

This is a reproduction of a library book that was digitized by Google as part of an ongoing effort to preserve the information in books and make it universally accessible.

<https://books.google.com>

about this book

This is a digital copy of a book that has been on the shelves of libraries before it was acquired by Google in

It was carefully scanned as part of a project to make the world's books available online.

The book has outlived copyright and can now be made available to the public. A book in the public domain is a book

which was never subject to copyright or whose copyright term has expired. Whether a book is publicly accessible can be

vary from country to country. Publicly accessible books are our gateway to the past and represent a historical, cultural

and scientific potential that is often difficult to discover.

Signs of use, notes, and other marginalia contained in the original volume are also found in this file - a reminder of the book's long journey from the publisher to a library and on to you.

Terms of Use

Google is proud to partner with libraries to digitize publicly available materials and make them widely available.

accessible. Publicly accessible books belong to the public, and we are only their guardians. Nevertheless, this

Work is costly. In order to continue to provide this resource, we have taken steps to prevent abuse by

commercial parties. This includes technical restrictions on automated queries.

We ask you to adhere to the following guidelines:

+ Use of the files for non-commercial purposes We have Google Book Search for end users and want you to

Use files only for personal, non-commercial purposes.

+ No automated queries Do not send automated queries of any kind to the Google system. If you are conducting research

about machine translation, optical character recognition or other areas where access to text in large quantities

useful, please contact us. We encourage the use of publicly available material for these purposes and can

may help.

+ Retaining Google brand elements The Google "watermark" that you will find in every file is important to inform about

this project and helps users find more material through Google Book Search. Please do not remove the watermark.

+ Stay within the legality Regardless of your intended use, you must be aware of your responsibility,

ensure that your use is legal. Do not assume that a book that in our opinion for users in the United States

is publicly accessible, is also publicly accessible to users in other countries. Whether a book is still subject to copyright is

varies from country to country. We cannot advise whether a particular use of a particular book is legally permissible

Do not assume that a book's appearance in Google Book Search means that it is available in any form and everywhere on the

world. A copyright infringement can have serious consequences have.

About Google Book Search

Google's mission is to organize the world's information and make it universally usable and accessible. Google

Book Search helps readers discover the world's books and supports
Authors and publishers to reach new target groups.

The entire book text can be found online at <http://books.google.com>
search.

3u

Real and honest German Mr..

To you I raise my voice from the desert , which

System you may belong to! Basically strive

we all only seek one thing, and if the holy

Word is in danger , to become a mockery of the unclean ,

so there must be no discord of opinion among the BB.. and

of the will. What the great world destroyer has done,

to profane the KK is still quite alive to all of us

in memory ! Just as he degraded the princes,

in order to overthrow them all the more easily and safely, just as

he also devalued everything noble and worthy , because yhis

Work could only flourish in iniquity. The Ver:

validity has seized him, and not given over to death:

who would have reconciled many with him but who

cowardly disgrace , so that faith in him never again

But the bad , which is located under

his rule so powerfully raised , is not to be with him

has fallen immediately; rather, it has only risen to its peak

Even earlier, Judaism had been part of the Catholic Church

found entrance, *) the Corsican also led us the Jews

to , and delivered to them the vessels of the temple.

*) Will R. , from Or." , and whoever knows the sh.". R... will understand me.

4

To complete the mischief, almost everywhere

the much distorted French Freemasonry was introduced;

some German ŷŷ fled under the gunfire of the

great Or.. of France , who is under the wing of

Cambaceres and Joseph Buonaparte his light-shy doctors

The 4 higher Gr.. spread quite

general, and R+chapters were everywhere in German:

country , along with other poisonous plants. Savary vol:

in this way he carried out his political: military espionage:

system into which gamblers, whores and Jews so excellently

fit. Some German 00 , who are guilty of the crime

resisted , were on the orders of French agents

closed , and wickedness celebrated its triumph ,

for all her powers now seemed to be at her service.

The Jews soon realized that the KK was a worthy

means to firmly establish their own esoteric empire.

The golden key to which keen hearts and ears

open, had long been tested in her skilful hands ;

At the same time they gained a solid base for their efforts:

drives, a thousand new connections opened up to them, the

They were met with the trust of unsuspecting people, and they

saw themselves in the possession of a secure central point

Communications and observations.

The danger from this side is not only
of our Order, it threatens the States in general, and therefore
I would like to raise my voice so powerfully , with it
even the laziest person would be awakened from his slumber.

5

Facts speak loudest! I lead first
some general , here are some special ones.
Jews are Rosicrucians. They swear by
the Gospel, they bow before the cross, they carry
the garment of the church , yhe celebrate , with Christians, that
Meal of redemption and remain Jews!!!

Is this a wicked mockery? Are they playing a comedy,
to make fun of the mysteries of Christianity
make ?

Or are they serious? Have they stopped being Jews?

I would like to believe that some of them
the one that is in the 3 symbolic Gr.. from Tubalcain,
of Solomon's Temple, of the two pillars, of Hiram
etc. occurs , take literally , and in it the
promised return of a universal Jewish kingdom
look; only in the higher gr... would such a Deu:

tion would hardly be possible for the most die-hard Ifraelite.

Not just Christianity , but also the ecclesiastical
Priesthood is too visible in it , and if
the Jews in the system of N: 4: to which there
usual rite, they can certainly

only for show. Such mummary allows

them also their law , and the Talmud says this:

expressly in the explanation of the words : " Against the Pure

be pure , and against the wrong one! "

But if the religious opinion of the Jews were also

Point (like most others) less ambiguous

6

and lenient, they would hardly be able to

strict observance of a sentence, the violation of which

tion must be so beneficial to them! Through the R+

Gr.. they come into higher connections; this Gr..

is often the leash in the hands of unknown superiors,

which either consist of sneaking proselytes, or

from cheating and cheated alchemists, or from

political faction leaders, and with the Israelites

more or less related.

The Jew derives even greater profit from a

peculiar institution of Rosicrucianism. Three R: +:

may create a bricklayer , and have the right to

Masonic secrets, except the ÿÿ and with hint:

regarding the rite, to communicate as desired. The Jews,

which are R+ , can therefore be found in the stand , the for:

melle My.. for the air of their hearts among their fellow believers

for money and other purposes, and in our

Order to insert so much rabble , than good for them

*) The disadvantages that result from this are not only

firm Institute and the reputation of true Masons, but the
Humanity ever grown , are not to be calculated.

I will just point out some of them:

1. The Jewish Kabbalah , which for religion and morals

ity is just as destructive , than the tasteless

and nefarious writings of the Rabbis, has a deep,

*) I am R: †: but no oath binds me to this degree , and in general

the mason is only bound by law and truth!

inner connection with the alchemical rose crosses:

rey , and with the bleak teachings of materialism, so

as on the other side , with a certain mystique:

mus (which can most aptly be called the mystifying

could), and the Jews receive through the My..., as

below from a new , and striking example

will illuminate , only too easy opportunity to use their cabalistic

To amalgamate teachings with the symbols of our Order,

and thereby undermine their foundations,

those who are used to , even the holiest things in the common

a circle of greedy life.

2. The jŷŷ give them the opportunity to use their trained

to apply bribery system on a much larger scale ,

and to confuse a hundred peaceful relationships.

3. Napoleon is isolated on a rock in the world:

sea, but his name still has , like magic, on

Hundreds of thousands whom he enriched by plundering the earth,

and in the hands of his confidants lie the strings

a connection that extends not only through France,
but also about Germany , Italy , Spain , the
Netherlands 2. widespread , and their striving for nothing
lesser is directed , than to a general world:
revolution.

How worrying must the intervention of the Jews in
Masonic connections appear , when considering
what active share this people has in the crimes
the French Revolution and the Corfi Usurper

8th

taken how firmly it believes in a future
Jewish world domination, and what influence the
Jewish gold unfortunately! has on so many civil servants?

The My.. is a league of the noble and better , the
escape from time , to be above it
Judaism, however, forms a caste that is
hostile to the entire human race , and
the God of Israel has only a chosen people ,
to whom the other nations are given under the footstool
should be.

How can Judaism and Mysticism coexist
exist? The dead metal next to the living light?
The pure robe of the initiate next to the dirty
Hager : and changer table ? The earthward facing
Meaning, besides the pious gaze towards the afterlife?
Hate, next to love?

I come to the individual facts , whereby the

everything stated so far receives its full confirmation.

In 1807, in Frankfurt am Main, under

the shot of the then French: primatic direction

ration, a so-called , which has its constitution

from the great Or... in Paris, and the meaningful

Names for the dawn (l'aurore

naissante). The Jews, who had this secret

Klubb initially went out, wanted without doubt through those

Indicate naming , that the day of their salvation has appeared

fey. But the young dawn was basically nothing

9

further than a police lantern, because part of the

General:Police personnel were at the peak of

new guild, which by the way had no objection ,

fine Israelite children the Ark of the New Bun:

of unlocking , and to break bread with them

and drink the cup. The great Or...

in Paris have every reason to be impressed by the docility and

to be satisfied with the daughter's goodwill, and

when Napoleon Almighty several German ŷŷ

closed , This Frankfurter remained in quiet possession

of his trust.

In 1812, Br.. G....P..... found it

advised to descend from the master's chair, but pushed

a teacher at the Jewish Philanthropin , to his

Job.

After the Corsican world ruler and his

Believers so unfortunate battle at Waterloo

the circumcised children of the dawn in no small

Embarrassment. In the French Orient, the sun no longer wanted

to shine , and in the fear of his heart the BBr...

the holy word is lost. The sovereign princes (man

knows this designation of the R: +:) came together, and

held council, and it was decided to add the voice of one

certain Hirschfeld. This Hirschfeld is

a soul brother M..... s (who collides with each other:

the apartments broke through , about every moment

to be able to sit at the feet of the master) by the way

10

but a rather mysterious being. He calls himself a

Patriarchs (in the Old Testament sense?) and seems

to have gone to school with Cagliostro. In the year

In 1796 he gave (in company with his deceased brother

the) published a paper entitled : " Biblical

Organon, or real view of the Bible, with a mystical

accompaniment and critical comments. " This

Book is a strange mixture of rabbinism ,

Pantheism and Christianity , but this is precisely why

luring bait for Masonic enthusiasts. In the

Overlooked letters sent to a German

Prince (?) the author, despite all his cunning and

Maliciousness quite simply , and who especially the third letter
reads with attention , it must be clear , that here,
under the mask of Christianity, the most impure of Judaism
thum is hidden. Such a contradiction
between reason and revelation, as he claims there
becomes , Christianity knows nothing , and still unwritten:
ner and unphilosophical at the same time is the opinion of the
Author. , that no cult corresponds to any rational idea
che; by the way, the Patriarch reveals in this very letter
the gross ignorance, in that even the difference
between reason and understanding remained alien, but very
He skillfully knows how to fool the unsuspecting, less perceptive reader
from the labyrinth of confusing concepts into the area of
Mysticism. But that this Ors
ganon , just as the patriarchy of Hirschfeld on
11

a secret Jewish association , which
mainly the My.. seeks to take control , is made from
become clear from the following.

Hirschfeld had quick advice for the needs of his

B.Br.. , He turned the Rosicrucians into Templars and
consecrated them to Nittern of the triple cross , namely
of the red (which the superiors of Clermont in Auvergne
wear), the white , which of the English , and the
green , which is the emblem of the Flemish tongue;
At the same time he sent a deputation (be:

frehnd from the imaginary M.....r and a M.....t

B..) to Schleswig , to Prince Carl von Hess

sen to obtain from him a constitution (or rather

a documentary confirmation of the adopted Templar

systems).

.....

This prince , in whose name the fame mi:

military talents and other excellent qualities

Hirschfeld has (at least he assures us)

through the Biblical Organon to a friend and defender

won , and he also receives an annual salary from him.

You can see from this , that the activity of the

Mask of the Christian Mysticism Working Jewish League

has already had great success. Incidentally, it is hard to

think of something funnier , as the Jew in armor,

with the cross on his chest , and the mighty Saras

cen sword in hand , as he now swears , and

receives the consecration! How would Hugs von Payen

12

be amazed when he suddenly finds himself among these garlic;

knight would see, and what a cry of screech would that

Raise rabble , when suddenly the shining heroes:

figure would arise in their midst? But the matter has

also a very serious side.

The new Templar system of the Frankfurt Jews

is clearly connected with those in the Biblical Organon:

spoken views , as with some phenomena

in the My.. , together. The Knights of the Triple

Cross is to remind God of the unbelievers (the Jews

find all non-Jews unbelievers) and the law

of the Lord ; the price of their work:

to work is (for each knight) a piece of the land of the

Unbelievers, and their watchword: God wills it!

They swear blind obedience to their superiors (in

Auvergne ?) and must always have their loins girded

have , ie prepared for the journey to the Promised Land

be.

Do these Templars come from Clermont, in Auvergne?

Why not from Jerusalem?

Simeon the Patriarch and Peter the Hermit play

in the history of these Templar Knights the main role.

Why is Hugo's not remembered, and Jakob Molay's

not ?

Why is there no such thing in this new Templar Order?

Trace of the symbols and ritual of the true

and right Templars? Why is the cross threefold?

13

Why is the meaningful "In hoc signo vinces" missing?

Undisputedly, Patriarch Hirschfeld has this Templar:

order of Clermont itself, and he also lives

no penalty for the form , the spirit and being

of the old , purely Masonic Templar system. Here is

again hidden Judaism, because only Judaism

has a God whom his followers must praise , only

The Jews are the possessions of the unbelievers:

be called , as their rightful inheritance. *)

What I say about the Templars is not mere courage

I know the real and right institute , but

It is little known, and its constitution is still

the false BBr hungry for bookseller's wages."

escaped.

From what has been said so far, the following is undeniable

highlights:

1. There is a secret association in Germany

with Masonic forms , which under unknown superiors

and strives for non-Masonic purposes.

2. The members of this association are mostly

Jews; they work in degrees and systems which

*) I refer the BB.. to the recently published publication: The Jews

and Judaism as they are, presented from their own writings

ten as the declared enemies of Christianity and pure morality

ibility , their history , their writings and experience

recognized as open and secret disruptors of civil and moral

Prosperity of written states, Cologne on the Rhine, by Peter. 1816.

14

only appear to be Christian rites and Christian

have symbols.

3. The Jews need Christianity either

for mockery, or to cover secret intentions and

Activities.

4. The Templars of Clermont , like the Patriarch

Hirschfeld has constituted it , are definitely not outlaws

and true mason, no true mason will call them

Recognize brothers , and their land and facilities

gen are the written religion and thus the Freemason

rerey just as it endangers the states themselves

are ly.

5. To all honest Masons and all governments

must be concerned that the Jewsŷŷ stop ,

and made impossible for them , the cult of

Christians and the Masonic institutions elsewhere?

purposes.

BBr.. of our ancient, venerable order , which since

has braved so many storms over the centuries, against the

only the wicked work and the weak, the

but will exist , because it is founded on the pure

Christianity and the eternal purposes of humanity;

Do not ignore my warning in these troubling times.

There is no question of ridiculous slanders,

in which only stupidity still believes, but by

a cheeky , outrageous fraud that misses the most sacred:

The honour of the Order is also our honour, and

15

This requires us to act manfully against the dangers

that threaten us , and solemnly protect ourselves against the

malicious imitation of our name and our customs.

The wicked no longer creep in darkness , they kick

as if they were our BBr... and boast about the

Shoes and the Cooperative of German Princes. Our

Silence would be recognition, and in this case

The Jews' games with the cross could soon

renew the accusations against all Masons , which

previously brought against the Knights Templar.

This is a common concern:

ity of all German ŷŷ , ŷhe may in this or that

System work , for everyone must have it from the highest

It is important that nothing be a burden on the Order itself

The governments under whose eyes we work,

must experience , that this Jewish mischief is nothing less:

ger than M.. is , and the true mason no longer knows

respects , as a deceptive illusion. In the storms of

In these terribly turbulent times, the loyal, strong civic spirit

of the German masons have proved themselves brilliantly everywhere, ŷtill the

Strength with loyalty in alliance, and so the

Trust and respect of the monarchs and the greatest,

Part of the nation newly won: we want both first

strive to keep, show our lives to our detractors, and

smile at the mob that calls us shy of the light, while

our gaze is constantly directed towards the East.

But the wrong education and the beautiful
Influence of the Jews on other peoples, among whom fie woh ≠
not from pressure, but from causes:
that are in them and their constitution proves this
Example of Spain and Poland. They enjoyed in Spain
during the Middle Ages the great privileges, and soon
were all money transactions in their hands: they were them
Financier the King and the Great: the people rose
the most terrible thing: they even had the right, La ?? n ≠
to acquire and occupy: fie have this plan?
quite also used: but the fields were used by Christians ≠
who not only pressed and pressed on the outermost dru,
but with the products themselves drove a uscherli ≠
trade. For this reason and not just from Fattas
tism developed such a general scream in Spain,
that can finally only be satisfied by their total exile
could). In Poland, the Jews soon appear after the
Introduction of Christianity immigrated to seyn: already
in 1264 Duke Boleslav gave them great privileges,
who confirmed Casimir the Great around 1341,
according to legend, out of love for the beautiful Esther, a Ju ?? din:
apparently for other reasons. One hoped na
by the Jews the lack of a third status, which is –
to replace sta ?? dtische trades. How for this
tion is to be seen: the same ver?
ha ?? ltnis emerged as in Spain; fie became the main ≠
inhabited the Sta ?? dte, and so did all the trades,
that no Christian could come up next to them: they did
an own political connection, that of their elders
and rabbis were ruled; all Jews in Poland were

divided into certain provinces: they kept proper land =
days and sent deputies to Warsaw from their midst:
they chose a marshal of their own for 6 years and though
the last king of Poland the public constitution
picked up, so it continued in secret. With big

Mr. Etatsrath Moldenhawer in Copenhagen, whose
treasure treatise on the influence of the Jews on the walk

nien this essay beygefu ?? gt ift, also has a representation
the same approved righteous who wrote

in the treatises of the Copenhagen Academy of the Wif
properties printed ift; it was impossible for me to be the origi =
nal quickly enough to be able to

to use. The following excerpt from a in

Germany can certainly little known Spanish essay
to some extent replace this deficiency: it is under the
Title: Discurso sobre el estado de los Judios en España
as an attachment behind: El ordenamiento de leyes que D, Al-
fonso XI. hizo en las cortes de Alcala de Henares el
año 1546. Publicanto-los doctores D. Ignacio Jordan
de Allo y del Rio y D. Miguel de Manuel y Rodriguez,

Madrid 1774, Fol, ©. 143 - 158. The treatise iff

very thorough and taught and with all the necessary
la ?? gen long: for my purpose it will be sufficient,
to give the results in a traditional excerpt,

The Jews were early in Spain and had themselves
very increased: the mistakes, be in all honesty
hated were also the cause that the conci -

lien and the Reichstag at the time of the Gothen very afterdru ?? ck =

precautions taken against them. This series of

Regulations have the commendable purpose, every connection Ami: to cut off Jews and Chriften: with the same intention is ordered that the Jews in separate quarters, surrounded by a wall, should live under knows the name Judenstadt; but it seems that this Separation could not be observed in small communities. The Jews would have been happier and less different have been followed when dealing with the trade that you The main trade, begun ?? gt, was not a part of the unrest taken from the empire and abstained from all practices who were dangerous to the well-being and calm of the Roich were. That's why you were often about to do it entirely to drive the country away, but they knew how to assert themselves: it is not unlikely that they will be at the idea and the

Victory of the Arabs have not a few antheil. The Lord = the Arabs' real deprivation, veswe =

against the Jews fo came up powerfully: the Spaniards did no other goal than to regain their freedom = Ness; the Jews meanwhile lay down on science; and on trade, they gained great insight into the same and especially as skillful arithmetic masters soon indispensable for the common finances, Ip vers groan fie in the eyes of the Spaniards of their faith

were also. They were usually doctors, pharmacies –

ker, treasurer and steward at the royal Courtyard and with the big ones, and had the opportunity

to acquire the greatest favor and great trust. Already

in 1367 the states of Burgos provided the Ko ?? nige before that the evils, of which the land at the bu ?? rger – unrest, through the Rathschla ?? ge the Jews, and asked that in the future all Jewish Officials want to be removed: but they and Abu had: no success. The administration of ko ?? – The only income was in their hands and they were – judged or administered them; often they were over the

most screaming lower loops. But they did
needed: fie received all kinds of privileges and
Rewards: the doctor of Ko ?? nig's Alfonso XI. was at the same time

Zollpachter and Mu ?? nzdirector. The blackmail and plaque =
that they allowed themselves excited a general one

Unwilling: many residents had to leave their homes:

i

loud and soothing were the complaints from all sides
erto ?? ten. „ The peak of their power and influence et
were enough under the son of Alfonso's Pedro, at whom bet
Jew Samuel Levi trusted minister and everything related =
the Gu ?? nstling was: there is an old poem from the
Late 14th century, in which the people's need
and the influence of the D. Abram and D. Samuel, with
their honey-sweet words the Ko ?? nig chatted, naive and
are shown. CEU. LN
Since 1412, their reputation has decreased allma ?? hlig and

it was forbidden that in the future the administration of ko ?? nig =

take over or any public office
clot: they should, in order to see the first sight =
to become known, wear special clothes. E: fam
on a formal dispute: it wrote against fie der Licen =
ziat D. Marcos Rodriguez: the Jews defended fid) in
a scripture that was handed over to the king: fie awahn =
of the many Jews in different places and high

the lease years consumed the farmer's marrow and nothing
further than the du ?? rre body was u ?? brig. " |

We now go back to Mr. Ru ?? h's own script.
He shows how this badness of the whole Jewish system in
the bourgeois and religious procurement of the Jews lies,
for what apart from the lumbar commandments of their Cerimonial Law
offer three moments as the most important.

1. The strictly aristocratic constitution and power
the rabbi. „ The Geidadel is among the Jews themselves
far less respected than the knowledge of the fratzen and
mindless kind of scholarship in which the rabbis their
mental powers and spoiled. “ – Every freye Ent –
winding becomes impossible as long as this power of the rabbis
exists. “

a. Herewith the belief that the Jews
are the first and foremost people of God, who once
the whole earth will be subjugated. Noticeable evidence –
sung about the resulting arrogance of the Jews;
gutmu ?? thige Prahlereyen by Moses Mendelssohn, very funny
by Moses Hirschel and the most fun of Saul Ascher.

3rd. All work appears to the Jews as a punishment. Field =
construction is declared a contemptible trade in the Talmud and
Cattle breeding viewed as a rejected business, life
type of a ra ?? ubers.

Mr. Ru ?? hs now comes out on the ala
Information on how to protect the rights of the Jews for the Zus

c – "w" –

–

It is said that this author influences the Jews on

our civil life cannot be found without nightly help! He goes
now on suggestions for Abhü ?? lfe Aber. Before we fom:
men, we still want a lot in view of our own
(add if, |

Prussian scholars in particular have been around for about 40 years

fer to make the fu ?? rspeakers of the Jews starting against

the reluctance that persecutes them among the people. Some were
driven by friendship against individual nobles from the –
sem people; others through zeal for enlightenment and against
limited liability for individual positive forms of religion,
still others by the fact that fle of individual realms among the
Jews had become abha ?? ngig. But the mind was this
whole dispute a cosmopolitan of general people –
love that sees the same brother in every person.

But just for this last so sublime drive is here

always only by misunderstandings, whose
we must first.

The first is based on prejudice, in the Middle Ages and
afterwards the Jews also sow us with blind rage and

10 Ru ?? hs about the claim d. Jews to d. Deuts. Civil rights:

unjust religious zeal has been persecuted. Mr.
Ru ?? h's irrefutably refuted. According to the raw customs
the previous time one was happy to be against the Ju –
the superimposed Abergla ?? ubian conceptions and with
Cruelty changed. They almost always have the fu ?? rsten
very eager, the cruelty came from the people
but not in deep reason by hatred of Un:
chrieten, but by hatred of the life of fraud

prompted the creeping Tro ?? dler and Volksausplu ?? nderer. –

The Meynung, the Jus, then came from this prejudice
the seyen bey us bu ?? rgend too much, ga ?? be man
more civil rights for them, so they would ennoble. Ru ?? hs
shows from history clear of the sun, the opposite in and

except Germany, they had Freysta ?? tten, where they had all rights

enjoyed, yes La ?? nder, where they ruled – but their dirt,
their shyness to work, their anger at pretending trade remained
always the same. They pull fid) back from the hardworking trade;
not because you prevent fle from taking it, but because fie
don't want it. SONY

The second prejudice is of a kind by which bet
human mind easily tapped into the most important things
will. You confuse an abstract general expression
with the reality of the individual. So here are the Jews

with Judaism, Judaism. Not

the Jews, our Bru ?? dern, but the Jews

Yes, even apart from the formation of the mind, it must be for the Jews of the greatest importance, Judaism to end soon. Just think of your fate – sal in Spain, as it became a pleasure for all people there, to see thousands of them burn at the stake, how she gathers the government there for her own good and especially had to hunt out into the country. And how similar to = things bey us. Ask a man in front of a man around, whether not every farmer, every citizen fie as the people spoilers and brothe thieves hates and verfiudr. Only their so ?? ld = ner and some students who don't know life, can speak against it. Without a cruiser, work is worth it to have delivered are the rich among them their Bettelsa ?? cke filled with millions, which the chess devil yours Christian sweat and work stolen and together there = have breathed. This mischief cannot be without terrible Violence comes to an end if our governments don't control the evil quickly and with high force.

The Germans cannot forget that many their brothers who went out to defend their fatherland, fell ill that so many villages from the starved

Co – =

12 Ru ?? hs about bic Anspr. b. Jews to d. Deuts. Civil rights.

Heeren was devastated because the delivery Jews were vain For the sake of profit, put stakes in the deliveries. The Germans will not forget that if they have these Jews as it were as their masters with the gold and silverware see the blood of their brothers sticking to! Like what to help there?

We want to nas the nature of Judaism to develop fox.

The Society of Jews united four very well different elements. The Jews na ?? are 1. a separate one Nation, 2. a political connection, 3. a religious party, 4. a broker and tro ?? dler caste. Each of these Elements require its own judgment, the association but everyone wants to pay special attention to tegn. |

Your nationalitát for fid) only denotes your physical Origin of one people. Here is the most beautiful for them to be decided. Not a justice lover Man becomes the former sentence that the black one Color slave color fey, or bey any similar

want to stay. In every educated state, every one – born, he likes his origin after Saxon, turning or Jew seyn, the same rights of the free man, the same Protection and the same right of citizens. But mind you, we will not give anyone these rights of the natives – may admit if he does not have all the obligations of the state of the happy man and the Bürger to the full extent ready to meet it. We are already here, apart from of religion, state and commerce, of mere descent after, the first big mistake of Judaism. They exist for millennia between all other peoples of the earth who are only so far cultivated that you can be them through Schacher can only get rich if they only hey = advise and keep their breed clean in this way. May now probably an educated and cautious government at all engage in any such class of metoics, who has the cricket, physical separation from the tab; to make their natives the principle of access equip? Rec. very much doubts whether this will ever be healthy

Rühs about the claim d. Inden an d. Deuts, civil rights. 13

political principles unite 'offe, and thinks every Nation should take care of this kind of disorder where they once torn, as far as possible to eliminate. .

We are now talking about the Jews as Religion spars they. The Jews prefer to let themselves be Bürger des call mosaic belief, make this matter of religion The main thing and then focus on tolerance and tolerance wisdom to share their claims to equal rights to use other religious parties. Alone we say with the excellent pitcher: we wish to be all my tolerance in Christianity for every positive religious form of the union, which is only with the legal purpose of the burgers association – and, we add, with the moral education of the people. Now after this only principle of an educated policy the Jewish To tolerate religion or not? We have to answer: they should not be tolerated from three reasons, 1st because already according to the Mosaic teaching of Jehovah a mere Nationalal god of the Indians; fie find only the people of God, all on – those Völker are mere Goim and not their like; 2. because the Jews do not teach according to the Mosaic teaching and live, but after the Talmud; 3. because their alleged Religion. not just positive religious form iff, we are talking about inseparably overgrown with a theocratic constitution.

The pre-judgment of seeing only the people of God, makes it impossible to share such a theocratic religion

to unite the true legal purpose of the state, since such

vt One has probably entered here to defend the Jews –
throw whether it is not so good among Christians –
beating shopkeepers, Tro ?? dler and suppliers. The only one
Throw-in does not apply, because part of the fact is incorrect,
that corruption of the rural people and the indebtedness of the
rich youth are almost the only Jewish work; part what that
most important is that the individual crimes are the act
not as pernicious as the continued one
Do this in a closed society. |

Unfortunately, it is true that many „ Reichshümer of the
Christians have been brought together by Jewish trade,
but every Christian who acts in this way does it against him
Conscience, or as a Jewish depraved ejection of the chrifts
society. The Jew, on the other hand, not only allows
fine religion the shamefulness, but fie still praises him
about their success. So your society is a real Be –
schu ?? tzerin this fraud, which never died out before its destruction
the bourgeois life will be suppressed.

From what has been said so far, it is clear that from the
Follow the nature of Jewish society and go through history
be confirmed: the Jews must be completely un –
remain in their contradictory state if
they did not step out of Judaism.

So it becomes infinitely important that our people from this

we then at the cultural history of podiums or at Spain
lose weight.
So what should we wish that bad governments
in ERR = of Judaism have mo ?? gen? !
We have to wish for their most possible reduction.
Some general obligations are therefore easy to specify.
Any immigration of Jews is prohibited, the emigration –
be favored as far as possible. Your Heyrathsfpheite foll
be screwed on even more than the Christians. From the country
should be completely suppressed because their influence there
is pernicious too quickly, only in cities should fie
find protection under very specific restrictions. This
the last provisions could, however, be happy after several years
ren for those who order the field themselves or a proper one
want to do productive work, which is in fact from
the Tro ?? dlerkaste found to be lifted. That should
be provided as far as possible that no Christian in personal
Abha ?? ngigkeit of Jews ka ?? me. It should be prohibited,
that a Christian would somehow become Jews, not even as

Sabbathsknecht; may TIA only old regulations too great

. The damage to their religious doctrine for fic) alone Misit will soon be lifted through their better education, because only one truth lives in the spirit of man Morality and piety. There is a here and there made a great start, but everywhere there is still a lot, most of them u ?? brig. They therefore want to be geno ?? thig, to send their children to public written schools; their rabbis should only see religious teachers, hence like that of all other religious parties in high schools classis (search for education; also in an exam before christening and before a fie cine apprenticeship, geno ?? thigt seyn, to publicly declare that they are the infamia of the valley don't attach muds, fondle a reasonable moral of the want to teach and general love of whiteness.

3rd. The state only created the Jews as Nelis gionsparthey but absolutely not as a political association; he does not respect their rabbi in any way; allow they have no kind of bourgeois social forms (such as. B. own Courts), but forbid them any such encounter

among the most severe punishments. However, it would be very good: |. if you, as long as the spiritual required under 2

Anna ?? herung to us not generally far from among them ru ?? ckt iff, like you turnip anr  th, according to old custom another badge in clothing.

4th. The most dangerous thing was their connection to the Hank

22 R  hs on the claim b. Jews on d. Dent civil rights.

delskaste, against these are bans of the type just mentioned fruit nothing, sta ?? rker must be taken here, but It's hard to guess here if you don't have very hard Fords wants to do.

* There are two main views next to each other. To one sees the German people as a Christian one, makes Christianity the state religion, and then says along Ru ?? hs: the Jews cannot go to Germany other relationships than that of a tolerated one People; they are seen as a umbrella and fellow protectors, and the demand to grant them the same right of citizens, which appeared as resolute nonsense in earlier times would have to remain rejected. So you should be a better one pay certain protection money, certain restrictive laws remain subject to the defense of the fatherland

don't take a part.

According to the other view, Pen's marine becomes the basis which no positive state religion to the law at all makes, but then through the prince led up to the jug zip of tolerance stated that but no one at all Protection and peace of our states should retain the is not suitable to receive full civil rights.

We declare ourselves to be the second view. The first old herko ?? mmliche entha ?? lt na ?? lich in their premise one Race in the people who never reach full rights an injustice, the dire consequences of which here would fall back on the apparently bar-minded Christians. The thereby justified diminished civil honor of the Jews would be a very future gift for them of dishonorability, of which they always deal with great Have served advantage. That's why they had Chris Gen forbidden most harmful usury especially under protection the archbishop allowed. Just fo bey us. In Wu ?? rtemberg = (the must Christian separatists under the threat of ko ?? rper – visit the churches with punishment; the Jews, however, you lock themselves in their synagogues and supposedly in them scream to their private god that he will destroy us Christians and give them the earth as their inheritance. Evening there the terrible regulations of the concept drove the only son, the Erna ?? hrer, the only stu ?? tze of the family in the war, and a whole Jewish community next to it was found with a few a hundred guilders frey, to an unimpeded increase in be – deceptive dealers.

Rahs complains against it, according to Friedrich des Great law in every city a maximum of ju ?? discher Schu ?? tz – to impose a general ban on immigration;

–

To the governments and peoples of the
Judaism endangered Christian states!

As in the past centuries, the culture, civilization, prosperity and the future of European Christian peoples alternately the Arabs, the Tatars and threatened the Turks, – peoples of foreign races and Religion, whose attacks and onslaught are the weapons of European Christian peoples victoriously struck back at the time: in our day another foreign race threatens culture, civilization, prosperity and the future of European Christian peoples; a foreign race that is no less dangerous, yes with regard to their means and goals, probably is even more dangerous than those aggressive elements of the people. And this strange race is the Jewish race.

The right instinct of the European Christian peoples has this sworn, natural enemy up to the kept in check at the latest times, the hereditary enemy, the opposite restrictive legislative orders are only half Maass rules and inadequate protective weapons of the Christian Peoples have proven.

However, this condition has changed since the beginning of the current century, in the individual European countries gradually changed radically.

The ideas of the French Revolution that won: freedom, equality and fraternity also have before the Jewish race tore down the barriers to protection of the Christian peoples.

The principle of freedom was also applied to that race turns, their first and highest senses and aspirations everywhere

Ä 1

<http://idigital.slub-dresden.de/ppn320843882/3> *

2nd

consists of the other peoples through refinement of all kinds to strike in moral and material slave chains there according to their religious and national traditions all of these Peoples are only created to serve it.

The principle of equality was also applied to that race who does not want to be the same with us, for one privileged people by God, but the rest of people for lower beings, considered impure animals.

The principle of fraternity was also applied to that race applied to us non-Jews not even for their neighbors, recognized for their fellow human beings, and after their Talmud the Gentiles are certain enemies to be exterminated deceive, steal, squeeze into the abyss of ruin to push against the wrong swear, to dishonor them, yes to murder before their god is a pleasant act.

No wonder if modern liberalism is with the interests of pre-victional Judaism identified more, towards the Jews to a pseudo-life designed and in the hands of the Jews was a convenient means of verifying their plans for world domination

real and to chain the European peoples.

The Jews are too unrestricted rulers of the money market; they dominate the stock exchanges where they meet the prices of the Money and monetary value, raw products and industrial Determine items at will; and by this it is they who about the capitalist's wallet, about the fruit of the Weld the farmer and the trader.

They control the banks and the financial institutions in general; and by this they are the creators of the fictitious values that Man of credit and money turnover, whose channels they follow open up to your own fellow tribesmen and block from the non-Jews who are not comfortable with them.

The natural consequence of this monopolization of the money market is that the farmer, the large landowner, the manufacturer, the Craftsman, the merchant u. s. w. in material dependence advised by the Jews; and because in this way their existence was determined by the arbitrariness of the Jews, so they had to their obedient servants, become their abductors. Mieser adds that the Jews at the banks railways, insurance companies and. s. w. in public life employ influential men in richly doped centers,

*

**

and those endured in such a way, as it were Jewish Fiefdoms are in legislation and government circles the most serviceable and most important pillars of the Jewish power.

The top of this national economic and financial pyramid forms the Rothschild's „ dynasty “, which became the banker of the

has always become countries in need of credit, without their

mood can hardly be waged today; and if a war is waged, it is only a new one opportunity to add billions more increase and the capital of the European peoples – itself by exploiting the national misfortune of the same – in the Hands of the „ dynasty “ and the Jewish race to be able to center.

By those who gnaw at the mark of the peoples and by the Jewish money powers continually increased monstrous state

The governments of individual indebted states
to mere Jewish agencies, to Jewish money collection
Organs sunk. Hence the absolute inactivity of this
Governments on the Jewish question, yes their hostile
hold against their own peoples in the interest of Judaism.

Judaism has succeeded in
to get some of the press directly into their hands,
partly to influence itself indirectly so that up to the
has hardly existed in Central Europe at the latest,
that the truth should be spoken to Judaism
would have dared.

So the Jews are too vague bidders, too
become a part of public opinion. Each against them
the complaint, however well founded, is suppressed, everyone who
Apparently, even remotely touching Jewish rule
Article set aside. They give praise and blame
Living and dead, about princes, statesmen, civil servants
taught, artists u. s. w., even about the private life of the
to be able to. The advancement of those working in public life
Men and the recognition and reward of their merits
is due to the weight of the Jewish press, therefore must
everyone who aims at any public career
wants to get, according to the favor of the Jewish press and thus also
hail according to the favor of the Juleuschaft.

The consequence of this state is that intellectual slavery
and the moral prevailing over Judaism

4th

Cowardice, one of the most characteristic features of our time
forms. Emerging young cribs are about their future,
elderly men who have earned a name are around their
Past and concerned about their call for their death, and
so that they can insure all of this with the help of the Jewish press,
they become traffickers of Jewish power
they to betray their own nation and race and thus theirs
own blood relatives.

The Jews have distorted lodge life in many countries,
stripped of its nature and the same as one of the most dangerous
and most successful means of Jewish power humiliated.

Mainly through the press, the Jewish
increasingly the Christian religion, which nevertheless leads to a special
cifish race religion of the European-Aryan peoples
and whose magic circles are not a single European-Aryan
People have been able to withdraw. This testifies to the story of

15 centuries, all the time in the circle of European-Aryan peoples not a single new religion has been able to escape, the basis of which is not the gelium Christi.

It was Christianity that was the European Aryan race on the one hand from moral bankrupt and the social dissolution, but on the other hand by the semi-wild Barbarism saved and regenerated the same by civilization, the culture of the European-Aryan race on firm religious laid the racial and social foundations.

The Christian religion is the most powerful reaction against the Jewish world domination tendencies, an insurmountable protest against the exaltation of the Semitic over the Aryan Human race, and so it is only too natural that the Jewish a sworn mortal enemy of both the founder of this Religion, as well as the Christian religion itself.

Now that Judaism is superiority and master can only then firmly establish its Semitic Race, if he has succeeded in to defeat the reaction and the institution of the Christian to destroy them: Christianity forms the first and main target of his attacks.

Because the Jewish people have their ancient nomadic nature Is essentially kept to this day the concept of the fatherland unknown. Known as a cosmopolitan

5

the Jew on the principle: Ubi bene, ibi patria. The Jew can therefore not be a patriot with love, devotion and self: sacrifice on the floor on which he was born and the built this floor in the sweat of his face. If every now and then the Jew also practices agriculture, that's the way it is nothing other than a predatory economy, which the forests devastated, the productive power of the soil exhausted and same in this way makes more and more sterile. Also built on he does not take the ground; for he himself takes plow, scythe and Don't pick up, yes, he doesn't even leave the floor like to be built on by others; he looks more at real estate only as a mortgage, the farmer only as one by usury exploiting slaves, whose hard work fruit him heard.

Legislation has freed the ground and the farmer made his own master by managed: and today after a few decades we are

that we the people of the new Jewish hearing
have to free what is worse than the old one; because the
Bauer is an unconditional committed to the Jewish growth
rers and Schankwirthes, who, by virtue of the licitation
right to drive away from the house and yard every hour and him
gathers his family can make him homeless.

This is one of the main causes of the increasingly massive
increasing emigration to America, causing the ground
by means of the Jewish usury and the Jewish drudgery
is deprived of its hardworking, hardworking natives, whose
Take a place now for unproductive chess Jews.

By the Talmud towards the Jews, non-Jews who
Exercise of any injustice and crime allowed
through the Jews the legal system and thus also the social
economic order threatened with overthrow. The crime statistics
proves that the Jews in the category of the condemned and
even more in the section of the accused with disproportionate
figures larger than the non-Jews. It succeeds
but a large number of the Jewish accused, in a row
the close cohesion of the Jews, partly with help from the wrong ones,
mostly Jewish witnesses, but partly by bribing the fun
organs to avoid judgment. There exist
whole well-organized Jewish bribes over the
freely available indebted officials and judges, and their

Threads and networks in some countries up to the highest
Government and judges are sufficient.

For this reason, a non-Jew can
about often not exercising his clearest right;
on the contrary, he is even at risk of being
Pages of bribed officials in association with the Jews often
his life as the target of chikanen and persecution
is made. It is one of the most characteristic Jewish

Tactics – and this explains most of their amazement values
Successes, – that they are the non-Jews who once made them theirs

Have chosen victims for fear of a possible
never let torsion out of its claws until this
either surrender to them, or materially and morally
Are basically directed. Now that the „ Al-
liance israélite universal “ „ All Israelites responsible for each other
are literal “, so consider the totality of Judaism
the private affairs of every single Jew, non-
Jews as their own business, and so see
the non-Jew who wants to assert his right ultimately

analyzes of the totality of Judaism.

In such a state, the non-Jews exist
To Jews who are guaranteed by constitution and law
did not provide legal equality in practice.

The international one that is already closely related
Jewish people have been constituted in Paris since 1860
ten „ Alliance israélite universal! an international leader
Main organ received, which is on the whole earth
owns. This supposedly mere charity association
has become more and more the character of a political association
settled with the governments of the individual states
maintains quasi-diplomatic cooling, even in 1873
around the Berlin Congress by its delegates
was re-examined.

This political universal Jewish covenant sets Judaism
in the stand, its entire international weight and its
entire international power against those on the part of non-Jews
on any point on earth
gripe, more correctly: justified self-defense action
to concentrate and each against the Jewish power
to punish unruly unruly so that it
the slave chains into which it is the European Christian

7

M

Peoples, mainly to beat in Central and Eastern Europe
understood to be able to close ever more firmly.

With such a worrying and constant pressure
the growing state of things, on the one hand in view of the big ones
Dangers with which the under international high command
standing Jewish race prosperity, calm, legal
security, culture, civilization and the future of
Christian peoples threatened to an ever increasing extent;
– on the other hand also in view of that irresponsible cold
Indifference with which many governments, on the part
of their peoples with Judaism led, unequal social
Watching self-defense struggles, even in some states
take sides for the Jews and their hands
deprive their own peoples of the means of self-protection by
they same in the Jewish question the freedom of the press, the association
and right of assembly and the right to freedom of speech
to take care of; – finally driven by the conviction,
that to take the initiative on this issue now

postponeable duty of self-preservation of Christian societies
is without nationality and denominational
divorced: – have been made up of several, due to Judaism in
exceptionally threatened states members of parliament,
Clergymen, officers, officials, lawyers, doctors, scholars, pro-
professors, artists, journalists, farmers, manufacturers, hand
workers, merchants and other friends of the thing dealing with
the theoretical study of the Jewish question for years
and at the same time this calamity from the practical
Know life in all its scope, – on the 11th and 12th. Sep-
September 1882 to Dresden to an international
Congress gathered in large numbers where they asked the Jewish question
made the subject of an in-depth discussion and
among other things, have decided as experts to the
Governments and peoples of the Christian
to appeal to the states.

To protect the interests of non-Jewish
company, first international congress
does not intend to anticipate the events regarding the
To set up a detailed program to solve the Jewish question.

Today's power of the Jewish race rests on much firmer ones
Basics, this parasite people has become our body
social and state life far too deeply

8th
eaten as that this first congress was deception
could indicate that his possible detailed propositions
already feasible today.

But we want about the ultimate purpose that the European
Peoples have to excel, come to terms today,
and for this reason, and further because it is a self-deception
is to be believed that the Jewish race with others, especially with
Christian peoples could ever be merged and assimilated
– this has never happened anywhere in 3000 years, –
Congress declares that the Jewish question alone
final in such a way and completely satisfactory
Can be solved in a way that at the time by the concerned
European countries bordered on the Arab, the Tatar
and the Turkish question has been listed.

Europe belongs to the Christian peoples, and
rum shouldn't be a test terrain for the rulers
lustful hostile, domineering, non-Christian
Serve folk elements.

That legal restrictions against the Jewish race
– and these –, however strict, are not the goal
lead, that gently proves the history of the past

Centuries. It would be Judaism by none
legal orders have been subject to permanent limits
that restrictive legal orders
after a few decades and the peoples
to force an ever repeated grueling struggle.

The Jewish emancipation, of which Europe
tenth the fusion of Judaism with the Christian
Expected peoples, made a complete fiasco
and only served to overpower every thinking head
testify that it is an absolute
is possible with the Judaism living in their circles
to be able to produce a modus vivendi.

By this first international anti-Jewish congress the
Details of the modalities for solving the Jewish question
because of the evolving events
he now only sees it as his task, getting started and that
Organization of social international self-government
to initiate defense.

And here we turn our appeal first
to the governments, but in the second row to the Christian ones

J
Peoples, to the Christian society of the Jewish European
states.

The governments, as those of Christian members
existing councilors of Christian rulers, we call for,
that they are the continuous and currently
same self-defense struggle of their peoples with the Jewish
thum, this your sworn enemy, no artificial ones
Put obstacles in the way of their peoples
on the Jewish question freedom of the press, the association and assembly
right to exercise and freedom of speech
on the contrary, as long as the provisions apply to the Jews
of common law and not the provisions of the state
right applied, their own people, which blood from
is her blood and flesh from her flesh, in this
support statutory self-defense struggles
like. But they may also strive through that
Indulge a more correct financial and government debt
System and a more correct economic
Systems themselves, their state and their peoples from the Dik-
nature of the Jewish money powers and thus also of the political
emancipate the influences of Judaism.

Those more or less depressed by the Jewish race
Christian peoples, however, we call for the justified self-
defense movement across the board in flux

bring and organize.

This self-defense action can continue as long as the Jewish Race under the hoard of common law seeks protection and also takes place, and as long as the provisions of constitutional law not applied to them by governments, only within the limits of the existing bourgeois Move laws.

So the Christian peoples take the energetic organizational of this legal self-defense movement in grabbed; – they lead the lively agitation and the strong action in the parliaments, in the district and local representatives in the press and in public meetings; – found them in the cities and the individual areas Protection associations; – form them to lead these protection associations State-Central committees that are back in different countries who have to connect internationally: – so that the mini work of the „ Alliance israélite universelle"

19th

by a „ Alliance chrétienne universelle " can be paralyzed. And in this way, may the Christian society in every field step by step Recapture positions from which they came through Judaism has been suppressed.

And if this our appeal is not the voice of a remains in the desert, but the European Christian Society to become aware of the danger threatening them arouses that they are to take legal action immediately Means of a legitimate self-defense: so the 9th century forehead within a short time of shame be far away that one of 7 – 8 million souls standing anti-cultural race, the Semitic Judenrace that from about 350 million souls existing Aryan (or intellectual human race through Christianity, morally and financially tyrannise, that human race that is powerful their intellectual and physical superiority, gathers their seeds from their perfect civilization with their victorious weapons and with the work of the Spread peace in all parts of the world.

And if this is our appeal to the Christian peoples Have been heard and have become the word of fact will: then the meeting in the future year second anti-jiid congress already one for the Christian Find peoples in a hurry changed new situation, and then he will speak his word about the further Maass rules of new

let it be heard.

And now to work, Christian brothers!

To protect the interests of non-Jewish society
on the 11th and 12th. September 1882 held at Dresden

International Anti-Jewish Congress.

Pushed report
about the
|. International Anti-Jewish Congress

in Dresden.

- - - u Ri

On September 11th and 12th, by invitation of pages
the gentlemen:

Friedrich Carl, Baron of Fechenbach-Lauden-
bach, Königl. Bayr. Chamberlain and Major a. D. on
Laudenbach and Sommerau, chairman of the clubs
to protect the craft and honorary president of the western
phal craft association;

Dr. phil. Ernst Henrici, Tegel near Berlin, chairman

i:

. of the Social Reichsverein in Berlin; .
| Victor von Istöczy, Budapest, member of the Hungarian
Reichstag;

Lic. Theol. Gustav Koffmane, Wroclaw, board member
of the German Reform Association in Wroclaw;

d Geza from Onody, Tisza-Eszlar, knight's landowner, co-

| member of the Hungarian Reichstag;

Wilhelm Pickenbach, Berlin, merchant, chairman
of the German Reform Association in Berlin;

Alexander Pinkert-Waldegg, Dresden, chief editor,
Chairman of the Central Committee of the German Reform
Party and the German Reform Association in Dresden;

Ernst Schmeitzner, Chemnitz, publishing house dealer, pre-
seated of the German Reform Association in Chemnitz;

Rudolf Skalla, Iglau in Moravia, industrialist, chair
that of the Austrian Reform Association in Jihlava;

Court preacher Adolf Stöcker, Berlin, member of the German
Reichstag and the Prussian House of Representatives,
President of the Christian Social Party in Berlin;

Carl, Baron of Thüngen-Roszbach, on Ross-
bach in Lower Franconia, knight's landowner;

Edmund Winterfeldt, Wroclaw, editor, board member
member of the German Reform Association in Wroclaw;

Knight Carl von Zerboni di Sposetti, Vienna, editor,
Board member of the Austrian Reform Association
to Vienna;

Ferdinand Ziegler, Wroclaw, factory owner, chairman
of the German Reform Association in Wroclaw;

the 1st international congress on confidential advice
„ about the next goals of the anti-jiid movement, as well
about the ways to become an effective international
Combat the Jewish position in high finance such as
in trade, in agriculture as in craft life, in
politics as in communal relations, in the press
how to be struck in art and science
must *, instead of Dresden. Over 300 of the called
Germany, Austria, Hungary and Russia adopted
same part. The negotiations were led by Mr. Ritterguts-
owner, Rittmeister a. D. von Bredow and Honorable Member
of the Hungarian Reichstag Ivan von Simonyi, and
reached under their presidium for acceptance:

First of all, that was printed by Mr
Hungarian Reichstag Victor von Istéczy wrote mani-

firm; also the following theses by Mr. Hofprediger Stöcker:

Theses of the Dresden international congress on confidential
Discussion of the Jewish question.

X,

The present position of the Jews is for themselves and for all cultural
more a danger, for some nation already the basic material
and spiritual ruin. An international association for the purpose,
breaking the superiority of Judaism is an inevitable cultural
the Christian world,

II.

The Jewish question, although in the diversity of the tribe and the
Belief founded, is not a mere race in its appearance
or religious question, but a universal, political, social political
and moral-religious character,

III.

The influence of the Jews, not in relation to their number and none-
caused by higher talent, is based on the ruthless, often
unscrupulous acquisition and use of money power on which enemy
against Christian state and social life and thereby
conditional power over the weak and bad elements dev national

18th

nalitite, finally on the deficiency of our opposing social
economic-political conditions,

IV.

Nationality in itself from a political point of view, and

determined according to their promises to remain a nationality by

Descent, language and culture internationally connected, through marriage among themselves, as well as through cleaning and eating laws as a caste characterized, the Jews as such are incapable of organic components to form any Christian people. The Reform Jews, although in Weighing details, but do not form any in their general position Exception, but by striving to preserve the Christian cultural world intoxicating and decomposing, an all the greater danger.

Y.

The emancipation of the Jews, in the sense of not just the same legal boldness, but total civic equality, is a contradiction with the nature of Judaism as with the nature of

Christian idea of the state, a fundamental and disastrous mistake. O brig-

The Jews are not to be given any position, nor are they behind in Christian schools.

VL

From a social point of view, representatives of the naked money power and often exploiters of foreign meat and productive work, on the with associated social obligations but little involved, the mo-Jewishism in an era that divided the dispute between work and Capital has developed until the emergence of parties to change, one first-class social danger, all the more so as the same power of his Christian state foundations negating the care of the revo-Jution thoughts especially participates. The financial power of the Jews is one Obstacle to independent state life, its driving is the root of thieving directions of business life, their influence on industry and Commercial through the usurpation of an intermediate trade the reason of mannichfach Volksnoth.

VII.

The Uebelstinde, which the Jewish spirit in trade and change, in Industry and agriculture are one of the capital powers to complain about restrictive legislation; Christians tie up their business connections with Christians if possible.

VIII.

Only by denying the Christian idea of the state and the national thoughts in public life as in legislation are Christian peoples depend on the Jews. Only through high keeping the Christian worldview and asserting the national needs in economic life, legislation and Administration, they will regain their natural independence,

The governments and legislative bodies are therefore around their
to request a constitutional initiative; to call on the peoples to do so
the care of the Christian spirit and the fight against the Jewish
Mind in the literature and in the daily press, in the state as in

14

communal life the peculiarity of every nation and
Defend freedom. – –

Furthermore, a request from the baron of Thüngen-
Rossbach and baron von Fechenbach-Laudenbach:
Theses.

The assembly recognizes the increase in the Jewish people's element
and the Jewish influence on our entire people's and state life
a serious and threatening danger for the morally new and economic
Continuation of the German people,

To break this influence and that out of it with necessity
to eliminate the resulting obstacles and dangers, it considers the following
Maass rules for urgent:

I.
To prevent immigration of the Jews, especially from the east.
II. ;

The ruling, mainly capitalist-manchester social
and economic legislation, which the usury and the speculation
primarily through the stock, banking and borsal system compared to that
honest uud honest acquisition unduly favored, must after the
kichtung reformirt that the state and people preserving productive
would be lifted and strengthened, but the speculation would be harmless
Maass are returned,

III.

As long as they are closed in their struggle, the Jews are
wait and form a people among the people, only as foreigners
to consider who are granted hospitality. Your civic rights
are therefore to be limited in such a way that they do not participate in the
legislation, still in authoritative offices, especially not for
Judicial office can get.

IV.

The Jews are to be liberated from military services, but have a replacement
for this a levy in the form of a poll tax or a military fee
eutrichten,

drawn: C. Frhr. v. Thiingen-Rosbach
Frhr. v. Fecheubach-Laudenbach.

Furthermore, at the request of Mr. Pinkert-Waldegg
Resolution of the following wording:

„ The in Dresden on the 11th and 12th. September 1882 to an anti-Jewish international congress united men are perfect convinced of the impartiality of the Hungarian judge and pronounced their firm belief that the same in the Tisza Eszlar affair, from the entire non-Jewish world with greatest Attention is being paid despite the tremendous power and the the physical influence of Judaism on its high professions will correspond,"

5

Finally, one of Mr
MP of the Hungarian Reichstag Ivan von Simonyi
held lecture on the Jewish question, which is now published by the publisher
von Heckenast's successor in Bratislava appears as a brochure.

The congress finally became a permanent committee
used, whose next task in the procurement of
Funds exist to support the anti-Jewish press
Because with regard to the words of the Jew Montefiore:

„ What are you fiddling with! as long as we don't have the press in our hands,
everything you say is in vain. In vain you create societies,
Bonds and bankrotte and the like: as long as we don't have the press
to use to numb and deceive the world, `
we do not do anything and our rule remains a fantasy. “

(spoken in a rabbinic meeting in Kraków in 1540)
the committee recognized that, „ as long as the Christian-Aryan
Natives have not recaptured the press to theirs
Educate peoples and show them their true position,
they do nothing and their rule is a fantasy. “
The other decisions made in the committee's lap
of course evade public participation. Only this
it is still to be announced that the following resolution
was taken:

„ In view of the great importance of the Jewish question in Russia
and their current state there in particular, speaks in the name of the

Congress the committee all its full approval and pathy, which are legally active in Russia, the to prevent further attacks by the Jews and the Christian-Aryan to protect the population against Semitic exploitation. "-

and that Mr. Ernst Schmeitzner publishing house Chemnitz acting as the representative of the standing committee elects – and the second International Anti-Jewish Congress was set at March 1883.

There are now two announcements from the committee in reaches the public for the purpose of the broadest spread may find space here again:

[http: digital.slub-dresden.de/ppn320843882/17](http://digital.slub-dresden.de/ppn320843882/17)

16

Announcement!

All anti-Jewish newspapers are just as polite as urged to send a number of her sheet to Mr. Ernst as soon as possible Schmeitzner, publisher in Chemnitz (Saxony), as well this gentleman their exact address in German, French, Russian or to share in English,

Likewise goes to all associations on earth, which have an anti-Jewish tendency represent the request to address your address in one of the languages listed To send Mr,

All journals that are not in the hands of Jews or Jews what ' political, social or national tendency they are influenced may be politely asked to consider this notice falling letters and in a place that cannot be overlooked, as free as possible to press,

The committee
the International Anti-Ytid Congress,

Announcement!

It has only been 8 days since our first announcement, and our central office already has a rough overview of that for our aspirations acquired the press, as well as learned that the individual

Members of the committee everywhere their work with energy and willingness to make sacrifices have recorded.

Today we particularly request associations of anti-Jews, their names and their number of members with our representative, Mr Ernst Schmeitzner, publishing house in Chemnitz (Saxony). Likewise, individual gentlemen who establish clubs or stand alone want to be good for our cause, asked to do the same to turn the central office mentioned.

About the organization to raise the urgently needed funds, as well as the publication of the results of the congress we will be in some Days in our organs, the „German form“, report and ask friendly newspapers again today Spreading the above.

Berlin, Chemnitz, Dresden, 29. September 1882,

The permanent committee
of the International Anti-Jewish Congress.

OFF»!?!*!4M MAIN

«The emancipation of the Jews has been

are spoken so frequently and in many different ways

that the author of the present papers cannot be intended to examine the question here . the much-discussed
again in its entirety. It is only

a Point . which will be discussed and demonstrated here, a point . the

— I may be permitted to make this remark — in the public negotiations on the emancipation of the Jews, as a rule, takes
a back seat and cannot be expected of a chamber, and is too little acquainted with . because you . which of course
the inner religious nature of Judaism and its historical appearance. This one, certainly extremely important point

. wel- dear . in my opinion . die Emancipation

long must prevent the . than they bind themselves to their previous religious foundations . is
following : « The Hebrew holds himself, by virtue of numerous . both in the Old Testament and in the
Talmud and all rabbinic writings

len, for a creature chosen by his God Jehovah from all peoples, who is destined to rule over the earth. All non-
Jews are considered unclean to him, tolerated

by Jehovah only because . to be ruled by the Jew in the Messianic Empire
and to serve him as slaves. This Messianic kingdom is a worldly
Reich, is approaching daily and begins with a great strangling of the Jews among the non-Jewish peoples
. which results in the complete subjugation of the latter.

As evident as these sentences form the actual core of Judaism,
Return from the Babylonian captivity until our days ; as surely as it is,
that only such a hope can save the Jewish people, despite

1*

has been brought,
of the Jews so
existing position

4

of all persecutions, in a thousand-year isolation; finally, as openly as these sentences are in the religious writings of
the Hebrews, strangely enough one should not speak about them today; one demands that one ignores them! - The
spokesmen among the Jews who belong to the party of progress have either completely thrown the misanthropic
hopes of their nation overboard or are trying to give their very worldly content the . which consistently
interpretation of a spiritual kingdom. With great cries of malice, obscurantism
. to interpret them differently

. Intolerance and slander they fall
over everyone . who takes it over . to present the matter in its true light *) , and one is good-natured enough
on the Christian side to allow oneself to be influenced by this outcry to such an extent that one can remove those
misanthropic basic elements

*) A large part of the German journals are edited by Jews, in others, however, Hebrews are financially involved; indeed,
the dominance of the Jews in German daily literature has reached such an extent that it determines
whether a book is received favorably or unfavorably. The main . that the Jewish judgment is not uncommon
reason must be found in this.

. that overall very few writings appear
. which the Jewish emancipation
also look at it from the other side . and certainly not in political newspapers
Articles can no longer appear. The publishers fear revenge; and we really have a kind of Jewish ensuring in this respect.
I confess to the Jewish men who

as editors, that they are beyond the prejudices of their nation; that therefore the whole of Jewry would be able to ' but this does not mean . emancipate to become. After all, it is . in the pursuit of these men and in their perpetual assurance of having cast off Jewish nationality . very au_allend . that they only ever cover up the Jewish follies and every attack who are trying to kill as quickly as possible . instead of using them to bring out the sharpness and thereby destroy it most safely.

of the Indenthumö at least considers it to be completely antiquated and finds it hard . them in our Days where the emancipation of the Jews is discussed everywhere . to pull it out again.

If the Jewish community consisted only of those Heller-thinking spokesmen . which differ from the have freed the frontiers of their people . However, it would not be acceptable if one counters their struggle for civil equality with beliefs wanted . to which they do not confess ; but now it is well known that the The much-vaunted progress among the Jews only affected a small number of the inhabitants of larger Cities, that the by far greater part of the Jewish population . especially in Flecken and villages . still holds firmly and rigidly to the old . that even very influential men under the Hebrews, with the greatest trepidation, follow the most miserable provisions of the Talmud. Moreover, in truth, those old Messiah hopes are by their nature so completely opposed to the political conditions of Christian peoples, those contemptuous ideas about the destiny of the non-Jews so degrading, that one cannot possibly be satisfied with the mere announcement of a renunciation or rejection. These hopes, this mass of dangerous prejudices are laid down in the Jewish religious books; as long as these

Faith books in their full

have wide validity; does he not, . the Jew is also obliged to adhere to these provisions given the current state of affairs, . he is no longer a real Jew. How can such a person be» prove to those few men of progress that it is time to grant the Jews equal political rights with the Christians? They are no longer true Jews and are therefore no longer capable of emancipation; the rest will only be capable when they too are no longer true Jews.

If this point in time ever occurs, then the existing religious system of the Jews must necessarily undergo a public

change; the Jews must learn from their religious writings a

A confession of faith in which the hope for an earthly Messiah

, the

Delusion to be a chosen people, the contempt and hatred against non-Jews

are no longer expressed, but rather it is publicly stated that these old

Prejudice as a harmful error. Not the Christian

It is not religious views that deviate from these points of view that make the Jews unfit for citizenship, but rather that

silly conceit that is completely intertwined with the Jewish people and that aims at nothing less than the enslavement

of non-Jewish humanity; ridiculous, however, because it is not possible due to the small number of

Jews can never be carried out; but given the pecuniary power of the Jews, it is dangerous enough for the non-

Jewish population of the states if it is the

Hebrews should succeed in gaining high state offices and with their pecuniary

Rule the influence and power of higher states

officials to connect.

But it will now be important that those human

hostile views and hopes of Judaism are demonstrated here in more detail.

Their historical appearance does not go back to Egypt, as is usually assumed. I have this in my except for the

work: "The human sacrifices of the ancient Hebrews", Nuremberg at Schräg 1842

extensively proven and must, in order not to

to go too far

to the information given there. They are a much more recent product, do not extend much beyond the time of the Babylonian captivity and only received practical application after this captivity, starting with Ezra (480 BC). The idea

The belief that all other peoples are unclean is not originally Jewish, but Egyptian; it came from Egypt to the

Jews in the last times of the Jewish

Kingdom, where Egypt exerted significant influence over Judea.

7

and the Jews were even under Egyptian rule for a time.

» An

Egyptian, » reports Herodotus II kiss mouth, 41, " Man or woman will never see a Greek on the

nor knife nor spit, nor cauldron of a Greek

use, not even pure bull stew if it was cut with a Greek knife.

»

It is well known how strictly the Jews have kept themselves separate from the impure peoples since the founding of the new state up to the present day. The vast majority of them even today avoid coming into . how much they enjoy contact with the knife of a non-Jew or lying in his bowl. If one accuses the Jews of this . Something to enjoy, was contemptuous treatment of the peoples among whom they have to live, and from whom they are not only tolerated but also so

before ,

even demand full citizenship; this is how you get the answer . it is a cruel

Slander that the Jew regards every non-Jew as an unclean creature; he

Do not cut with a Christian knife . because it is likely that

with this knife a food forbidden to the Indians has already been cut. This sounds quite acceptable to many people; one should respect every people and the Hebrews in this innocent . one thinks . the religious customs avoidance of the Christian knives and

I also do not force my knife on the Jew, but I do not wish to have people as my fellow citizens, and I am even more careful not to have them as my superiors, for such a declaration certainly lies in this aversion to using my knife. Your knife, says the Jew, was cut; if I wanted to use it, I would defile myself, . who declare me an unclean creature; and that would be against Jewish law. He therefore defile himself even if he . is unclean . because unclean food

8

an otherwise pure food was cut with a knife: but he wants to . which once an unclean food make Christians believe that they, who not only continually use such knives and utensils, but also eat the unclean food themselves into . they are not unclean in his eyes . but pure!

Let us come to another proof that the Hebrew considered the non-Jew to be an unclean creature. Why does the Jew still undergo circumcision to this day? "You are a holy people," we read in Deuteronomy 7:6, "a holy people to Jehovah . your God ; you hat Jehovah . your God chooses . to be his own people from all nations, which are upon the face of the earth. Not because ye are more in number than all . Jehovah has the nations that have favored you, nor chosen you; for ye are the fewest of all the nations; but because Jehovah loved you, and has kept the oath which he swore to your fathers.

known by all the families of the earth (Deut . 28 , 1.) . » Jehovah has made a covenant with this his holy people; the sign of this covenant is circumcision;

whoever is circumcised belongs to those , whom Jehovah chooses , the uncircumcised is a rejected by Jehovah '

creature should be eradicated. "This is my covenant," it says in Genesis 17: 17, which you . 10 . , " shall keep between me and you and your descendants after you, that every male shall be circumcised in the flesh of your foreskin,

And this shall be a token of my covenant between me and you. And an uncircumcised man , who has not been circumcised in the flesh of his foreskin: it •

That soul shall be cut off from his people; he has broken my covenant. »

Circumcision, although not originally Jewish *)

*) Herodotus says II . " Die Kolchier , Egyptians and Ethiopians are the only ones among 104 : all people , which has always been the shame

I have only you

9

and initially nothing else , as a substitute for the victim

death of the boy *) , is by the Jews

whereby Jehovah his chosen

other peoples of the earth. So

When a Jew is circumcised, he declares himself to be a being sanctified by Jehovah, to whom the impure uncircumcised cannot look up. One would think that the fact that the Muslims also circumcise themselves must have made the later Jews have taught , that this rite could not be linked to promises that exclusively on the

But just as such a conceited delusion could arise, although the neighboring Egyptians and Phoenicians also practiced circumcision, so it has also continued to exist alongside the Mohammedan religion.

The Rabbis declare the circumcision of the Muslims to be

ineffective . partly because it is not fully implemented . as with the Jews . theils
because those peoples did not have the Jewish promise. This very promise on
World domination . which, in addition to the arrogance . one from the impure peoples of the world
prominent , holy people

to be inseparably connected with circumcision among the Jews. It is the promise that must . just these
make the Hebrews incapable of being citizens . as long as they have circumcision, for the
of the state. Of course, it is not important whether the citizen of a state has a piece of foreskin or not: the ideas are what
which one
with the-

circumcise limbs. The Phoenicians and the Syrians

(namely the Jews) admit that they learned circumcision from the Egyptians. These are the only peoples after the
Egyptians. Of the Egyptians and Ethiopians . who circumcise themselves; they all do it
themselves I cannot
which part learned circumcision from the other. say, »

I refer to the further proof

in Palestine

this remark

kung, on my writing: "The Human Sacrifices of the Ancient Hebrews" page 582 _.

as the sign people of the long the

10

his rite connects , ideas that will never end . as long as the rite
itself is issued.-

It is well known from the Old Testament writings that even the pre-Exilic Jews regarded "the uncircumcised" as an object
of contempt. At that time, the Hebrews did not yet regard circumcision as an institution peculiar to their people alone; it still
had a general character of sanctification, which was not denied to other circumcised tribes either, but the lack of which was
already considered something unclean and despised in those who did not undergo this rite, such as the Philistines.

ous was made an accusation. In captivity, among Chaldeans and Persians who were not circumcised,
the Jews formed the view that circumcision
dung is a unique characteristic of the holy Hebrew tribe; at least

The leaders of that tenth of the Jews sought . who returned from captivity to Palestine

wanted to return (nine tenths of them, as is well known, have completely mixed with the heathens and have since disappeared from history), to establish such a view among their colonists; which in time was completely successful.

At first, the Jews who had migrated from Babylonia to Palestine also had foreign wives, some of whom they had brought with them from abroad and some of whom they had taken from their neighbours: a proof that they would have had even less hesitation in marrying non- . that the great majority who in Chaldea Jews.
and that

It can be proved with the most compelling reasons *) that before the Babylonian captivity, this system of separation from the Gentiles was not known at all.

But now, since Ezra (480 BC), more and more of these new colonists were convinced that the Jew was a , based on the saying of the prophets,
holy being,

*) Compare "Human Sacrifice of the Hebrews" p. 87 _.

11

that the stamp of this holiness is stamped on him by circumcision
the visible sign of his covenant with God . that all other people are unclean
and that the Jew also becomes unclean . if he mixes with them. The leaders of the
Colony come before Esra and complain that priests . Levites and people not from the Gentiles
wanted to separate . rather the »holy
and

the monstrosity and also carries it out: the Jews

Seeds mixed with the peoples of the countries *) . » Then decides

are forced to take their non-Jewish wives and

to reject the children raised with them,

expels them from the country and leaves them to their fate. Since then, the

Contempt for all non-Jews under this poor state of art and science
Hebrew people ever stronger .

One often hears the saying: Should not the Hebrews have had an aversion to the peoples who oppress them to this day? Should they be friendly to those who in the most varied ways express their aversion to the Jews at the

Did not the many acts of hatred they had to endure also fill them with hatred against their oppressors? — But just she look at the History! The Jews

which through their arrogance to be a chosen people, through their hatred against all Gentiles, who prolonged all human feeling, aroused the contempt of the Gentiles. It was not the belief in an invisible God, as one would like to represents what drew them the hatred of all peoples, but their dirty, final, misanthropic nature; it was not external pressure that what they do with contempt

other peoples fulfilled but the arrogance that they themselves are the chosen ones of Jehovah's but all other peoples are unclean and

are rejected before God. They have expressed their abhorrence of

*) Esra 9, 1.

the one

were it,

against

12

the peoples had already shown this before they were under the Roman yoke or later oppressed by the Christians; their contempt was not only directed against their oppressors, but against every non-Jew in general. Could the Gentiles

otherwise as contemptuously mocking this dirty Jewish people that on his lack of a foreskin founded the hope of world domination, which in its ridiculous conceit looked down upon everything great and sublime in the heathen world, without developing any qualities that would have commanded the respect, let alone the admiration, of its contemporaries?

"A Jew," says Juvenal *), "will not show an uncircumcised man the right way or a well when he asks him" - and such people demanded tolerance?

The uncircumcised is nothing more than a dog to the orthodox Indian; with this name

In Roman times he branded the non-Jews **) , and the rabbis also used this term for Christians. I quote from Eisenmenger
some

This diligent scholar, professor of oriental languages, has undertaken the hopeless effort of working through the
rabbinical jungle and in two . But first I must say a few words about this man himself.

strong quarto volumes under the title «Discovered Judaism» the most important

the rabbinical writings of the Christian world. Whenever this book is quoted

becomes . one hears the response from the Jews, Eisenmenger was an enemy of the Jews and

his statements could not be considered true; Christian

Literary figures in their zeal for the emancipation of the Hebrews speak

This, without even having the book in my hands

*) Juven . satyr. XIV . 103.

**) Matt. 15, 26. 27.

13

I do not want to deny that Eisenmenger was an enemy of the Jews; every person who has a human heart, a feeling for
humanity and the progress of our race in his breast, must become an enemy of this Jewish nature as soon as he
takes a closer look at it; for then he recognizes in the Jewish people a group of people who have distanced themselves
from the educational processes of the world.

has been hostile for two thousand years, but has brought to light within itself a mass of the most outrageous nonsense,
preserves the true sanctuary of the appearance of the . which the Hebrews describes as an everlasting

Messiah and bases his rule over the . to which he clings with the utmost tenacity, because he

world on it, a rule that is to impose the same nonsense on all other people. But if one wants to claim that Eisenmenger
says things about the Jews that are not found in their writings, that he falsely attributes a lot of spiteful things to them, then
one is telling the grossest untruth; for this scholar not only quotes very precisely, but also gives the source and
page of the writing everywhere and even quotes the Hebrew text word for word. A few passages from his book may
follow.

. from which he drew . but he

In the writings of Rabbi Eliezer, chapter 29 (Eisenm. II, 630), the question is raised as to why Abraham circumcised his servants. The answer is: "For the sake of purity, so that they would not defile their master with their food and drink; for everyone who eats with an uncircumcised person

does just as much as if he were with a
Dog would eat; for as a dog is not circumcised, so is one the foreskin
still has nor circumcised. Whoever touches an uncircumcised he does so much,
as if he touched a madman Whoever bathes with it does as much as if he
bathed with a leper, because the uncircumcised in their lives

14

times as much as rages but after their death they are like carrion in the field. » The Rabbi
Menachem says in his interpretation of the five books of Moses, fol. 47: «The foreskin is despised and more impure
than all impurities that are in the world.» In the Talmudic tractate Nedarim, fol. 31 (Eisenm. 1. 672.) it says: «The
foreskin is despised because the godless are disgraced with it,» and in the tractate kesaolilin, fol. 92: ->Whoever
separates himself from the foreskin does as much as if he separated himself from a grave.

secreted. »

God himself did not dare to speak to Abraham for so long

he was uncircumcised to speak Hebrew, for this language the angels
understood and from this it can be seen that he was in contact with an unclean person; God therefore used, as long as
the patriarch was not circumcised, against Abraham, means which the angels the Chaldean language
do not understand (Book 4aIKut rudeni Fol. 37).

Eisenm. I, 674.). The Talmud (Tractat Megilla Fol. 7. Eisenm. 1, 714 .) explains the Mosaic Sabbath
commandment as follows: "The assembly shall be for you, the and not to strangers, to you, and not
dogs." In the book Jaikut Schi-

moni is the passage Psalm 4, 8 : «You make my heart glad in the day when they have plenty of wine and grain» (Fol.
91. Eisenm. I must go, since the Gentiles . 715 .) declared that it is all the more glorious for the Jews
were already in prosperity. «The Rabbi Joshua Ben Levi,» it says, «said that this matter was like a king who gathered
wandering people and placed them before the door of his palace

They saw dogs coming out of where they should go in. Now they have dogs
the house with quails, heads of fattened cattle and calves' heads in their mouths, and they began to say: If dogs
eat only good things:

what will our meal be like then! Thus the Epicureans (the Christians) are compared to dogs, as it is said (Isaiah 56:11): They are insatiable

15

ashamed dogs who do not get enough to eat. When they are in such prosperity,
How much more must the Israelites prosper?

Thus it is also the confession of many baptized Jews that the orthodox Jews . . . that the name Kelef . . . stand in relation to Christians (Eisenm. I, 716.).

Therefore, the dead non-Jew is just like animal carrion. Rabbi Eliezer explains in chapter 34 (Eisenm. II, 909) the passage from Isaiah: "The dead will not live," as follows: "This means the Goyim, who are like the carrion of animals and will indeed rise for judgment, but will not live." Therefore, the Jew finds it quite appropriate that the unclean meat should be sold to the Christians, and also the hindquarters of the animals, which he may not eat as unclean. But he spits on these parts first, lets his children contaminate them, and puts a curse on them, so that the unclean Christian can eat them all the more surely *misa meschunnah* "sudden death." At least, that is what happened otherwise (cf. *Bnrtror_Judenschule*, p. 591; Eisenm. II, 641).

The Rabbis find the origin of the impurity of non-Jewish peoples in the fact that they were created by the evil serpent of paradise, the devil. As it says in the book *Naarecheth haelahuth* (fol. 128. Eisenm. I, 593.), this serpent "cast an impurity into Eve;" from this they came into being, and from the devil they also receive their strength and power. Since only the pure spirits of Adam are called man, the impure spirits, the non-Jews, do not deserve the name of man.

"You are men," it says in the Book of Zohar (Eisenm. I, 591.), "but the other peoples are not men, because their souls come from the unclean spirit; only the Israelites are called by this name because their souls come from the holy spirit." In

Talmudic tractate *Lava*

16

mezia Fol. 114. (Eisenm. I, 594.) one reads: «The Rabbi

Simeon . . . of Jochai son, says, the graves of the Goyim^ (non-Jews) defile . . .
not because (Ezek. 34, 31.) it is said: You are men. You are . . . my sheep . . . Sheep of my pasture, you
called men, but the peoples of the world are not

people, but rather animals. » The Talmudic tractate Jevamoth Fol . 94. (Eisenm. I, 596.) teaches: >. The seed of a non-Jew is like the seed of an animal ; » and in the In the book Markevet ham-mischne (Eisenm. 1, 596.) the expression Vieh in the sentence «Cursed be he who lies with cattle» is explained by non-Jewish women.

Usually Christians and non-Jews in general are referred to in the rabbinical writings by the names: "Children of Esau," "Edomites"; and then Jewish conceit indulges in insults against Esau and his descendants; he is said to have been begotten by the great serpent, the devil, and God has burdened him and his lineage with all the impurities of the world so that Jacob and his sons could remain pure. "Esau," it says in the book 8ebene luebotli liabberith (Eisenm. 1,645), "is Edom; he is the serpent who has drawn all the impurities of the serpent (i.e. of the devil) to the Jews, completely himself.

has so that Jacob may remain pure; » he is the scum of Sammael (that is, the devil), and Satan himself (Eisenm. I) was born 646. 647.) ; he was, according to the book Jalkut rubeni, reddish because he had drunk the blood of monthly impurity in his mother's womb (Eisenm. I, 650.) ; according to the explanation of Rabbi Abarbanel, however, because he under the reddish planet Mars the star of the evil god was born. «Therefore,» it continues,

«The mighty men who sprang from him and ruled in Italy were all bloodthirsty; the same who were kings of Italy and Roman emperors and who dress in scarlet to this day.

17

The Edomite people are cursed, destined for hell. Rabbi Abarbenel says in his book Waselimia Jeschua Fol. 30. (Eisenm. I, 690.): »The vengeance of God will come more upon the Edomite people than upon other peoples, and will this ummah

hainmekulleleth the cursed people, not worthy of the one whose other peoples worthy. » But God also keeps himself away from the other peoples who are unclean. »Know,« it says in because they the book of Shaare Zedek, among whom seventy crowns were divided "that than the seventy nations and each people with its land fell to a certain prince,

the blessed God has found no part in all of them, because he is pure, but they are all leweim di impure (Eis. 1, 701.). Only in Israel has he found a part, because it is pure. »

Several Rabbis make the distinction that only the soul of the Christian, the comes from the evil spirit be unclean, but the body becomes clean as the soul

has left, at least a Christian corpse is no longer contaminated. Thus Rabbi Menachem says in his interpretation of the five books of Moses, fol. 183. (Eisenm. 1, 702.):

»You are already aware that a Goi as long as he lives, is unclean and defiled because of the uncleanness that dwells in him. But when he dies, his spirit is finished; therefore he does not defile in the tent. For this is an article of faith that the graves of the Goyim do not defile, because (Numbers 19:14) it is said: us

"When a man dies," but the nations of the world are not called men. With an Israelite it is quite the opposite case, for a holy spirit dwells in him during his lifetime; when he dies, he is unclean and defiled. There is a great mystery in this matter. For when the unclean spirit sees a clean vessel which is empty of the holy spirit, it comes and dwells in it. Therefore it is customary to

the bodies of the raging

so that no unclean spirit may enter them. »

2

18

The spirit of the non-Jew, because it comes from the devil, goes to hell; only he who belongs to the covenant of circumcision, only the Jew, can be saved. Let us hear a sample of Jewish wisdom in relation to the proof of this statement. One designation of God is fchaddai, that is, the Almighty. This word is written in Hebrew with three letters fch di; the letter ei means the circumcision, the whole word refers to the circumcised, they belong to the almighty God. But if one now takes the symbol of circumcision, the i, one only has fch d, and this word means devil. The uncircumcised therefore belong to the devil. This argument can be found in several rabbinical writings (Eisenm. I 676.). Why, the Jews conclude, do the Christians insist so from the three letters fch di away, so much on abolishing circumcision in order to bring the Hebrews to hell? In the book Len daath (Eis. I, 678.) we read: "Why have they (the Christians) issued their orders against the commandment of circumcision more than against other commandments in the law? Because circumcision brings eternal life! For the living God is our portion, and has commanded that we save our children from destruction through his covenant, which he makes in our flesh. But they command that we not

the

circumcise them, so that they may go to hell with them and we may not have a part in eternal life. » Hell has indeed for the seventy

Peoples of the world seven large divisions, where the non-Jews all terrible
Endure torture, ten

.Peoples always in a division, as is reported in the book Torah Adam (Eism. II, 340.). Godless Hebrews also go to hell,
but they are not tormented because they belong to the chosen people. Abraham takes them up to heaven after a short time
(Eis. 11,343.). Because then no circumcised Jew can go to hell.

This rabbinical

will be sufficient

in the eyes of the Hebrew in truth for

I will give men instead of you and peoples

of life! Fear not, for I am with you; I will bring your seed from the east, and gather you from the west. I say to the north, Give! and to the south, Do not hold back! Bring my sons from far off, and my daughters from the ends of the earth, everyone who calls by my name, whom I

instead of the

for my glory, whom I formed and made! » »I bent Judah as my bow (Zecharj . 0
13.) , I will take Ephraim as a bow and raise up your sons Zion , against your sons, O Greece, and make yourself like the sword of a mighty man. And Jehovah will appear upon them, and his arrow will go out like lightning. and the Lord Jehovah pushes the trumpet and goes along with the winds of the south. Jehovah of hosts will They protect them, and they devour their enemies and trample them like slingstones, and drink their blood noise like wine and become full (of blood) like sacrificial bowls, like the corners of the altar . «

After this great bloodbath among the non-Jews, the conditions of the Hebrews completely transformed; the

Peoples are mostly destroyed; the Indians, masters of the earth, and the rest of the remaining Nations serve them as slaves. « The peoples and the kingdoms (Isaiah 60:11) that do not want to serve you, perish and the nations shall be destroyed. The sons of your oppressors shall bow down before you, and all those who taunt you shall bow down at the soles of your feet, and call you Jehovah's City. Zion of the Holy One in Israel. » The most glorious time begins for the Hebrew; he no longer works; the subjugated non-Jews must work for him, they must Jerusalem and deliver their treasures to the new city. "Instead of were forsaken (Isa. 60.) and hated No one has trodden upon you Majesty, a delight for I make you eternal generations and generations. And you will drink the milk of nations and suck the breast of kings, and you will know that I am Jehovah and your Redeemer, the Mighty Jacob ' your savior s. > « They are building the devastation of Past, they raise up the ruins of the past; they renew the devastated cities which lay in ruins from generation to generation. And strangers stand and feed your flocks, and sons of Your farmers and your vinedressers are strangers. Her but are 26 heißet Priester Jehova 's You are called servants of our God. The peoples' wealth you will consume and enter into her glory. Your gates will always be open, They will not shut themselves day or night, to bring you the treasures of the peoples and their kings and their retinue. » »Then you will see and rejoice, and your heart will tremble and expand; for the riches of the sea will turn to you the peoples treasures come to you. » »EH will gather together the wealth of all the surrounding peoples, gold and silver and Clothes in great abundance (Zecharj. 14 Peace over 14.). » The new Jewish king rules from now on in the earth; there is only one remaining non-Jews must the Jewish religion, in the new kingdom, all convert to Judaism. ° Incline your ear (Isa. 55, 4.) and come to me an everlasting covenant heard that your soul may live. I will grant you the graces of David, the constant ones. Behold, I have made him a lawgiver of the peoples, a prince and ruler of the peoples. » » And it came to pass (Zech. 14 which 16.), whoever is left of all the peoples came against Jerusalem they grow year after year

to worship before the King Jehovah of hosts and to celebrate the feast of booths » » In those days (Zech . 8

. 20 .) , ten men from all the tongues of the

nations the tail of a Jew, saying, We will go with you: for we have

ge-

heard . God is with you! »

The expectation of this Messiah was evidently

the first times after the Babylonian captivity. The longed-for king did not appear. The Indies remained under the rule of the

Persians; when the Persian Empire was

Alexander the Great, which was famously . they became subject to tribute to the Greeks, then to the

Romans . destroyed Jerusalem and the Temple in the year 70 AD

destroyed; since then they have been scattered among all peoples. But this two thousand year historical fact

. who just

27

The opposite of that proved . what the Jews

could not, however, shake them in their hope of the Messiah; she lives continually among them; Jehovah delays only

because of the sins of the Hebrews; if there is improvement, the Messiah must appear, and even if this does not happen,

Jehovah can

The appearance should not be postponed beyond a certain point in time. Let us hear the . which he has established

statements of the Rabbis on this subject, which, as is clear, are based in their essential part entirely on the above Old

Testament passages, and therefore can less be explained as the private opinions of individuals, but must be regarded as an

expression of the national mentality.

The Jews explain their relationship

and later among the Christians for a new captivity, for the captivity under the Edomites, which

. as we noted above, is one of those names

with which in rabbinical writings the Christians, as descendants of Esau '

be referred to . Another of these names is «Amalekites.» This

tribe . whose extermination is repeatedly commanded to the Hebrews in the Old Testament and finally

accomplished; the Rabbis found it appropriate to transfer this designation to the Christians, who are destined for the

same fate. This is what it says in the great -kulkut ruboni Fol. 49. Ciseum.

. 752 . : »The War of the Fourth

will be waged against Sammael (devil), who is Esau, a heavy and mighty war, according to the . and it will be a content (from Deut. 25, 19.): » «Thus you shall blot out the memory of the Amalekites! » » for with the measure with which man measures should give him back

be measured . He had no mercy on them as they

from Egypt, which is why

nor will there be mercy in heaven. » — Book Zeror ham mar Fol. 158. Eisenm. I, 751.: «From of the Edomite captivity he said: I lift up my hand to heaven,

under the Romans

Amalekites are a people

captivity

expected,

one of the same

28

that I will take vengeance on Edom, as it is written (Ex. 17:16): "Because the hand is on the throne of the Lord, then I will repay my enemies with vengeance. From the head up shall the enemy, namely, Amalek, be slain, of whom (Num. 24:26) it is said: "Amalek is the first among the nations," and he will be called the enemy of God, as I have already explained. Then (it will say according to Deut. 32:43): "Rejoice, you nations, with his people. This is where the Edomite captivity extends, and the redemption of Israel begins."

Shortly before the Messiah appears, the power of the Christians will reach its highest peak. Book Majene jeshua Fol. 76. Eisenm. I, 689. : "Shortly before the redemption, the godless people, namely Edom, will spread out." Jehovah hesitates to send the Messiah because of the sins of the Hebrew people; the Jews are to atone for their sins among Christians and Muslims first; this is the purpose of the captivity among the nations; the Edomites are thus destined to free the Jews from hell; Isaac already foresaw this and therefore he loved Esau (Eism. 1, 653.).

If the Jews repent, the Messiah will appear soon. Calculation cha-

dasch Fol. 46. Ironm. I . 838. : »The Great Prince (En-

gel) Michael, who is the provider of Israel, came (once to God) and said to him:

O Lord of the world, when will the Israelites be released from the Edomitic

go into captivity? For behold, you have written, they shall be redeemed from captivity when they have endured great distress. Then God said, Sammael (evil angel), who is the provider of Edom, shall come and dispute with me. And when Sammael came, he said, O Lord of the world, you have said that

The Israelites should remain in Edomite captivity until they repent; but now they are ungodly.

29

For this the holy blessed God punished Sammael because he had spoken evil against Israel, and Sammael fled three thousand miles away. Then God said to Michael: You should have listened to the words (Deut. 4:30) "Then you will return to the Lord your God, and the Lord will

your God is a merciful God » »

Michael replied: O Lord of the world

will you then in vain

merciful God commanded you not to have mercy on them, although they are not worthy? Then God said to him, I have sworn that I will not redeem them

until they turn to me as much as a pinpoint; then I will

open a great door for them. » Rabbi David Kimchi also says in his commentary on Jos. 56, 2: «Repentance delays the coming of the Messiah, » and in the book

Shir hashirim rabba Fol. 269. Eisenm. II

670. it says: «Rabbi Levi said that if the Israelites repented for

just one day, they would immediately be redeemed and the Son

David's coming. »

On the other hand, other rabbis claim that the Messiah will appear even without the Jews repenting, and that the Jews will be very unrepentant at the time of his appearance. Rabbi Bechai says in his interpretation of the five books of Moses, fol. 149. Eisenm. II: "Salvation depends on repentance; but even if the Israelites do not repent, he (the Messiah) will not come beyond the appointed time.

» In the Talmud treatise

Ironm. II 672 . one reads: « The Rabbi

currently in which the son of David 's

for the houses of assembly (synagogues) will be houses of pleasure, and the wisdom of the scribes will stink, and he who fears sin will be despised, and the faces of men will be like the faces of dogs (insolent), and the truth will be lacking. Rabbi Nechorai says: At the time

in which the son of Da-

Sanhedrin Fol. 97. Jehuda says: In

will come wer-

30

When it comes, the boys will put the old men to shame and the daughter will Rebel against their mother and the son will not be ashamed before his father. The

Rabbi Nechemja says: At the time when the son of David comes, the impudence will be great and the one who is most respected will be an unjust person, and the whole kingdom will be transformed into heresy and no one will punish it. "— According to the opinion of several rabbis, God has set a certain number of souls that are to appear on earth in human bodies; only when all these people are born will the Messiah appear.

komme. Talmudischer Tractat Avoda sara Fol. 5. Eisenm. II 673. : «The Rabbi. Jose said that the Son of David would not come until all the souls that are in the gas have come to an end, as it is said (Isaiah 57:16): "For my spirit (that is, the Messiah) will tarry before me because of the souls that I have made." Rabbi Solomon gives the following explanation of the word gas (body): "There is a treasure chamber called gas; God created all souls before the world and placed them in this treasure chamber."

As long as the Messiah is delayed, the Hebrew should not waver in his hope, but should also be careful not to try to calculate the time of his coming.

Rabbi Isaac Abarbenel, for example, teaches in his book Rosh Amanah Fol. 5. Eisenm. II

677. : «It is necessary to believe that he (the Messiah) will certainly come and will not fail to appear, and if he tarries, wait for him. Nor is it fitting to set a certain time for him or to deduce from passages (of the Old Testament)

draw conclusions about the time of his arrival. Did not our sages, of blessed memory, say: The breasts of those who calculate the times must burst? » The reason for this curse is explained by Rabbi Moshe Bar Majemon, Eisenm.

II 677. : «Daniel has given us the

31

The depth of the knowledge of the time (in which the Messiah is to come) is explained; but because it is hidden, the wise men, of blessed memory, have forbidden us to calculate the times of the future of the Messiah, since the common people are annoyed by it and perhaps fall into error when they see that the time has come.

and the Messiah still did not appear. » Nevertheless, many Rabbis have Attempt made to determine the time! Some think that the Messiah was at the time of destruction of the temple and will remain in the Paḥ until the time when Jehovah has decided on redemption.

radiese. Rabbi Aden Esra, for example, interprets the words of Isaiah chapter 52, 13, "Behold, my servant will act wisely": "Many," he says (Eisenm. H, 653.), "have understood these words of the Messiah, because our ancients, of blessed memory, said that the Messiah was born on the day on which the Temple was destroyed, and that he was bound in chains.

» In the book Ävodath hakkodesch Fol. 55. Eisenm. II, 668. it says: «Our rabbis, of blessed memory, have learned through a tradition that the Messiah, the son of David, is alive in paradise to this day.»

As soon as the Messiah appeared, he gathered the Jews and began a great war with the non-Jews, who became his prey all the easier because they were at war with each other and destroying each other at the same time. Book Maschmia Jeschua Fol. 53. Eisenm. II, 744. : ° When the children of Edom (Christians) and the Ishmaelites (Mnhamedans) have gathered against each other for war, then the children of Judah and the children of Jorael will also gather together and set a head over them, who will be the Messiah, the son of Joseph. » — Book of Mikveh Jisrae ! Fol. 48. Eisenm. II

. 745. : «The Prophet
Isaiah

speaks of the future redemption: Fear not, I

32

I am with you. I will bring your seed from the east, and gather you from the west. I will say to the north, Give! and to the south, Do not withhold!

Bring my cream from afar and my daughters from the end of the world! This will understood Media, Persia, India, China, which are towards the east of the holy land; Kedar or Asia and Sythia, which are towards the north of the land of Israel; Abyssinia, which lies towards the south of the land of Israel; Europe, which is towards the west of the land of Israel. The words: «Bring my sons from afar! » mean America or the West Indies, the prophet shows this quite clearly in these two verses.

clearly the places / in which the tribes are scattered. » — Book Zeror hammor Fol . 144.

Ironm. II . 690. : "With the destruction of the city of Rome our redemption will come together." 690. , comments on the fall/ » — Book Majene jeschua , Eisenm. II also: «After the . passage Daniel 7:13. prophet first reported the destruction of the city of Rome and only afterwards mentioned the redemption and salvation of Israel that in the future it would happen like this, namely first Rome would be destroyed . so we learn from it and then the Messiah would reveal himself. In the chapters of Rabbi Eliezer it is said that the

Children of Ishmael (Turks) will wage three fierce wars in the last days, first on the sea . secondly on the field and thirdly in the great city of Rome, which will see war more difficult . than the previous two.

From here the son of David will also come and both (Turks and Christians) downfall; and from there he will be in

the land of Israel, as (Isaiah 63 . I .) is said: Who is he of Bozrah . who comes from Edom, with garments sprinkled with dust? He, walking resplendent in his garment because of his mighty . proudly accompanied strength? It is I . the salvation

promises to save mightily. Why is your robe and your garments red like the Wine press treader? The wine press tread

33

I alone, and there was no one with me from the peoples. And I trodden them in my anger, and crushed them in my wrath, and their juice splashed on my garments, and I defiled all my clothing. For the day of vengeance was in my heart, and the year of my redeemed had come. And I looked around, and there was no support. My arm helped me, and my wrath supported me. And I trampled the peoples in my anger, and crushed them in my wrath, and they . there was no helper; and I was amazed . fell to the ground.

her juice ran . >»

According to the rabbinical interpretation of this prophetic passage, Messiah alone will . So first the destroy the city of Rome, but then he will subjugate the nations with a Jewish army. Jehovah has long since given the goods and blood of the Gentiles to the Hebrews.

determined. Rabbi Bechai in the Interpretation of the Five Books of Moses Fol. 132. Eisenm. II "In the Medrash it is taught . 20Y. : that the words (Leviticus 11:2) "these are the animals that you shall eat" mean the same as what the scripture (Habakkuk 3:6) says: "He stood and measured the earth, he saw the nations and divided them." At the time when the holy God wanted to give the Israelites the law publicly in the desert. He permitted them their (the nations') blood

. He stood up and measured the earth and gave the law to the Israelites

. as said (Isaiah 60:12)

is: «And the nations shall be utterly destroyed.» He has made their souls lawful to them, as it is said (Deut. 20:16): «You shall not save a soul alive.» He has made their goods lawful to them, as it is said (Deut. 7:16): «You shall devour all nations.»

The same is stated in the book Vajikra rabba Fol. 146. Eis. II, 200. :

"The . Ras said he has permitted their blood and allowed their goods. Their blood he has allowed . as it is said (Deut. 20, -16.): «You shall not let a soul live;» their goods but did he allow . as (Deut. 20 . 14.) ge-

It is said: "And you shall eat of the spoil of your enemies."

Therefore we hope that those kingdoms, although they are mighty and strong like an oak and a pine, will quickly and suddenly be broken and perish. »

Of the remaining peoples, the Rabbis teach, the Messiah will leave a third; but the Christians

sten should be completely eradicated.

The Book of Mashmia

jeschua Fol . II 74 . To them . 751 . says about the passage Zechari.

13 . 8. : »And in all the land two parts shall be cut off, but the third will remain in it, » The following: « It means that two thirds of the earth . that among all the peoples who will be wiped out by war and plague; but the third part will remain. » Rabbi Bechai says in his interpretation of the five books of Moses Iron M. I

. 658. : » There is no nation in the world that will not have a part with the holy God (in the kingdom of the Messiah), but Amalek and Esau will have no part, and will not be remembered anymore, as it is written (Obadj. I, 8.): There shall not be left of the house of Esau. This saying is

to declare that from the remaining nations there will be men left to serve the Lord, but not from the seed of Esau, as it is written in Exodus 17:14: I will blot out the memory of Amalek. . this one shall be destroyed from the world,

Rabbi Abarbenel comments on the words of the prophet Obadiah (Eisenm. I, 657.): "So that everyone from the mountains of Esau may be exterminated by murder," as follows: "The meaning of these words is that all who claim to be from the mountains of Esau and are named after them, namely the Christians, shall be exterminated together by the murder and strangulation that will befall them; for in the coming war no one shall be left . This is due to a huge of Edom." — Book of Sera Abraham Fol. 37. Eisenm. 11, 781. : "The holy God will in the future accept from all peoples,

except for Esau. » In the second part of the Pra- 3*

36

ger Machsor Fol. 17. Eisenrn.II,781. it says: «The King, the holy God, sworn: If all the nations come, I will receive them, except the Amalek» —

About the passage in Obadj. 9. : »And your mighty men, O Teman, shall be afraid,

Everyone from the mountains of Esau will be wiped out by murder," says Rabbi Abarbenel (Eisenm. II, 783.):

"These words mean that everyone

of all those who have their lineage from Mount Esau and are named after him, should be exterminated. This means the Christians; their extermination will be through manslaughter, through a mighty slaughter that will take place among them; for in the coming war in Edom no one will be left. » The same Rabbi Abarbenel says about Zeph. 3, 9:

«Then I will turn pure lips to the peoples» (Eisenm. II,

778.) thus: -He did not say: all peoples, because the Edomite people are not included in this promise; for they are enemies of God and his law and will not see the glory of the Lord. But the other peoples of the children of Ishmael (Muhammadans) will be considered worthy to accept the divine faith, because according to their faith they are not so different and distant from the main parts of the law as the children of Edom. » In the Meilrasch Tillim Fol. 10.

(Eisenm. II, 784.) the words Ps. 9, 7. : "The devastations of the enemy have come to an end; you have overthrown the cities, their memory has perished with them," are interpreted as follows: "The holy God has sworn an oath by the throne of his glory that he will not leave Amalek a memorial in heaven, that he will leave him neither son nor grandson; so that one cannot say:

This tree belongs to Amalek!

In the Messianic Kingdom, only Jews are the

no uncircumcised man shall reign any more, for the earthly

Fol. 56. Iron«. I, 723.: »How the royal government has been torn away from the kingdom of the people of property! How long has the government of the kings of perversity lasted! How safe and happy they live, but I am in the midst of captivity!

How my God has wounded me and not bound up my pains! The children

Edom's are clothed with the mantle of my glory; they eat honey and milk, but I wither like grass! » — Book of Othioth Rabbi Akkiva Fol. 9; Eisenm. I 723. : >This

World is compared to night. And the kings of the nations of the world are like wild animals that roam about in the forest in the middle of the night. But as soon as the dawn breaks, they go back again, like all wild animals return to their forest and their place. So it is with all the kings of the earth and the princes of the world. When the future world and the kingdom of the Messiah come upon them, they go back to their forest and lose their glory and become prey again. »

— Book of Avodath hakkodesh Fol. 57. (Eis. II, 724.): "When the Israelites do the will of their Father in heaven, they are kings on earth and the power (of the peoples) is before them as a servant; then the peoples will be subject to them, since this was the purpose of creation; they rule above (over the spirits) and below (over the people);" yes, even more (Eis. II, 715.), when at the appearance of the Messiah the Archangel Michael has split the graves in Jerusalem with a trumpet blast and the dead Jews are resurrected, then the Messiah will be sent to the Israelites scattered throughout all the lands, and immediately all the kings of the earth will take them from their shoulders and bring them to the Lord. " — Rabbi that Moshe bar Maje-mo says in his interpretation of the Talmud. Tractate Shabbat (Eis.

II, 756.): «The days of the Messiah are such a time in which the government will return to the Israelites

38

will come and where they will return to the kingdom of Israel. Their king will be very great, and the house of his kingdom will be in Zion. His name will be great and his memory will be among all nations, more than that of Solomon. All nations will make peace with him and serve him because of his great righteousness and the wonders that will be done by him.

- But God will destroy who will oppose him will be the promised everyone and deliver them into his hands. All the verses of Scripture also testify to his happiness and our happy situation with him will be different than it is now, except that the government will again return to the In the world nothing is Israelites.

This is it what our sages say, that between this time and the time of Messiah there will be no difference, except that the kingdoms will then be subject.

The subjugated rest of the peoples accept the Jewish faith. Rabbi Bechai in the interpretation of the five books of Moses. II Egypt, Jethro became a Jewish believer and accepted 774. : <>As in the first redemption from our religion: so all peoples in the final redemption will also

convert to the Jewish faith. » The Jews take possession of the wealth of the nations.

Rabbi Bechai . Ice. 11* 798 . : « At the end of the final captivity they (the Jews) will inherit the seventy nations.

» The Chaldean translation says Isaiah 6v »You will be 16 . :

satisfied with the goods of the nations and delight yourself with the spoils of kings. » Yes, even the hidden treasures of the earth and the sea will come into the possession of the Jews at the time of the Messiah. Book 3nltut rubeni Eis. II, 773. :

>Everything that comes from the

geo_enbart werden . distribute them among the Jews gathered from captivity.

austheilen . that they will be satisfied with great riches .

From now on, the Jews no longer do any work . the subjugated peoples must work for them; for this reason the peoples already bear the name of servants. Thus it is said in the prayer on the first day of the New Year (Eis. 1,576.): "Servants rule over us." This will be Echa rabbathi (Eis.

. 576 .) is interpreted as follows: » Servants rule over us . means the king

I kingdoms or the monarchies . » Book of Nizzachon (Eis . I, 577 .) : «When they (the peoples) say: It is fitting for

an uncircumcised and unclean person to serve the Jews; say to them: On the contrary, if they do not serve the Jews, they are guilty of destruction and death, as the prophet Isaiah (60, 12) says: For whatsoever nations or kingdoms

do not want to serve you » . They shall perish, and the nations shall be desolate.

The Jews base this hope particularly on some passages in Isaiah chapter 49, 22, 23: «Thus says the Lord: Behold, I will lift up my hand against the nations, and

I will raise my banner against the nations; they will bring your sons in their arms and carry your daughters on their shoulders; kings will separate your foster fathers and queens your nursing mothers. They will bow down to the ground before you on their faces and lick the dust of your feet. Then you will know

. that I am the Lord,

who will not be put to shame those who wait for him.

» Furthermore Isaiah 61:5 . 6 . : « Strangers

will stand and pasture your flocks, and foreigners will be your tillers and
Wein-

be gardeners : but ye shall be called priests of the Lord .
Abarbenel in his

» About this passage the Rabbi says

40

legmig of the prophet (Eis. II, 759.): »The prophet also reports that the Lord has anointed him to announce to the
Israelites that the nations are to be subdued to them, so
that strangers may stand and feed their flocks, and foreigners may tend their fields and
plant vineyards, so that the children of Israel do not have to do any rough work, but can serve the glorious God with
their law and prayer alone: Therefore he says: But you shall be called priests of the Lord, by which he means, you
shall not tend flocks, nor till the earth, but you shall serve the Most High and be priests of God. But so that you
have time for the service of the blessed God, you shall eat the goods of the peoples.n" In the book ^alünt 8elimoni (Eis.II,
761.) it says about the above

Isaiah : «The nations will come and put dust under the feet of the
lick the Messiah; they will all come and fall on their faces before the Messiah and before the Israelites, and say, We will

be your servants and those of the Israelites.

every Israelite will have 2899 servants, as it is said (Zechariah 8:23): At that time ten men from every language of
the nations will take hold of the skirt of a Jew, saying, 'We will go with you, for we have heard that God is with you.'

The number of 2899 servants is calculated as follows (Rabbi Bechai, Interpretation of the five books of Moses; Eis. II, 761.):
"There are 79 peoples, 19 men from each people make 799 at one end, so at four ends 2899."

If the subjugated peoples in the kingdom of the Messiah want to rebel, the Jews do not need to wage war against them;
the Messiah will quickly bring them back to obedience by sending out evil spirits to torment them.k Rabbi
Abarbenel in his interpretation of Isaiah (Ezek. II. Signs and wonders will happen when he says: He will strike the
earth with the rod of his mouth and . 762.) : «The Prophet has promised that

But it will be a

41

kill the wicked with the breath of his mouth, with which he wants to indicate that the Messiah does not need to assemble an army and wage war against a country that opposes his commandments, but that he will strike it violently with the staff of his mouth, without sword or spear. » Book of Emek hammelech (Eis. II, 763.): «At that time the Messiah will rule over the upper and lower creatures, and the spirits and devils will plague the peoples by the command of the son of David.» «He will humble the peoples and give orders to the corrupters and hordes of destruction against them if one of them rebels against him, just as King Solomon, upon whom be peace, did. ->

These are the basic features of the Jewish hope of the Messiah; to be brief, I have given only these and dispensed with a mass of the most bizarre dreams with which the rabbis have embellished the Messianic kingdom. These hopes have not only remained in the heads of the Israelites and on the parchment rolls of the synagogues; they have very frequently, in almost all countries, sought to gain practical validity, which of course always ended in the ruin of the deluded Hebrews.*) I refer here only to the most significant of these examples under the reign of the Emperor Trajan (115 AD), when a Bar Cochab (Son of the Star), as he called himself, appeared as the Messiah; the Jews later called him Bar or Ben Kosiba, Son of the Lie. According to the report of Dio Cassius**), the Jews went to this

Uprisings in their

.Barbarism against the non-Jews so far that they sawed them up, ate their flesh, smeared themselves with their blood-

42

about 460,000 people are said to have died in this uprising in northern Africa (the uprising originated in Cyrene), in Egypt and on Cyprus.

In Cyprus, the Jews were so feared and hated after the uprising because of the atrocities they committed that everyone was killed. s

that no one was tolerated there anymore and
who entered the country even if a shipwreck brings him to the coast
In the book Zemach Da-vid (Eis. H. 654 .) is from the Jewish side

about this event: «Ben Cosifa had rebelled against the Romans and who called himself Bar Cochaf claimed to be the Messiah. But he was therefore Bar Co-chaf d. i. called Son of the Star because he said that the words (4. Moses . 24, 17.) : «There will come a star out of Jacob rc. » on him . Even Rabbi Akkiva said of him when he had seen him : This is the King , who Messiah . The Jews who were in Bither anointed him crowned him king over they threw the yoke of the Romans from their necks brought many Romans and Greeks one who lived in Africa and killed a great multitude of people like the sand on the Shore of the Sea which cannot be counted. In Egypt, those who lived in Alexandria did the same thing; they those Jews Rabbi brought, according to the testimony of Asaria more than 200,000 people lost their lives. The Jews which on the Island of Cyprus lived killed all the Goyim until there was no one left. Then the Emperor Trajan his general Hadrian which of his sister son, against them; and he killed so many Jews as was never seen in the times Nebusaradan (the general of Nebuchadnezzar), nor of Titus. » - And this Messiah's hope would not be of a worldly nature? -

But now it will be said that the Jews certainly had such views and principles earlier; today

43

But today they have been abandoned; one cannot blame the Indians of today for the barbarism of their forefathers, any more than one can blame the Christians of today for the burning at the stake of the Inquisition, the St. Bartholomew's Day massacre, etc. - Probably!

V We ask, however: How can one prove that the Jews

have really renounced these principles? The proof cannot be found in their own assertion! Where are the synagogues in which no secular Messiah is preached any more? Even the so-called enlightened rabbis can give up this dogma, even if they have eliminated it for themselves; that king from the tribe of David is still the highest hope everywhere. not to their community

the nation . In newspaper articles and in Jewish pamphlets we read everywhere that the Jews have given up on their Letters belief in the Messiah, but if we enter into a Synagogue, we take a Jewish prayer book. To this day, the Jewish head of the situation soon becomes apparent the household prays on the Passover: « This year we are here the other year we are so Gott will in Canaan ; this year we are servants the other year we are God willing, free children and masters, » and

When drinking the fourth cup, he pours out his hopes for the coming of the Messiah and his curses against non-Jews.

Just observe the Jew among Jews not in Christian society. Among
To his people he is another here he shows that he was the seed of Abraham as
God's chosen one and despise the Goy. Even if he is only in the majority
white he becomes presumptuous and impudent. The bad luck wanted it that I
Recently on a trip to Frankfurt I met a bunch of Jews in an express train.
Immediately the Jewish gibberish started; I sat there. Then the kosher as among a foreign nation
biscuits appeared; in the morning the people took off their
Skirts out, turned up, although

44

Meanwhile a Christian lady had hurried to her seat, with her shirt sleeves up to her armpit, wrapped the
her phylacteries around her bare arm and began to babble in Hebrew again.

— And these people emancipated, I thought, want
want to be Germans! — They have their special food, their
special customs they hang throughout the world as a separate people
together, and yet want to claim in Germany that they are sincere Germans, in France that they are French, believes that
in the event of a war between France and in England they are English! Can you
Germany, the French Jew will regard the German as his enemy, that he will join the French

Christians would feel more committed than the German Jew? —

One hears it said that if the Jews were emancipated, their prejudices would disappear of their own accord: but
how? If they do not want to give up these prejudices even at the price of emancipation, they will

waive when they are emancipated? Do those countries show where the Jews already
are emancipated that the Jewish population there does not consider itself a particular people

hold more Have they renounced the hope of the Messiah, the distinction between impure and pure food,
and, what is connected with that, between impure and pure people, have they renounced circumcision, the use of a
special language even in private life? In Germany, are not those more liberal men who want to reform Judaism confronted
by the most determined opposition on the Jewish side, which does not even want to be emancipated? The Jewish
money king himself sits at banquets in front of a kosher bowl and thus tells all nations openly to their faces that he

which he Christian ambassadors

I consider them unclean! These rigid people in Germany are only in these days that they submitted a petition to the Bundestag in which they

45

suspect the Jewish men of progress as revolutionary minds and the challenge the German Federation to suppress their efforts by force! I know I do not know whether this remarkable document was actually handed over to the Bundestag; but I do know that it was delivered to an influential Indian in Frankfurt for the purpose of handing it over. And who are the revolutionaries? Those so-called innovators who supported the revolutionary idea

of a Jewish secular king, or those stubborn Old Believers who are most eagerly supporting this idea? In Fürth it has been heard in recent days that a clear-thinking Rabbi has been able to overcome the opposition experienced the case

saw his entire existence threatened. The Old Believers have formally sued this widely respected man at the Bavarian Ministry

and proposed his removal; all Jewish community members had to vote whether he should stay in Fürth or not; and with exact details a few more votes were cast in his favour. This is how it is in one of the largest Jewish communities in Germany! And what accusations have been made against this man! of which one is praised that here the advantages That he had let his daughter eat lunch with a Christian family in Nuremberg, that he had walked on the Sabbath with a Jew who carried a stick,

that he had rung a house bell on the Sabbath, that laundry was seen hanging on the floor of his house on the Sabbath, from which it can be assumed that this laundry the evening before after the beginning of the Sabbath, etc. — and such People who are so rigidly attached to those old concluding misanthropic Prejudice

hanging that we consider unclean for servants and dogs, as their ancestors did, Even if they do not say it to our faces, such people want us to give them full civil rights, that

46

they should be enabled to hold official positions,

Become superiors of the Christians, government and institutional officials! —

The emancipation of the Jews does not lie with the Christians, but with the Jews themselves.

Our educated year

hundred wants to promote human dignity in all people

but it demands the same from everyone in . who claims this recognition . a
relation to others. As long as the Jew considers his people to be the chosen one and every non-Jew to be an impure
to his servitude

creature: would it not be foolish of Christians to give the Jews equal civil rights, to place them above themselves in
offices and dignities? If you want these rights, give up your miserable prejudices
your national

anerken-

certain

closing separate language in French! As long . so become Germans in Germany, in France
as you remain a people connected throughout the world, closely bound by a common hope aimed at the suppression
of other people, as long as you have religious principles that degrade non-Jewish fellow human beings to the
point of being dogs, it is an unheard-of presumption to expect the peoples you despise to . which your
divide you. For the enlightened among you, it is little that Germany demands of you, must demand, in order to
give you equal civil rights: a reformed . their rights with

tes Jewish confession. The sentence: «Love your neighbour as yourself!», on which the welfare of humanity is rightly
based, is not originally Christian, it is Jewish (Leviticus 19:11).

. 18 .7). Based on this sentence . supported by others
Old Testament passages . a new confession; but it should be understood in a sense,
according to which the term «neighbour» is understood to mean every fellow human being . not just
the Jude . not like Deuteronomy 23:19, 20, where it says: «Of your brother you shall

but you shall make profit from the stranger! » In this confession it is stated literally that from now on it forms the norm of your faith and behavior, and that you renounce everything . What does not agree with him is that you especially hostile messiahship, the difference between clean and unclean foods and the

It is certainly not to be thought that the so-called Old Believers will sign such a confession: so let them persist in their old foolishness and be left to their fate!

But brighter thinkers , who sign it , who change their worship practices and thereby formally change , separate themselves from those ancients . These then have a founded right to emancipation, and Germany will not deny it to them. Do you now want to

but not separated from the old , they show that they still have common Jewish - national hopes that the connection with their fanatical fellow believers is more important than joining the community of German bourgeoisie: and then they may no longer speak of emancipation or accuse the German spirit, which, however, with its reforms, does not go beyond the doorstep, but no one

Others , than yourself.

author's guiding principles

"I am not attacking the man of the century, but the millennium, which he has left his mark on. is not a friend of a great man if one everything he does is blindly good, but if you warns of mistakes and tries to correct them. I will take a shadow from his name and him, if necessary, to another, our common economic policy that corresponds to German interests The great Bismarck can only fight with fiery the iron, not with rose water."

"Banking, stock and stock exchange privileges are, as things They are therefore practically the Jewish press, the Jewish scholars and the Jewish dian representatives protected with all their might and promoted."

1875 Perrot

1. Introduction.

We live in a time that is moving and fateful for our people is that it has become the duty of every German-conscious person to to participate in the design of things.

bring enlightenment so that we can penetrate to the deepest sources, Anyone who is able to do so must. Nothing and no one can hinder research if we want to master the terrible situation in which we disastrous actions of the past.

Whoever says that the extremely sad signs of the present time, Corruption, racketeering, moral and economic decline in German people merely consequences of the World War and the so-called world crisis, repeats phrases that the uncritical public is convinced of "Jewish presses written in German" were recited daily to hide the real reasons and to deceive the German people. lull.

Whoever wants to understand his time must look into the past. Far back, to the middle of the last century. There lie the Reasons that have led to the current situation. There he finds answers answer to the questions that so many German-conscious people have asked themselves:

How did it come about that the Second Empire, to which the Hohenzollerns belonged in three years of painstaking, goal-oriented work, the stones were collected have not fulfilled the longing of the German people?

Why was it that the path taken in the new Reich no longer remained the straight and pure one that was founded by Frederick the Great and his ancestors and descendants, despite all storms, was?

Who were the switchmen who caused a wrong path which was so disastrous for our German people? Who are the guilty parties who will harm our people for generations have brought about the most severe distress, the deepest suffering?

If we want to research it, we look in our history books and the detailed, diligently compiled sources work in vain. They complain about the conditions that developed in the Second Reich have developed, but they avoid the real causes, such as beating around the bush. Some, because they really have no idea, where the causes are to be sought, the others glide elegantly over the truth away because they have something to fear. For once it is known, then

5

A storm will arise and the rule of that clique that today the beneficiaries of the corruption so skillfully orchestrated by their fathers fare! The people would, if they could see clearly, with the initiated brokers terrible judgment. Knowing this, they hold with claws and teeth the truth for more than sixty years by all means. They have understood how to set off the first warning and alarm clock and all to silence his friends and followers, to slander them, to economically to harm or suppress, as we have experienced recently on the National Socialist movement and its leaders. This time these means are ineffective. Even the last resort, terror, will prove to be ineffective. prove powerful.

The first warner and alarm clock was an idealist of selfless fervor Love of the Fatherland: Dr. Franz Fürchtegott Perrot, has since the day he recognized the great danger for the German people, his whole action He has devoted his life to enlightenment and is convinced of the impossibility of to achieve a reversal on the fatal path, shattered. Dr. Fr. Perrot was born in 1837 and died in 1891. He came from an old French noble family from Chateauroux in Berry. His grandfather Jaques Francois Perrot was one of the creators of the first French version and joined the first parliament as a Moselle deputy. In 1789 he laid the gave up his nobility. He passed on his passionate love of his country to his descendants are inherited. This is a trait observed among many French emigrants. respected quality that she is the new, or rather regained father country often love more passionately than the Germans who always stayed in the country; is

It is the Germanic element that was present in the various emigrations to Germany. Jaques Francois Perrot settled in 1815 naturalize with his family in Prussia and was highly respected there and loved as a justice of the peace in Sierck on the Moselle until his death. His children felt completely like Prussians. One of his sons, Franz Jakob Perrot, was one of the most important lawyers of his time. He donated the Prussian people with an excellent body of law: "Constitution, Jurisdiction and Procedure of the Courts of the Prussian Rhine Provinces in civil legal matters (Trier 1842). He died as Royal Prussian State Prosecutor in 1843 in Elberfeld in the young age of only 34 years. His wife Luise Natalie Friederici was a close blood relative of Christian Fürchtegott Gellert; She was a highly educated, sophisticated woman who focused on character development her two sons had the greatest influence.

Dr. Franz Perrot was originally an artillery officer, but found Professions did not bring him real satisfaction. Early on he turned to scientific, especially political and economic studies. His brother and Fellow campaigner Karl Herrmann Perrot, born 1843, died 1917, was the well-known pioneer for our colonies, especially East Africa. Although he excelled outstanding contribution to the development of this colony – he sacrificed this cultural work his entire fortune – he was honored for his courageous

6

German attitude and pushed into the background as far as possible crowded.

Today it is time to bring the main works of Dr. F. Perrot to light to move, because spring has come to the German people. Today They are no longer being hushed up, as the people have been awakened by Adolf Hitler! The wave of popular movement is growing bigger and bigger every day, which will soon have the power to eliminate the parasites who have been To suck and sweep away the mark of the German people.

If you want to cure a disease, it is not enough to just treat the symptoms and combat them. One must get to the cause of the suffering to get to a poisonous ulcer. Regardless of this, the Knife of the doctor who wants to help the patient, to save him, also if it causes pain. Pain for an ideal, because a shadow must fall on a much-revered personality.

It is folly to doubt the greatness of Goethe or Napoleon, although both had characteristics that are to be blamed. Where there is light, there is a Shadow! The brighter the light, the deeper the shadow must be. This is a law of nature. These revelations also create a character= Bismarck's weaknesses will become known to wide circles, which have always been concerned was carefully concealed. The disclosure of these Weakness immediately to the masterminds who use this weakness to the detriment of the German people and used it to their advantage. The National=

Socialism knows no personality cult. Through truth, greatness
Bismarck's can only be diminished for Pharisees.

There are many Germans who consider Bismarck to be an anti-Semitic.
He was perhaps in his youth. The critical comments about Jews,
which are always cited as evidence, all date from before 1850.
Since his time in Frankfurt, however, where he had a lot to do with the rich
Jews, where his friendship with Amfchel Rothschild began,
He never made anti-Semitic remarks again. He has since then
great admiration of the Jews and a fusion
of the Jewish with our race. He spoke of a
certain "Moussaux", which bring the Jewish blood to the Germanic
would be, as was the case with the mixing with the French emigrants.
It is hardly likely that the Rothschild family custom, which
Tradition has proven that the male members of the family only
pure-bred Jewish women are allowed to marry, while the daughters are allowed to marry the
nobility of the countries. The Jews only have him
completely one-sidedly oriented, as far as they considered it necessary for their purposes
They convinced Bismarck of the advantages of the Jewish race,
that in 1869 he completed Hardenberg's work and the emancipation of the
Jews in Germany. Until then, no Jew was allowed to
hold public office. He even later joined England
and France, Romania forced to grant the Jews equal rights there too=
to give authorization, against the will of the people and the government.

Only those who have never been under Jewish influence for a long time, only those who have
experienced the sophisticated adaptability of this race, which is always so
long, as the Jew wants something from the other race,
brings for the development of Bismarck's attitude towards the Jews
no understanding. The Oriental masterfully understands his opponent
ftudy, fspot out your weaknesses and act accordingly! It is a
undisputed fact that the assets of the originally moderately wealthy
Bismarck, since his stay as Chancellor in Frankfurt, through the
advice from his Jewish friends increased more and more, that the Chancellor
left many millions at his death, which naturally contributed to his income
as a state minister had no relation at all. On the
The Jewish influence is based on Bismarck's acquisitive spirit.
This statement does not mean, however, that Bismarck acted dishonestly
He only deviated from the custom
as a civil servant not to make any financial transactions, or through his

Gerfon v. Bleichröder.

Through the influence of Notschild=Bleichröder, Bismarck, without realizing it,
want and notice more and more dependent on the international
Jewish big finance. Bismarck's friendship with Bleichröder was a
so intimate that he always had unannounced access to the Chancellor, a
A favor that no one else could boast of.

It is little known, or long forgotten, that in the forties Rothschild
years of the last century founded two newspapers – one of them

was called "The Imperial Facade" – whose main tendency was to use the proven Prussian financial constitution as "outdated", "backward" and "no longer up to date"
He has undoubtedly also contributed to the lively friendly
The communication that took place between him and Bismarck in Frankfurt was not opportunity to convince the Chancellor of his opinion
Rothschild's agent in Berlin, G. v. Bleichröder, ensured that these
Bismarck's ideas remained firmly established. The introduction of gold currency and the financial constitution of the German Empire are based on these influence. The worst gift, however, was the Stock Corporation Act.
When it was published on May 20, 1870, the Jews could be sure that the majority of the German people had no idea what terrible gift that was given to him.

But Dr. Franz Perrot saw clearly.

How the situation appeared to his eyes at that time, we can best see the description of his brother Karl Perrot from the magazine "Der Deutsche" (Vol. 8, Issue 10) of June 6, 1908, which we reproduce here verbatim give:

"Above all, it was the misguided financial and economic policy in Germany, which makes the states more and more dependent and more dependent on international big finance, which the rise attracted attention, and his aim was to provide the state with financial

8

and to regain economic independence, to protect the people from exodus exploitation by Jewish big business and to protect the powerfully growing to combat corruption.

In this sense he was tireless and successful in word and writing and has put all his skills and his last breath into the good cause his fatherland. He was never a pamphleteer.

Shortly before the outbreak of the great war in 1870/1871 I found him in his office – he was then the director's secretary of the Rhenish Railway society – lost in thought, his head sorrowfully on the
He sat at the desk, leaning on his hand, and when I asked him what he so deeply moved, the following characteristic, prophetic answer:

"While we await with the greatest concern the inevitable approaching facing a great war, has a small but powerful and unscrupulous Clique in our country a thoroughly immoral stock corporation law for exploitation of the country and its people, which requires personal responsibility and all the experiences which England, France and the United-United States of North America for more than a hundred years the field of stocks, is thrown into the wind. If this Stock Corporation Act is approved as proposed, we will definitely experience a short, great dizzying era, which will inevitably end in a few

years will lead to a terrible financial and economic crisis and our fatherland is thoroughly corrupt, from the clerk to the minister will p~~ate~~ate."

This with patriotic fire and the tone of firm conviction
The words spoken frightened me not a little and my objections,
that we rely on the state as the guardian of public morality and
He knew, to my chagrin, that he could abandon the general interest
by pointing out that none of the helmsmen
Statesmen must rise to the occasion and see through these tricks
could.

He now did everything in his power to inform people about the danger threatening here and worked tirelessly in this regard, but the consequences were evident soon. His powerful opponents worked effectively with all their
The "Kölnische Zeitung" withdrew
his cooperation, as she expressed it, because of his reactionary views in the field of stocks. For the same reason, his
official position at the Rhenish Railway Company, a stock corporation company, untenable.

He vowed not to accept a position with a stock company under any circumstances. to take up the fociety as long as this immoral law existed, and
has kept his word honestly. In order to avoid the many hostilities that

9

ftreaft and quickly sent the now deceased Consul General
Obladen followed him to Rostock to recruit him for the management of one of the largest
Rhineland banks under the most favourable conditions.
advantageous this offer was, Dr. Franz Perrot remained firm and refused,
although it must have had much to tempt the poor man.

In the meantime, the great war of 1870/71 broke out and Perrot, who also
campaign of 1866, led an ammunition column,
At Gravelotte, he led the way at the critical moment when the
Artillery of the 9th Army Corps had missed its target, its ammunition column
under French fire over a bare ridge and turned
fo averted the impending danger. He was decorated with the Iron Cross for this.

When I met my brother during the campaign,
I found it in a nest of proof sheets of his work 'The Fight Against
the exploitation of the public through banknote fraud and paper
pejt' (Roftock 1872, Ernst Kuhns Verlag) eagerly endeavored to look through it.
To my question: "Fanz, can we not wait until the war is over?
Is it over? he answered me briefly: 'No', I am not afraid of the French,

We shoot them together, but Jews and Jewish comrades who during we stand here for the fatherland in the field, digging the ground, and everything corrupt us, I can't get to them with heavy artillery."

With unparalleled self-denial, he continued the fight with his pen during the campaign from France.

Even before the Frankfurt Peace Treaty was signed, Dr. Franz Perrot submitted Chancellor Prince Bismarck made a remarkable speech in May 1871. fcription in which he proposed that all German and Luxembourg private railways by the state using the five billion the French war reparations and to use the surplus of the To use the income for what we later use the capital against all rules of a frugal state and national economy.

Dr. Franz Perrot wanted to give the German people this enormous capital hold, and if one had followed his sensible advice, the great, deep economic crisis of 1875, the outbreak of which he prophetically predicted would have been avoided and we would today is the most financially powerful country in the world.

This proposal was also considered at that time, but here it was the banker Bleichröder, the former agent of the House of Rothschild, who acted in the interests of international big finance to prevent the execution of this ingenious plan vain, a historical fact published here for the first time becomes.

Dr. Franz Perrot now graduated as a political and economic expert the conservative party and developed an extraordinarily active literary activity, through which he inspired the Reich Chancellor to a position to determine economic policies that are more in line with the common interest But to do so, it was first and foremost necessary to eliminate the harmful influence Bleichröder and the two powerful ministers acting in his spirit

10

v. Camphausen and v. Delbrück – and for that, fat Dr. Franz Perrot used all his skills.

Nevertheless, the fateful, galloping, deliberated, in vain also in the Reichstag by Dr. Tellkampf opposed the Stock Corporation Act, it Under his influence, the short, great founding era took place, which collapse in 1873 followed immediately."

That is Karl Perrot's report.

Now the book itself should speak. It was published in 1872 in Rostock. The reader may form his own opinion as to whether Dr. Franz Perrot fhis warnings were right, whether the consequences he predicted have occurred testified.

) This method of enforcing unpopular and harmful laws has
We subsequently had the opportunity to get to know each other sufficiently.

b. Preface.

The banking question is a world cultural question and at the same time represents an essential part of today's social question. It is a question of interests in the broadest sense of the word. It is not only interesting, highly interesting for every thinking person, but it reaches into its conclusions frequencies also to a much greater extent than is commonly believed, up to the wallet of every single person, even the poorest.

What is called the banking question is essentially nothing more than the question whether we will continue, as unfortunately has been the case so far, to give our German citizens what they want to grant an annual national gift of 7-10 million thalers, without us having the slightest reason to do so.

The so-called banking question is a very extraordinary one. It is a personal privilege, namely the privilege of making money in the form of banknotes.

It is almost unbelievable and yet true that until then it was possible to keep the nature of this privilege at least to the eye of the masses and almost completely obscure even our educated people.

In and of itself, it is clear to every impartial person that only the state can issue banknotes. The fact that the banknote is nothing more than a piece of paper, is as paper money, would hardly ever be denied to a person. It would have occurred if the central bankers had not used their entire far-reaching influence, especially in the daily press, such as to spread the whim of sophistry about what is in itself a simple matter, that it was indeed difficult to get through the accumulated brimborium of sophistry, to the clear core of the matter. – In particular, I keep trying to push the ridiculous claim that the banknote is a bill of exchange, while every merchant knows that the bill of exchange costs interest, which the banknote, on the other hand, records them.

Whoever spends 3 million thalers in banknotes and one million in cash, for 2 million interest-bearing papers or bills of exchange deposited, the state simply enriches itself at general expense with the proceeds of the 2 million Taler, for which no cash is deposited: – no help will be given by the state's sophistry.

We now have such non-cash banknotes in Germany for over 106 million thalers and it is calculated that the central bankers from this

1) We have 4.7 thalers of paper in Germany, 3.5 in England and 1.3 in France per capita according to Federal Chancellery statistics.

Privilegium an annual national donation of 7–10 million thalers win.

That a regular grant of privileges of this amount would result in Form of a noticeable increase in the cost of all needs and an impairment all wages and salaries, i.e. in sum as an indirect tax on the entire population should be very clear to any impartial person; and that, moreover, privileges of such kind and extent the worst consequences and dangers involved, is probably not dispute, but apparently is not given sufficient attention.

It is obvious that such an enormous privilege is not only sought to protect and preserve the privileged by all means but it also provides the privilege itself with plenty of the means, the struggle in which they defend the interests of the entire public to lead with supermadness. This enormous The struggle for interests is all the more important as the owners of the privilege of the note holders and co-interested parties of other Privileges are: – these are tax privileges and especially also the stock company privileges, under which the latter in turn, the railway joint-stock company monopolies especially – It is essentially the international bankocracy which is in possession of these enormous privileges and by means of the shares= social system itself, our higher social classes on a large scale begin to become co-interested in this colossal exploitation economy power.

We have already stated elsewhere that in the present interpreted context, the actual and real cause of those phenomena which the civilized world today calls the so-called “social question” and keep them in concern. – The socialists claim Exploitation of labor by big capital, but they seek, and fo also Karl Marx and Laffale, the cause of this exploitation at the very reversed place and therefore propose completely wrong, utopian means to remedy the situation. The opponents of the socialist theorists have mostly easy enough to demonstrate the errors on which the brooding mind of the Socialists. But now, too, a One deduces what the socialists regard as theoretical theoretical proof of the exploitation of labor by big capital is demonstrably false, ergo goes with natural and correct Things, and it is nonsense to speak of an exploitation of labour by the to want to talk about pension capital.

However, such exploitation of labour still takes place, namely not only the so-called wage labor, but all labor in general through the Big capital really and demonstrably takes place. The evils that follow this Exploitation systems are actually increasing enormously. But one has so far the ass things have not been seen properly and consequently from no side the right remedies have been proposed, and the opponents of the socialists are

in part even went so far as to deny and contest the evil itself, because they searched for the causes of it in vain.

The evil is now undoubtedly there, and indeed in colossal extent that is growing daily. The cause of the evil is none other than the senseless privileges of big capital, by means of which it enables will be a real exploitation of labour, and indeed of all labour in the greatest extent, up to the Prussian Privy Council, even up to the Minister to put it into action systematically.

We estimate the direct yield of the combined unnatural note and tax and stock company privileges in Germany alone 50 to 60 million thalers annually. This amount not only covers the work, in the form of wage and salary reductions, etc. and in the form of increase in the needs of life, but it arises from all Work, it arises from the state, it arises from modern cultural development even greater indirect damage, indeed a real impending danger, the latter in particular through the stock market fraud, whose disastrous effects emerge in an ever more terrifying manner, and already in itself a social question of the greatest importance.

If you take away the privileges, then not everything is, but at least the by far the most necessary and important thing to ensure our social development to return to its natural course. One will then easily find that it is folly to try to shake the inheritance rights which a god— is a natural law established by law and which we cannot change by any artificial order of things. It is not the inheritance law that accumulates unnatural Wealth, but the foolish privileges of pension capital. Say There is even a saying in popular parlance: "Wealth does not remain in the third generation". After the abolition of privileges, it will continue no one can think of an equal distribution of all property and especially of landed property; work is in the be able to see their natural demands fulfilled as if by themselves and a social question will essentially no longer exist or at least cease to exist more and more.

Here again, the principle that Above all, the cause of an evil must be seen correctly if one wants to find the right To find a cure. Perhaps we will be given credit for the confess to having done this first in the full extent of the serious question. Finally, there would still be those elements of an unnatural capital— movement and disruption of the natural development, which the today's national debt system and the relationship between productive and unproductive expenditure in the state budgets. Here too, to solve another part of the social question, as we have done in our "time" questions").

1

Perrot, Bismarck and the Jews.

First, we are dealing with two questions of the just described
Complex social phenomena – with two questions, which
for now the most pressing for a solution, these are the railway and
the banking question.

We have devoted a number of works to the railway question,
which have been published partly in bookstores, partly in this Eye=
views are under the press). The bank question is addressed to the present
Book: The joint-stock company question in its larger context
we hope to deal with in detail in a special paper?).

A phenomenon of the most serious kind is the influence which most
beneficiaries of privileges in an unbelievable extension to the
public press, especially the daily newspapers, are already able to practice
This influence actually goes so far that the vast majority
even the more important so-called "liberal" and "independent" newspapers
definitely more the interests of the privilege holders than those of the misera
contribuens plebs to perceive sich call. One would feel
would be quite misleading if one believed that in our major daily newspapers
an unbiased assessment of the banking issue, an honest effort to
Enlightenment of their readership about the core of the issue, an energetic approach
fight against the socially harmful privilege of notes and a strong
safeguarding the greater common interest.

On the contrary, one usually encounters a certain reluctance to give up this privilege.
to touch on legal issues. The most extensive circles of readers, which
Knowledge about current affairs is almost exclusively obtained from the daily press,
Questions are literally hushed up and where addressing them is unavoidable=
becomes possible, it is done with fundamental evasion and artificial concealment=
holding the core point of interest, which is the only obstacle to a
reasonable and just regulation of the issue. Yes, our so-called
The "liberal" mainstream press even advocates the preservation of privilege
legien, without regard to the overall national interest and the demands
of equal justice. – Unfortunately, things are already like this,
that the daily press is controlled to a very serious extent by the privileged circles
directly and indirectly dependent. – The privileged

18

Circles, in proper recognition of the power of the press, for a skillful, systematic representation of their interests in the same careful care worn.

In the leading article of its issue No. 64 of March 4, for example, the "Köln. Ztg." the bank question. She would still have remained silent if the reason had not come to them from outside. The

"Köln. Ztg." does not ignore the fact that only the monopoly=clique interests and fine Power, the simple, natural and obvious solution to the banking question

"We would like to believe," she said, "that the determination a limited maximum amount of the not fully covered

Notes, according to the provision of the Peels Act, would like to satisfy.

In any case, the latter solution would be more gentle for be-
ftant interests, which are to be reckoned with and which are based on
a possible consideration also a fully valid claim
have."

The "Kölnische Ztg." therefore wishes the privilege of enrichment individual without work at the expense of all is limited, but not eliminated to see. She obviously only wants the restriction so that hasty abuse of the privilege the hen itself is killed, which lays the golden eggs. The "existing interests" which "Köln. Ztg." wishes to be so gentle, are of course not those of the misera contribuens plebs. The "liberal" paper does not even mention these. In financial matters, it seems, not only the "comfort" but "Liberalism" also appears.

And what about the "fully valid claim" to "possible protection" of those "existing interests" which "must be taken into account", fo the "Köln. Ztg." does not specify where the "full validity" of this claim, but we remember a correspondence which the same "Kölnische Ztg." in its paper of January 4, 1870, which perhaps agrees on the "full validity" of those claims: conclusion is suitable. – We have that correspondence from the "Köln. Ztg." It reads as follows:

From the Grand Duchy of Hesse, December 31. Yesterday's meeting the Second Chamber, in which the government granted Extension of the concession of the Bank for Southern Germany was discussed, was a very agitated one, and that the government had a great deal of weight on the Chamber's resolution in this matter was already shown by the The fact that both the Prime Minister Mr. v. Dalwigk and the Finance Minister Minister v. Schenk and the State Councillor v. Bechtold in the meeting— it seemed, while it is otherwise the rule that the government, when, as here, on motions of members of the Chamber, unrepresented Yesterday, the mistrust that was evident in the meeting that the extension of the bank's concession for Southern Germany with counter-performances which do not belong to the country, but would have benefited individual people

2*⁷ 19

fe, of particular importance. People remembered the previous occurrences= niffe. When the Bank for Southern Germany was founded, a Difference between the information on the price realised by the government acquired 2000 shares and the price at the time of sale of the same of about 7–11000 Fl., which had given rise to discussions, and Even if this point is not further pursued after the explanations given pursued, there remained until now another difference, which was third share issue of the affiliated Bank for Trade and Industry in 1857, was still unclear. At that time, the administrative– council of this bank by the shareholders in the general meeting of January 20, 1857, five million guilders shares of the management al pari, “in order to use them for the fulfillment of the obligations assumed towards the Grand Ducal Government– liabilities”. On 28 February 1857, The bank's management announced that “about 1 million of these had been sold and with the agio profit achieved against the Grand Ducal Government liabilities incurred” and confirmed this in the General Assembly of 4 May 1857, where 6000 shares, equal to 1 million guilders (not more approximately), as used for this purpose At that time, the price was calculated according to the rate of shares in the period from January 20 to February 28, 1857, that they must have suffered a profit of 357,000 Fl., while the Ministry for the State Treasury only had 250,000 Fl. At the 17th Diet, where this was discussed, v. Dalwigk initially sought to by writing to the effect that he of 20 February 1863 to the speaker in the Finance Committee this described as a “purely internal” matter for the bank, flater, however, he confessed, according to the members' reports of the Finance Committee in a committee meeting, that however apart from 250,000 Fl. another 100,000 Fl., but not into the state treasury, paid; he even mentioned how these members ensure the name of the recipient attending the meeting and in the session of 10 November 1863 the

After some reluctance, State Councillor v. Bechtold document incorporated into the official protocol, in which— it is stated that 350,000 Fl. had actually been paid; he but repeatedly assured that only 250,000 Fl. of this had been transferred to the state treasury and declared: “I am not against that in a position to continue paying the 100,000 Fl. from the bank. to provide information; I can only give the assurance that a stipulation on this between the Ministry and the Bank did not take place.” (Page 39 of the 61st Protocol) The defense The government's decision at that time was limited to the fact that no more, i.e. not yet another 758,000 Fl. had been given; but it was not very satisfactory that

20

the Second Chamber unanimously approved the request for initiation an investigation to clarify the aforementioned contradiction. The The first chamber avoided making a decision on this and the Landtag also fñch remained silent about it. The mistrust of the current chamber has therefore a very tangible reason, which was more or less veiled in yesterday's debate came forward, while Mr. v. Dalwigk had the courage to claim, at that time, in 1863, that incident had already been sufficiently explained. He This provoked the contradiction of the then speaker in the Finance Committee, KJ Hoffmann, and the other committee member Bol= hard. With this background, the decisions of yesterday's meeting easier to understand. What is remarkable, however, is that the Chamber with all voices expressed their hope for the North German Federation and on the creation of the law to be enacted there— fet that the ultramontane party, as well as the democratic expected help from there, and that this happens, Although the bank is headquartered in southern Hesse, where the laws of the North German Confederation have not yet been published cation in the Federal Law Gazette. There is just Conditions whose healing can only be expected from the greater State, in the small one they partly escape attention, In some cases the powers of the exploiters are stronger than those of the exploiters. those seeking help. In such situations, the right Knowledge also the reluctant, and so the North German Confederation yesterday the not insignificant triumph of the all— fideal recognition in the Hessian Second Chamber.

So much for the “Kölnische Ztg.” of January 4, 1870.

These are the interests that the “Köln. Ztg.” represents today. That the same “to a possible consideration also a fully valid However, the communication seems to indicate that they are entitled to this. But the German public wants to judge how this excellent “liberal” Big press represents its interests.

The “Köln. Ztg.” recently, on the occasion of the infamous Janvier trial de la Motte let high words of moral indignation ring out. If our

"Liberalism" does not rise higher than the "solvent Moral" of the "Köln. Ztg.", it will not be his fault if we do similar such a process Janvier de la Motte possible. For it was mostly the demoralization that followed the monetary=privilege economy, which has brought France down so much.

If this is not recognized in time, we will follow the same Way: quod deus bene avertat. Unfortunately, strong beginnings have already been made.

We have endeavoured to build a dam against this murky stream
This book bears witness to this, as far as the
We have also, without further comment, the polemic
which Dr. Al. Meyer, perhaps not only
on his own initiative, in the fine "Deutsches Handelsblatt" against us

21

Since Dr. Alexander Meyer is Secretary of the German trading day and is also a member of the bank commission of the same, which consists of some 20 bank directors, the article by Dr. Meyer perhaps particularly suitable to challenge the ruling party direction on this issue to characterize.

In the appendix we have some of the statements from the German trade= day and its banking commission, as well as the central bank's stakeholders given, partly also the remarkable work of the Reichstag member Mr. GD Augspurg on the banking issue together with an analysis of the be-known brochure by Mr. v. Unruh on the same question and a proposal proposal by G. Hirth to consolidate German paper money. –
We hope to obtain as complete a judgment as possible on the question to have collected.

Rostock, on the birthday of Prince Bismarck in 1872.

F. Perrot.

22

1. Twelve Theses on the Banking Question.

Article 4 of the Constitution of the North German Confederation provides that statutory regulation of the banking sector is reserved to the competence of the federal government and the Federation is preparing to move closer to its task in this regard.

The importance of banking for overall economic development

does not require explanation. On the other hand, it must be stated from the outset that an economically sound, generally accepted theory of banking has not yet existed, but rather the views on this matter be as disparate and abrupt as possible.

While on the one hand the legal regulation emanating from the federal government The banking sector is likely to be spared for a long time from the most profound Influences on the economic future of Germany, one must On the other hand, one might ask oneself with concern whether it will also be possible to short deadline from an almost inextricable chaos of problems to distill the only beneficial economic truth.

In order to stimulate discussion on the subject, the fchuß of the German Trade Day in February 1870 print some theses which Dr. A. Meyer has put forward. At the same time, however, the Committee of the Trade Day expressly stated that it would consider the above-mentioned the by no means appropriate.

It is now permitted to put forward antitheses to the theses of Dr. Meyer which represent the results of detailed study of the subject contain:

1. It is the exclusive responsibility of the State to provide traffic not only with metal, but also the paper means of circulation, because the state as such can do this best.
2. The "banknote" is a makeshift solution for commerce. As the latter of the paper medium of circulation was already urgently needed, the state understood this task not yet, – instead of remedial fuffifciating the need himself, he grants his authority and his credit to private individuals: – in some cases Although he exercised his authority and obligation in this regard, unfortunately in such a way that he abused them completely mindlessly. The same abuse was carried out Incidentally, the private banks also benefit from the delegated authority, mostly wherever they could.
3. Any "banknote" which is not backed by cash, i.e. by coin is covered, increases the circulating funds by the amount on which it is denominated. The effect of this increase in the means of circulation is exactly that of a public taxation. The definition of "Banknote" as a debt is incorrect. The issue of any not Cash coin backed "note" constitutes a public tax in the

Amount to which it is denominated, because any increase in the circulating funds their compensation is achieved by a corresponding reduction in the throughput average purchasing power of money, in other words, in a corresponding Increase in average prices. – Such taxation is natural The state is and must remain so. The state may, without prejudice, for the entirety of this shelf not to be alienated in favor of private individuals.

4. Every bank note not backed by cash therefore increases the operating fund of the bank by the amount for which it is written and is nothing more and nothing less than something created by the bank that had never existed before "Money". And when Mr. Max Wirth in his "Handbook of Banking" most recently concluded: "There is no fundamental difference between Banknotes and government paper money", this sentence could be even more succinct be defined as follows: "Between notes not covered by cash deposits and "government paper money" there is no fundamental difference."

5. From the above it is clear exactly what tax amount the notes' emission brings to the banks and it is a tax which is almost without We also have herewith the declaration of the fact that has not yet been sufficiently appreciated that the activity of all capable Financiers with such a penchant for the establishment of central banks where the state does not set specific limits on this preference. – It is clear that the tax resulting from the bank's note issue income is greater, the higher the amount of non-cash covered notes, hence the tendency of all central banks – if possible many notes – with as little cash coverage as possible. – The "brittle" Behavior of Prussian administrative practice in granting concessions for note banks is probably based on an unclear feeling of this expert and can only be praised.

6. The granting of the authority to issue banknotes to private individuals constitutes According to what has been discussed so far, however, a state-sanctioned entry in direction, which promotes an unmotivated accumulation of capital in preferred The central banks are acting on an unnatural and therefore unjustifiable accumulation of capital in private hands, by largely distributing the tax revenue contained in the note issue almost has the character of a public donation: – Performance and There is no motivational relationship whatsoever between the performance and the counter-

7. The issue of banknotes is not to be regarded as a banking transaction at all. – The paper medium of circulation, which traffic experience has shown absolutely needs it, must and may only be granted to him by the state The state simply creates "paper money" for this purpose. This paper money constitutes a tax just like the "banknotes", not a debt. The process is simply this. The citizens agree to increase their means of circulation by the amount of paper money, which the traffic requires, thereby increasing the current the state income by the amount of the paper created; in return,

24

but gradually the purchasing power of money accordingly and thus acts as general tax.

8. Experience teaches, as Max Wirth says in his new handbook of

Banking concludes that "the regular redemption of banknotes at the cash desk of government paper money by accepting it in lieu of payment the state coffers are amply replaced."

9. A "state bank" is therefore in no way necessary. – The Experience shows that carefully and sensibly managed state banks have done relatively good work by at least created a unified means of circulation in their notes, and others= fidely, through their good management, they were relatively advantageous in and of themse^l. But it remains no less true that these state banks are state and private business in just as impermissible a manner as the private notes Banks. – It is not the state's business to conduct banking business. State banks are therefore in principle inadmissible.

10. The current confusion regarding the banking issue will Most of the time it is caused by the fact that the creation of the The circulation of the necessary means of circulation is mixed with banking transactions, while both are in themselves quite heterogeneous things. As soon as you have both separates, clarity comes into the confusing matter.

11. Not only the concession system, but also the normative conditions are superfluous with this solution, because it is not subject to any Doubt that the banking business exempted from the issue of banknotes is to be completely released. – The question of joint-stock companies has to find their solution in a larger context.

12. The quintessence of the above thesis would therefore be the following:
Bank question:

a) The state creates the mechanical convenience of transport necessary paper circulation media by issuing government bonds paper money.

b) All banknote issuance ceases.

c) No more state bank.

d) Complete liberalisation of banking operations.

2. The bank squeeze.

of the permanent committee of the German trading day,
'reduced to the question: What is a banknote?

The permanent committee of the German trading day has by means of question= a banking squeeze at the German banking and trading centers
The report on the results of this inquiry is available in print.

The result can be summed up in a single sentence: none

On this side, even the slightest doubt is raised that the bank-note is in itself the correct form of the paper medium of circulation;

25

– only Rostock (Dr. Witte) wants to get rid of the banknote altogether and replaced by simple government paper money.

It should be noted that the questionnaire itself does not contain any question which could lead to the conclusion that the author of the same in any way to the possible economic legitimacy of the state= paper money instead of banknotes.

Anyone who sees the banknote as the right, scientifically motivated and practical who considers the paper medium to be the most useful, will be able to having to answer the following questions to yourself and others:

1. Why can't and shouldn't the banking business, like any other, be completely be released?

2. What is better and more correct: a state bank, only private banks, or both at the same time?

3. Since nobody can even think of making note banks completely free= admit: – what about the concessions or normative provisions? conditions?

4. Concessions are seen as a great evil, and people want now introduce "normative conditions" instead, but for the fixation of the normative conditions there is also no certain principle, as for the concession conditions and the control is in both cases equally unfortunate and – where the intention to deceive the control is present – immediately ineffective.

These questions and the related secondary questions lead to a completely inextricable labyrinth. The proof of the correctness This claim is most emphatically supported by the above-mentioned Report on the results of the bank inquiry.

The survey gives us a variety of views and opinions, which – it cannot be a burden on me to state the fact – which, I say, it couldn't be more confusing and contradictory.

This is so far the last consequence of the assumption that the banknote the economically correct paper medium for communication.

If I now contradict all the respondents of the questionnaire – except for Rostock – the banknote was completely abolished

and only wants to see it replaced by government paper money, then I am Fully aware of the inadequacy of such an isolated radical contradiction. But since I do not express my opinion lightly, but only on the basis of the most laborious Studies and strenuous intellectual work, as I also opposed currently after careful examination of the historical facts and the now again present results of the investigation cannot change my opinion, rather, I only find it strengthened and confirmed, so I am faced with the extremely difficult perhaps very thankless task, almost alone against a generally accepted view, which is also supported by powerful private interests, argue. It gives me little consolation that I have my concerns fight approved by the most notable of our national economists.

26

that they, however, consider an open approach in this sense to be unacceptable at the moment keep as safe as possible.

From the motivation of the questionnaire used for the survey – how the in the “Memorandum of the Permanent Committee of the German Trading Day: On Banking” is included – it follows that the questionnaire, as well as its respondents and most of our Bank theorists, who are of the opinion that the banknote, as The memorandum expresses itself cautiously enough, a “document, a Obligation certificate of the issuing institution or individual viduums” fe.

The bank theorists and now Max Wirth in his latest Handbook of Banking draws the conclusion even more precisely; Wirth gives as the quintessence of his handbook: “There is no fundamental Difference between banknotes and government paper money. Both are promissory notes.”

However, this definite must be considered inappropriate in such generality – M. Wirth defines this “guilt” more precisely as “Forced loan”. But it should also be added that it is not the Creditors note holders, but the entire public of the actual creditor, and that this poor creditor also has to pay interest on the money he lends him.

However, I must define the banknote as a “promissory note”, Despite all opposing views, for absolutely wrongly hold and explain: the banknote is by its nature and by its effect not only a promissory note of the issuer–fts, but a taxation of the state's inhabitants by the issuer by the amount of the note which would have been issued without cash collateral is issued.

My reasons are as follows:

A “debt” necessarily presupposes the idea of repayment or

Repayment of the debt. When creating banknotes, however, a
There is no talk of debt repayment at all.

And where does the "debtor" get the money from in the note-
emission?

The alleged "guilt" arises simply because the grade
issuer his own money and thus the total amount of circulating
money is increased by the amount of notes issued without cash backing.
As a result, the purchasing power of the circulating money supply is gradually
reduced accordingly. However, since this reduction is limited to a large
reservoir, it is hardly noticeable in detail when the emission
does not exceed certain limits.

The bank thus increases its money by the amount of the non-cash
notes and withdraws this amount on this no longer unusual
Ways out of the pockets of the entire public, without even the slightest
there was no idea of ever repaying this "debt".

The so-called "redeemability" of the notes has to do with this "debt-
conditions" to create nothing. That would be
a curious "debt" which, despite constant "redemption", always
remains at the same level. – If one considers the note issue as
Contracting of a debt, yes, one would have to
Above all, remember that the amount of money that the bank has to pay through the
notes issued without cash backing, not from the pocket
the note holder, but from the pockets of the entire public
that the entire public would be the actual "debtor", while
However, the loss in the event of bankruptcy would be borne by the note holders.
centered.

However, since in the usual way there is no repayment of that amount,
which the central bank through the issuance of notes without cash backing –
(I understand, of course, only the partial amount of the notes issued, which
not covered by cash) – from the pockets of the public, in no
How the speech is and can be,

fo any note issued without cash backing acts only as
public tax in favor of the note issuers,
quod erat demonstrandum.

Taxation, however, is a natural state right, the transfer of which
to private individuals is not only theoretically inadmissible, but with the greatest, of a
most worrying abuses in practice.

The most serious disadvantage of note issuance by private individuals is this,
that this in fact leads to a non-natural, economically not at all
motivated accumulation of capital in privileged hands
which is already considered by the agricultural sector as an unfair
capital withdrawal and credit price increases are perceived and combated
and would in time lead to even more serious consequences.

Issuing notes not backed by cash simply means
Make money for your own pocket at the cost of the whole; this must
only the state. A transfer of this power is completely
and actually synonymous with a one-sided, unjust and economically
economically pernicious monopoly privilege of the mobile large
capital.

The elimination of banknotes by issuing government paper money is
admittedly only advantageous in states in which economic education
has progressed so far that the paper money press will absolutely never again
satisfaction of momentary state needs and
may, and this condition should be the first constitutional law of the
to be created German government paper money.

Incidentally, this is also the only radical solution to all of those prin=
cipal questions, the answers to which are the content of the
Questionnaire on the latest banking queste also tried in vain, or
not tried, as is the case with all answers to these questions, precisely the
Case must be fine; the questions are unanswerable because the question itself=

28

position is based on false principles and because the respondents have
the same false principle cannot be overcome.

But the whole extremely important matter is solved simply, clearly and
logical, once one has realized that the banknote is not a "debt",
but a tax is constituted. The simple solution to all previous
The unsolvable questions are then the following:

1. no more banknotes,
2. only government paper money besides metal money,
3. State banks are both superfluous and harmful,
4. the banking business – NB. without note issue – is completely
to release.

The transition from the present state to the realization of this
Sentences would, of course, have to be the subject of particularly careful consideration.

3. Money, its nature and its economic functions.

A contribution
to solve the banking, coin and currency issues.

The legislation of the German Empire is currently being replaced by task of regulating the monetary system of Germany. This regulation will, probably for a long time to come, the German monetary system will have its shape and the significance of this redesign is perhaps best illustrated by the difficulties involved in assessing the relevant conditions. – In the most important questions of the monetary system, it is not yet the case that economics has become an indisputable, scientific Clarification and the profound influence that the monetary system on all economic relationships is a reorganization of the German monetary system, which is not based on irrefutable scientific basis, necessarily with the greatest economic concerns linked.

The following inspections are based on the intention to Contribution to the acquisition of this indispensable scientific basis in the to provide information on state and economic monetary issues.

It has become an article of faith in modern economics and every Chamber of Commerce Secretary considers himself entitled to make the big statement to say: "Money is a commodity like any other."

With all due respect, gentlemen! – let us take a closer look at this We are dealing with the core of the matter: knowing we are first sure what the money is, then we can do everything else fo surely conclude from this.

The fact that money is also a commodity should not be ignored. However, two things seem to us to be of the utmost importance, namely:

29

Firstly, money is not merely a commodity, but also has

other properties and functions and

Secondly, money is indeed a commodity, but not a commodity like any other

other, but a product with very special qualities,

which rather distinguishes and sets them apart from every other commodity.

It is again the old story that the convenient generalization by means of stamped technical terms are usually bad; every economic Each case must be judged on its own merits.

Most of the work would be done for our case if we had a logical-critical history of money. But we do Unfortunately not, and so we must not let the effort to make a little to investigate for yourself what money was initially and how it then over a long period of time it has gradually become what it is now. It will show that what we call "money" today is not yet a finished closed concept, but according to all assumptions also further will be subject to change before it reaches its full economic clarification has been obtained.

At the very beginning of traffic, there was no money: people exchanged the objects in nature against each other: that was the stage of "barter traffic".

Everything that is exchanged has a "value" and this value is a double: namely, firstly, in the estimation of the one who possesses the object of exchange, then secondly in the estimation of the one who takes the exchange object. The "exchange value" of a thing is therefore regularly a compromise between the value estimates of both exchanging parties.

As exchange increases in volume and frequency, suffice for the compromise of the valuations soon usual stops and usual Agreements that lead to this compromise being maintained for an ever to formalize the increasing number of cases in such a way that the "value" of the frequently exchanged objects, expressed in the quantum, or number the objects to be exchanged are determined by mutual agreement.

A "value" in itself, as a basic economic concept, therefore exists not at all. No thing is endowed with an absolute value: it has rather, in itself always only the relative value which each one has in attaches his appraisal.

A measure of this value only arises when one object is compared with another is exchanged by compromising the subjective valuations, the two objects to be exchanged are considered to be of equal value. – Again= Such a compromise regarding the same objects in exchange sufficiently often, the result of the compromise becomes the norm and In this way, a usual "market value" is created which in exchange objects that occur more frequently in traffic.

Now the development of traffic continues, with the all= common exchange begins to focus on the mediation of people–

30

who make a special "business" out of this mediation,
fo ...
after a common, widely known and adopted

scale to measure.

As such a common measure of value, one naturally chooses the most common and most viable object of exchange. You gain the Advantage, instead of having to measure each market value against all the others, now all together on a single or at least a few to be able to measure comparatively.

This process of traffic life, which still in historical times to follow, but unfortunately so far one accessible to the wider public lacks sufficient historical representation, we owe the creation of "money". – Originally and first of all, money is nothing else, as a particularly widespread and frequent object of exchange, which is often has become the common measure of value for exchange transactions.

One will naturally find that at the beginning of the development of traffic not everywhere did the same object of exchange become the common measure of value, because the same object of exchange is not always the most common and most circulating. For example, we find in the mainly Agricultural peoples usually have livestock as the most important and most common object of exchange, first used as a common measure of value. Highest It is interesting how the Latin term for "money", pecunia, substantively and linguistically it originated from pecus (cattle). We know, for example, that originally at the beginning of historical times in Italy a cow averaged 10 sheep, so that the latter was like the small change Among various peoples it was, and still is, the custom to estimate the value of objects of exchange in the number of cattle heads and breeding animals.

In other parts of the world with other natural conditions of existence of its inhabitants, have chosen other objects of exchange than to measure value more suitable recommended, so in Russia 3. B. for a long time furs, at some populations of Africa certain mussels, etc.

Once traffic has become accustomed to certain particularly frequent and to use suitable exchange objects as a common measure of value, then it is= At the same time, the custom has arisen to exchange these objects nor in any other way to facilitate traffic. Very This is instructively shown by the use that furs are put to in Russia for transport purposes in historical times. People got used to Even before the Tartar immigration, the furs were to transform a relative measure of value into an absolute value, and a usual traffic agreement was formed that for furs every other object of exchange was taken and given. Whoever had furs knew then that he can receive any other object of exchange in exchange This was quite convenient compared to before: one was now able to instead of surplus natural values themselves, this "capital" in the more convenient form of furs, to store and transport. The furs were

Representatives of all other exchange values: these exchange values are gradually becoming more abundant in traffic, because with the advancing Development increasingly overshoots the work product and finally establishes responsible for facilitating the exchange of these products: the "market".

On the "market" you can get any other exchange item for furs: The furs have thus become "market instructions": that is, they are already a kind of "money", and one can now in the way how furs mediate the exchange of value, the expressions: "buy" and "sell". The furs are now "money", all other Objects of exchange are: "goods". – From the exchange trade develops the "commercial transaction".

During their invasion, the Tartars take away Russian war chests, whose "Currency" consisted of furs. Even in Peter the Great's time Furs served as "money".

The development of transport continued in the meantime. The work surplus became ever richer, market traffic ever larger and the more tailored: the furs soon were no longer enough as "money". Interesting it is, as here, in addition to the emerging metal money, the attempt to runs to make the use of furs in the function as money more convenient for malifieren: – in fact, in Russia they have actually begun to only the snouts of the furs, instead of the whole furs themselves, as valid To set market instructions in motion: – the ratio of snouts to the real furs actually offers an analogy of the relationship from paper money to metal money.

The same role of transport mediation and »facilitation, which in Russia for a long time took over the furs, have in the largest part of the cultural countries of the Old World various metals, especially the precious metals with even greater and more lasting effectiveness.

In Italy, people first learned how to extract and process copper. comparative valuation and exchange mediation through livestock could of course only exist at the lowest level of nomadic and agricultural Development is sufficient. A somewhat higher level of development reached the nearest copper and regularly shaped, with a weight= ftamped quantities of this metal were soon made available for equal value estimate and as market instructions, ie as money uses. Certain weights of copper – the pondo aeris – formed until late in life, the main bafis of the never clearly developed Roman "coinage".

The most common use as "money" is for precious metals, gold and silver. Nature had given the Orient gold, the Greeks made silver most easily accessible: and so we see in the Orient so to speak, the gold currency, in Greece the silver currency emerge. – Here, too, they are first regularly shaped, stamped Weight quantities, which mark the transition to a real "coin= fyftem" will form. With the progressive development of traffic,

these weight quantities more and more useful: – the development of the Retail trade requires division into ever smaller weight units: – the consistent marking of these smaller weight quantities and a common guarantee for the equality of salary and wages weight improvement will soon result in greater convenience of transport

as an unavoidable need: – Cities and states are taking over the Execution of both tasks for their respective traffic circles, as the naturally most suitable organs: – and so in traffic the

“Coins”, initially with one-sided, later with double-sided “embossing”.

– The Romans found it very late – namely only after they had been conquered by the Tarentine war with the Greek colonies and their silver currency in relationship – to the minting and use of silver coins. and since then have had a quasi “dual currency” in copper and Silver. – Gold coins were minted by the Romans much later Although it was also minted, the gold was used in trade in larger Quantities are almost always used only according to weight.

II.

All that is needed is an unbiased assessment of the historical process to come to the conclusion that money not only has no Good is “like any other”, but that it differs from the character a commodity which it initially possessed exclusively, without, however, having completely shed this character up to now.

The original character of a commodity is first joined by that of a comparative value measure, and then that of a market instruction. – The more the property of the current market instruction in money developed, the more the quality as a commodity gradually recedes, but without, as I said, disappearing completely.

In the process of “buying” and “selling”, the money of his completely stripped of its value as a commodity for personal use and nothing more, as a title of value, which is determined by the need of traffic and the customary agreements arising from this have the character of a universal commonly accepted instruction on the market.

So is money, especially the most common precious metal money, from a commodity to a with the “credit” of a market instruction has become a tainted replacement agent of all goods. This representation of all Market values through money have become so familiar to us today that we are constantly in danger of considering the concepts of “money” and “capital” as identical

to confuse with each other.

It is now easy to see what support is being given to traffic and in particular the trade that mediates the exchange of value from this very generally adopted representation of all market values by money— This representation has only made the exchange of value possible in the actual senses are mobilized and both – trade and money – are progressing in their inseparable development, keeping pace with each other: –

Perrot, Bismarck and the Jews. 3 33

The history of money and coinage offers, particularly with regard to the gradual development and refinement of comparative conventional Value measurement the most interesting explanations and evidence for the separable connection of all cultural development with the progress of the monetary system. – This connection has not yet been due attention is given: – how little sufficient is e.g. until now the relation of the Roman financial system, the Roman capital and Retail Trade to Roman Coinage in Cultural–Historical Relation appreciated?

A readable, cultural–historical perspective

History of the monetary system is a great need of time: – if we had it, would have met a very tangible economic need: – We would then see far more clearly the ways for the further development of our monetary system before us. – Of course, this story cannot be compared with success until the right points of view are established. ftstehen: – may we succeed in making a contribution to this ftftfement delivery.

III.

It is now necessary to examine the relations in more detail, which arise from the given relationships between “money” and “goods” have developed.

Instead of the more primitive forms of money – such as cattle hides, furs, Mussels, etc. – is, with advancing culture, everywhere the precious metal money: – only peoples at the lowest levels of culture can make do feven with more imperfect means of payment. – Precious metal money has achieved a universality, which on the one hand stems from its natural property= fcies as a commodity and on the other hand an essential needs of the entire traffic.

It is quite obvious that the more trade expands, developed and branched, the more the need for the greatest possible Equalization of comparative value measurement and at the same time after an exchange–mediating market instruction of as universal a

The natural properties of precious metals made them particularly suitable for both the needs of trade and traffic. It is important for our further discussions, to come back to this point in more detail.

Firstly, precious metals, as exchange value, are almost without exception on the value all over the world and were so in such an early time that they are probably to be regarded as the first universal exchange values.

Secondly, the distribution of precious metals in nature is relatively limited, so that relatively small quantities of it relatively have a large exchange value: – universal “demand” with limited “offer”.

34

Thirdly, one can therefore invest large amounts of precious metals in small volumes can be relatively easily preserved and transported.

Fourthly, one can easily find different and specific weights and shapes quantities of it, which is of the greatest importance for the comparative measurement of value importance appears.

Fifthly, the precious metals are not exposed to spoilage and allow can be stored easily and safely for an unlimited period of time.

All these properties together have resulted in the precious metals from a universal product, at the same time a universal value measurer and a universal market directive and thus finally a universal representative of all in the The values circulating in traffic have become the most important.

So, at first, what we today call “money” was just a Object of exchange, a commodity, but ultimately this commodity becomes a remplaceant, a representative of all goods, of all values circulating in trade and this representation is composed of the two properties of the comparative measurement of value and credit as a market instruction.

If one looks at the course of this historical development and the If one looks at the current nature of money without prejudice, then hardly any There can be no doubt that among the characteristics which we today understand the term “money”, the character of a “commodity” is always still present, but over time it has receded more and more is, so that for us the property of money as a commodity only forms the distant background, so to speak, from which the essential characteristics of the money to an increasing extent.

IV.

A special consideration is required regarding the property of money as value measurer.

The value of a traffic object, expressed in money, is called its "price". We have shown how the comparative measurement of value of all traffic objects developed from the fact that people got used to all Objects on a few, recently almost exclusively the precious metals, to measure. By setting a sequence of certain weights and form quantities of the precious metals in the various smaller and larger circles of traffic, one arrived at usual value scales, which with advancing traffic gradually become finer and more detailed. The relative development of these value scales can be seen in the different different peoples and at different times an accurate standard for the relative development of traffic: – it only takes one Looking at the development of these scales among the Greeks and Romans, to recognize that a finely structured retail trade on such a scale is not could exist. – The imperfection of ancient financial systems is with the imperfection, the uncertainty and the preponderance of the all too frequently changing value scales in close connection.

3 * 35

We can now determine the "price" of an object, especially of a commodity= more precisely define it by specifying how many units the value= scale, the value of the object, or a unit of measurement and weight be equated with the goods.

This "price" is simply a result of the relationship between "supply" and "Demand" between the precious metals on the one hand and the circulating other exchange values, on the other hand, gradually emerged. The price therefore forms a simple relation between the circulating amount of money and the quantities of goods in circulation, or trading objects.

Let us therefore assume, as is actually the case, the number of units of value circulating in trade as relatively constant, so The price of a commodity will rise or fall depending on the sales area of this product, the supply, compared to the existing demand, goes down or up, rises or falls – et vice versa.

The quantity of units of value circulating in trade is determined Incidentally, under normal circumstances, according to the amount of the previous available money in general, if not exactly, then at least approximately.

As long as there was only metal money, the amount of circulating money bound to very natural limits, which allow frequent and sudden large Fluctuations in the total circulation are excluded. The production of Precious metals have, however, undergone great changes over time.

The discovery of America in particular has brought about such a significant amount of the same into circulation, that also the minting of precious metal money increased to a greater extent than the supply of values over=main: – the consequence of this was that in the relation between money and transport objects as a whole, a major change in level occurred: – the money lost purchasing power, ie the price of transport objects decreased on average into the air.

Thus, prices are subject to a double kind of change. Firstly, they change gradually and averagely over long periods of time, just as the relationship between the circulating money mass and the amount the circulating market values as a whole change: – then there is also even more frequent partial price fluctuations, which can be determined by momentary tane economic cycles, but the price relationships on the whole not alter significantly.

We therefore have the important fact that the precious metal induced value measurement on average does not undergo sudden fluctuations in the ratio of the value measure to the measured values is: – it is not difficult to find the cause of this phenomenon in the circumstance find that every inflow to the reservoir of precious metal money gradually equalizes across the universal level of the entire traffic world: – there are just as enormous inflows as since the discovery of America and the gold fields in California and Australia, necessary to achieve this

36

extensive level of improvement generally noticeable over the course of decades to change.

It is obvious that with precious metal money, as with the world oceans, the size of the reservoir the comparative stability of the level, ie for our case of the measurement of value reduced to precious metal money.

V.

From the course of our previous investigations, it should now be illuminate how metal money is far more a form of money based on habitual transfer income-based credit institution, called a commodity Anyone who exchanges money for goods does not consider money to be a commodity own use, but only a generally honored title of ownership, which the “credit” is present, that it can always be exchanged on the market for Goods can be converted. – “Buy” and “Sell” are already “credit operations” only made possible by the market instruction= credit which the money has acquired through customary agreement. – The advantage of these credit operations is simply that they are invaluable opportunity to see all traffic objects in such a convenient form to acquire, conserve and translocate money.

But even this convenience is not enough to meet all needs the progressive development of traffic. Production and sales increased to a stage where even the mediation of metal credit is still great and ever greater inconveniences become noticeable. Even speaking, traffic is looking for ways to get rid of these inconveniences. to help.

The difficulties of making payments using cash on larger Distance initially leads to the thought that the "change" is based on: – Instead of first A paying B and then B paying C, B "draws" on A a "bill of exchange", which C takes in place of cash payment, by he gives the "bill" the credit that A will pay it on the due date "honor" – C changes the debtor and A changes the creditor: – hence the "change". – The advantage of this operation is based first of all that two payments are reduced to one, and this advantage is usually increased significantly by the fact that A and C are in the same place live, but B lives in a more distant place, so that at the same time a payment over a longer distance into one over a shorter distance distance is transformed.

Soon, however, a further moment will be added, which The simpler nature of the change is somewhat complicated. From the exhibition to Of course, a larger or larger period of time elapses before the bill of exchange matures. shorter period. During this time, the change represents a "Acceptance" of A acknowledged claim of C to A, linked to the A's promise to make payment within a certain period of time. A commercial agreement was formed, that every merchant such a promise of payment, called a bill of exchange, in the period from the date of issue

37

until the due date in place of real money and but at the same time assumes co-guarantee as "indoffant", that the bill of exchange will be converted into ordinary money on the due date. The bill of exchange becomes a special kind of "money" which can be quite correctly called "merchant Money." – Bills of exchange are money of limited circulation. duration and limited circulation area, which only opens at the end of its Career in ordinary, i.e. divisible at will and in the ordinary= money that can be used in everyday transactions. If someone wants to use this If he makes a payment before the due date, he must pay a "discount". Bills of exchange are therefore already a type of paper money, the credit of which is subject to special conditions.

However, the change was accompanied by a great inconvenience: – the The amount to which it is denominated can only be issued in full and undivided as money At the same time, traffic has a need for market guidance which allows to transfer large values even more conveniently and easily than in form of metal money to translocate and preserve. A paper

Market instruction of an even more convenient form than the bill of exchange, should
To meet the need: – the “banknote” is created.

The original term “banknote” arose quite logically from
the change: – according to its origin it is actually a change
“Payable at sight”. If one understands the initial idea of the banknote correctly
developed, it is an instruction à vista on in the basements of the bank
deposited metal money: – it constitutes an obligation of the bank,
the presenter of the note at any time, upon request, the nominal amount
to be exchanged for metal money. – These solubility exchanges function in the trade
as a more convenient substitute for the bank's equivalent amount
deposited to think metal money, fully enjoy the credit of the same
within the bank's credit area and are therefore also in the
ordinary traffic of this credit area divisible into ordinary coin,
without “discount”.

These “notes” therefore represent a type of money which
Main characteristics of a generally known standard of value and a
generally honored market instruction already to an almost equally high degree
united in itself, like the metal money itself. – The credit of this banknote money
but is initially linked to the idea that the bank has the nominal amount of the same
deposited in metal. – The market credit of the metal=

The value of money is therefore comparatively absolute, while that of banknotes is only co
– Incidentally, these initial credit conditions and thus
also the nature of the paper means of circulation in the further course of
Traffic development is still significant.

VI.

If we have just shown the idea on which the circulation=
credit of the “banknotes” originally built up, we must immediately

38

also demonstrate how the commercial origin of the banknote, with that
idea was by no means entirely compliant.

By making a business out of it, the private enterprise
to supply the public with the paper medium of circulation which it
was allowed to do so, she naturally had to have a “business” advantage for herself
It is of crucial importance to talk about this “business”
It is important to clearly see the “economic advantage” in issuing banknotes.

If someone can only issue as much nominal amount in notes
wanted when he puts back in metal money as “cover”: it is clear that
there would be no commercial advantage for the issuer:
No one has ever been so stupid as to do such a thing.

The initial practice of the financiers was simply to nominal amount in notes than they had in metal cover: money. They soon relied on the business success experience that the need for transport is usually at least 2/ of the emitted Notes in constant circulation, and that they were for the ordinary Need to convert their notes into "cash" with / "cover" in metal= money in traffic was more than sufficient.

It is now necessary to clarify exactly what the actual consequences are linked to this business conduct.

If someone issues notes and only a part of their nominal value, For example, if we take $\frac{1}{2}$ as cover, namely in metal money, then two things are unquestionable:

Firstly, he increases his working capital by double the amount of the "cover" deposited metal money amount and

secondly, it increases the amount of circulating circulating medium equally= if twice as much.

In return, the "banker" supplies the paper money to the trade, the latter is absolutely necessary, he enjoys as remuneration the very positive Advantage of increasing its business capital by as much as its note issue in nominal amount exceeds the deposited "cash cover" – always before– assuming that, as was originally the case, the "cover" at all only in metal money. – In this increase in business capital There is, under the above–mentioned assumption, the business advantage of the Bankers. – It is clear at a glance that this advantage a quite extraordinary one and that it is all the more significant, the smaller the Cash coverage remains in relation to the banknote issue. Furthermore, it is clear that with the same ratio of cash coverage and banknote issue, the advantage grows with the total amount of emissions.

The possibility for a banker to increase his working capital by issuing unsecured notes to increase the nominal value of the latter is based of course on the willingness of the audience to use the notes in circulation to be honored according to their face value and used as money. The public's willingness to do so is based on several reasons: – firstly on the mechanical need of the trade for paper money: –

39

then on the idea of the "redeemability" of this paper money, if one needs metal money, or the note is denied credit somewhere: – and thirdly, probably also on the greater or lesser ignorance of the general public about the exact conditions of existence of such banknotes. – If one adds a certain amount of personal trust to this

the banking firm, so one has the main elements from which the so-called "credit" of the banknotes.

Even the latest banking wisdom of a part of our economic School seems to have hardly progressed beyond this, compared to the Banknote granted by the public "credit", the banknote itself, as a "Promissory note". However, it seems to us as if one thus always only one word, and a completely incorrect one, in place another: – we have so far understood the nature of the banknote attempted to develop analytically: we continue on this path: the Synthesis ultimately occurs by itself.

By issuing "notes", however, the banker assumes – according to the most prevalent concepts in the public – the obligation, to exchange these notes for metal money at any time upon request: – According to this obligation, the banker must be able to provide the necessary If the entire amount of notes issued is to be converted into metal money: The banker, on the other hand, expects that this "necessary case" will not will occur and, as explained, issues in order to benefit from its business sake, more notes than he has in cash.

The "debt" contracted by this additional emission is now so peculiar nature that this designation is in fact no longer sufficient and another term would certainly characterize their nature more accurately would like: we want to try to find this other name.

To do this, we must now remember the essential second point, that in the case of the issue of notes only partially covered by cash, the amount of the circulating funds in circulation by the amount of the non– The amount of notes in circulation circulating means of circulation thus increases through this "finance" operation" – famous word! – by the same amount by which increased the bank's working capital.

This increase in public funds is now, however, for the Traffic is by no means indifferent: according to our previous discussions, Rather, it should be clear that the increase in means of payment is synonymous is, with a, admittedly only gradually occurring and often hardly measurable Reduction in the purchasing power of money. But before this reduction in purchasing power of money, or – what is the same thing – the increase in the durometer average prices, with not too significant paper issuance, the newly created circulation medium for a while, which the previous Purchasing power corresponding to the current situation. This is usually the case as long Private banknotes remain completely the same:

by issuing notes only partially covered by cash, the operating

the bank's fund for the full amount of the notes not covered by cash increased.

Since the purchasing power of the public medium of circulation is gradually being reduced, speaking links, the issue constitutes only partially covered by cash "Zettel" not only creates a "debt" towards the audience, but also very importantly, the effect of public "taxation" in favor of the issuing bank.

We must now assess whether, firstly, the effect of this taxation with the Services which the bank renders to the transport, and secondly, whether such taxation of the general ity in favour of individuals appears to be permissible in principle. – Nor can one even say that the audience is free to– willingly tax themselves, because traffic is in a kind of forced situation if he does not receive the paper money from where it is actually only come from, namely the state.

VII.

Naturally, another point of the underpass follows here.

In the case of note banks, the practice of "covering" the note issue partly in cash, partly in "securities" Some banks have thus recovered the full amount of their others have replaced part of their notes with cash and securities, and another part of their notes entirely uncovered.

It is necessary to examine the effect of the coverage by securities practices, both in relation to the bank and in relation to the audience.

As for the effect of paper cover on the bank, the same essentially determined by the fact that the deposited securities are interest-bearing The economic result is simply this: the bank buys interest-bearing paper the paper that has passed into their possession makes them then again into money by issuing notes for the same amount, while at the same time the purchased securities are held as collateral by the bank The "operation" simply boils down to the bank by the amount of the note issue, which the paper backing serves as "cover" serves, is enriched: the bank owns the capital questionis twice, namely once in the form of "paper cover" and then in the form of notes: The bank also benefits twice, namely in the form of Interest from the securities deposited as collateral and then in the form of business profit, which is realized with the notes circulating as money becomes.

The effect for the audience is again that of an increase of the circulating stamps by the amount of the paper-backed

Notes, which would be equivalent to a public tax of the same amount in favour of the Bank corresponds.

41

VIII.

The effect of the previous practice of allowing private banks to issue notes which are only partially covered by "cash", is also actually means that the amount of circulating tokens around the contribution of the notes not backed by cash is increased and that, in addition, a significant quantity of paper tokens circulates in circulation, for which there is no cover at all – neither in paper nor in cash – is present. A difference between covered and uncovered notes does not prevail in traffic.

It is clear from what has been discussed so far that the taxation of The public's support for the bank is all the more significant the smaller the Cash cover for the issue amount of the notes. Should this But if it is not yet clear to someone, then it is possible to refer to the preference fee, which clever financiers have been able to achieve up to the present day of the found Particularly instructive in this regard is American financial history. In the years 1810–1840 in America with almost complete banking freedom, and only on the amount their shares limited liability of shareholders a multitude of banks founded, whose founders were just waiting until the taxation of the audience through the sometimes not at all, or mostly only very slightly covered notes in the form of a price increase of the shares, in order to then to sell shares advantageously and to collect the amount initially to pocket this taxation: when this had happened, only then the success of the "business" actually conducted by the bank and proved to be of the kind that from 1810 to 1840 not less than 3000 banks failed. The real business of these banks has actually only one of the founders in the audience committed intentionally and knowingly theft by doing the same taxed exclusively for their private benefit, without even even to try to honestly fulfill the counter-performances promised present.

The fact that, for example, the Prussian administration is still very behaved "brittle" – as they say – with regard to concessions= issuing of note banks is undoubtedly based on an unclear, equal= fame instinctive feelings of the true state of affairs. As a result of this praiseworthy= The responsible persons for the Prussian administration's valuable conduct were those fine who would like to gain a great advantage by issuing as large as possible banknote amounts with as little cash coverage as possible, – were those financiers, I say, compelled to establish themselves on the borders of Prussia, in the so-called "robber states" – nomen est omen! – because these "Robbery states" were less difficult with the granting of the concession, as

Prussia. For example, when a clever financier from Cologne founded a central bank with extremely low cash coverage, and thus particularly large profit, he went to Darmstadt and got the concession for that paper bank.

42

institute, which of all German banks has the least cash coverage and thus the greatest taxation of the public in favour of the Bank: but such a valuable concession was not granted for nothing and the meeting of the Darmstadt Second Chamber on 20 December 1869 only gives a hint as to where the five million guilders of shares went which the general meeting of bank shareholders on January 20, 1857 made available to the Board of Directors of the Bank "in order to Fulfillment by the Grand Ducal Government towards liabilities incurred." – The haste to use who recently wanted to establish a paper bank in Reuss, and indirectly before the entry into force of the provisional banking law for the North German Bund, sheds its own light on this connection, which hopefully will help to bring the insight into these matters on the right track bring to.

There will probably no longer be any doubt why the notes banks always and everywhere with particular emphasis on the justification for the note issue and why the financiers of all Countries since the existence of note banks, the latter have always had such a pronounced This is nothing more and nothing less than than the right of big capital to regulate the trade in paper to provide circulation funds and to collect a tax from the public which entails virtually no expenses.

The issuance of "banknotes" only partially backed by metal money, is also – sans phrase – a public donation to the issuers in the amount of notes not backed by cash).

Only the truly limitless confusion of all previously concerned about money and The prevailing views in the banking sector and the undeniably great interest of the Central banks in this confusion make it understandable that a fact of such eminent significance has not yet achieved such resounding effect– could reach.

Modern economics has all the occasionally emerging problems– claims of an absorbing superiority of "capital" are pure want to argue. These claims are, however, in their generality also unfounded. In the authority to issue only partially by cash covered notes, however, an institution has in fact been created which large capital simply by donation from the public purse to the most liberal, most comfortable and most extensively increased and indeed on a completely unmotivated accumulation of capital in individual preferred hands. – Here also lies one of the causes which the complaints of agriculture justify that capital is disproportionately

withdraw.

4) Paper cover by bills of exchange changes little in this respect, because the bills of exchange are paid by the bank with notes, and the discount gives the profit of this gift capital.

43

IX.

It must be clear, after what has been said so far, that for the important role which "money" plays in trade, no longer has its quality as a commodity, but the main thing is that credit, which has developed over time has become more and more inseparably linked to money, that credit, by virtue of which everyone's money as a representative of capital and as instruction on the market is recognized and rewarded.

The function of money as a comparative measure of value also allows sufficient sufficiency ...

but the price unit can already be considered as a somewhat abstract Measure of value – think, for example, of the English "pound sterling" – on so that the purchasing power of the ideal unit of value depends only would depend on the ratio of the circulating stamps to the amount of objects of value circulating in exchange.

The functions of money are also primarily determined by its market instructions credit. This credit of money is now derived from the property of money, as a mere commodity, but has also already become a highly independent entity, which only or rather from the character of a goods depend.

If we are therefore able – and this precondition is already in has become a fact on a large scale – a market instruction to increase, which we only by convention provide the credit it needs, this market instruction can, precisely as a result of the conventional enclosed credit, fulfill the function of money in the most excellent way. We already have such conventional money: it is simple – paper money.

Such "paper money", which has no value of its own, but functions solely as a result of the credit attached to it, is incomparably more perfect than metal money, and the latter's inherent The quality of a product is, at the current point of view of trade actually only disruptive to the tasks it has to fulfil.

However, due to the physical handling of money in circulation the precious metals, as material from which one can make part of the valuables fabricated, will probably never be replaced, so one will have to deal with this

Accept imperfection and its effect on the attainable
Minimum to reduce must seek.

X.

Pure convention money without its own commodity value is therefore the ideal
for traffic: but as far as human judgment reaches, this ideal is
cannot be realized purely – incidentally, common destiny
of all ideals! – because the physical nature of traffic can hardly be a circula-
tion agent of the physical properties of the precious metals is always completely
can do without.

44

The “banknotes” we have spoken of so far are only a means-
link in the development from commodity money to convention money.
The banknotes were originally only used as remnants for the bank's
deposited commodity money, ie precious metal money, thought of: in practice, however,
They have predominantly become convention money.

One should say that just as it is the undisputed task of the state to
To provide traffic with the metal medium of circulation, just as
It must also be his task to provide the traffic with the now un-
In practice,
This is somewhat different.

Just as metal money is only gradually being replaced by a private information
means of the merchants to a state-stamped and guaranteed
has become a means of circulation, so paper money is also first of all a private
means of information for merchants, initially in the form of bills of exchange, then in
Form of the banknote emerged. The need for the paper convention-
tion money was available before the state and society had a clear idea
about how best to satisfy this need. The
Banknote was simply a necessary transit point of development
development towards paper money. The disadvantages which arise in
in practice linked to the banknote, have also contributed the most important
contributed to the circulation for the appropriate acceptance of paper money
to predispose

The banking business in and of itself has to do with completely different things
than to provide the traffic with the necessary means of circulation.
The banking business is only concerned with the distribution and
use of the circulation medium on a somewhat larger scale,
but not naturally and appropriately with the creation of this circulation-
by means of themselves. The history of central banks is therefore also to a large extent-
ftabe a history of evils, which with such a mixture

of state tasks and private business are inescapably linked and which only in individual cases, depending on time and condition, may lead to pressure.

Now it is to be noted that even very early on the view became apparent that the state had to provide the paper means of circulation: Unfortunately, this was linked to the same error that caused the private banknotes only as remnants of deposited cash in the idea, and people generally came to the conclusion that the state could use paper circulation funds only through a "bank": this is how the large State banks, which are usually not even pure state institutions, but are middle ground between state and private institutions. The legal provisions issued by so-called state banks are usually such that that they allow private capital to benefit from the commercial advantage and taxation of citizens arising from the issuance of paper, which which is also added to the business profits.

45

Was there a misconception regarding private note banks that one State task – the paper issue – and a state regalia – the public substantial taxation – to private individuals; these state banks The great error is that the state task cannot be carried out without the cooperation of a purely private branch of industry; that It was believed that the creation of paper circulation media was absolutely tied to the operation of a banking business. So again State and private tasks are unfortunately mixed together. That such state banks, as one would recently find, are doing quite well There is no doubt that the situation can be so, but this does not raise the inner Contradiction of their nature does not arise.

Soon, however, the correct idea was also grasped that "paper= money" can be issued by the state without the mediation of a bank – Unfortunately, it then happened almost without exception that such paper only was made to meet the immense need of poor state economy Experience had shown that such government bonds= money could circulate quite well alongside metal money at par, and believed only, the money-making has no limits anymore. – Long, unbelievable It took a long time until the knowledge became generally stated that the production of paper money also had its limits.

These limits of money production had probably been reached with metal money. prudent and wise nature itself: – with paper money, this Limits can only be drawn through the reasonable understanding of heads of state. Unfortunately, we are only now beginning to gain some clarity about these limits. provide.

When the state issues paper money, it increases the sum of the circulating stamps. This causes a change in the relation, between the sum of the value units and the value in circulation

exchange values, such that the same sum
Exchange value, more money comes, as before. The equalization then takes place
in such a way that the money loses purchasing power accordingly, or,
in other words, prices are rising.

So every issue of government paper money is simply a state tax
to be regarded equally, only that the effect of this taxation, with moderate paper=
money issuance occurs only very gradually, almost imperceptibly.

If the issuance of paper money is simply limited
which arises from the general need of the trade for paper money
emerge, – a relationship which is, on the whole, not fvable=
kendes, now statistically determined in a certain relation to the metal money supply
cash is – yes is the change in the relationship between money and exchange=
value circulation is not directly measurable, i.e. it changes the prices
not noticeable: just as a drop of water affects the level of a large basin
changes, but this cannot be proven in a measurable way.

If one takes into account that the monetary reserve of the individual state
is not something that is closed in itself, but that under normal circumstances

46

nisms also from state to state a balancing of the money circulation to a certain
measures, it is clear on the one hand that taxation by paper=
money issue does not even exclusively refer to the circulation of the issuing
State, but also, depending on the circumstances, more or less on
the adjacent national territories, especially if the emitted
Paper circulates in the latter: – on the other hand, it is precisely this
It was thanks to this that individual states were able to contribute relatively high amount
in paper without causing any objectionable effects within their territory
To see disturbances in the price relationships occur; because the greater the
Level at which the increase in money is distributed, the lower it is
the associated disruption of standards. – Moreover, since all civilized states
more or less paper means of circulation, so also in
This mutual taxation provides a certain degree of compensation.

Another circumstance helps with this compensation. As soon as
namely a state issues its paper – let this paper be called “notes”
or “paper money” – so much that the gradual leveling
can no longer keep pace with the reproduction, the changed
Relation between the amount of tokens and the circulating values
as a price change, and foreign countries initially close themselves off to the
in excess of issued securities. The change in level is now
only valid within the issuing state, or rather is transferred
only to a lesser extent on the neighboring areas.

Since at the same time metal money had its universally accepted
purchasing power, the price increase is initially only transferred to the
excessively issued paper money, while the traffic is striving to

to maintain the usual value measurement relationships for metal money.
First of all, there is the exchange rate difference between paper and metal money.

Furthermore, since foreign countries persistently reject the discredited paper, since the Price increase in the over-emitting state, albeit in small-
to a lesser extent, to the metal money, since the payments to be made in money
Payment liabilities, namely interest on government debt abroad
are mostly to be prefented in metal, this results in an increased metal outflow
abroad, while at the same time the metal is in great demand in the country
Expansion is held back out of mistrust. – For all these reasons
The emission of paper usually results in a more or less strong
Disappearance of the metal from the circulation of the State concerned. –
Those with the madness of such excessive paper creation for traffic
The associated evils are too well known to go into further detail
to have to.

XI.

We now have the three main types of procurement of paper
medium of circulation for traffic: – private banknotes,
government banknotes and government paper money.

Now experience has shown that private individuals can be denied the power of
Money making, ie the issue of notes not backed by cash, not un=

among others

could be left to a limited extent because the temptation of an immeasurable
control of the audience is too great to avoid any abuse
to open. – So they decided to set legal limits.
but now the central banks state business – note issue – and private=
business – namely the actual banking business – was carried out at the same time,
it was possible to regulate both at the same time.
has done this in two ways: firstly, by giving the state
which reserved the granting of the licence to operate a central bank, or
by establishing general “normative provisions” for the grades=
banking operations, the observance of which the state must monitor
would have: – but the one is as unfortunate as the other.

State banks, if not abused by the state itself in emergencies,
have already provided comparatively better services, since their operation
ftitular regulation, and this regulation in the Central European
States finally acted with caution. State banks have priority over private banks
the undeniable advantage that they provide traffic with at least one
uniform circulation, with equal credit everywhere=
means, a circumstance that becomes more important the larger the
relevant state territory. – The notes of such state banks function
Incidentally, in circulation it is completely as simple government paper money and its
Redeemability” is merely an illusion for internal traffic. – On the other hand,
The state banks are in great trouble, as are the private banks=

banks to mix state and private business, the use of public
Taxation in an unmotivated manner of the so-called state banks
to allow the private individuals involved to benefit, as well as state and private
to regulate business evenly and through the excellent cooperation
State participation in private banking is a natural
to prevent the healthy development of banking business at all: the state
must not, and least of all in the scale and with the privileges
as is done by the current state banks – the private business
Competing: – that is not his task and is decided by the
Bad.

The so-called “forced exchange rate” for paper money or banknotes is determined according
previous one as an absurdity and has also proved itself as such in
Reality has proven itself. If paper money is only created in appropriate quantities,
fo there is no need for a forced course, as experience shows, – finds
If, on the other hand, over-emission occurs, no forced exchange rate will help against dev
as experience also proves beyond doubt.

That the notes of the so-called state banks actually operate like state=
paper money works, has already been emphasized. Max Wirth in the 3rd volume
his national economy, which is also known as the “Handbook of Banking”
serves: draws from fine investigations, among other things, the following conclusion:
“There is no fundamental difference between banknotes
and government paper money. – Banknotes without a compulsory exchange rate are
the government paper money in practice insofar as the rule=

48

moderate redemption of the former at the cash desk at the government securities
money by accepting it in lieu of payment at the state treasury
(Taxes, postage, telegraph charges, customs duties and other charges–
fees) is amply replaced.”

Let us now present the results of our investigations concerning the bank=
question, they should probably be as clear as simple
solution to the problem, which we summarize in the following sentences:

1. The need for paper circulation medium – Convention–
The state has to create the money for the purpose of generating income, namely through sin
Issuance of government paper money. However, since this paper money issue is
State taxation, then when determining its amount,
in constitutional states also the representation of the people has to compete.
The only decisive factor for the amount of government bond issuance is the mechanical
The need for convenience in traffic, never the changing needs
need of the state for money. The need of the trade for paper money
but is on average just as constant as the need for
Metal money. The continuous smaller fluctuations in the
It is permissible in both means of payment, of course, to trade itself
at the same time.

2. The issuance of so-called banknotes must be absolutely suppressed.

3. State banks are as superfluous as they are harmful.

The Preussische Bank's concession must therefore be terminated.

4. The banking business – notabene without note issue, which is not a banking transaction at all – is completely freed. The question of the joint-stock companies, which of course has a say here, must be in a larger contexts find their solution.

The current confusion of views on the banking issue is based primarily on the habitual view which banking transactions and Note emission as identical, while they are two fundamentally different things are).

4. The German trading day and the banking question).

It has now been just a year since I was published in the "National-Zeitung" and in the "Hamburger Börse" my "Antitheses to the Theses of Dr. A. Meyer pt. Bank question").

Since then, world history has made great strides in a short period of time forward. We are a united, powerful and respected nation But the magnitude of our economic tasks has also only grown, and no sooner has peace been concluded than the difficult most important economic issues are approaching us with increased force.

) Between this work and the following one lies the French War, in which I commanded an artillery-ammunition column.

2) From the "National-Zeitung" of July 12, 1871.

3) Reported p. 20 ff

Perrot, Bismarck and the Jews.

In my 12 theses mentioned above I had suggested want the public discussion to focus on the economic I would like to clarify the financial truth in banking matters because I cannot deny the conviction that this economic truth alone can provide the foundation for a healthy German banking law, in the G. Hirth's "Annals of the North German Confederation" (previous year p. 299) I also tried to write a more detailed paper entitled "The Money, fine essence and fine functions") – the economic To make the truth in banking matters scientifically clear and incontestable.

That was in June last year. I also published around this time

Zeit in No. 27 of the "Deutsche Industrie-Zeitung" a work of the same Trend: – "The banking squeeze of the remaining committee of the German trading day, reduced to the question: What is a banknote?").

My presentation concentrated on the following sentences:

Every note not backed by cash constitutes a tax, and not by Issuing cash-backed notes simply means, at the expense of the whole, make money for their own pockets; only the state is allowed to do that. Every Transfer of this power to private individuals is completely and effectively equal= significantly associated with a one-sided, unjust and economically corrupt-monopoly privileges of mobile big capital.

I may well assume that the presentation of such profound economic sentences in the above-mentioned outstanding passages did not go unnoticed However, I have not heard of any changes in the entire German press even a single word of discussion, even just the Mention of the same would have been loud: – certainly a very strange fact.

Now returning from the campaign, I find in No. 19 of the "Deutsches Handelsblatt" of 11 May c. under "Official Communications" ments of the German Trade Day" a memorandum "The Bank-question concerning"), which also appeared in separate print, and on the negotiations of the Banking Commission of the German Trading Day Report. The work was written by the Secretary General of the German Trade Day, Dr. Alexander Meyer.

The 26-member commission consisted mainly of bankers directors, among whom I only mention Mr. von Dechend, President of the Prussian ßische Staatsbank. The meetings of the commission have However, it took place from 23 to 25 May last year.

Remarkable and outstanding in the negotiations of the Commission is the fact that it excluded all discussions of principle. The memorandum states: "From a practical point of view it can only be a matter of making such arrangements,

1) The previous work.

2) p. 25.

3) Is provided in the appendix.

50

which will satisfy for the near future. This must be followed by practical Men limit their view, and it would be equally doctrinaire, to establish principles that are valid for all eternity

shall, as it is conceived as a purely theoretical endeavor should be emphasized principles that in science well-founded, but at the moment due to the circumstances at the introduction into life."

Very nice! – Also: "it would be doctrinal (for the banking question) principles to want to set up rules that are to be valid for all eternity"?! Should the Gentlemen have perhaps overlooked that the economic truth, like all Truth in general, eternal? This convulsive defense of the economic efficient truth and the fundamental silence of the same by The bank directors assembled as a bank commission make a very They declare it to be "doctrinaire" when the German Nation is looking for a compass in the confusing banking matter that fit could safely lead to the goal of healthy and prosperous banking conditions. Only the "compass" leads safely on the high seas, and in the banking question Unfortunately, we have long since lost sight of the solid land of science lost. We are drifting helplessly on an ocean of the most contradictory most confused views and opinions. So a compass here! – And where else can one find it than in the eternal truth-ity?

Incidentally, this has fundamentally rejected all fundamental discussions These changes were not particularly pleasing to all members of the banking committee. The same No. 19 of the "Deutsches Handelsblatt", which reports the actions of the Commission, also brings a separate vote from Mr. Heinrich Kämmerer in Hamburg, which was later confirmed in writing– and contains, among other things, the following passage: "It may well It can be assumed that most members of the May in Berlin the German Trade Day Commission, which had been assembled, the bank– legislation, without a feeling of satisfaction apart The decisions taken seem, in their entirety, to Wishes of none of the existing parties have been met. This The unsatisfactory result may be attributed to the fact that had failed to first conduct a comprehensive discussion of the theory of the banking system before moving on to discussing the reform of the current banking conditions ... To what extent the theoretical investigations to direct practical application can be achieved in practice, or to what extent, in view of existing conditions temporary concessions must be made, is certainly a very important point to consider, but it must be put into second Line and the discussion about it until the reason has been established principles. Only on the basis of an understanding on the principles of banking and the goals to be pursued, a healthy banking law must be brought about..."

4* 51

Mr. Heinrich Kämmerer has without question hit the nail on the head Head hit; moreover, he considers himself "obliged to respond to views" which in the Commission's previous negotiations have partly

ignored, partly hushed up, while they were notoriously the first national-economic writers, as well as in numerous practical warmly represented by all those involved in the table."

"From a practical point of view, this can only be the case"

– says the memorandum of the Bank Commission – "to establish such institutions make decisions that will satisfy for the near future." – That is, should read: "Institutions which the bank directors and

bank shareholders." – At least, such a sense from all the negotiations and decisions of the Bank Commission to emerge.

The quintessence of all decisions taken is the following: the right Private banks should also continue to be entitled to issue banknotes. For these Central banks are to be given "normative conditions". And The most important of these normative conditions is, according to the decisions the Commission as follows: "A part of the The notes given shall be paid in cash, the rest by discounts of at least two signatures, each not exceeding three months, covered fine." But one only has to consider that the discounts are without a doubt be acquired, at least for the most part, against notes to be issued. If, as will be proposed later, for example, the bonds issued by the bank Notes covered by $\frac{1}{2}$ in cash and $\frac{1}{2}$ in discounts, the latter however against issuing notes are exchanged, the bank assets are simply increased by the amount of notes covered by discounts, and the Interest on this easily acquired amount consists precisely in the discount itself. For example, if 3 million thaler notes are issued under such premises, for the bank has simply lost 2 million thalers through this issue. enriches.

That such a process is immoral and leads to immoral consequences, proves the entire banking history and proves drastically enough the present. God save us from Parisian and Viennese!) stock exchange conditions preserve, but – the danger of such conditions is at our gates. our future banking laws will determine whether the danger in our Tore. The propositions of the bank commission would counteract this danger but open the door and gate.

This danger is indeed no small one. It means demoralisation of our entire monetary system, uneconomical and unnatural monopoly-privilege of big capital, acute Intensification of a previously latent social question from above down and legally regulated exploitation of the entire people by a few matadors of the golden calf.

1) See, for example, the small brochure: "Economic Conditions in Austria", Leipzig 1871.

Incidentally, this danger is already halfway between the walls and the years. Only the tenacious honesty and conscientiousness of the old Prussian Civil service, for which I am not otherwise enthusiastic in every respect, has with an almost instinctive "brittleness" to the flooding of the banknote economy in Prussia and so far only in the State Bank in Berlin a still relatively modest hearth of the "note cult", which, however, but already a very nice school of admirers of this cult at the Berlin Stock Exchange and this stock exchange in the best possible way for further Progress on the slippery path of legal theft prepared en gros.

So again: – a bank that issues 3 million thaler banknotes and $\frac{1}{2}$ of which is covered in cash, / in discounts or interest-bearing securities, simply enriched himself by 2 million thalers at public expense. And our gentlemen national economists want to make us believe that such enrichment simply constituted a debt relationship – a note was simply a debt document?! I have already said that a "debt" There can be no question of repayment being considered, that a wonderful "debt" which is constantly "redeemed" and yet always remains at the same height; – that almost more miraculously a "guilt" which would bring interest to the debtor instead of paying it to the creditor pays, etc. An assumption which, at every consequence, leads to nonsense leads, cannot possibly be right.

And yet our ostensible national economy pays homage to the today this view! – If it were not true, one would have to consider it impossible. However, the more important of our economists= fcaftler recognize the truth, but it has already come to the point that almost does not seem "opportune" to become an open defender of the same= because they are the almost all-powerful matadors of big capital against him.

No, gentlemen! –the note not backed by cash is not a "debt", but a "tax" which the note issuer pays for the benefit of its own pocket, imposed on the entire public, and almost without collection costs from his pocket. Performance and counter-performance are in no way Any such taxation must definitely for the future at least with us – be controlled if we do not drift with full sails into a real social danger want.

There is no natural conflict between capital and labour, but but the legislation has created such a one, through monopolistic Preferential treatment of large capital: – because the right to tax by means of note issuance is nothing other than a monopolistic preference justification. But if unbacked paper money is a tax, well then, only the state may levy such a tax, and to collect this tax no bank is needed: – so: 1. no more banknotes, 2. only government= paper money under control of legislation, 3. no more state bank,

4. full banking freedom with reservation of the question of the "joint stock company" facilities".

The transition from the present state to that described above requirements, would of course require a certain period of time demand, and should of course least of all with the sudden subscription of the truly excellent and exemplary managed Prussian state bank. – How about the idea of what has so far only been alleged Note debt into a real, gradually repayable debt of the Note issuers to the state: – Here occasionally more.

Rostock, end of June.

F. Perrot.

5. The function of the banknote).

Mr. F. Perrot in Rostock has about a year ago a number of Theses on the banking question and is now making a complaint about it to the public, that in the entire German press also not a single word of discussion, even just a mention, has been heard He calls this fact a very strange one and gives not unclear to understand that a conspiracy of bank directors and bank shareholders exists, aimed at the "eternal truth" which Providence through revealed the mouth of Mr. Perrot, to keep quiet. That his theses have not been mentioned only because they were not mentioned It does not occur to Mr. Perrot that he is not worth it, because he "may hunt, that he alone in the German press has the full economic and scientific undertaken a scientific clarification of the difficult problem".

When a researcher of outstanding reputation, such as Makkulloch, Wolowski or Macleod would boast, but the scientific Clarification of the banking issue, we would have such a Statement, with all due respect for the man's other merits, as an outbreak of megalomania. In Mr. Perrot's case we believe in the existence of this disease, to which the law of sufficient reason also applies, not, but lead his striking statement to a naive and comprehensive Ignorance of banking literature and the banking system.

The essence of Mr. Perrot's teaching is that every cash supply unsecured note constitutes a tax, and that the right to pay by cash to issue covered notes, a public donation to the notes=

issuers should be treated equally.

This doctrine is neither correct nor new. Simple and obvious is they, but that is precisely what would have raised doubts in Mr Perrot about the correctness

1) From No. 29 of the "Deutsches Handelsblatt" the article is by the editor of the paper, written by the same Dr. A. Meyer, Secretary of the German Trade Day. Perrot.

54

as if he were to awaken the novelty; he should have remembered the poet's words

like:

If nature could be unraveled with so few grasps,
Would she have waited for you to track her down?

Irredeemable government paper money and redeemable banknotes are often confused with each other. The issue of paper money can be as a taxation of the public; it is not an economic substantial act, but an act of public power. The issue of banknotes notes, on the other hand, has a legitimate economic origin, which is can be made clear in just a few words.

In large-scale traffic, transactions are usually carried out on credit, against bills of exchange. Every turnover becomes a source of new turnover. The buyer is not the one who consumes the goods themselves, but who sells them on to other traders, who then wants to express. Between the producer of a product and its consumer there are many hands in the middle and every transition from one hand to the other is a turnover that requires a means of turnover. On the other hand the producer who has sold his goods has gained space for new production. For this he needs the raw materials, the auxiliary materials, which in turn can only be obtained through a series of sales for which sales funds are necessary can be.

The first turnover we are talking about results in new sales. For each turnover, a turnover means is required. The first turnover has a means of sales, the bill of exchange, and since the following sales have a means of payment, the bill of exchange is required. If the demand for means of payment is generated, it is perfectly acceptable that the created bills of exchange serve as a further means of income.

However, a bill of exchange as a means of sales has certain disadvantages. It requires a precise examination of authenticity, which is not possible for everyone; he puts everyone who issues the same, the risk of recourse; he is responsible for the redemption and is bound to forms and deadlines.

Therefore, the remitter of the bill of exchange prefers not to include it in the

daily circulation. He deposits it in a bank, which withdraws it from circulation until the expiry date and replaces it with a other means of circulation. The banknote is the representative fendant of the bill of exchange. By issuing the banknote, a means of revenue created in the most legitimate way by another replaced; for the vast majority of taxpayers it is absolutely irrelevant whether the bill of exchange circulates in kind or the banknote instead. For the Hands that mediate the turnover, the banknote is more convenient, the easily is recognizable, does not make the issuer liable for recourse and at any time The audience even wins when the notes the bill of exchange, because the public identification documents of the bank= notes indicate the danger if revenues are created in excess while the amount of bills of exchange created is subject to public knowledge. Banknotes have a certain guarantee

--

00

whether the sum of the sales funds increases with the sales or falls: with government paper money this guarantee no longer applies.

If Mr. Perrot considers the issue of banknotes as a burden on the If he calls himself a taxpayer, he must make the same accusation against the bills of exch They are means of turnover, like banknotes, and are used for payments instead of cash money like this. This consequence has indeed been a writer drawn in whose paths Mr. Perrot moves. We mean Mr. Held, the editor of the Staatsbürgerzeitung and creator of a social theory. And near the same, which all bills of exchange, all credit papers with the exception of state affiliations, we must also Mr. Perrot's place among the economic writers instruct. AM

6. Agriculture and the question of demand').

Now the bomb has finally exploded!

Perhaps some readers will remember that last year, before the Wars, I commented here that agriculture a particularly outstanding interest in the solution of the bank-question.

In No. 80 of this paper I expressed my astonishment at that my here, in the National-Zeitung, in the Hamburg Stock Exchange, in the Deutsche Industrie-Zeitung, in the G. Hirth Annals of the North German Confederation etc. published statements that differ greatly from the current views

Regarding the banking issue, there was no mention in the entire German press still found a response.

Recently I also pointed out this in the National-Zeitung No. 320 complete ignorance of my position and my work, including Emphasis on the contrast in which I find myself with the people mentioned in No. 19 of the decisions of the Bank Commission published in the Deutsches Handelsblatt of the German trading day.

This finally worked. In No. 29 of the report signed by the Secretary General of the German Trade Day, published by Dr. Alexander Meyer Deutsches Handelsblatt (20 July) published an article with the letters AM signed article: "the function of the banknote" 2).

I hope that this article will help me to understand the issues that I have raised in the Matter from the beginning aimed discussion of the will bring into flow the view that is emerging, and that in particular the circles of landowners and farmers the immense Meaning, which for them is most preferably related to a rich-solution to the banking question, lively and sustained-will be grasped.

- 1) From the "Deutsche Landwirtschaftszeitung".
- 2) The article is published on pages 54 et seq.

56

The fact that Mr AM's article is spiced with personalities can The matter will probably only be beneficial insofar as it will provide some with a piquant interest is given, which may cause them to take a closer look to deal with the question. – I think it would be a bad fit for me To follow Mr. AM in this area, but I must ask the readers of this paper, which the interesting article in No. 29 of the Deutsches Handelsblatt should not read it themselves, that according to Mr. AM the The press has ignored my statements only because they were "the Er-are not worth mentioning." – But it is best if you reads carefully the article in question by Mr AM: – it is really worth reading and interesting.

The very special interest of land ownership and agriculture Fortunately, in this matter there is only an increased potency of the interests which are of interest to the entire state economy and cultural development to the just and correct solution of the banking question. I would like to discuss the following again as briefly as possible:

In No. 320 of the National-Zeitung I wrote:

My explanation is concentrated in the following sentences:

"Every note not backed by cash constitutes a tax, not a debt, and not issue notes backed by cash, simply means, at the expense of the whole for one's own pocket Making money; only the state is allowed to do that. Every over-transfer of this authority to private individuals is completely and effectively synonymous with a one-sided, unfair and inefficient economically damaging monopoly privilege of the mobile big capital."

This claim is based on the following simple calculation:

For example, a bank has one million thalers in cash.

If this bank, for example, issues notes worth 3 million thalers gives, it does not give them away, but uses them as own money to achieve the highest possible user yield. These 3 million thalers Notes thus serve the bank as an asset of 3 million Taler – that seems very clear.

But the current banking legislation now requires that for a partial amount of these notes, we chase, for example, $\frac{1}{2}$ – that is, in our case, a million – be deposited in cash in the bank's cellars. Cash in the cellars the bank bears no interest: – instead of this million in cash, a Million of the notes issued which are put to useful use.

Furthermore, the current banking legislation generally requires that further part, sometimes even the entire amount of the remaining 2 million Notes, monetary paper deposited by the bank. Since the notes of the Bank as money, so the bank can easily keep its remaining 2 million notes against interest-bearing paper or discount exchange for bills of exchange.

57

The result of the calculation is, as it seems to me, quite incontestable bar this:

The bank, which had one million thalers in cash and for 3 million Taler notes, has after this "operation" the benefit of three million thalers: – namely one million, which they, in place of their own deposited cash assets from this amount in the form of notes were used profitably, and two million, for which they received interest supporting papers or bills of exchange bearing a discount.

The bank is therefore simply became two million thalers richer.

All my arithmetic and logic does not enable me to

to discover an error.

How it is possible that the previous banking literature and banking legislation
a calculation problem that seems so simple and clear,
What the reason is, others may explore that.

Whoever can prove my calculation example wrong, will reject my
Claims regarding the banking issue: – but whoever is correct
this very small and, as it seems to me, clear addition task, the
will also have to agree with me that such a
Big capital is a state-patented enrichment machine, a legally
regulated exploitation of the citizens of the state by individual private individuals, a
uneconomical and unfair displacement and accumulation of
capital and a social danger threatening with strong steps
comes.

That the banks are taking what they get from the national wealth through the "notes=
business" to pump money transferred as a gift to others,
so that they can do business with it, can certainly not be considered as an Aquil=
valent for this wonderful gift. I at least
I think it is very wrong that the nation should give part of its wealth to
Banks should be donated under state law so that they can, through loans or other
Use of this donation will enable all kinds of business, which will certainly
may have some benefits, but their most certain result is
the convenient, economically unjustified enrichment of the bank=
owner by means of this very money.

How could it be justified that the state should lend money to private individuals?
as a gift, so that they can use this money at their discretion
to use for business, which after all is their own advantage first
in mind, which at least enriches individuals from the
constitute total assets, an enrichment that is disproportionate
fts to the possible benefit which the whole can derive from the business
use of the donation may perhaps arise.

This is my view on the banking issue.

The special relationship of agriculture to this issue lies
on the hand.

58

Between agriculture and mobile big capital, a
Time a certain contradictory tension developed. In the nature of the
Such tension is just as unfounded between things as between
Capital and labor. This tension between mobile capital and land
possession is only due to incorrect legislation and, in particular,
on the other hand, by the fact that the legislation regulates mobile capital with a mono=
political privileges, as in the previous banking
being is embodied.

This current state of banking, as it has developed so far, wounds, works with the suction power of a sponge, all capital from agriculture and landed property and those convenient monopolized ways of enriching oneself, which are the banknote business, partly directly and partly indirectly, quickly caused concern exciting dimensions.

Here lies a main root of the evil which our well-known Economist K. Braun recently described it as a "paper plague".

And if the very interests of agriculture and land possession requires us to fight this "paper plague" with all our strength, if the correct solution to the banking question in the German Reichstag all our life and creative spheres are touched most intimately, This solution for agriculture and land ownership is a

question of life
Rostock, July 26th. F. Perrot.

7. From No. 96 of the "Deutsche Landwirtschaftliche Zeitung".

No. 90 of this newspaper brings an article about the banking question, signed F. Perrot.

"What is right for one should be fair for another."

A landowner has a productive area worth 3. B. 100,000 Tlr.
The same wants to request the concession from the state, on the basis of this to issue 300,000 Tlr. of paper money with a secure productive value.

Surely this request will be refused.

But why?

Isn't land safer than silver bars? The silver bar has only relative value, is unproductive as a metal. – Land but is the original source of all products (values).

"No monopoly to private or joint-stock companies, neither in banking, railways or other public welfare matters."

We have been feeling these "taxes" for a long time and appreciate their pressure, Bank fortresses alone are difficult to storm, but not impregnable.

Is the honorable author of the above-mentioned article right?
understood by a landowner.

8. On the banking question))).

"What is right for one should be fair for another," says in No. 96 of the "Deut. Landw. Ztg." "a landowner" who refers to my article in No. 90.

If you allow someone who has 1 million to have 3 million in paper money (called banknotes?), then one must be fairer= white also – not only the landowner who has 100,000 thalers, still issuing 300,000 of them in paper – but one must anyone who has 1 thaler, even a silver grošchen, to allow 3 in paper – "emit", and let it be his business whether someone this paper money takes.

Our economy always talks about "competition" and does not want state railways today, because the "competition" in all things, i.e. also in the railway sector, better care than the state. Without "competition" no salvation and where there is competition, everything else will find its way. Why because now – gentlemen economists – you shy away from the "Banking business", as you understand it, that is, with the right of banknotes= issue, also only the "free economic movement, – the competition"?

Why should the "issuance of banknotes" not also be subject to the "conkurrenz"? – Why should not everyone, according to their heart= Would you like to be able to compete with everyone else in the production of banknotes? – Do you doubt that the "competition" is doing this "business"? This excellent competition, which is responsible for everything, everything care?

Why, for heaven's sake, if you help me with my railway= reform efforts, with their "competition" getting in the way, to defend the private railway system – why do you want because the same excellent competition does not also lead to the sole ruler and ruler feiderin proclaim in the banknote issue?

Would you like to try it, what a fun competition= business will come out of it? – You will see, we will have money like hay; – everyone will have his "credit" according to the laws of "free economic movement" – every wallet will into a banking business, – the "credit" will take you completely out of take a real upswing, – a wonderful business era will begin break in and – above all this is called presiding and regulating Deity the "competition" fhoven! – Fear not the unreason and lack of education of the people, the "competition" will take care of everything.

1) Reply to the previous article from the "Deutsche Landwirtschaftliche Newspaper".

2) "There is no fundamental difference between banknotes and government paper money." (Handbook of Banking by Max Wirth, Cologne 1870, p. 580.)

60

Yes, in the railway sector, the economy wants "competition". But only big capital can build railways if the state does not does what is his office, and thus not only his obligations, but also transferred part of its rights and powers to private individuals – thus creating a real monopoly of mobile big capital, which will soon have the wisdom to compete with the coalition to swap.

However, when it comes to banknotes, it is no longer enough to rely on the to call it "competition", because really anyone could compete. Here, any "competition" which is below a number of millions Taler moved, be excluded by law, so that here too the mobile Big capital's monopoly is secured.

Some Dii minorum gentium of our economy have this truth – ties have already been denounced as "socialist", while their disregard a real socialism on the neck, a real conflict between capital and labor, between land ownership and mobile capital artificially induced.

Yes, the gentleman "Landowner" in No. 96 of this newspaper has really misled me. ftood: "No monopoly to private or joint-stock companies, neither in banking, railways nor other public welfare– Things."

Rostock, in August. F. Perrot.

9. Modest request.

(From No. 100 of the Deutsche Landwirtschaftliche Zeitung.)

So all railways should become state railways?

No private individual, no stock company shall have the "monopoly" Paper "to make money", received neither in bank, railway – nor other Common good! – This also includes mills, breweries, sugar – and other factories?

If the property already owned or managed by him is
Railways, however, the state does not have enough carriages to transport people or
To transport goods appropriately and without loss of time, as the latter the evil
Fama says, or if such a state railway administration despite legal
Obligation to pay any compensation for damage to the goods transported on it
Freight goods are refused and forced to turn away from
knows how to create necks – what can be done about it; how can it be remedied?
Of course, we also have similar things on private railways.
learn from others. And it will not get better if there is no strict disciplinarian
handles the rod. But we have neither the one nor the other.
Does the state railway worker perhaps know a better solution than
the competition?

And in the banknote and share issue, the competition should also be
be made more difficult, just so that big capital, which has

61

Millions, can practice usury at 300%, so that the small
Capital, the middle class is increasingly suppressed and eradicated, and the
intelligent workers are degraded to machines, to slaves?
Or should this be understood as meaning that the state exercises all monopolies itself
should, like the Pafha of Egypt? – So that would be El Dorado?

Is not the best remedy against monopolies the greatest possible reproduction,
Release of the same, hence free competition?

ze

10. The railway and bank question and the “competition”.

Answer to a “modest request”.
(efr, sp No. 100 of the German Agricultural Journal)

The questioner (–0– follows a tactic with which I also
other side had already had to fight, namely the tactic of right
to draw inadmissible conclusions from sentences.

It has, as I have often emphasized, become fashionable to believe and
to say that “competition, ie free economic activity–
movement”, alone is capable of controlling all economic affairs
best way to regulate. – If I now focus on “making consequences”
I would ask Mr. –o–, for example: “Would you like to
the government and administration in general also in competition–
operation? – Would Germany, for example, be better off at 36, or
as before 360, or as before with about 2000 independent governments,
than with that of a single one? These governments made and make

fometimes even "competition among each other. – Why do you want now abolish this competition by force and join a single government in Germany? Where, my dear Mr –0–, will you reveal the find justice one day if this single government does not suit you want to give?"

Seriously speaking, against the competition I have always not the least, on the contrary, I am convinced that fit works benevolently in all the things which are better done by the Private industry rather than the state. But I am quite positively also the conviction that there are things which the state better, more correctly and to the greater advantage of the state citizens are more concerned than the private industry and that in these Things the competition does not work as well as the modern Economics believes this and wants to make people believe this.

You yourself, dear Mr –0–, are, for example, firmly and firmly convinced that it would be nonsense to defend the fatherland, that is, the military being to leave it to the competition, and yet there was a time where literally different "entrepreneurs" are involved in this "business" "competed". – Very likely, sir –o–, They also believe that post and telegraphy are best

62

in the hands of the state, and I strongly suspect that you will protest would object if, for example, the post office, as it once was, is, back into the hands of the "competition". In England, for example, it was found advantageous to use telegraphy, which had previously been run as a "business", was now subject to competition to remove and concentrate in the hands of the state, and one finds feel comfortable with it.

You yourself, dear Mr –o–, are convinced, just like I believe that there are things that the state definitely does better than the "competition", and that it would be to the disadvantage of all if wanted to leave these things to the competition.

Now, my dear sir –0–, I am ready to can turn around by answering the question you asked me, now address to you: – "since there are undoubtedly certain general things that you cannot leave to the competition If you want, you should also include mills, breweries, sugar– and other factories?"

You see, sir –0–, he who digs a pit for others will fall himself inside.

Concerning the railways, the views so far have in fact wavered as to whether they are among the things which the state should better take care of

or to those which are better left to the competition.

If I now stand up for the former view today, then
This is because I am a very careful, conscientious
and comprehensive study of the facts, I have become convinced
that the "competition" in the railway sector is by no means that of
partial consequences which our economists warn us about—
And if you wanted to reply to me that the view of a
individual ones cannot be considered here, I would like to ask you
to point out that this view, which I now have in Germany
I am trying to bring to the fore in England, Belgium and America,
the oldest railway countries, already general and public validity
Please ask what the English merchants
from the railway competition, and how one in Belgium thinks about the
Competition of the railways. You can find some information about this in
the second issue of the German Monthly Journal for Trade, Shipping—
travel and transport, which is currently being issued.

Experience has shown that in the railways, as in telegraphy,
In the nature of things, the coalition will soon replace the con-
competition, then you have private railways without competition: —
what then?

I will explain this to you immediately with an example. There were 3 different
different cable companies between Europe and America. Think
Now, Sir —0—, that these three companies are in contact with each other
competed and pushed each other's prices down? The cuckoo

63

They did. They must have been complete fools. No, they formed a coalition
fomselfes into a single company, increased the prices of telegrams and
— well, dear audience, pay and think about where "competition" is not
everything can lead to.

It is similar with the railways. If you, dear Mr —0—,
If you wanted to look into the history of the railways, you would find
that in France, for example, the railway companies had already been so clever
are to form a coalition to such an extent that "competition" is completely excluded,
and if the state does not protect the public against this
consequence of the "free economic movement", that would be
French public now the most ruthless exploitation by the iron
railway companies.

What now, my dear sir —0—, will you hunt when the German
Railway companies have only just become as smart as they already are
and formed a coalition in their own interests in such a way that they
no longer compete with each other, but the audience
only exploit together?!) — That this will happen very soon is
the nature of the railway system, as experience tells us, except in France,

also already proven in England and America.

And if we do not soon take energetic action against state railways¹ fteer, we will have to do it in a very short time with powerful coalitions of large railway complexes that make the necessary transition uneven more difficult than it currently is.

You see, Sir -0-, that it is always good to trust his judgment some expertise, and I hope that we can now move on to Railways are in good condition.

I now come to the banking business.

You seem to have understood me correctly so far that I, the bank² issuing notes, ie making money, not for a banking business, but consider it a matter of state.

Making money is not a business, but a state privilege.

The real banking business, on the other hand, I count among those in which which the state should not interfere, and which it should best the free economic movement, which leaves competition to it. So you are expressing yourself incorrectly when you say: "And in the bank² grades² or stock question, the competition should also be be made more difficult." -

If you, dear Mr -0-, consider banknote making to be one of Banking transactions count and the competition certainly no less If you want to admit more than I do, you must necessarily ask the question, which I asked our economists in No. 982), namely that the Banking and banknote making are both absolutely free

- 1) Editor's note: See today's cartels, syndicates, trusts, etc.
- 2) Reported in the article "On the banking question", p. 60, no. 8.

64

and not to be regulated by any other law than by the competition itself

If you can reconcile it with your conscience and your insight, to give this advice, well, try to put it into practice. neither equal rights for all nor rights only for the state. I for my person can only plead again:

1. no more banknotes:
2. the state alone makes paper money;

3. no more state bank;
4. banking business must be completely free of competition;
5. the transitional measures are taken under reasonable and necessary circumstances.

taking into account existing circumstances and to a
to distribute over a corresponding long period of time.

I will come back to the affairs of joint-stock companies
especially back in the Deutsche Monatsschrift.

Rostock, August 22, 1871. F. Perrot.

11. Banking question and socialism.
("Deut. Landwirtsch. Ztg. v. 30. Sept. 1870.")

J.

Thank God – we may say – it also starts with the banking question,
day to be!

What leads us to this exclamation are two important opinions=
statements on the question, which finally reflects the seriousness of the situation
take into account.

Two outstanding members of the Reichstag have expressed their views
on the banking issue, namely Mr. GD Augspurg in
Deutsches Handelsblatt No. 33–37 and Mr. HV von Unruh in a
small brochure: "The banking question before the Commission of the German
trading day."

Both works approach the core of the matter in a way that
hope that German insight and honesty will find a solution to the same
will succeed, as unfortunately no other state has achieved so far
has been.

We cannot say that the attitude of the daily press as a whole
in this matter. It cannot be said that they have

1) Incidentally, Max Wirth says in his fine "Handbook of Banking" p. 582: "In full
The freedom to issue banknotes will create a monopoly for the rich,
to whom interest-free capital is then advanced by the poor; because
those with means cannot issue any notes." – The difference between the current
The difference between the current situation and the general freedom of music is therefore
legal monopoly of the rich exists, while with freedom of notes the legal
monopoly would turn into an apparently only factual one.

task of entertaining the audience as best as possible and without bias[≠] clarify, has been fulfilled sufficiently – and time is burning here the nails.

Be that as it may, we finally have two members here, namely two important members of the German Reichstag before us, who admit frankly:

that issuing banknotes not backed by cash is just as much as make money for your own pocket, tax the public, or rather exploit them – and that the flood of paper can now finally be stopped must.

I think it is not an exaggeration to assume that the monetary interest in the issue of banknotes is deliberately and has deliberately sought and still seeks to confuse the question and to work against comprehensive, effective enlightenment, and that here perhaps the greatest difficulty of a natural and healthy solution to be sought.

We turn first to Mr. Augspurg. In No. 36 of the German Handelsblatt concludes from similar statements, as we They gave in the 1870 volume of the Hirth Annals:

“that the state by issuing paper money, the note banks by Issue of their payment promises by means of the annual, of which interest earned an unjustified, significant profit by increasing the exchange value of the circulating metal money, i.e. the legal national currency in proportion to the amount their paper money to the total amount of circulating (liquid) capital and thereby deprive a large part of the population, who lives on fixed income, to significant damage, but secondly, it harms the entire population of the state by they undermine the continuity of the legal standard of value.”

“On the other hand, there are no advantages in any direction for the whole population of the state through the issue of banknotes.

paper money, taxpayers get the interest saved on the circulating amount; but nevertheless, on the other hand, their damage is much more considerable."

Here (with your permission) it seems to us that there is something right and wrong in the conclusion mixed together.

When two people do the same thing, it is not always the same thing. If the state makes paper money, it is not the same as if private individuals make paper money for your own benefit.

To date, the view is – and we agree with it – that traffic for its mechanical convenience a certain quantity of paper market instructions could hardly be dispensed with, even against the gold standard.

We do not consider it to be associated with any notable evil, if the state meets this mechanical need of traffic through

66

Issue of a fixed sum of government paper money.

With such a moderate issue of government paper money, there is no demonstrable M. Wirth writes about this in his "Handb. d. Bankw."

(p. 581): "As long as ... government paper money does not exceed a certain fraction below the amount required to achieve the sales-required amount is increased, can neither be increased by increase in commodity prices, nor from reduction in paper value, hence neither money nor silver premium is mentioned fein."

Banknotes, on the other hand, have the disadvantage that They enrich private individuals in an unjustifiable manner, namely the interest on the amount not covered by cash.

Mr. Augspurg comments on this in the following way: "Every paper bank At the same time, she carries out banking transactions of various kinds, and if she by the way in which they use their payment promises (notes) is permitted to almost double its business capital, ie to invest almost as much money in the business than it itself possesses as property, it follows that if it exploits this freedom as far as possible for their own benefit, thereby very peculiar, deviating from the norm economic conditions must be created."

– – "This is not a sound economic ratio and it can also produce seriously healthy consequences-bring." – And further, Mr. Augspurg says of the banknotes,

(Deut. Handelsbl., p. 357) "that the only real purpose of their-use is the exploitation of the public and if this it is taken away, the use no longer has any purpose has."

However, one can hardly come out more roundly with the language, unless because in the sentence that also here in Germany "sooner or later the roots of ruin, economic instability, which have been present in the creation of banknotes since the beginning, spread their growth, expand their branches and become more and more entangled until they envelop everything and finally into the abyss."

II.

After, as we have reported, Mr. Augspurg has most frankly on the perishability and inadmissibility of all notes not covered by cash pronounced, he concludes his deductions with the question:

"Why do we retain the use of banking everywhere? notes? Why not simply ban the issue of all and every banknote?" –

5* 67

and Mr. Augspurg immediately gives the answer himself with the following words: "It is difficult to give any other answer to this question find than

"that one is once accustomed to the evil and that it is hard would appear, a number of bank shareholders, who also if the exploitation of the entire population by

issuing banknotes, this privilege

to take suddenly."

And indeed, it is hard to understand that "note banks still today, instead of being considered as recommended to pay interest on the capital raised, which in turn by the population on the debt documents delivered to them or promise of payment. To admire is in any case the – good nature of this population."

We completely agree with Mr Augspurg on all points – one exception, namely his absolute rejection of the government bond= money.

We do not want to and cannot make an absolute judgment as to whether the return of the paper medium of circulation could be completely dispensed with, as some

claim; however, we are of the opinion that small traffic, even more than the larger one, to its mechanical convenience of paper money is needed, and we see, based on experience, not the slightest evil in the fact that the state through-issuing simple government paper money to this mechanical need for convenience in transport, a need which may be somewhat reduced by the gold standard, will certainly not be eliminated.

The absolute condemnation of all government paper money by Mr. Augspurg
However, purg seems to have another meaning to us.

The final conclusion to which Mr Augspurg comes is radical enough, as follows:

"Therefore, the final decision can only ever be that

the use of any and all paper money is reprehensible and should be abolished

must be, not only of the state, but also of the private paper money, the banknotes".

However, we sincerely admit that we are not in agreement with this radicalism. fully agree, for the following reasons:

Mr. Augspurg proves the inadmissibility and harmfulness of Banknotes in detail, but takes government paper money as something self-evident under all circumstances something reprehensible. – In contrast, we have it already pointed out that moderately issued government bonds money no one has yet felt or proven any disadvantage and that such a disadvantage does not exist, as long as the mechanical convenience traffic's need for speed is the only criterion for the expenditure of this government paper money.

68

But then Mr Augspurg repeatedly points to a taxation of the uncovered notes.

If only the government paper, which we only have in moderation, could be created money – assuming its reprehensibility under all circumstances – so one would soon experience that traffic is becoming increasingly convenience requires the paper medium of circulation, and it would then of course remain, once the government paper money is so absolutely rejects, nothing left but to keep banknotes and Although, as Mr Augspurg suggests, with a tax on their uncovered amount to be issued.

This taxation of notes is for the transitional period during their entire gradual and until its complete abolition, however, a too recommended means of information, but as a permanent institution, would

nothing more than the continued existence of the note nonsense in more or less mild form.

The maintenance of a moderate amount of government paper money, resp. gradual transformation of a part of the notes into such and simple, albeit gradual abolition of all other banknotes, would lead us to the path of experience can lead to finding out how much paper we withdraw from circulation at all without compromising his comfort=ibility suffers as a result.

If, on the other hand, we consider the relatively innocent state
If we abolished paper money first, as Mr. Augspurg wants, we would last taxed banknotes remain as the only means of information if we will not immediately reintroduce the government paper money that has just been abolished wanted.

If we allow private individuals to issue money, thereby enriching themselves and increasing the general purchasing power of money. press – this is under all circumstances a socialism of all=worst kind.

If, on the other hand, the state issues paper money for the convenience of Traffic, he also enriches himself and takes the
The amount of this enrichment also comes from the pockets of all citizens;
But he is doing nothing different than what he does with every tax and this
This type of taxation is not linked to any demonstrable evil,
as long as the mechanical need for convenience in traffic is their only
Dimension and motif remain. While banknotes under all circumstances reprehensible, government paper money offers under all circumstances the only means, without social injustice, to remove from circulation that paper
To provide a means of circulation, which he, at least for now, and perhaps always, really needs.

III.

We now turn to the meritorious brochure of the Lord
v. Unruh:

69

"The banking question before the German Trade Commission–day."

Mr. v. Unruh first deals with the decisions and negotiations of these
Commission of the German Trading Day, as set out in No. 19 of the German
Handelsblatt. He provides evidence that for these
decisions and negotiations with the majority of the commission members

– consisting of some 20 bank directors – but probably the paper bank-party interests may have been the leading motive. The representation is in a clear, lively and appealing dialectical form and ironizes the negotiations of the Bank Commission repeatedly in apt white.

Mr. v. Unruh then also deals with the banking question from the general points of view and begins with the certainly very correct sentence:

“If one wants to reach a firm judgment on the banknote issue To get there, one must first understand the nature of money and its surrogates, as well as their effects on world trade make it as clear as possible.” Starting from this same view, We published in May 1870 in Hirth's "Annalen des deutschen Reich" an investigation on: “Money, its essence and its economic functions” as a “contribution to solving the banking, Coin and currency question”).

Mr. v. Unruh also comes to very similar results to those we developed in the above work. His research results are likely to be mainly substantively in the following passage, which is also printed in bold in the brochure summarize:

“Issuing notes that are not backed by cash means: willing credit of the public, everyone, take or, as it is also expressed, the audience tax partly in favour of the bank itself, partly in favour of those who want to exploit bank credit as much as possible.” That is clear enough. – However clear it is,

It almost astonishes us that in the assessments of the Brochure, which we have read in major newspapers, just This main point is not even touched upon anywhere. It is unlikely that anyone There is no doubt that the assessors are not actually concerned to inform the German public about this point to provide clarification and precisely this point, which is the pivotal point the question is to appear in the importance it deserves let's go.

At the risk of exposing ourselves to a new eruption of party egoism as in No. 29 of the “Deutsches Handelsblatt” in an article: “The Function of the Banknote” is thrown against us, we want

4) Reported p. 29ff. 2) Reported p. 54ff.

70

to put this main point of the banking question into the right light again try.

A "taxation of the public in favour of the banks", as now by two well-known members of the Reichstag in the issue not found in cash backed notes, and which is one of these Reichs= members of the day as an "exploitation of the audience" through the notes= banks and their associates have repeatedly expressly stated that such "Taxation" and "exploitation of the public" by the music banks, however, is nothing more than literally a form of Note interest paid annually to our wealthiest citizens= paid state subsidy.

The note not backed by cash is nothing more and nothing less than regular state support, which the German people their (probably very needy) note= bankers and the like, a state support, which the interested parties are unconcerned about the public welfare, to preserve by all means and also for are trying to secure the future. But as long as we our bankers and comrades pay state subsidies, We should not be surprised if our working classes can claim the same!

Do we not have here a socialism of the most dangerous kind and at the same time a beginning to the most flourishing communism?

The central banks and their shareholders distribute annually among themselves (hence "dividend") a round sum of millions of thalers, which is based on a unfortunately no longer unusual ways of escaping from everyone's pockets be taken and the grand liberalism of our daily press knows through= from none of this!

With what conscience can we justify the fact that we have lost several thousand Taler for our teachers, while we give our bank-holding colleagues citizens to collect the interest of more than 100 million banknotes not covered by cash annually at the expense of the whole enrich?

With what conscience do we pick and feel at the most useful and necessary government spending, while we give the money to our wealthiest Pour millions into the pockets of our fellow citizens every year?

Shouldn't it finally be time for our daily press, which their wealthiest fellow citizens "exploited population" (GD Augspurg, member of the Reichstag), the star stings?

Those defenders of the banknote party who have to respond to this intend, we ask that you address your reply to the Reichstag= members of the GD Augspurg or HV von Unruh, while at the same time words of the first of the two gentlemen:

"The mass of the population is in a strange state state of economic immaturity. It manages with the paper

which documents their loan as if it were money, is happy
 fure about the convenience associated with such a means of circulation
 like a child playing with a razor, writing about its smoothness
 learned works on the advantages of the credit economy, on the monetary economy,
 where one becomes rich simply through one's credit, without working, and praises
 their luck in the newspapers when they are blessed with a new paper bank
 She knows nothing about the fact that she is constantly
 Lending enormous sums to the privileged (wonderful presentation-
 loan), without receiving a single thaler of interest for
 thus exploiting them."

Yes, yes, Mr Augspurg is right in the end when he says: "To
 What is certainly admirable is the good nature of this population.)

12. The banking question.

An examination for everyone.

The banking question has a very special and great interest for everyone
 and it is important that this interest be understood. May it
 we succeed in writing the following lines in such a way that the interest
 of the entire people in the correct solution of the banking question to the people
 come to consciousness itself, and indeed to true consciousness.

Almost all views today agree that a so-called banking question
 only exists insofar as the issue of banknotes
 to the banking business. – If one separates the banknote issue
 from the banking business, yes, a banking question no longer exists and no one has
 to object to the banking business, without such note issue,
 to run it on its own, like any other business.

But as soon as the issue of banknotes is incorporated into the banking business,
 A number of "banking questions" arise, the solution of which no one has yet found
 has succeeded and probably no one will ever succeed. – This should
 ft in and of itself lead to the assumption that banknote issue
 is not a banking business at all, and that the solution to the "banking question" is simpl
 to be found in the fact that one stops issuing banknotes as a bank≠
 business to view and treat.

Mr Prinze-Smith speaks about this in the "Program for the
 Association of German Free Traders" in the following way:

The free traders "are agreed that the business of credit intermediation≠
 ment, the actual banking activity, must be a free trade; whereby
 the maintenance of a central bank without restricting competing interests
 fhaps, is not excluded. – However, opinions are divided regarding

of paper money, the issuance of which, although usually by banks completely different from those applicable to the actual banking business

) This also applies to today's circumstances. D. Editor. Berlin 1931.

72

Some want the production of paper currency increase and decrease with the fluctuations in demand for drugs Others claim that the need for sales funds determines will be caused by completely different circumstances than the desire for loans: and that the issue of paper money, instead of interacting with speculation, to withstand inflation and credit crises, must be firmly contingent if one should always be safe from paper money confusion, as it is in the most frightening shape in neighboring countries. – While some also believe that everyone should be free to raise his credit by issuing notes others consider it fairer if the profit from a surrogate for the revenue that belongs to the whole, including all Taxpayers benefit from the issuance of paper money for government accounts, instead of individual capitalists appropriating that profit. – About this The question therefore remains open.” It is already clear from this question, that Mr. Prinze-Smith also used the banknote issue for a banking transaction does not hold.

The first question that needs to be addressed when discussing the bank essence is to be understood, is the one about

the banknote.

The safest way to investigate a material question is ultimately always the mathematical one: – we try to apply it to the bank question, based on the simplest possible numerical relationships.

For example, a bank has one million thalers in cash.

They issue banknotes of three million thalers.

She deposits her cash assets (1 million) as interest-free collateral.

It exchanges two million of its notes for interest-bearing papers. bills of exchange, which they also deposit as security, and use the third million notes for profitable transactions elsewhere.

What is now the arithmetically provable effect of this “financial operation”?

The answer cannot be difficult; it is simple:

1. The non-interest-bearing cash deposited by the bank in the amount of a million brings no return.
2. The additional two million securities or bills of exchange deposited bring the bank's interest or discount.
3. The third million used in business brings its business To use.

The effect of this "financial operation" is the fact that the bank has the interest benefit of three million thalers as a result of this, while without the issue of notes they would only enjoy one million thalers.

The bank is thus enriched by the interest of two million thalers, by paying this sum in banknotes, without depositing a spent the same amount in cash.

73

This fact provides a simple explanation for why banks Note editions are so sought-after objects of the founding fraud that big capital is turning to their establishment with great preference, and that the privilege of issuing banknotes is so tenaciously and eagerly defended by the central holders are held and defended.

At the same time, in this case we can only see a monopolistic privilege of big capital, which is accompanied by the most serious social dangers and already the most worrying social exercises.

This situation has been justified by pointing out that Banknotes, called "bills of exchange" and from this designation the proof wanted to derive that the enrichment of the central bank by the interest of the The two million thalers not covered in cash in our example are simply "commercial" profit.

In contrast, we first declare that we are not aware of such "Change", nor want to know anything about such "business" and that we will look at these so-called "bills" and these so-called "transactions" in more detail will feel the tooth.

II.

If it is an undeniable fact that the issue is not in

cash-backed notes, the issuing bank enjoys interest of an equal large sum of money, the question remains to be discussed as to which effect that banknote issuance has on traffic in general.

Max Wirth in his valuable "Handbook of Banking", which probably contains the newest and most comprehensive actual material, sees the banknote issue as follows (p. 98):

"By issuing banknotes, the note bank has created a fictitious capital, which grants it real interest enjoyment"; and p. 581: "Since banks issuing banknotes have a capital in the amount the surplus of paper money circulation over the cash in stock society involuntarily and without interest presented by the public—attended, the state, as representative and tacitly—illuminated representative of the public has the right, to demand an equivalent from the note banks."

One can see that Max Wirth has at least expressed his doubts about the economic Authorization of the banks to appropriate the advantage that comes with the issue of notes not backed by cash, and he sees this advantage as if it originated from a capital which the banks had acquired as a uninterest-bearing compulsory loan from the pockets of the general public.

In order to see clearly here, we must, as I said, determine the effect, which is exerted on traffic through the issue of notes.

74

If we go back to our initial numerical example, we have the bank, which issued three million thaler notes, one million of which in cash and two million in securities or bills of exchange.

the sum of the media acting as money by two million increased.

There were, in fact, before the issue of the notes

- a) one million in cash assets of the bank,
- b) the two million securities or bills of exchange which the bank has issued against exchanges her notes.

After the note issue, three million in notes will be added, which function as money in traffic, while at the same time cash—The bank's assets of one million were withdrawn from circulation, so that the Traffic as a money circulating medium increased by two million thalers Whether the securities mentioned above under b, or bills of exchange in the Cash of the bank or in any other interest, is for the traffic

indifferent.

"The music edition is also", – as O. Michaelis puts it in fine detail – signed work "Notes and Deposits" says – "true creation of cheese, it forms an increase in the cheeses of the circle of economies within which the notes are – running, existing cash reserves, and it will not be replaced the cash register on the one hand and the cash register on the other Page Kafe withdrawn." (Quarterly Journal for Economics 1865, III. Vol. p. 89.)

Spending non-cash banknotes simply means spending on your own pocket money. Now, if you call such notes "bills of exchange", and describe their issue as a "business"; – as already mentioned, these alleged "changes" are, in the eyes of any impartial person, merely "Reitwechsel" and indeed privileged "Reitwechsel" and such "business" involves a social injustice and danger.

III.

It has now also been claimed that the money exchanged by banknotes – Increase in circulation funds had a beneficial effect on traffic, fit increases sales and increases production, fit "fertilizes" the traffic by means of "credit".

That this is not true, that this common saying is only in favour of invented by note issuing banks, has now finally become quite general knowledge. If the unsecured issued Note "fertilizes" the traffic, then one is also compelled to accept that consequence which Faucher gives us in his fine work "Currency and Prices" (Quarterly Economics Journal 1868 Vol. III and IV), namely

75

the consequence that the false taler, as long as it is not a folder recognized, do exactly the same thing and that one must therefore actually punish the one which detects and reports the counterfeit thaler as such, but not the one who makes it and spends it. "Isn't it actually make life difficult for yourself and others if you Guests only look at their fingers?" – asks Mr. Faucher in deepest sense.

The effect of uncovered notes on the market is simply this. Circulating funds are increased by the amount of unsecured notes issued increased, thereby increasing the purchasing power of money accordingly, but initially not evenly, reduced, that is, in other words, there will be a speaking increase in prices, which only gradually more evenly distributed. The increase in circulating funds therefore has the effect

if one wants to use the expression, like a tax on the possession
the state's residents.

Imposing such a tax can only be a matter of state. The
transfer of such authority to individual private individuals, by granting monopolies
privilege of not being able to issue notes backed by cash is mean= harmful, dangerous and unjust.

How the figures for this taxation in 1869 compare with ours
to France and England and how this status changed towards 1852
The "Köln. Ztg." shows in an excellent
Work which she brought immediately before the war: ("The
Order of the North German Banking System", reprinted in the "Ar= beitg." No. 684 and 685, 1870). This work contains the following overview
and explanation regarding the circulating notes not covered by cash= quantities:

"We see from this that in the short period from 1852 to 1869 the
 Amount of uncovered notes in Northern Germany by 110 million
 Taler, while at the English bank it only increased by 11 (in the whole
 England has decreased), in France it has increased by 31 million,
 It should also be noted that the latter countries do not have government paper money
 know, of which, however, in northern Germany a sum (40 million)
 exists, which is equal to the entire unbacked banknote supply of France.
 We are therefore on a dangerous, slippery slope
 Ways to stop even the friends of the un-
 covered notes would appear. The slope of this
 The path becomes even clearer when we look back over the last five years,
 within which the years 1866, 1867 and 1868 were marked by the war and its
 Consequences of a poor harvest for the boom in trade and
 industry and general prosperity were as unfavorable as possible.
 At the end of 1864, the total amount of notes in circulation was 166 million
 Taler with 53% metal coverage, at the end of 1869 216 million with barely 48%
 Cover. The main culprits in this increase are: the Prussian
 Bank with 113 million and 55% against 152 million and 49% coverage; the
 In 1866, the Saxon Bank opened in Dresden with 6 million and 50%
 At the end of 1866, around 14 million and 43% at the end of 1869; the Meiningen with
 2/ million and 44% against 5 million and 33%); the Brunswickers with 2281000
 against 3779000, the Hanoverian with 1492000 against 2571000 thalers.
 The Frankfurt Bank has also greatly increased its note issuance, from 25 million.
 guilders to 29 million; at the same time, however, the percentage of metal coverage
 from 55% to 63%, meaning that the sum of uncovered
 Notes remained the same. In a few banks, mainly
 due to competition from neighbouring countries, a reduction in banknote circulation

77

ftstatt; the strongest at the Leipzig, from 7 million to 3484000 thalers.
 At the same time, one of the main tasks of the banks was to recruit unemployed
 Capital has been completely neglected: the already low
 The sum of the deposits of all North German note banks decreased
 from 37 million thalers at the end of 1864 to 31 million at the end of 1869. The English

Paper banks, with the exception of the Bank of England, have over 500 million. Taler, the Scottish over 400 million, all banks in England, Schott» country and Ireland over 2000 million deposits. Nor was it possible to push down the interest rate through this apparent increase in money; The same amounted to an average of 1.4% at the central banks, or on the open market Markets in the years:

| mc | ern Ham-Frank- | Amfter-| 5 Peters=
 London] Paris | Berlin burg furt Daft Vienna burg
 1867 25] 250 4 2 2 (3% 4 7
 1868 2/16 2½ 4 1¼16 2 25% 4 7
 1869 37 275 ur 2 3 Sa 45% 6 /

If one now compares the northern German banking centres, the discount highest where there is the most paper money, in the Kingdom of Saxony, because In Leipzig it was 4% from 1 January to 14 September, from 14 September to October 5th 5%,^e from October 5th to December 31st $5\frac{1}{4}\%$ or an average of 4% % Even today it is higher there than in Berlin.”

IV.

After all this, there seems to us to be no doubt that the monopoly privilege to issue individual notes not backed by cash, must be recognized as a highly serious aberration of the legislation, which has already brought the most dangerous socialist consequences upon us= pulls.

But it would be even more dangerous to turn the existing privilege into a to make general freedom by allowing everyone to love to issue such notes, ie to make paper money. As the unity of metal money, so is the unity of paper money of the greatest Importance for traffic. It would be folly to search for coins in metal money= To strive for unity and to achieve the greatest possible diversity in paper money to pay homage.

Everyone, with few exceptions, is of the opinion that traffic, and for purely mechanical reasons, a paper medium, i.e. paper money. This need is, and can only be on average just as uniform as that of metal money. He has nothing whatsoever to do with momentary crises and speculations 0. Michaelis shows this most strikingly in fine, multifaceted- thought work “Notes and Deposits”, where he also presented, among other things, the

Papers to lend a helping hand, with well-deserved ridicule.

It cannot be considered a task for any bank or person by developing *Reitwechseln* (seilicet banknotes) in trade crises to intervene or any emerging need for payment means or even to “fertilize the traffic”, as the wonderful bare phrase is. O. Michaelis can take credit for this in his work “Notes and Deposits” with irrefutable sharpness to have determined.

This one view is enough to teach us what it means When some economists want to advise us to stop manufacturing Banknotes, like a normal business, to be released to everyone, from considering that this release is actually preferable would obviously only benefit big business.

It has also been suggested that the production of banknotes should be liberalised, but – certain “police” restrictions deemed necessary and to enforce these “police” restrictions through so-called “Normative conditions” should be established by law. But that would mean only add a public deception to the harmful measure, because a “police restriction” of banking business requires also requires a police check of the same, and such a check is and remains under all circumstances merely an illusion.

V.

To be completely clear about the nature of banknotes, it remains to investigate what happens when a central bank is liquidated, or the note privilege ceases. It should be noted that after Previous practice of legislation, the privilege of notes was partly limited to certain time, partly on notice, partly for an unlimited period cared for.

For the sake of greater clarity, we assume the same Figures as at the beginning of this study and assume that the liquidation is regularly carried out according to music theory.

The bank therefore has one million in cash and two million Paper backing, three million notes in circulation. Two million Notes were given to acquire the paper backing for it; the third Million was partly loaned at interest, partly was beneficial Realities have been acquired for this. You can only do two things with money do, namely borrow it or buy something with it.

In the event of liquidation, the bank can now first of all convert the bill of exchange deposit in the amount of 2 million into metal money and redeem an amount equal to the bills of exchange given for it. For the third million notes, the situation is as follows: for a part of the same realities, they can be equal

if converted into metal money and notes in the corresponding amount

79

The notes borrowed as money can still be found in the hand of the first recipient, then he has either no claim to replace it in metal, or he can at most also only as a loan. However, if the notes lent are already passed into the second hand, and have given the first recipient the service of money, the latter is undoubtedly obliged to pay the bank the corresponding amount in money, or in their own notes= refund.

It is clear from all this that the bank in this transaction has its own original cash assets of one million remain, and that their In addition, the interest on the two million remains, for which she Capital increased by means of the issue of banknotes. – Incidentally, experience has shown The profit which the bank derives from the Lost notes arise during settlement.

The privilege of issuing notes not backed by cash is, as already said, equivalent to entering into the interest benefit of an equal Sum for the duration of the privilege, ie in most cases substantively, for an unlimited period of time, unless the bank for other reasons is forced to liquidate.

Such banknotes not backed by cash are therefore nothing more than private alloyed riding changes, i.e. worse than the worst riding changes.

VI.

If, according to the investigations so far, the issue is not in cash covered notes by private individuals, even if it were completely released, a highly dangerous legalization of arbitrarily created, in lieu of money Serving change of riding means: if such expenditure of uncovered notes of a taxation of the whole in favor of the note issuers if such taxation of the whole is for the benefit of individual in no way appears to be permissible any more: – but if On the other hand, for reasons of mechanical convenience, the traffic of a paper means of circulation: – so the question arises how and on how to create this paper means of circulation for the trade becomes.

The fact that notes backed entirely by cash are not issued by private individuals, is obvious, as it is more of a disadvantage than an advantage for the issuers would be linked:

The simplest, most obvious and most natural approach seems to be

if the state, as it provides for the metal money, also for the paper Money would be a concern.

The banknotes are nothing more than fabricated and circulating money. "The one" – says the "Kölnische Zeitung" in its already several mentioned remarkable work – "the this claim in bank= notes paid out, considers it as settled; whoever receives a Goods against cash, ie against the immediate receipt of the equivalent value in

80

money, the condition of cash payment is considered fulfilled." – As long as the revocation does not occur, the banknotes serve and function as money, and the fact that they are not "legal" tender ft, does not deprive them of this property.

Max Wirth in his "Handbook of Banking" draws as one of his Main conclusions (p. 580) are as follows: There is no fundamental Difference between banknotes and government paper money... The Banknotes without a fixed exchange rate are the state paper money in the Practice is the same in that the regular redemption of the former at the cash desk, with government paper money by accepting it in Payment is amply replaced at the state treasury.

There is therefore not the slightest reason to ignore the obvious and natural not to take the appropriate path, which consists in the state the traffic, like the metal money, so also the paper money, whose Traffic for reasons of mechanical convenience requires, alone and for finally delivers.

The frequently mentioned work of the "Köln. Ztg." "We must," she says, "the uncovered notes, because they push the metal money out to the country, because in moments of crises which exacerbate the latter, because compared to such disadvantages the The savings brought about by them did not benefit the whole country, but only the issuing banks, and because the country finally demands can that what circulates as money can also be used by each and every cash register be taken without hesitation, and can only have a very moderate amount of paper money justified, which despite fits indissolubility, because of which it is harmless, because state and citizens must continually make mutual payments."

After all this, we believe that the fundamental truth in the so-called banking question first of all to have established the sentence:

"No more banknotes, only government paper money."

Since the bank question is only a banknote question, Jo would hereby the fundamental solution to the so-called banking question has been given. of government paper money there was absolutely no need for a state bank

and the complete release of the banknote-issuing-free currency=
There would be no obstacle to the business.

It might be worth remembering here the fears that
the possible misuse of paper money issuance

Max Wirth writes about this in the "Handb. d. Bankw." (p. 53):

Because of the problems resulting from the misuse of paper money
losses, reject the use of paper money altogether

To want to is just as wrong as to want to use
wanted to renounce sharp instruments because they
cutting, or wine, because you can get drunk with it."

– To make matters worse, the Afigents and Greenbacks prove that the shortage
a state bank has no guarantee against misuse of paper money

Perrot, Bismarck and the Jews. 6 81

This guarantee can only be achieved in advanced public education
can be found.

Whatever solution one tries to give to the banking question, abusive
Government paper money is always and under all circumstances possible: – not in
Cash-backed banknotes, on the other hand, are in and of themselves and under all circumstances
an abuse.

But since every institution is subject to possible abuse,
fo possible misuse cannot be an argument against government paper money.

Our fundamental conclusions can therefore be summed up in the following sentences
together:

1. No more banknotes.
2. No more state bank.
3. The state alone makes paper money.
4. Complete banking freedom.

VII.

From the fundamental demands developed above, the following arises:

Next, the question is how to get from the current situation to the one considered correct
and economically recognized that the transition could be brought about.

It hardly needs to be said that every such transition is accompanied by possible
must be done with the greatest possible care for existing conditions. First of all,
It would be impractical and inappropriate from the outset to increase the number of
current circulation medium suddenly significantly reduced; and also

It would also be wrong for other reasons to proceed if one were to Prussian State Bank wanted to suddenly and all at once.

There is no other means here than to use an expression, which Faucher uses in "Currency and Prices", on the same The way out of the dead end is the same way you came in.

But we have reached a dead end by using the banknotes successfully increased, which was the same with regard to the unbacked banknotes The transfer of public capital to the banks was significant own use. It is therefore only fair and reasonable that the The whole, i.e. the state, gradually takes back the capital belonging to it, by collecting the notes gradually, ie in annual installments, and by Issue your own paper money, whether in the same amount, whether annually in For the notes that are completely covered by cash, there would be no to issue paper money, as the cash deposit in the free traffic would occur.

The main increase in banknote circulation in Germany occurs in the period since 1859, i.e. in a period of about 12 years. The notes= sum, the gradual reimbursement of which to the state is at stake, already amounts to over 200 million thalers, of which over 100 million are not are covered in cash. The reduction resulting from the withdrawal of banknotes of the bank capital would therefore amount to about 100 million thalers, while Instead of the other half of the note, the cash cover of the banks will be

82

It is therefore only the uncovered half of the note whose withdrawal takes longer appointments required.

If we look at the confiscation of the approximately 100 million thalers of uncovered Notes for a period of about 10 years, so in each year to withdraw about 11 million thaler notes and replace them with government paper money. replace it, which seems completely harmless. At the same time, an appropriate apparent reduction in the circulation of paper money as a result of gradually be brought about that government paper money is issued annually, not for the the same but for a lower nominal amount, as the collected issuing notes.

No government paper money would be issued for the notes backed by cash In proportion to the withdrawal of these notes backed by cash, the Cash coverage itself is free.

This transformation would take place over a period of 10 years certainly not without difficulties, but certainly for the lasting welfare of our entire cultural development.

As regards the interest on the notes not covered by cash, which the banks during the period of the privilege of issuing notes, it will not

recommend the adoption of a retroactive law; during the transition period
However, taxation of the uncovered banknote amounts is indicated
appear.

The way proposed here – and it is probably the only
possible, since there is only one way out of a dead end –
would at the same time reduce the amount of paper money in circulation to less than the
Half e reduced, because on the one hand for the banknote amounts covered by cash paper
would not be reissued, on the other hand, the replacement of banknotes by
Government paper money is not recommended in the same nominal amount, so that
in this way an annual gradual reduction in paper
course would occur.

The difficulties and concerns of such a settlement are not
misunderstood, but they are by no means as great as they appear at first glance.
And on the other hand, they are faced with the certainty that a
Continuing on the previous path infallibly leads to socialist catastrophes
ftrophes, which are much more serious
than the difficulties which arose at the time of the still
counteract possible reversal.

Such a serious reversal as we propose is likely to be unequally
be preferable to those means of information which aim to
To limit the evil only a little, to ensure that it is then no longer a question of
fefe, but otherwise to let it continue to exist. These are the
Proposals, such as those now emerging from important quarters, and for the most part
lead to similar measures as those in England by the Peels=
acts were taken.

This means turning around in the dead end, but only a short distance to
the exit and then stop again. It would happen

6* 83

This is of course not in the interest of the general public, but only in the
Interest of the big capital party interested in the banknote issue.

On what kind of conditions, namely economic and social conditions, the
existing monetary and banking legislation, as shown by the
latest developments in the city administration of New York, as shown by the
Stock exchange conditions in Paris, Vienna and also Berlin. Here, in fact,
a social question, and it has become more pressing than our
daily press seems to consistently accept.

The so-called banking question is, without a doubt, an essential component
the social question, insofar as it is simply a question of whether the
privilege transferred to big capital through unreasonable legislation
of making money for one's own pocket, with its destructive, demoralizing
the most dangerous effects continue to exist, whether it may
continue to exist in a somewhat milder and more limited manner than before,

– or whether it should be abolished and eliminated altogether.

There is no question that legislation that gives big capital a Monopoly of making money for one's own pocket, simply by doing so an artificial conflict between capital and labor: which is already asserting itself on a broad basis and through no stamped art phrase can be denied any more. The more and more, and indeed in an “unnatural way” spreading capital power is not a meaningless socialist phrase, but a fact which we all have to pay attention to.

If we do not want to bury our heads in the sand like the ostrich, in order not to see the danger, – if we honestly and sincerely face things like they are, look them in the face and want to call them by their right name – then we must admit that a social question and danger really exists and It is true that, due to the errors of our legislation and the state administrative modalities which it creates, by means of that debt economy of which has already brought most European countries to the brink of bankruptcy and which has had a degrading effect on the entire public life into every business and every family – and then by means of those monopolistic enrichment methods which in banking and stock corporation legislation in favor of big capital and which are increasingly working to promote the worship of the golden calf in place of every other religion in this world.

Progress along this path would inevitably lead to socialist catastrophes. It is still possible to turn around and return to healthier May these lines help to make this happen. In any case, we considered it our duty to use them as a warning sign for the German nation to write here.

Perhaps German honesty and insight will succeed in reforming the to enforce banking legislation, which has so far been hampered by the flow of the interested parties of the note privilege and the ignorance of the public opinion has failed on the core of the matter.

84

13th motion on the banking issue
presented at the “Economic Congress” in Lübeck on August 29, 1871.

Considering that the Economic Congress

1. the law of “free economic movement” as a supreme economic law has been proclaimed,
 2. the operation of private businesses by the state is always considered viewed with rudeness and declared,
- the Economic Congress

a) the regulation of private business by the state –
(normative or concessionary conditions for banking business),
b) the operation of banking transactions by the state (so-called state
banks)
under no circumstances recommend, nor even discuss.
Rather, the Economic Congress can only declare
for unconditional banking freedom.

Considering, however, that a so-called “banking question” has arisen,
that the creation of means of circulation functioning as “money” is a
“transaction” and in particular as a banking transaction;

Considering that a banking question only exists if one
Creation of so-called banknotes is considered a “business”,

Considering, however, that there can be no reason to prohibit the manufacture of notes,
if it is a “business”, by “normative conditions” or concessions
conditions to be restricted and regulated by the state,

Considering that if the manufacture of banknotes is a business, like any
others, logic demands, on this business, as on any other,
to apply the law of “free economic movement” and from the
“Competition” alone is the remedy for all concerns that may arise
expect,

Considering all this, the so-called banking question should be reduced to the question
reduce,

the issuing of banknotes is a “business” and as such logical
to completely release,

or is it not a “business”, and therefore further related to the banking business
no relationship whatsoever.

The present resolution proposal assumes the latter eventuality
as the correct one and attaches the following implementation measures to it:

1. No further edition of money will take place.
2. The amount of banknotes issued to date has been paid by the banks in annual
partial rates, the amount of which is determined by the legislation, gradually
pull.
3. In the amount of the annual notes to be collected by the banks=
amounts, the state issues paper money annually in the same, or according to good=
The legislation also provides for a smaller amount.

4. For the amount of banknotes covered by cash, no
no paper money was issued.

5. The benefits previously enjoyed for notes not backed by cash and – possibly
according to the approval of the legislation – including during the transitional period
Interest still to be enjoyed from the uncovered notes remains for the
Banks as a public gift.

6. The operation of all banks shall be completely freed as soon as they no longer issue banknotes
have more.

7. The Preussische Bank is of course involved in this process.
closed.

F. Perrot.

14. An investigation into the banking question).
(No. 38 of "Progress" etc. 1871.) – 17 September 1871.
A letter to Mr. F. Perrot in Rostock.

Understandably, the new order of things in Prussia and Germany
to the attempt to eliminate the old arrangement in the banking system and the
Banknote a general uniform, a greater weight and an all-round
to gain usefulness. Austria, whose money market in some countries
suffers from breaking, listens attentively to the debate and is excited about
the results of the investigations. It is not just the theory in words
and writing, but the practice in trade and commerce, which leads to a decline
should come to an end.

Also your investigation into the banking question, in these pages
laid, therefore found attentive readers, although they were immediately in the first
sentences as a somewhat localized one, for Prussia or for North Germany alone
But in the further course the question also becomes of interest
from Central Europe and, by the way, as is unfortunately the case in Northern Germany
It is a bad practice to dismiss Austria as if this economic complex of
12,000 square miles with some 30 million inhabitants in the bank
and banknote question no history, no experience, no example, no
Law, no authorization, no present and no future.

It is for this reason that I take up the pen for this epistle, not to
Your views on banking and its reform, not your
to examine theoretical statements in an approving or rejecting manner, but
just to provide some information about Austria's banking system in the present
To convey moments of orientation. Perhaps you will notice
Dear Sir, from the fact that the banking question of Austria cannot be lumped together with
which can be thrown into Prussia and Germany.

1) From a friend of our paper, whose social position and knowledge

efficient reputation, however, entitles him to speak a decisive word,
This article is addressed to us and we hereby recommend it to the attention of our readers.
The editorial team of "Fortfchr".

86

I do not believe that Max Wirth, on whose Handbook of Banking
They appealed to many like-minded people with the statement
that the issuing of notes by a bank of notes created a "fictitious capital"
because these notes are only the representatives of the effectively inserted
capital of the borrowers of the notes. Even less like-minded people
However, your statement that the issue of non-metal
covered notes is a taxation of citizens, or "an un-
interest-bearing compulsory loan" of the bank to the public.

"The note not backed by cash is at the same time a debt, a
Tax, a donation and a robbery", – this is the summary of your
Consideration which, if correct, would put the banknote before the barriers
of the criminal court. In our humble opinion
is the banknote which represents the equivalent in letters of credit or securities
neither a debt nor a tax, nor a gift
nor a robbery. A note issued in such a way is nothing but the
generally valid means of circulation in exchange for a limited value-
object. The interest for the withdrawal of such notes is a reward for the effort-
administration and the risk of the bank, but not a tax or a robbery.

In the further course of your letter, the music edition will be referred to as the Aus-
exercise of a state power, namely the monetary power. The Over:
However, the transfer of this right to private individuals would be a monopoly privilege of
large capital, leads to unnatural accumulation of mobile capital,
puts capital in conflict with labor, leads to depraved
stock exchange conditions, the paper plague, demoralize public life and work
now into the hands of all subversive movements.

"The evidence for this is provided by the American, French and
the financial, stock market and moral conditions in Vienna!

This accusation alone is the cause of this epistle, and you will
I would forgive a Viennese and Ofterreier, dear Sir, if he
replied that the Viennese monetary, stock exchange and moral conditions
are unlikely to be known in detail.

The conditions in Vienna are neither worse nor better than the conditions
Baden, Frankfurt, Amsterdam, Hamburg, London and other emporia,
which you ignore in your denunciation. Take
but please check the bankruptcy directory of the business world in your area
Hand and compare it to Austria in terms of quality and quantity
act, and you will judge a little more fairly.

How little is known about openness and fine conditions in Germany, Your letter shows again that it is a means for Prussia and Germany to to get out of the banknote misery, the issue of government paper money attaches, no matter how strongly the safeguards against misuse are armored.

However, there is complete agreement in the serious Austrian circles that the banking business should be completely abandoned; about the authority of t Opinions still differ on the issue of music, only agreeing on this, not to allow the monopoly of the National Bank to continue.

87

But what about Prussia and now Germany with a terrible privilege burdening k. pr. Bank? Has the cry for help been heard? who was at the Bank Commission of the German Trade Day against the k. pr. Bank was raised? is the protest against the establishment of a Reichsbank already lost? will the vote for the necessity of the Existence of private note banks (as it is, for example, by the bank management Braunschweig) simply ignored? Do you want to use the extra= Prussian private banks are just as oppressed and enslaved as the old Prussian ones?

This should be taken into account before the very complicated, completely norms of Austria, whose economy has been cannot find peace, as a guard. Austria has a number of unfortunate wars and unfortunate statesmen are to blame= book, Prussia has recorded victories and victorious heads of state; Austria only has banknotes with a fixed exchange rate, Prussia hardly touched ever think of a discount on his notes; – such comparisons do not require to make a comparison of very different situations. The banking question fuch as the question of issuing notes has enormously differing opinions in Austria Premises, conditions and necessities against the same question in Prussia and Germany, which I only refer to on this occasion).

15. Two members of the German Reichstag on the banking question.
By F. Perrot.

(No. 39 of "Fortfschritt", September 24, 1871).
(Reply to the letter addressed to me in No. 38 of the newspaper)

It is certainly self-evident that in Austria one should first of all impending regulation of the banking system in the German Empire with excitement I completely agree with you, dear opponent, that the situation in Austria regarding the banking issue requires a special assessment required, as it is closely related to the general financial situation of Austria context.

It is far from my intention to focus specifically on the Austrian situation

to make targeted proposals on the banking issue. How sad, however, the light in which I see the Austrian economic and financial relationships, I have always believed that in every situation of public life the clear recognition of the economic truth must be the first condition of procedure in public affairs.

It will probably be of interest at this point if I follow the views which you wrote in your letter to me about the actual core of the bank question, compare it with some statements which have recently two outstanding members of the German Reichstag in this question through the press. – In response to your accusation the ignorance of Austrian conditions I come to the conclusion

1) The author remained anonymous. Perrot.

88

back. – I also ask myself, before I return to the aforementioned work of our two Members of the Reichstag would like to make a few preliminary remarks.

“In our humble opinion,” you ask, “the bank note, which has the equivalent in letters of credit or securities, neither a debt nor a tax, neither a gift nor a robbery. A note issued in such a way is nothing but the generally valid “Circulatory means in exchange for a limited object of value.”

This latter proposition must be fully and completely admitted, but that the bank through this exchange of its notes for interest-bearing securities enjoys interest on a capital which it would have had without the issue of banknotes You will certainly agree with me that I would not have had that.

“The interest for the withdrawal of such notes” – then say further – “it is a reward for the effort and risk of the bank, but not a tax or a robbery.”

Here I must now allow myself the most obedient counter-representation, that when I withdraw “such notes”, ie whose “equivalent value is Bank has in letters of credit or securities” hardly any trace of a “effort” or “risk” on the part of the bank

The “effort” with the notes, like doing business with money, and the “risk” associated with this lies on the side of the audience, which has the notes in its hands in exchange for the thought value effects. N

The notes we are talking about here, that is, the notes whose “The bank has the equivalent value in letters of credit or securities” – the bank's "effort" consists mainly only in the coupon and their “risk” lies mainly in the selection of papers as well as the fire safety of the safe.

The bank's "effort and risk" should therefore not be in a motivatable relationship to the interest which they only by issuing non-cash backed notes and the effect The increase in the means of circulation caused by these notes falls into the main thing is the audience.

I may therefore correct myself by saying that it is not the writer these lines, but also M. Wirth (Handbook of Banking, p. 581) makes the claim that "banks that issue notes have a Capital in the amount of the excess of the paper circulation over the stock Cash received involuntarily and without interest from the public."

Here I would like to take the liberty of making some quotations from the most recent works work of two well-known German Reichstag members. Both I am certain that these works will arouse the greatest interest there too.

It is Mr. GD Augspurg and Mr. von Unruh, who have just about the banking issue, the one in the "Deutsches Handelsblatt" (No. 33-37) and this in a special brochure:

"The banking question before the Commission of the German trading day."

89

In Mr Augspurg you first meet – and Mr Augspurg enjoys great prestige in the question – an absolute opponent of all paper money, both "state" and private paper money. His ultima ratio is:

"that the use of any and all paper money is reprehensible and must be abolished, not only of the state, but also of the private sector paper money, banknotes."

The profit that banks make by issuing non-cash-backed securities Mr. Augspurg illustrates, among other things, by the following quotation:

There are banks which are legally entitled to withdraw any amount (without any restrictions) of banknotes without asking which is the actual existing capital, which is for all cases have to ensure their redemption; there are others whose deposit Capital shall amount to 200,000 thalers, and which are legally entitled to To issue 1 million thaler notes, in other words, from the real 8000 thalers in legitimate interest from the capital at 4% and further In addition, there are promises of payment based on compliance the bank cover an economically illegitimate interest rate of 26,000 thalers, so from 200,000 thalers 34,000 thalers or 17% annually!

This is how a member of the board of directors who is considered an authority in banking n

German Reichstag, in your eyes, my dear opponent, apparently very legitimate "business". It is also particularly the view that that

"The note banks are deceiving themselves by issuing their payment promises. by means of the annual interest derived from it an unjustified— provide a significant profit by increasing the exchange value of the circulating metal money, i.e. the legal national currency in Ratios of the amount of their paper money to the total amount of circulating (liquid) capital and thereby reduce the large Part of the population, which lives on fixed income, to significant harm, but secondarily the entire population of the state harm by undermining the operation of the legal standard of value."

"On the other hand, there are no advantages in any direction for the total population of the state through the issue of the bank— grades."

This is certainly very succinct and unambiguous and it justifies fe eo ipso fuch view is confronted with the question which Mr. Augspurg poses:

"Why do we continue to use banknotes everywhere? why not just ban the issuance of all and every bank= grades."

Mr. Augspurg himself gives the answer very drastically as follows: It is difficult to find an answer to this question other than

"that one is once accustomed to the evil, and that it seems hard a number of bank shareholders, who also once

90

Exploitation of the population through the issuance of banknotes: notes are accustomed to suddenly taking away this privilege."

Yes, yes, that would be hard for the poor shareholders. And the population which one "exploits" – ?

"The amount of the population," says Mr. Augspurg, member of the German Reichstag, "is in a strange state of economic Immaturity. She manages the paper notes, whereby her loan documented as if they were money, is happy about the The convenience associated with the means of circulation is like a child who Razor plays, about its smoothness, writes learned works about the Advantages of the credit economy over the monetary economy, whereby one becomes rich simply through one's credit, without working, and praises her happiness in the newspapers when she comes with a new

She knows nothing about the fact that she continually giving enormous sums to the individual privileged without receiving a single thaler of interest for it, thus exploiting them."

– "What is to be admired is the good nature of these Population."

So Mr. GD Augspurg in his excellent work: "The Bank Question" in the "Deutsches Handelsblatt" (No. 33–37).

No less interesting is the brochure issued these days of Mr. v. Unruh, also known as an outstanding member of the German Reichstag. With well-known brilliant presentation skills and in Mr. v. Unruh deals with this in a sharply logical manner in his brochure

"The banking question before the Commission of the German Trade Day."

You may – dear Mr. Respondent – read this brochure about= testify that one has by no means ignored the cry of distress which is heard at the Bankkon mission of the German Trading Day against the k. priv. Bank." –

No, this cry of distress from the unfortunate 22 bank directors will cannot be ignored. We have repeatedly and emphatically against every privileged bank and especially against state-banks at all explained.

Mr. v. Unruh sheds light on this "cry of distress" that came from 22 banks= directors and 4 non-bank directors of the German trading day with the incisive sharpness of his well-known Dialectics, the subtle irony of this criticism is of downright devastating effect. I can only ask you, dear Mr. Opponent, to change the lighting which Mr. v. Unruh responded to the much-discussed "cry for distress" of the 22 bank directors f should be read in his brochure.

German people, hear the "cry of distress" of your bank directors!

) The writer of this has also responded to the "Notschrei" in the "Nationalzeitung" No. 32 (Supplementary sheet) dedicated an illumination.

91

By the way, Mr. von Unruh thinks very similarly about the banknotes as the Writer of these lines:

"Do not issue cash-backed notes," says Mr. von Unruh p. 22 fhis brochure, "means: the involuntary credit of the public kums, everyone's claim, or, as it also appears from=

is pressed, the audience is taxed partly in favor of the Bank itself, partly in favour of those who have the bank credit want to exploit as much as possible."

You see, dear opponent, that my views are shared by notable people and now probably no longer so would like to be easily pushed aside. They believe that "the Rejume In my opinion, if it were correct, the banknote would be of the criminal court." – Hm! – Nearly touching on fights have, however, already been expressed by very noteworthy sources For example, Mr. von Unruh asks on page 31 of his brochure:

"Does it not come close to counterfeiting when paper money= tokens of banks circulate, which may be redeemable for cash are no longer able to do so?"

A well-known economist Mr. J. Faucher also brings the banknotes in= sometimes closely related to counterfeiting and the penal code and in his intellectual work: "Currency and Prices" in the "Viertel= Jahrsfschrift für Volkswirtschaft" (Year 1868). He says there, If the issue of non-cash notes does not affect all the pleasant effects that the central banks and their friends tell us about, then one should not punish the counterfeiters, but those who Detect and report counterfeit money. As long as the counterfeit money is If such a thing is not discovered, it functions in the same way as bonds issued without ca banknotes.

The whole deduction of Mr Augspurg leads to a different conclusion There is hardly any other explanation than that the banknote is essentially punishable because he characterizes it as an "exploitation" (ipsissimum verbum) of the population. Insofar as such "exploitation" is knowingly practiced and against better knowledge is defended for financial reasons, I would even like to fcriminal).

Mr. von Unruh comes to similar conclusions as the Writer of these lines. On page 35 of his brochure he says:

"We strive for limitation and gradual elimination all notes not covered with metal, with the greatest possible restriction all paper money in general and release of the deposit= fites= and giro banks. We want this goal to be neither lose sight of it, nor move too far away, but nor do I rush into it."

1) "A large-scale theft is being carried out in Europe today, alongside robbery=

chivalry and theocratic exploitation of formerly noble professions – and he leads to honor instead of imprisonment." – Dr. Schäffle, former Austrian Minister of Trade

We fully agree with this, and the positive suggestions we have made in this direction, have this very goal in mind. Only It seemed to us and still seems to us that the "elimination of all not in metal-backed notes" with the elimination of all banknotes is synonymous at all, since of course no bank would undertake it will produce notes backed entirely by cash, since this only costs but brings no benefit.

But is it true that traffic has become mechanically dependent? convenience requires a certain amount of paper circulation medium, fo nothing will be left but government paper money for this amount to keep.

What Austria suffered from the misuse of government paper money We know very well that this is the case. But since every thing is subject to abuse is, the misuse of an institution in and of itself does not prove anything against the same. – If the matter were not so serious, we would almost remember that dictum: "Even roast rabbit, enjoyed in excess – –"

What, by the way, is the "vote for the necessity of existence from private note banks" – namely from these private note banks felf-reimbursed – is concerned, then according to the statements of the gentlemen Augsburg and von Unruh, which I allow myself to join, one feparate appreciation hardly needs to be given.

It is the great advantage of clarifying a matter in principle that one subsequently no longer needs to specifically refute each individual objection. place.

By the way, if you – dear Sir – after the intentionally abundant quotes from the two works shown can now be read want to see what some well-known newspapers have said about them up to that point, and consider what they have not said about them, you will must admit that the art of silence is at least on the part of the defender of the note banks is trained with skill and tactics. I have a very detailed report on Unruh's work in a important daily newspaper, which contains the actual core of the matter and what Mr. von Unruh considers to be the core of it and presents it as such, only with a very vague, for anyone who has not read the brochure themselves has, meaningless phrase and instead a direct apology the paper banks.

We are certainly with Mr. von Unruh and our important people= hosts for full liberalization of banking business, but – banknote production We do not consider cation to be a banking transaction.

Freedom of banking and freedom of banknote manufacture– We therefore consider cation to be two fundamentally different things. – The The main evil of the banknote, the undue enrichment of individuals, would the same even with the complete liberation of this "industry"

because not everyone can and will issue notes. We close
We also refer to M. Wirth here when he says (Handb. d. Bankw. p. 582):

93

"With complete freedom of note issuance, a
A monopoly of the rich was created, which then had an interest-free
capital is advanced by the poor, because in-
agents cannot issue any slips of paper."

This epistle has become longer than I had originally imagined.
I would therefore like to see the answer to your objection of in-
knowledge of Austrian conditions for another epistle.

Rostock, September 20, 1871.

16. Banknote enemies.
(No. 43 of "Fortfschritt" of October 22, 1871.)
Second Epistle to Mr. Perrot in Nofstock.

I have the announced reply because of knowledge of the Austrian
I waited for the market and monetary conditions, but it is still not available to me today
and so I want, dear Sir, to address some of your
return to the theories and views put forward in No. 38.

They refer to the statements of two outstanding
Members of the German Reichstag in Berlin, a calling that was very
finds little resonance in a country that is affected by the financial votes of the
most outstanding members of Parliament were badly damaged and
becomes.

If Mr. Augspurg rejects all paper money and the profit
from the issue of such notes at an economically illegitimate interest rate
declared, he is on the dogmatic standpoint of the opponents
Galileo: E pure si muove. According to such a basic view,
One naturally comes to the trivial conclusion that the banknotes are only
"because it would seem hard to deny a number of shareholders this
privilege to take."

The writer of these lines is not one of those bank shareholders and
has no private interest in the paper institutes at all; but from the
Experience in the transport and business life of some parts of the world and several
He has concluded from the empires, countries, cities and districts that paper money,
banknotes, one of the most beneficial inventions of civilized mankind
and all the disadvantages and damages associated with it, a thousandfold
be replaced by its advantages. The banknote has the wholesale of
partially freed from the burden of commodity exchange, because gold and silver are

Goods and a heavy burden. The banknote is the steam horse in comparison to the pack animal or rowing boat of past centuries.

Mr. Augspurg is, it seems, still in the fairy tales, with which the Children of the money economy are amused and frightened by the exploitation of the entire population – through notes.

No less interesting in fact is the recently published brochure of Mr. von Unruh on the banking issue, but also no less – the one-sidedness of the assessment.

94

Mr. von Unruh ranks himself at the school of police officers in banking and censor; he cannot imagine a bank without state control, and nor a check without cash cover. A shudder grips him, that notes are only backed by one third in cash, and consequently the non-cash backed note is called "counterfeiting", and as I put it before stated: the banknote was presented before the criminal court!

But since the economic monstrosity of removing banknotes from the traffic in Europe, America, India and Australia by means of criminal law to distribute, had little prospect of practical feasibility, despite recommendation of Mr. Augspurg, Unruh, Faucher, Wirth and others, to propose, dear Sir, to issue government paper money.

This final motion addresses all that is directed against the banknote was put forward. Mr. von Unruh comes to the same conclusion (p. 31): "It is the state's responsibility to provide the necessary, fully important means of circulation and to use surrogates for metal only to the smallest possible extent and under full security of the audience (i.e. censorship and police!) to allow or to produce it yourself."

The view which is not fully with cash covered note a "paper note without collateral (p. 22, balance), an involuntary credit of the public, an exploitation of the population (Augspurg), a counterfeiting factory (Faucher), a theft in Great" (Schaeffle); – These gentlemen want government paper money. – Cheers!

May Prussia, which has only now become a great state, be spared To have government paper money in circulation in days of crisis; may the above-mentioned economists and their comrades present, what tragedy the Prussian money market would have offered, if the Rothosen had reached the Rhine, and government paper money would have been in circulation.

Austria knows a thing or two about government paper money and the counterfeiting of banknote to sing.

In this country, people argue against government paper money and for the Banknote; people are calling for banking freedom and soon also for freedom the issue of banknotes under normative provisions which hopefully the cash coverage as a long-overcome position leave aside.

This is of course not your view and your tendency, dear Sir, but it has comrades, even in your midst. I quote Mr. Leopold Lasker, who in his latest brochure (Berlin, 1871, Springer: Banking freedom or not?) the inappropriateness of all previous paternalism⁼ fuffifcife of the banks and complains bitterly: "only with the most complete Freedom of the banks has not yet been attempted," while the Theoretical views put forward in support of banking freedom are untenable and the experience gained from practice speaks for the same" (p. 43). "One must abandon the idea that the freedom of paper

95

in the interest of the banks" (p. 59). "The release of the notes: The issue is intended primarily to benefit the non-banking public come" (p. 60).

So in Germany, in Prussia, within your Reichsrat, dear Sir, the old prejudice about banks and banknotes is already finding its reasoned refutation, and one is not in a good mood to accept the charitable banknote to be summoned before the bar of the criminal court. The enemies of banknotes must few are already looking for other weapons to suppress modern traffic conditions niffe look around.

Vienna, mid-October 1871.

17. Banknote Friends.

(No. 44 of "Fortfschritt" of October 29, 1871.)

(Response to the article on page 348 of this newspaper: "Banknote enemies.")

Partly due to illness, partly due to other more urgent work it would not have been possible for me to access your money there, as I would have liked. circumstances with regard to the issue of banknotes in more detail. – By the way, I make no secret of the fact that I am very impressed with your Austrian I see financial circumstances in a desperately bleak light.

In my eyes, the most important thing in this dim light is your public debt ratios, the connection with the paper which is unfortunately a very narrow one, and whose influence on the general state relationships and on all individual economies, probably none other than a can be more rude.

If one looks at the recently published sixth edition of the "Handbuche

of comparative statistics" by G. Fr. Kolb the figures of the Austrian Reich's national debt economy; if you look at the year after year in hair-raising dimensions accumulating deficits; if one reads that this avalanche of national debt has already reached over 3 billion guilders has grown and its interest etc. is about one third of the total entire state income; if one considers the context this accursed national debt economy with the paper fraud If one takes a closer look, one agrees with Kolb that the state fuchen at the same time "debts of every single inhabitant of a country, Debts of every family, debts which every piece of land, every business (with the exception of certain banking and stock transactions), any business may burden," and when one finally removes the disruptive, destructive, like a creeping poison, the influence that these states mismanagement in all directions: there can be no doubt subject to the fact that, on the one hand, the public debt ratios the entire remaining Economic life in Austria dominate and that on the other hand, with such situation all proposals to eliminate the paper fraud are useless, If Austria does not have a finance minister like

96

great Baron von Stein, and if he does not have the authority stands by, with almost dictatorial power, the economy= relations of the entire Austrian crown lands centralistically to regenerate.

In other words: I see the Austrian financial situation as an almost hopeless one and believe that to the previous Austrian state bankruptcies will be joined by further ones, so long, until -) well, I leave it to you to finish the sentence.

So much for now about the "financial situation" there.

But if I am not mistaken, you are probably mainly concerned with the defense of the banknote at all, and I come back to this core of our disagreement.

You cite Mr. "Leopold Lasker" in your favor. Mr. Leopold Lasker is not initially the well-known Reichstag member this family name. The representative is called Eduard Lasker. The Bremen-based Handelsblatt, for example, recently had at the top of its newspaper mistakenly identified the Reichstag member as the author of the brochure "Bank freedom or not" and this error, as far as I know, not yet redressed. - To my knowledge, it is the first time that Mr. "Leopold Lasker" is mentioned as a writer. It is probably Interested if, for example, you wanted to earn the public with a more detailed information about the proposed new author to lend a helping hand.

A key statement by Mr. "Leopold Lasker" that you quoted

gives me the opportunity to immediately address one of the main points of our question Mr. "Leopold Lasker" said: "One must take the view give up, as if the freedom from paperwork was required in the interest of the banks".

Whether it is "required" in the interest of the banks, we want to find out let it be asked and only come back to the one point, which Advantages of issuing non-cash backed notes for the banks really have.

I come here via my multiple mentioned simple The calculation does not ignore the fact that a bank, for example, white issues three million notes and only one of them million in cash to cover the interest of nearly two million is enriched.

I would be grateful if you could please address this point It seems to me that the defenders of the banknote never address this point properly. – It is likely that find out whether "freedom from paper is required in the interest of the banks".

They call "paper money, banknotes, one of the first most fprodigious inventions of civilized humanity," say then: "The banknote has freed the wholesale trade from the burden of

1) The events of 1931 allow us to admire Perrot's vision.

Perrot, Bismarck and the Jews. 7 97

Partially exempt from the exchange of goods, because gold and silver find goods and a heavy burden." !)

In the second of these sentences I miss the "paper money" which They are mentioned in the first sentence together with the banknote. The paper money, and indeed also the government paper money, is just like the bank= note, with the property of "relieving the wholesale trade of the burden of goods= What you say about the banknote so brilliantly would of course also have to apply to paper money in general.

It seems to me that you are overlooking the fact that in the paper economy not only paper is replaced by metal, but also the amount the means of circulation that functions as money is increased at all, namely by the amount of unbacked paper money issued, or the not backed by cash notes, the interest from which flows into the bank's coffers.

I completely agree with you that the only merit of all paper money in general is that it is used for some commercial purposes transactions the more inconvenient, heavier money by a much easier trans= portable medium, but government paper money does just as well as Banknotes. But the fact that this is precisely what the "wholesale trade", as you say,

was most useful, and that in this substitution of a more convenient medium for a more uncomfortable creative moment – that is To my knowledge, this has not been explained anywhere up to now. Rather, it would be a new discovery.

That the “liberation of wholesale trade from the burden of commodity exchange”, as you put it, in this sense, above all, the change is owed, namely the real, actual change, should surely, You should not have any doubts either.

Also, all those who have a creative influence on the banknote power, have so far seen this creative power only in the fact that a bank, the more notes it produces without cash backing, the more “credit” The “blessing” of an unnaturally overdriven credit economy is likely to be in Austria become clearer and clearer.

It is certainly a most wonderful idea that certain people have the privilege legium to make paper money in order to give others “credit” and to get interest paid for it. However, it would be much easier if everyone can pay for the amount of “credit” they need. (he makes his paper money himself?) – that would be absolute “banknotes–freedom”.

Why you still want to have “normative provisions”, see I really don't. Why, given the enormous advantage you have of banknotes=

7) The inflation of 1919–23, the “paper plague” of the post-war period, has

German people not only from their goods, gold and silver, but also from exempt from all assets.

2) See the paper money (“emergency money”) of the provinces and cities during the inflation from 1919–23.

98

freedom, nor “normative determinations”? – Why not just leave the regulation of this business to the “competition”? – that “competition” of which it is said that it flows all business in the best rules?

Why, for heaven's sake, even normative provisions that yes, always only hindering the free movements of the “competition”= – Normative provisions from which no human being can say knows what should be in it and what should not?

Why do you, who call all “police” and “censorship” in banking matters

to particularly detest (as I do too, by the way), for the banknotes= fabrication nevertheless "police" and "censorship" by means of the "normative determination" to retain the "measures"?

It makes a strange impression on me when I think about that the only defender of the "normative provisions", sometimes the Bank discussion at the "economic congress", this normative conditions repeatedly expressly as "mere police treatment" of the banking industry, "for the protection of the public" reached and characterized.

"Police" restrictions on the banking industry by any "Normative determinations" naturally and naturally also presuppose "police surveillance and control of the banking industry."
– As far as I know the banking business, I consider any kind of control of the same by state organs as being as harmful as it is illusory.

To conclude, I would like to introduce you to Mr. August Eggers in Bremen cite, who is probably familiar to you through his work on the coin= reform is known. Mr. Eggers is, like Mr. Augspurg, a great-grandfather merchant. He expresses himself in the recently published second issue of his "Economic Treatises" on the "non-metal-backed banknote" as follows:

"Adam Smith puts in his Wealth of Nations, Book II, Chapter II; The following example is given: the circulating and sufficient for traffic The total amount of metal money in a country is one million pounds sterling. Some Time later, some banks and bankers give a million pounds bank= notes, to cover which they retain 200,000 pounds sterling of metal money. The circulation of the country remains unchanged and the circulating million Pound banknotes have the same purchasing power as the previously circulating Million pounds of metal money. 800,000 pounds of metal money will be released and can go abroad as interest-free, beneficial to the country Capital."

"Such a procedure is piracy." The 800,000 pounds have an oversaturating effect on the foreign market and devalue the metal money.

"It is not the country in general that is characterized by this first practiced on others and then back on itself= falling piracy enriched, but it is first of all the Bankers who make a profit without working."

7* 98

"The banknote is not an international means of payment. In order to facilitate trade= To balance the balance sheets, metal money is needed."

"The non-metal-backed banknote is an illegitimate form of use of credit, which is the basis that the metal=

money granted to all other forms of credit, is false."!)

"The economic power, the society, the state must suffer from privileges which a certain Class without work a profit of (in Germany annually) 5-10 million thalers. A serious abuse can only have a paralyzing and corrupting effect. Privileges give provide themselves with the means to maintain their possession. There are already signs that the cancer is spreading."

And I believe that we also know how to "catch a song" in Austria, not just from the misuse of government paper money, as you write.

Not only the abolition of banknotes, but also the possible reduction of all paper money in general must be the constant pursuit of all healthy national economy. Austria can, however, issue notes and paper Money cannot be disposed of in an honest way, except when there are surpluses in state budgets, while for decades there has only been deficit has accumulated into a deficit.

Rostock, October 24, 1871.

18. Austria state bankruptcy.

3. Epistle to Mr. Perrot in Rostock.

I would have to possess the spirit of Goethe, who would answer Mephisto's questions about student's answer, I wanted to address all the points you made in your reply touching, clearly and convincingly explaining. You can only do one thing particular point in such a polemic of a journal.

Please allow me, dear Sir, to end this third epistle only with the an= furveys on Austria's financial situation, which I am so eager to was. They are very clear about it, very honest, very unreserved, very This facilitates the trial and the jury's verdict.

You write without concealment that "you understand the Austrian monetary situation in a desperately dim light"; "They explain the national debt= conditions as pernicious in their influence" and arrive at the result,

) Perrot's tireless work did indeed result in the financial law 1883. Among other things, since then only the Reichsbank has been allowed to issue paper spend money. But the Reichsbank is only a state institution to a very limited extent. Perrot has described the situation in his work "A so-called Deutsche Reichsbank", which under the pseudonym Dr. Hilarius Bankberger appeared, taken apart.

We, the descendants, have experienced the example of uncovered notes ourselves There is probably no German-blooded person who does not have in his fcafe the beautiful 1000 and 100 Mark notes, which are not issued by the Republic of Germany

have been redeemed.

100

"that the Austrian financial situation is almost hopeless", with the Belief, "that in addition to the previous state bankruptcies, there will be further ones will occur until – –".

These breaks are your property, not mine, and these Quotes about past, present and future national bankruptcy Austria's own. Probably these are serious and weighty statements are the result of careful studies, but you have, Dear Sir, don't say anything about it. People here know it well probably, as one would in Prussia behind a carton of wheat beer or behind a Schoppen Grüneberger roundly condemned Austria, and before the last Drops of those noble drinks, it is certain that Austria in Politics and finance bankrupt. But such pub conversations are certainly no scientific explanations and no noteworthy evidence and will certainly, dear Sir, be received by you as well as by any serious state man and economists as empty phrases. Therefore refer also to Kolb's statistics, in which Austria's state debt economy demonstrated.

But that is the only thing you can use as evidence for your declaration of inevitable national bankruptcy of Austria; the only – without any input from you, without further investigation, without any Consideration of the circumstances, without consideration of historical events or economic events, – nothing, absolutely nothing according to your own studies and experiences, but merely the dictum of statistics as mefi Anāfic prophecy of coming bankruptcy!

The reply would not be difficult. One could point to the wealth of Austria who can easily do not only pay the interest on the national debt to pay off, but to return the capital of 3 billion in a reasonably short period of time amortize; it only requires a regulation of the property tax, a management of forest property, implementation of communications, etc. – and the hair-raising dimensions of the deficit would have cost the richest surplus. Of course, the state of peace in Europe is firm prospect, and a Napoleon should not have the south Austria and a Bismarck brought war to the north of this brother state A little look beyond the book of statistics into the world of fociety life in Austria for two decades would be of great benefit to you and your judges demonstrate what a colossal upswing Austria has enjoyed in all material territories that no one could have imagined after such unfortunate wars and battles, least of all the North German party men. Beat a little the results of the sugar and the beer tax, look at the yield of the tobacco gradient, let yourself demonstrate the increase in controllable objects in realities and factories, – – and the heroes behind the pint of wheat beer or the pint of green bergers will perhaps find themselves moved to prevent the state bankruptcy of Austria

to a later date. Always assuming that the Imperial Prussia has not recently brought its breech-loaders to Bohemia

101

because Austria was not prepared for war either at Solferino or at Königgrätz prepared, and is – not prepared for the next one either.

However, passons! As little as one washes a Moor white, so little is the prevailing prejudice about Austria, which particularly affects northern Germany infected, to eliminate.

So bankruptcy remains! Everything that is said against it, is whitewashing, optimism, careless glossing over of the true situation fts, self-deception or deliberate fraud, patriotic fraud, Ignorance of one's own country, – in short, the announced bankruptcy is the sole, appropriate, well-founded truth.

You and your like-minded people can only not demand.

What would follow from this? But only the duty of the publicist, the Citizen and statesman to warn everyone so that the coming. State bankruptcy of Austria does not harm or disadvantage. Call it but throughout Germany that Austria will soon be bankrupt again will do; let the night watchmen blow: beware of fire and light and Austrian papers; trumpet it to all neighbors enough that Austria cannot be granted overnight credit, and all stands, in all economic areas, on all stock exchanges, in all It should be announced in the newspapers: Austria is bankrupt.

The fact that Austrian journalism does not follow these emanations, You can read, dear Sir, from the weekly magazine published in the Kaiserstadt Vienna appears and your letter with the expression of the hopeless Austrian Reich financial situation and the distant state bankruptcy sans gene.

What do you think, dear Sir, is the consequence of such a proclamation of the Austrian bankruptcy? Do you still have demand in the north, west and south of Germany, whether these declamations about the financial situation Austria have persuaded any capitalist to buy his Austrian Sell securities? Why not find out how many millions not in the last decade, but since the civil war, since the Siegen in France, from Berlin, Breslau, Cologne, Frankfurt and others places to Vienna to have papers sent against it? Perhaps it will be of interest to you if I tell you something that You will certainly not find it in Kolb's statistics, but there are sources who ft that since last year a few hundred million and since the last months about 60 million guilders nominal in Austrian Securities can be sold to Germany for capital investments. All these owners and purchasers of Austrian papers are blind and see that

Sword of Damocles of so versatile, also from you with such reliability announced state bankruptcy. State pension, priority bonds, Lots, shares, mortgage bonds, – all these bankrupt Papers are coveted by foolish and deluded German capital, and are an Austrian export item. Woe, woe, three times woe!!

Do you not remember, dear Sir, the saying: "Gray

102

is all theory!!?" The practical world does not seem to be subject to the judgment to agree with some party men and leaders; one is in German country is not the enemy of its own money, and nobody wants to be part of a The capital is also everywhere very sensitive, suspicious, eagle-eyed, cautious, and the "former Austrian state bankruptcies", as you like to express it, are a warning sign with giant letters! And yet this capital – goes into the arbor, as Nestroy declaims. I fear that your call, so well-meant he may be, this capital will not teach anyone any better despite Kolb's Statistics etc.

So if the next Austrian state bankruptcy, which you can predict at the hopeless financial situation, Prussian and German capital is lost, then you, dear Sir, are not to blame; you have warned honestly and honestly, and courageously published your opinion.

May Heaven reform sinners, so that they do not fall into the darkness Austria's national bankruptcy means they have to put their money and their skin on the mar

Vienna, November 1871. AN

19. Abolition of all paper money.

4. Epistle to Mr. Perrot in Rostock.

Actually, any further discussion is superfluous. You, dear Sir, have declared Austria bankrupt because of its monetary economy; I have Your reasoning about the past, present and future of Austrian state and national economy, and we jointly warned the whole world not to give credit to Austrian securities– This is probably the end result of all polemics, the end point of every Debate. According to such a premise, it is indeed a luxury to say a word about paper money or paper money, banknotes or government notes, banknote cover or confusion of notes etc. For Austria at least any further discussion of the monetary economy would be accompanied by the practical Significance is missing; Austria is bankrupt, and it is completely irrelevant for these millions of economic people, whether to issue banknotes may and should, or whether only precious metal should circulate?

The point of view which you, dear opponent, sharpen as follows:
"Abolition of all paper money" has for Austria, which I represent
allow me to give only a theoretical or rather at the advertised
Bankruptcy has no value at all. I fight de lana caprina. And then it is
a little embarrassed, as it were, to have to climb the teaching lectern in order to
ftended questions to answer, although in a newspaper article
can only proceed aphoristically.

But these epistles have taken on a greater extent than
was intended from the outset, and they have the interest of a further
So, despite the bankruptcy, the polemic may be a
Continuation received.

103

Above all, I request, dear Sir, to leave the denunciation aside,
as if the representatives of the banks and banknotes were merely acting in the selfish
interefts to speak. Mr. von Unruh is also such an informer
the most respectable companies in Germany. The writer of this
Epistle is such a denunciation without any reason and basis, as the best
friendly editorial staff may attest to it.

One of your first questions concerns the point that the banks are
Issuing more notes than their cash reserves in order to cover the corresponding
Enrich the enjoyment of interest. – You want to have this point clearly discussed.

The attempt is daring. Are the upper floors of a house
built in the air because only the first floor is on the ground?
A merchant whose assets amount to 1000 thalers does not have the right
to take out a loan of 10,000 thalers?

The complete error lies in the fact that so many have the delusion that
Bank can issue any amount of notes. No rule=
A well-managed bank can issue a note at will or at will;
you ask for their notes when you need them, and when you lose them
can turn to.

A second misconception is that the bank does not take any risk in issuing
of her grades. If this had even a spark of truth,
One can never and nowhere speak of a threat to the banknote.

The interest that a bank receives for issuing the securities it requires
The receipt of grades is a reward for their work and for their guarantee.
Only the most complete information about the effectiveness and management of a note=
bank is tempted to say that the issue of banknotes is a
ftrol or robbery, and all these tirades only arouse smiles in
the merchant world!)

Below is the huge difference between a banknote and a
The state note is usually used for a

Performance issued and remains in circulation for an indefinite period; the banknote will only be issued against deposit of an equivalent value given, and returns to the place of issue within an indefinite period of time.

The banknotes issued by the Austrian National Bank – with the exception of the 80 million advanced to the state for the privilege lions – can be confiscated within a maximum of 3 months; the Austrian government notes are only awaiting a future measure to be able to get out of circulation.

However, you and your like-minded people do not want any grades, no Paper money or the greatest possible limitation of this replacement for metal coins.

Has perhaps the experience of world traffic led to this view?

It has been recorded in the chronicle for thousands of years that the metal coin no crisis has been held back. The states have to counterfeit coins took refuge, the commercial world had to seek bankruptcy courts

1) The smile of the augurs.

104

seek protection; everything before a banknote or paper money existed, or when the paper production was in childhood. One can well say, that the system of pure metal money circulation was a fiasco everywhere, although the discovery of new silver mines and gold mines came to help, because otherwise it would have been due to the lack of material for the increased traffic. The fiasco of this system is not isolated in one economic area, but comes to different times, in different places and under different conditions to When the greatest dangers come upon a state, or a catastrophe deprives world trade of capital and credit, then the fiasco of metal money is an obvious one, and one rushes with trembling hands for the saving paper money! Let us not look far Italy carried out its revolution – with paper money; France kept itself solvent for the 5 billion – through paper money; – the United States of North America bear the enormous costs of the Civil War with Paper Money; – Russia heals its wounds of the Crimea war, the Polish uprising and the peasant emancipation – through paper money; Turkey is trying all kinds of reforms – through paper money. Austria could only avoid the unfortunate wars and experimental governments overcome by paper money; – and England, rich England, raises always the provisions of the Peel Act, if they were in the days of a Crisis hinders the issuance of notes.

The enthusiasts for the circulation of metal money cultivate the history of In any case, the need for the today's traffic a terra incognita.

Since I have all police and censorship, including in the field of business the paper banks, yes, you ask: why Normative

regulations?

What do you say now, dear Sir, to the following normative provision, which I, as a legislator, would impose on every bank issuing banknotes, namely:

The bank is obliged to exchange any presented note for metal at any time= coin. Failure to comply with this obligation will result in the Bank immediately closed, bankruptcy proceedings initiated, etc.

One could add to this normative determination that the Directors, board members, governors, etc. are personally liable, or other strict measures following the example of that famous MP from the Berlin Landtag: Freedom of the press with the gallows next to it, so limited issue of notes with the gallows next to it for the bank and for the bank partners, if they do not exchange the presented notes for metal substitute.

Such a normative determination probably makes every police and censorship superfluous, and in any case it is a more rational measure than the complete ftänft or third=metal coverage, financial braids that are far behind hang down and are indeed reminiscent of Chinese monetary economy.

105

Leave it to the customer and the discretion of each individual, whether he requests, accepts, keeps or exchanges such notes, just as how it is left up to each individual whether he discounts a bill of exchange, a payment takes, continues to girdle, etc. Nobody will make a fool of themselves by doing so, e.g. with Austrian bank notes or government notes in Germany or elsewhere Wanting to make purchases, – and Prussian cash orders, although they every expert takes at face value, are not a general means of exchange for goods in Austria. This can be left to the world of transport, which to decide between note and note just as between note and coin white. Just ensure the greatest possible publicity in the business card of the Banks and for the most inconsiderate observation of the above-mentioned or any similar normative determination.

Any other restriction on the issue of music is a restriction on the social intercourse and an arbitrary limitation of credit, which the public is willing to grant to a bank; therefore, all privileges are laws of the note banks – not just a tax on money and credit= traffic, but rather a disadvantage for the economic community of the State under the pretext of securing the value of the Note. This pretext leads to control and to the police, just as harmful as illusory, as you rightly point out.

The metal-backed note, if its issue is already guaranteed by a counter-value, appears as a waste of credit, as a forced Fallow land of the most fertile field, as dead capital. I refer you to

the vault of the National Bank, where 140 million in silver and gold buried, for 20 years! I refer you to the war treasure Prussia, which has consumed interests for 50 years!

But what is the use of all this? Mr. Eggers in Bremen refers to Adam Smith and declares the non-metal-backed note to be an illegitimate exploitation of credit; – and with this dogma of infallibility, one believes all savings niffe of modern monetary transactions into the cesspool of hell and fraud to be able to stay. So: abolition of banknotes and possibly The utmost reduction of all paper money, you preach, dear sir.

I congratulate you on such a monetary economy. I only dare to ask, To exclude Austria from it, and to save it from its bankruptcy, its ruin and – to leave it to his notes! In recent days the Call for an increase in banknotes, and the management of the National Bank had to, despite all resistance, issue millions and millions of notes. They will admit, dear Sir, that this is in stark contradiction with your views and tendencies, and not a sign of a government for the Abolition of paper money. Accordingly, in this country, where one builds houses, factories, railways, etc. with notes, the endeavor after the abolition of all paper money, no converts will be gained.

All such theories are here based on the need for life, for existence, for income and earnings – shelved.

Vienna, November 1871. AN

106

20. Austria's state economy.

Third Epistle to Mr. AN in Vienna (ef. No. 45 of the "Fortfchr.").

By F. Perrot.

Not without a certain pleasure I have read at the beginning of your third epistle the excellent phrase with which you describe "the spirit of Goethe, which which Mephifto has answer all the student's questions," in the Dis= cussfion on the banking question. I have always said that the party the banknote enthusiasts have very skilled defenders, and their interests with a lot of skill, as well as apparently not without well-planned tactics in the press perceives.

The discussions we had contradictorily on the banking issue have plowed, the readership of these papers should also be fufficient material to form an independent opinion about the important matter, and I am happy to follow you on the Area of the Austrian state economy, over which no less maintain useful conversations and urgently needed clarifications mediated, as in the banking question. – I live in the pleasant Foreseeing that here too the "spirit of Goethe" will not fail us,

to appear at the end of our discussion.

Through your discussions on the economic situation in Austria sounds a slight doubt as to whether I should take such matters more seriously I would like to reassure you about this and On the contrary, we assure you that the chapter on the state economy and the state Debt mismanagement has always seemed to me one of the most important which I have studied in more detail. Evidence for this should You will find, among other things, in my recently published "Zeitfragen, Bei- sluggishness in solving state and economic issues the present".

As far as I know, you are very much mistaken if They believe that "in Prussia behind a pint of wheat beer or a glass of Grüneberger" about the economic affairs Austria was negotiated, and Austrian "state bankruptcy" was spoken of What our honorable citizens pour out on the beer bench, has so far dealt largely with the issues of the highest politics and diplomacy matie. On the other hand, the good people have not yet, on average, interest and understanding for one's own economic needs occasions, let alone for strangers. They can be used with the most- greatest comfort through all kinds of financial arts the skin over the ears and when it gets too bad, they become socialists and move theoretically and practically against "capital".

You are doing us far too much credit if you believe that "behind the bar Weißbier or a glass of Grüneberger" would be Austrian state bankruptcy. This is already ensured by the pre- excellent daily press that all possible things are brought closer to the citizen

107

and that he is better informed about all sorts of things than about his own and his neighbors' economic affairs.

The deepest political and diplomatic secrets are Citizens on the beer bench sooner realise than the truth that an eternal debt-making state economy is one of the main roots of those conditions which culminate in the exploitation of all by a few, and which In the end, only on one side is the absolute worship of the golden veal and leave the petroleum on the other side.

Our excellent daily press with its tremendous influence ensures that the citizen's mind is protected like a Chinese wall so that he sees nothing but high politics, even higher diplomacy matie, and also war and murder stories, railway accidents, City gossip and theater reviews. – For sufficient national debt Both the absolute governments and the liberal people's representatives violations, and finally we are even told that a state more brilliantly situated, and that its inhabitants are all the better and happier

worse off, the more debt the state has!))! – And it will probably be the states as well as with families and individuals; the more debt – the better? – –

You are not satisfied, my dear opponent, that I the three billion national debt so dry and without any I have provided explanations. They state most definitely that it would be easy for Austria to pay off this enormous debt “in a reasonably short period of time to be removed.

Well then, my dear Mr AN, if it is as easy as you say, then all those who could and did not do it, the curse on her head that she would bring endless misfortune from Austria did not avert it, although they could.

We know very well how the Austrian debts came about. Among other things, the sixth edition of G. Kolb's Statistics contains a special Chapter about it, II. Section, p. 21: “On the history of guilt”. You wish probably to indicate that a disastrous policy and unfortunate wars are primarily to blame for the continued debt-making, and you are certainly right. But we must not forget that the debts incurred during war are not reduced in peace, but only increased by a disastrous state economy. Without wishing to offend your patriotism, I quote The example of Frederick II of Prussia, who in the Seven Years' Wars a more significant national debt than Austria contracted, his death, however, not only removed it, but also a had accumulated considerable state treasury. Now, on the other hand, peace debts shows Frederick II's successor and the constitutional liberal era in Prussia, although fortunately not to the same extent as in

- 1) Dawes= and Poug Plan, Hoover= Moratorium.
- 2) Compare the situation since 1918.

108

You in Austria. – Gervinus reports in the “History of the nineteenth century,” that the festivities of the Congress of Vienna Kaiserstaat about 30 million, although the deeply indebted State could not even adequately care for the mutilated invalids.”)

Incidentally, the Prussian national debt has also remained constant since 1848. and not insignificantly increased. Our state budget differs in this respect from the Austrian only in terms of intensity, not the In essence. On both sides, the unproductive, debt-generating Expenditure is consistently predominant, but not yet to the same extent as in Austria, since we are not yet forced, like Austria, to pay about a third of our national income to pay interest on debts.)

I wanted to see our politicians "behind a pint of wheat beer or a Schoppen Grüneberger" would only be so far that they could recognize the perishability of would appreciate the national debt economy in its entirety.

I wish we were at the point where our jug pourers on the beer bench had any idea that they themselves were paying the interest on the national debt have to pay, and that because of this national debt, the provincial, the municipal and private economy in the most unhealthy and pernicious We are becoming more and more of a debt economy. I wanted to Citizens would only get an idea that on this useless Public debt economy actually and mainly those "paper plague", which is increasingly based on the excessive enrichment less at the expense of all.

Should you consider it advantageous if a country like Austria (according to Kolb) for 1870 about 148 million guilders for interest on debts, and about 100 million guilders for military expenditure, which is almost half of its income for debt interest and military expenditure?

Why, if Austria is in such a brilliant position, as you state, Why don't we build the railways from available state funds instead of to build on stock fraud with bond debts, and in doing so during the "foundation" the bankers were given millions of dollars to pour? – Who tells the jug pourers on the beer bench that Railways, which only rely on debts and dividends (plus royalties) are built, about half of their operating volume, which would otherwise be Tariff reductions should be abolished and should benefit everyone, instead continually have to spend on debt interest and dividends?

Why does Austria spend 100 million on military costs when As you say, there was no war at Solferino or Königgrätz was prepared, nor is it prepared for such a thing now? Where can it go lead, if the peoples of Europe, even in the midst of peace, continue to rising war expenditures are steadily leading to ruin? This question applies to all civilised countries in the world.

1) We experience that even in a parliamentary republic, festivals can be celebrated without

To take into account war invalids and a middle class that is being hunted to death, etc.

2) And is it any different in 1931?

109

We would be happy if Austria could, as you say, this sad financial situation, but unfortunately we have to still doubt it.

The "execution of communications" would be quite good and with time also very useful, if not, as we have already

said, were built solely on debt and dividends, with the Money is always squandered by the millions and by big capitalists through the known privileged fraud methods for the common good alienated and channeled into the pockets of privileged people.

"Management of the forest property" is also easier said than done. It has been reported in recent years that the Austrian forest property is even very heavily "managed". The exact figures are but certainly not at hand. Moreover, the richer part of this Hungary's forest holdings. However, in the event of a deficit, which per 1871 officially at 3/ million, according to secure private calculations, however amounts to about 40 million, this "management" is so extraordinary not carry it very far.

"Regulation of property taxes" may well bring in some benefits. However, it should not be overlooked that the relatively low development of communications in Austria, mainly the Land ownership finds itself disadvantaged and has long been is deeply in debt. The pernicious consequences of banknotes and shares The consequences of fraud primarily affect agriculture.

What has Spain and Italy and previously in France, for example, the sale of the highly valued church property and the property of dead hands? – Today Spain is reducing the payment of fine debt interest, like Austria This has already been done by means of alleged "taxation", and to the same Italy will also take these steps on a larger scale. And Spain and Italy are probably no less rich than Austria.

What you say in your last letter has been heard in Austria for some time said by those who state debt, bank and stock fraud consider or spend for charitable purposes, but the debt grows constant and the interest payment has been repeatedly reduced, and it is very likely that what happened before will happen again.

We would be pleased if our epistle could contribute something to could, that things would get better, and that also here in Prussia and Germany Surpluses replace debts, and economy on abundance of the place of the economy on loan. And if you are often lucky seem to appreciate because his papers are still owned by German capital coveted "export article"), yes, for my part, I appreciate the state

) The "Tribüne" is now warning against Austrian papers. In Austria Now so much has been prepared for the issue for Germany that a price pressure on the older Austrian effects must become inevitable. Everything there is speculating on Germany and the favorable monetary conditions of our state. From Holland, whose

happy, among whose export articles "papers" are not included, and wish from the heart that our neighbouring and brother country Austria will succeed may become such a country (without paper exports).

Rostock, November 1871.

21. Happiness and salvation of states through paper.

Fourth Epistle to Mr. AN in Vienna.

By F. Perrot.

I had written my third letter before I had read your fourth.
We must therefore see how we deal with the once quoted "spirit of Goethe"
find your way for the time being. N

My cousin, Hofrat Thiersch, who died in Munich, did the same famous saying: "This century is a paper year—hundred." — How true was he? — Our railways are building we — with paper; we run our state economy — with paper; the We create the "wealth of nations" (according to Adam Smith) — with paper; We raise trade, commerce and industry — with paper; we wage wars and make revolutions — with paper (and some petroleum); we "try all kinds of reforms" — through paper; we heal the wounds of worst national debt economy, the worst wars, the shocking most serious state upheavals, the most fatal trade crises — with paper, — everything, all this — with paper; oh happy century — with paper!

And all this paper, which enriches us as if with steam power and makes you happy — and all this paper is made from rags!

O, great Goethe, you have written so much paper and had no A sense that you had yourself and the world and little Weimar much happier if you had made notes from this paper printed — namely banknotes, great Goethe. If you today appeared in this world, you would surely be either a banker or a paper= become a manufacturer. Today we are getting rich through paper, great Goethe, and also happy, through paper, oh Goethe. Only poor and stupid devils still make the thankless effort of writing something on this paper. Whoever knows "how it's done" has music printed from this paper, namely banknotes, great Goethe, and makes himself and others happy with it.

Markets previously had the largest sales for Austrian securities, Austria will and gradually abandoned. In Holland itself, the national debt is being amortized and that through liquid capital no longer as usual in Austrian, but in French French securities are preferred. The French values are all low, and The belief in France's financial recovery is almost Therefore, they expect a significant future increase in the share price of French papers, and even if one should perhaps miscalculate in this, provisionally The effect is that these papers are preferred to the Austrian ones. Germany remains the main market for Austrian emissions and the German

Capitalist, if he does not avoid Austrian matters, has all the advantages shocks that threaten the Danube Empire in political or financial crises, for this part to fear. –

(I take the above from the “Deutsche Landwirtschaftliche Zeitung”. – Perrot.

2

And what is best, o Goethe, is that every person will now have the right given to make yourself and others happy – with paper. I will then also focus on this happiness business; I will one million thalers on shares and then as much as possible Paper. You must know this, oh great Goethe, it is with This paper is of no use if you do not have a lot of cash, it would have to because it is possible to create a very famous stock fraud can; and even the dizziness can now be dealt with all the better and more vigorously the more you already have. But I will watch, o great Goethe, that I devise a really big stock scam; then I get for my fine invention a number of “founding shares” and if they are quite high ft, I sell them. Then the scam goes bankrupt, o Goethe, and I have the money in my pocket and when it is all gone, I start again a new scam. You see, great Goethe, that is much better, than with much effort, as you have done, all kinds of beautiful things on the paper to write. – The bankers are capable of, and even laugh at, that you make such an effort. I myself am never really a friend from all the writing – rather the opposite – but I was only Until now, I was of the opinion that one could do all sorts of good with it, such as you undoubtedly believed too, o Goethe. But now I see that one the paper can be used much better once the new freedom of music my friend AN in Vienna is perfect, I will found a central bank, o Goethe, and earn money without working, just by cheating and live entirely on other people’s debts and become rich like steam, and let the paper work for me: – I will do the cuckoo and slog longer with work!

Forgive me, dear friend and opponent, for this somewhat longer Apostrophe to the spirit of a great dead man, – you fight as you fay, de lana caprina, for the banknotes. Every pure and sincere Enthusiasm is always a pleasant phenomenon for me. I myself am nothing less than a “scholar” in the things about which we entertained and it is perhaps just a taste idiosyncrasy of me, with my limited subject's understanding, to fathom want to know what figures and facts our state and national economy There is an old saying: “Money rules the world” and the government and economic questions are in a certain sense all reduced to Money issues. I was once plagued by curiosity to know what the state with our money, and it was no less interesting for me to know what the paper banks do with our money. I took the trouble to provide me with knowledge of the relevant facts and figures, what others had thought and said about these facts and figures,

and then searched for myself through these seemingly important to think through matters until I believed I had got to the heart of the matter. to have come – to speak with Goethe. That is my whole scholarship.

112

Now I would like to ask you to give me some replies to your fourth letter. allow.

That the person who issued 3 million notes only / in cash covered, enjoys interest of three million instead of one million, You have not, as I see, denied this.

I am well aware that a bank cannot issue as many notes as it wants. well, but that does not change the above fact, even though the ratio of third coverage is considered to be quite regular.

As regards the bank's risk in issuing its notes, we have This point has already been discussed, but it can do no harm to shed light on it again.

You only need to be clear about how the notes are placed under the pub= come here.

The bank gives the notes to the public instead of money.

But with the money you can only do two things:
business point of view: – you can either lend it or
you can buy something with it.

If we now take our three million notes with / Bardedung remain, the bank can only lend its notes instead of money, or buy something with it. – And it will be when 2 million notes Moreover, they are supposed to be covered by a “paper deposit”, namely 2 million their notes to buy interest-bearing securities. – What risk does the bank have regarding these notes, provided that the so-called “paper cover” is not a mere mirror= fencing? Are the papers good and is the bank's safe safe, fo I look in vain for a risk of the bank for these 2 million Taler. – The risk here is only on the side of the public, which has the relevant notes in his hands and does business with them. – The “Business”, the “risk” and the work of the bank consists of these 2 million Notes only in coupon cutting.

As for the third million notes, they always represent the bank's own assets deposited as cover and the risk which the bank is running for this third million, if the bank behaves wisely= management in normal times no other than that of any other businessman.

It therefore remains correct and incontestable that the issue

not backed by cash notes is simply synonymous with the manufacture of an equal amount of money for his own pocket, and that this bene does not conflict with any corresponding performance or risk.

On the other hand, the bank's other business practices
A double risk arises. If the bank does bad business with the money borrowed from it and with its own money, it can settle liabilities which are beyond her strength, and then she runs the one side of the risk, namely the risk of every businessman who relies more on Borg as a coffee-based business or must be a business – the risk of bankruptcy
This risk of the bank then has a second side for the notes= owners. – They run a double risk. Firstly, they do business

Perrot, Bismarck and the Jews. 8 113

with the notes, than with money – first risk! – Secondly, the notes become completely worthless paper if it is not covered by the bank guarantee in more as a wonderful order is – second risk.

The bank therefore has – as already mentioned – no other risk than that of any businessman for the amount of their own cash assets. The Interest on notes not backed by cash is a pure gift to the bank.

This deduction seems to me to be so sure that it applies to the simplest laws of Mathematics, logic and economics, that I actually consider them to be incontestable.

As for the “normative provisions”, yes, I am against all and any normative provisions for banking transactions. What is the state the banking business? The banking business is a business like any other: The state has no right to interfere. And why should the “public Business card” of the banks? You would have to use the same Rights force every businessman to have a “public business certificate”, because you can get it from any business person just as with a bank. Has the state the right or duty to protect the public from harm in the business it does, or why should the state have a duty to do this more in banking transactions than in any other transactions?

No, I have always been in favour of banking freedom, and for complete and full banking freedom. – Is the issue of banknotes a simple banking business, well then, why a gallows next to this business – Any normative provision could only have the effect of State for the bank's business and in particular for the banknotes to be held accountable. Because what use is a “public business” identity card”, if it is not checked by state or police authorities, and that such control of banking transactions always and under all circumstances is an absurdity, as you, my dear Sir, are probably fully aware.

Finally, I find between you and me a most strange

Agreement of views. It is against cash coverage in general,
Actually, I do too. I do not want the metal to be withdrawn from circulation
I would therefore like government paper money without a metal backing.

The difference between you and me is again
that you want banknotes without metal backing, while I, as expected,
Government paper money without backing. My proposal involves
the advantage flowing from the creation of paper money, namely the surplus=
transfer of values from the property of the community to the state, like any
other tax, also benefit the whole in another form.
Your proposal, on the other hand, as I have repeatedly said, will use the proceeds of this
proven and, as is actually very clear, into the pockets of the "common"
useful bankers".

I therefore allow myself to use the method of uncovered banknotes for
crude, whereas the idea of unbacked government paper money is considered correct.

Until now, however, I am of the opinion that the mechanical convenience

114

speed of traffic requires a certain amount of paper money, while
Mr. Augspurg first wanted to get rid of all paper money,
but, as I now understand from correspondence with him, this
Point as I am inclined to leave open until experience on this
is sufficiently established.

And so I "preach" again and again:

"Abolition of banknotes and possible reduction
all paper money."

Rostock, November 14, 1871.

22. Final epistle to Mr. Perrot in Rostock.

The controversy that has arisen between us must lead to a settlement
fumption, it should not become an eternal theological disputation
spin out, without any prospect that one will convince the other.
Even in economics there are beliefs, traditions,
judgments, fairy tales, fear of ghosts, witch trials, etc., of which
it is very difficult to break free, and often decades pass and
Centuries, even millennia, before the simple rule of goods=
traffic allows their rights to be done. The so-called usury plays a role in the Bible
and in the history of all times a role, and large circles of states=
men and scholars cannot even today free themselves from the ban
of money or grain usury. That money is a commodity is still
still not fully understood. That credit in all civilized states

represents a greater economic engine and value than all gold and Silver and precious stones of the world, is still considered a fantasy That a credit paper, a piece of paper, a signature can replaced by mines as a medium of exchange, is still the reason for deep concerns and serious accusations.

Years will pass and libraries will before the theory lags behind the practical behavior and requirement, and our mutual letters certainly do not speed up the process of understanding Second. Let us therefore briefly summarize what follows from this polemic.

You maintain, dear Sir, that Austria was and is bankrupt, and will go bankrupt. The perpetual national deficit and Kolb's ftatiftic gospel points your judgment in this direction.

Strange! The same Austrian newspaper that published this enunciation without any comment, namely the "Fortfchop" No. 47 of November 19, 1871, prints p. 378 the following words: "The economic situation of the Reich (Austria) is far more favorable than one would have expected during the turn of our internal policy should believe." – Furthermore: "As a result, fshould reduce the deficit to a minimum." Then the switch of the currency agio, "explainable because the amount of circulating paper money is hardly sufficient for legitimate needs," ipsissima verba the editorial staff. "The prosperity of the rural population has increased." The

8* 115

Mining plants cannot produce as much as consumption demands." "The factories are in full operation, and in most small businesses the business is going well." "Employed workers are unlikely to to be found." "Increase in imports and exports." "The railways are not able to transport the goods quickly."

All this arises next door to your letters, dear Sir, in which They condemn Austria's bankruptcy with full conviction, drawn from Kolb's Statistics, and forecast with unyielding certainty. Now it remains nothing to add. This is grey theory next to green practice.

But we have also honestly and conscientiously Prussia and Germany warned that Austria should not be granted any credit; but it ft seems to have had no effect. The pure sounding Capital in over the black and yellow stakes, and buys useless Papers. I implore you and your like-minded people to do everything to protect the reckless capital from the impending losses to protect yourself in these transactions; perhaps you can get a free copy of Kolb's statistics in one million copies, and distribute it is intended as an instruction and warning to the deluded buyers of Austrian Papers. Use the stands and also the pulpits, – – and give. You after year and day friendly information whether the interest-bearing Capitalist makes fun of all this nonsense.

You make the very rare admission in your country that the People do not even have any understanding of their own economic interests opportunities; and you must not take offense if I, from many years of experience and various studies, came to the conclusion that Austria's economic affairs are in your country, "in Reich", a rather terra incognita; that your press about Austria's Finances are mostly judged only by political colour, not by the facts, – and that I hardly have a scribe, not even one – sad but true, – I am able to quote, which is part of this large economic complex in its development and in its existence a professional assessment bestowed upon him.

Only this explains why, after the great Fritz's invasion, in Silesia, after the Napoleonic Wars, after the Metternich closure system, after the Italian War and after the federal and brotherly friendly meetings in 1866 of this Austria all national economists by a new upswing, and that today, despite of the bankruptcy that is spreading everywhere, is once again giving credit to this Austria. They even allied themselves with this bankrupt Austria, and Berlin gives the signal in association with Austrian financiers all kinds of hosts efficient – to found! N

However, let us leave this topic. Let us move on to – paper. I make you, dear Sir, the following concession. Austria's money is just – paper. We build our houses – out of paper, we build Railways – made of paper, we construct factories – made of paper;

116

we set up steam engines – from paper; we produce cloth, glass Linen, leather, wood, soap, etc. – made of paper. For more than 20 years is our only tool for all production, for all freight transport, for the entire trade – paper.

Should we not move into the houses? or the railway carriages and steamboats? or the cloth, linen and leather goods not invest? or not enjoy the sugar and fuel, the bread and meat – because they were made using paper? Should this all theories and prediction-defying fact, visible, tangible, correct, enjoyable, not rather inviting about the paper as Money, as a means of exchange, to maintain new surveys and new studies to make? Should it not be apparent that the times of circulation are merely of cash have long since disappeared, and that alongside steam and electricity the circulation of metal coins can no longer suffice? Should the disciples science still has no idea that the face of the country's princes no longer have credit and value on a round piece of metal, than the inscription of a bank on a narrow strip of paper?

If one reads the writings and articles currently being written about banks

and notes are brought to light in Germany, one arrives largely to the view that empty slogans are still needed and find resonance, and along the way the denunciation, as if all opposition is merely self-interest, handled with love. The Banknotes find fraudulent institutions, banknotes find robberies.

But new banks are being founded every day, and everywhere Grades are requested, and all restrictive institutes are excluded from the business Crowd overflowing.

You yourself, dear Sir, it seems to me, have already received the full amount of cash covering of the notes was thrown overboard as an absurdity; the thirds= cover is considered a stuffed werewolf; – and you are – – arrived at unbacked government paper money! Cheers.

Allow me to quote you briefly. You know that the Magyars are a Enquete on the banking question, in which a lot of inconsistencies stuff came to my ears. One of the political spokesmen in Pest published fimperatively, an elaboration which was published in Schönberger's Pester Börfenbericht in It states: "We are, based on our experience and the Austrian banking history the most determined enemies of an amalgamation of the banking system with any operation of the state finances."

Let us conduct a survey in Austria, and if one thousandth of the voting population for the introduction of government paper money voted, – then dictate to me which penalty you like.

You are in contradiction with yourself, dear Sir, like most your fellow-viewers about the banknotes by giving full and complete Want banking freedom – and in addition government paper money, and on top of that us backed government paper money! You feel very well that the rule of the Metal money is not available, but now you want the state to give paper

117

They themselves explain the banking business as a business like any other in which the state has no right to interfere, but you make the state as a general banker ex officio with unbacked paper money!

In my humble opinion, the existence of such covered government paper money during the first trade crisis to the general Bankruptcy. – Hopefully Prussia and Germany will remain spared this experiment, and it is superfluous to say a word about it lose.

"Abolition of banknotes" is your slogan, to which I do not agree confess, in the interest of the entire economic life and work of our days. On the contrary. The banknotes are only beginning their Work and activity, after the state police, in prejudiced provision, the manner in which they are spent and used,

stunted and condemned to fallow by the metal roof. The An=

The money order and the check are only a surrogate for banknotes, just like the

Current account is a replacement for the same.

That is a huge difference between your view and mine

from the banknote and the government paper money, – from metal backing, bank=

moderate coverage and non-coverage, – of risk and business, of

Normative determination for a bank and police, of interest profit and people=

taxation etc.

These are fundamental differences that are not reflected in a few epistles on

Conclusion: Only as much or as little as you like, dear Sir,

admit that in this discussion about banknotes – the practical

business world of Europe, America, Asia and Australia is not on your side

ftstand; – only in the less or least cultivated states, in right=

In uncertain areas, metal money circulates. Where government paper money, and

above an uncovered one, is issued – – is easy to find. – You

will hardly agree with your statement: "Abolition of banknotes and possible

utmost reduction of all paper money" – make converts. In Austria

certainly not. But of course – we are heading towards bankruptcy. Merkur

stand by us.

Vienna, December 1871. AN

23. Banking question, socialism and liberalism.

By F. Perrot.

The socialists !) claim a rift between capital and

Work and rely on facts from which they can see an overgrowth,

Big capital is becoming omnipotent. Big capital, believe

the socialists, have the tendency to all less powerful states=

citizens, especially the poorest of them, the working classes,

1) In today's terms, "Marxists".

118

Big capital enriches itself without work and withers

the worker the price of his effort.

Modern economics flatly denies such a dichotomy between

Capital and Labour and denies the interpretation of the facts which in

demonstrate such a dichotomy in the eyes of the socialists.

So where is the truth?

All the arguments of our economists are not capable

to demonstrate away the so-called social question and if the same

is not to be found in a "conflict between capital and labour", where should one find the root of Abel, which exists despite all this and everything else? Search? And that it is necessary, becoming more necessary with each passing day, To get to the root cause of the evil, if the entire modern Culture should not be in real danger, but this is now becoming increasingly clear even to those who are more indifferent.

Let us first say it out loud: – yes, there is a conflict between capital and labor and this conflict has already become a huge gaping chasm.

Any denial of this fact by modern economics is only doctrinal phraseology, which stamped "economic" replacing independent, in-depth investigation with slogans. But – the undeniable conflict between capital and work of our time is not natural, it is artificial created by incredibly uneconomical modern state institutions created.

We have a number of state institutions which systematically work towards the mobile big capital in to prefer in a natural way, in an uneconomical way to accumulate, to privilege in a dangerous manner and to give him a position and tendency in the state which socialism, as a kind of self-defense, quite naturally causes.

The government is largely to blame for these state institutions. The thoughtless imitation of Adam Smith's teachings, which has become fashionable, with whose great truths modern economics has so far the great accepted their errors without criticism.

And modern liberalism, which claims to be in economic– to be highly informed about scientific matters and to carry the torch of "enlightenment" to advance the masses of our people, – this sublime liberalism comes into a very peculiar light when one considers his behavior the newer economic phenomena and problems more severe into consideration.

If we are to name the state institutions from which we believe that they are creating an artificial dichotomy that does not actually exist between capital and labour, they are as follows.

119

First, the national debt. – In absolutely governed states, and these national debts are always a large, rightly seriously criticized Abel. In constitutional states they are a regular state institution! I am making this a challenge for liberalism. special reproach because he knows so much about his budget rights.

Then comes the rotten tax system, which the Great-capital is certainly favored and the various classes of residents very unequally burdened to the point of blatant injustice and corruption of the state consequences. – If it were not for the national debt and its causes, this tax system would have been changed long ago.

It will soon find the form both in its facility – like the old Hansemann said – as well as in its lasting consequences realistic and demoralizing joint-stock companies. – That this cup has not been averted by us, the liberalizing phraseology of the modern national economy on the conscience. The earlier Kon= The difficulties that are undoubtedly linked to the cessation system were in effect possibility a thousand times that currently legalized by “normative conditions” fixed and authorized freedom of fraud, whose enormous adverse impact, if one consults the experience of other countries will, by no means a temporary one, but in the essence of the shares= society itself is founded, permanent and ever increasing. The joint-stock companies are legalized institutions for the exploitation of all by a few.

And then – last but not least – we have a state institution of The type in question in the existing central banks.

We have devoted repeated discussions to the central banks. We had shown how recently two outstanding national liberal Reichs= members of the day, Messrs. v. Unruh and Augspurg, in remarkable= valuable work on the conception of the banking question which we find in the press for a long time and in the public consciousness= are trying to provide.

Today we find reasons that are not often or emphatically enough to bring the current note bank matter back to the fore. Mr. Aug. Eggers, merchant in Bremen, further circles through his Efforts on the coin issue are known, comes in the second volume of his “Economic Treatises” in a special work also on “the non-metal-backed banknote”, and remarks about the same among others:

“Adam Smith states in his Wealth of Nations, Book II, Chapter VI. The following example: The circulating and traffic-free sufficient metal money supply of a country is one million Pound Sterling. Some time later, various banks and bankers issued one million pounds of notes, to cover They kept 200,000 pounds sterling of metal money. The circula= The country's currency remains unchanged and the circulating million

million pounds of metal money in circulation. 800,000 pounds Sterling metal money free and can go abroad as interest-free capital that benefits the country."

This is how the great Adam Smith takes care of the wealth of nations! And that has so far been considered "national economy"!

Does this recipe of the great Adam Smith not have a desperate resemblance with that other famous one, according to which gold can be produced chemically by treating centaury with oxygen: the Oxygen combines with the cabbage to form sauerkraut and – "the thousand G \ddot{u} lden become free" (and can go abroad as interest-free, the Land useful capital?).

Mr. Aug. Eggers, the Bremen merchant, is outraged by the "National~~s~~ economics" of Adam Smith and breaks down his quoted proposal in the exclamation:

"Such a procedure is piracy!"

Should not the great Adam Smith have thought that the nearest neighbour of the so comfortably "enriched" country has the cleverness want to do it exactly the same way and rely on the same The result is then simply that both countries In addition to the original metal money, there were also one million paper money each come; and whether they will compensate each other for the "freed" 800,000 pounds Sterling is extremely questionable and can even be viewed positively. no.

The amount of money available in each of the two countries has therefore doubled and thus has a reduced purchasing power in the long term. "It is also not the country," continues Mr Eggers, which through this first practiced on others and then on itself declining piracy enriched, but it is initially the bankers who make a profit without working."

The recipe for enriching nations by using colorful paper prints and grants a few lucky people the privilege of receiving these papers as your own "money" – this famous recipe comes from how fee, really by the famous Adam Smith and is up to the present day Day the alpha and omega of "liberal" economics.

For the central bank holders and their associates, however, this recipe is so comfortable and effective, like hardly any "Dukatenmännchen" or a "Donkey-stretch-yourself" can be. But that through the privileged colorful Papers called banknotes promoted the "wealth of nations" how is it possible that something like this can become a current belief could?!

And with such excellent state institutions, such as these central banks fare, one now goes and searches diligently, laboriously and learnedly for the Causes of the socialist dangers that affect modern society–

threaten!

121

What is most remarkable and even astonishing is this fact towards the behavior of the daily press.

It is saturated with the wisdom of all economic Teaching and vindicates the profession in everything that the welfare of the German Reich, to educate and enlighten our people, to preserve its interests.

And so one should at least believe that such a far-reaching, a question that deeply affects all material existence, will be addressed by the daily press has long been discussing this issue with sustained, tireless zeal.

That highly educated liberal grand press, which has such a sublime ethical standpoint, such a question should now also has long been the subject of the most comprehensive educational efforts and would have to accept views such as those now expressed by two of their most outstanding party members, Mr. v. Augspurg and v. Unruh dar= either fight with all your energy or admit that in the most inexplicable way to date the exercise of their journalistic duty was lacking in this matter.

The entire "liberal" party has committed an extraordinary omission here. sin to make amends if it does not want socialism to itself and all of us is growing relentlessly over our heads!)

One looks in vain for reasons which the previous behavior of this sublime liberalism and its Big press in the banking and stock company issue to explain seem.

Or should Bishop von Ketteler in his famous Mainz speech is right when he says that: "today's liberalism is closely allied with the financial powers who pay him well."

Unfortunately, Bishop Ketteler seems to be quite right, when he says: "The absolute dominion of monetary gain, at least, has Liberalism never fought against it." – And if this "liberalism" does not muster the courage to behave completely differently and to realize that the economic issues never without their natural connection with the ethical ones, this sentence of the bishop von Ketteler remain true: "The true son of liberalism and whose legacy is socialism?)"

Certainly, if "liberalism" seeks to defend itself or even Toleration of dangerous privileges of big capital, which, as Mr Augspurg says, merely the "exploitation of the audience"

aim, then socialism is only a consequence of this "liberalism" mus" and will soon also be a fine heir?).

1) It is extremely interesting to read here that Perrot already at that time saw the danger recognized, which has now become a fact.

2) Bismarck's later opposition to von Ketteler in the Kulturkampf appears here in a very special light.

3) Fulfilled in 1918.

122

We conclude with the following warning from Mr. Eggers, in which he speaks bluntly about the banknote privilege:

"The economic power, society, the state must suffer from privileges which a certain Class without work a profit of (in Germany annually) 8-10 million thalers. Such abuse can only have a paralyzing and corrupting effect. Privileges give provide themselves with the means to maintain their possession. There are already signs that the cancer is spreading takes hold.

Rostock, October 25, 1871.

Attachment.

About banking.

Memorandum of the Permanent Committee of the German trading day.

March 1869.

According to Article 4 of the Constitution of the North German Confederation, legal regulation of the banking sector is the responsibility of the federal authorities been transferred.

In order to answer the question in what way this provision of the Federal Constitution, it is necessary to first decide fi) to clarify at what point the state is actually involved in the banking

The banking business has about the same Functions, such as the commodity business towards the individual goods. The Capital is accumulated and then distributed across time and place. In the large and on the whole, banking is as free as any part of the commodity business. Everyone is free to discount bills of exchange, to sell goods barding, accepting deposits, orders in financial matters to be taken over by commission. Only the following three specific Points concerning which state intervention in the free activity of traffic.

1. In banking, more than in any other business, felt the need to raise larger capital for the benefit of the business= The most popular form in which larger capitals are thrown together for a specific purpose, the form of Joint-stock company. With the exception of a few territories, in Germany the establishment of a joint-stock company is linked to a state concession. Experience shows that at least in some states and especially the largest of them, in Prussia, concessions for bank shares were granted with greater difficulties, and where fe are paper banks, can still be issued today than for other Purposes. A legal regulation of the banking sector will therefore raise the question of have answered:

Under what conditions are joint-stock companies for the purpose to license the operation of the banking business?

This question must be ruled out from the outset. The legislative A draft law has already been submitted to the Federal Powers to regulate the shares=

124

companies from the need for a concession. In addition In connection with this legislation, the banking sector will also be now resting upon it, and it will be after the In= entry into force of the law, full banking freedom with the exception of the freedom from paperwork must be ensured.

2. The State may use private capital for the purpose of banking Where the state does this, it does not interfere with the freedom of the bank, rather he himself makes in his capacity as a property subject, as a treasury only makes use of that freedom, which it grants to every single citizen. The freedom of the economic public transport is only indirectly affected by the fact that competition of the state through factual natural conditions to individual enterprises will always be a very powerful one. Almost the state alone is actually able to run a widely branched banking company with numerous It is also mentioned that the State is able to grant privileges to the bank operated or benefited by it to grant rights which are not available to private enterprises, namely that of stamp exemption for the stamps issued by him

securities and that of postage-free shipping.

The second question relevant to the legislative treatment of banking comes into consideration is therefore the following:

Should the state be allowed to intervene in the field of banking to compete with the private industry, – in particular the bank established by him may establish branches, and shall be endowed with special privileges?

3. The bank's institution now requires very special treatment notes. The banknotes have a dual character: firstly, They are regarded as documents, commitment certificates of the issuing institution or individual. But if they have no other property than that of a document, the issuance of the same would not can be subject to legal restrictions, such as the emission of bills of exchange or promissory notes. However, banknotes have a second Peculiarity, they represent the place of cash, in such a way, that in the public consciousness the difference between banknotes and state paper money has almost completely disappeared. Under the influence of this double The practice of issuing banknotes has developed in almost all countries, that without special state authorization or at least without internal keeping certain legal limits, it is not allowed to issue banknotes Where a state bank exists, it also has the right to issue banknotes. emiffion everywhere.

The legislative question, which is to be posed as the third, is therefore there:

Should there be, in addition to the State Bank, where such a bank exists, the possibility be given that private banknotes are issued?

123

and if the answer is yes:

Under what conditions and restrictions should this be permitted

Should there be a special state permit for

the individual case? Or should the authorization be given to everyone?

ftatted, which submits to the regulations which the state has established this once and for all?

The state has the right, of course, not only to regulate the issuance of bank bonds grades, he can also, where he issues them, attach certain conditions, namely the condition that the issuer waive certain general powers and authorizations, which, moreover, are entitled to every citizen. In this sense, the paper banks often accept interest-bearing deposits– ftrimental; but other ftrimental restrictions could also be imagined, For example, paper banks would have to give up the right to keep long

To issue bills of exchange by discounting them, or to make investments in securities make.

We therefore have to deal with two questions in the following, with the question of centralization of the banking system and with the question of Banking freedom. The answers to both questions are by no means Hand. It is quite conceivable that in a country with an extensive Central Bank nevertheless has a very extensive freedom of paper, and other= On the other hand, it is also conceivable that in a country without a central bank, i.e. with decentralized banking, banking freedom, i.e. the freedom to issue notes to emit is a very stunted one; that either the issue of Banknotes are completely prohibited, or at least subject to concessions and very aggravating conditions are attached.

The question of whether it is advisable to establish a bank in a country with extensive economic activity, establishing a state-recognised central bank for commercial transactions has an extraordinarily rich and exhaustive literature in the life. It is impossible to summarize all the reasons for and against to demonstrate here; the unbiased observation will show that the result It has been shown that neither centralisation nor decentralisation sole and exclusive salvation can be found. The unbiased The judge will admit that the system which he has chosen from the standpoint point of the theory believes to have to be rejected, with careful handling can prove itself, and that the question of whether centralization or decentralization fation, cannot be decided in a once and for all valid manner, that rather the special circumstances, place and time, significant consideration must be taken.

In the German economic area, the situation has developed in such a way that in the largest and most important part, namely in Prussia, a Central Bank exists and that its activities within the entire has found great recognition among the business public. Not Only industry and large-scale trade see the Prussian Main bank is a secure support, even among private bankers

126

The verdict was widespread that the Prussian Main Bank had far more benefit than they get from any competition and a large part of the bankers would be in the extinction of the activity of the Prussian Main Bank a decisive disadvantage. The advantages which the Prussian Main Bank is praised for are in essentially the following: It creates that part of the circulating funds whose the traffic in paper form requires, in a particularly popular with the public popular style; their notes enjoy a wider circulation and better confidence than the other circulating in Germany The wide ramifications of its branches allow easy Effort and low cost, money, payments and collections to very remote points. The Prussian Main Bank wins an overview of the situation of the money market at all individual points

of the State, is therefore preferably able to determine the appropriate level of respective discount rate; in times of a locally very strong money needs, it is able to significantly outstrip the other financial powers located there. In times of a general monetary crisis, However, it can prevent a crisis by increasing the discount rate. to prevent, or at least to weaken it significantly. A purely theoretical Consideration will come to the conclusion that in the course of time and With sufficiently strengthened private banking activities, all these advantages can be achieved. a central bank will be able to be reached. Meanwhile, the Question whether the present moment is the right one to make such a This question must be answered decisively in the negative. The Private banking is a very important activity in most parts of Germany. poorly developed; not even nearly to the extent that, for example, In England, there are pure deposit banks. Against the establishment of Private banks issuing banknotes are subject to Prussian legislation and regulations: administrative practice has always been very brittle. This circumstance to attribute that in Prussia the development of the banking system back However, in some small states the Banking has developed; concessions for paper banks are readily available there= willingly granted, but this development cannot be considered a healthy one It does not rest on the necessary foundation of a well-developed traffic, rather, most of those note banks are with the obvious Intention to obtain the greater part of their business profits draw from the note issue that they invest in a foreign economic area. In the pursuit of their note emission as possible In order to expand their business, many of those banks have opened their deposits in a neglected for a damaging period. The consequences of the political disintegration fenheit of Germany, as in many branches of the economic traffic, also reflected in banking transactions; it is now important to To eliminate the consequences of that disunity, to transform Germany into a unified economic area also in terms of banking. It seems not opportune, especially in such a moment, to make a profound

127

To bring about a change in the principle on which banking has been pursued so far; rather, the task will be to create new to gather experience about banking after the political obstacles nis have been eliminated which have previously prevented a healthy development of this business operation. Two opposing errors that Restriction of private banking by the state in Prussia and the state support for paper banking in many smaller states have led to damage in our economic conditions. The task is now, after the elimination of these errors, under the rule of an equal moderate and appropriately more liberal banking policy to examine the consequences the state banking system, as it has existed in Prussia so far, on a enlarged territories, on that of the North German Confederation For these reasons, the following thesis is recommended:

1. Given the current economic conditions

Germany is a state-recognized

The central bank is now indispensable, as a result of the mistake of the previous banking policy the deposit bank neither in Prussia nor in the smaller German States is strongly developed.

As already emphasized, from now on it is not the Prussian state alone, Rather, the North German Confederation should be a unified economic area for banking activities. It follows with compelling necessity that that the privilege of the Prussian main bank after its expiration no longer be renewed, but that this institute must be replaced by a main bank of the

North German Confederation. It will have the task of establishing branches in all economically outstanding places in the North German

Federal Republic, while the establishment of branches outside the same is must have been denied for the same reasons for which the Prussian delegate mettenhaus in 1865 the establishment of branches outside Prussia

This main bank will issue Federal banknotes, which will be private traffic should not have a compulsory course, just as the

Notes of the Prussian Main Bank have had it. On the other hand, the

The Federal Government will undertake to deposit the notes of its

Bank in lieu of payment. The state treasuries of the individual states

will have no reason to restrict the acceptance of such notes to payment

Instead of refusing. To legally enforce your obligation to accept,

There is a reason for this at least as long as a large part of the federal means its way from the public's coffers to the coffers of the individual states and only by way of matriculation contributions for the

The reasons against a compulsory course, the private public

opposite, have been discussed so often that a recapitulation of them at this

The following thesis is therefore recommended:

2. Since an extension of the privilege of the Prussian

Main Bank after its expiration pursuant to Article 4 of the

128

Constitution of the North German Confederation is inadmissible, so

from 1 January 1872 a main bank of the North German

Federation into being, essentially with the

the same tasks and the same organization as before

the Prussian Main Bank had them.

The same shall in particular be empowered to—

offer of the North German Confederation to establish branches, and

their notes should be available at all cash registers in the North German

Federal Government in lieu of payment.

The Prussian Main Bank has the stamp exemption for its instructions,

such as in the freedom of postage — privileges that have not yet been completely eliminated

— have the possibility to receive money for their letters and money transfers

to transport from place to place without any expense. This Privilegium has evidently greatly disadvantaged the activities of private bankers. shared, and it is desirable to maintain the same distance in the future Any change of location of a certain sum of money takes place only in the interest of its recipient, and it therefore complies with the reason= fent of justice, to make him bear the costs of this manipulation alone The following thesis is therefore recommended:

3. On the other hand, it is not desirable to allow the main bank of the North German Confederation the privileges of stamp freedom and postage-free, as the Prussian Main Bank offers— feffen has or possesses. The privileges created by such legien brought about the possibility of trans— ferring money free of charge— port, makes it difficult for private banking to possibility of competition.

For the Preußische Hauptbank, as for the predominantly large number of the German note banks, the principle that they are for the third Part of the notes it issued had to be backed by cash. It seemed to have become a dogma among governments that such a Type of covering on the one hand indispensable, but on the other hand also sufficient fe. In contrast to this prejudice, it must be stated that not a single A serious attempt has been made to prove theoretically that such a type of covering is recommended. Nor has the practice Evidence has been provided which supports the recommendation of this coverage standard= Rather, it can be strictly proven that in the case of a strong demand for the bank's cash reserves, this principle is infallible bar would have to suffer shipwreck. Suppose the cash balance of the Prussian Bank 10 million thalers, but its banknote issue 120 million thaler, and that you now only have to pay a ten-thaler note for entry. solution would be presented, the bank would be faced with the alternative of either to violate the statutory provision of one-third coverage by redeeming the note, or entering into a state of insolvency by the postpones the redemption until she can exchange notes for 31/, thalers in silver. But it also offers one-third coverage

Perrot, Bismarck and the Jews. 9 129

not the slightest shot against excessive emissions, since it is in the power a bank is entitled to purchase any amount of silver for banknotes, if it is only agreed at any price demanded; a security against An excessive note emission can only be found in the fact that the Amount of uncovered notes is allocated. Covered notes are in harmless in any amount, they are nothing but an easily transportable Instruction on a cash treasure kept in the bank's vaults. In addition to these covered notes, there is also a certain, according to the circumstance The amount of uncovered notes to be measured is completely safe. In every economically developed country, transport always requires a a certain amount of paper currency. Experience has shown teaches that at any time a note emission of about 60 million thalers

in Prussia before 1866 could be fully employed. This sum of 60 million thalers will be used to expand the area in which the main bank has to act to obtain a corresponding sum, i.e. approximately 80 million thalers, and an unsecured note issue of this. The amount is therefore completely safe; even with the strongest crowds on the cash treasure, the legally standardized relationship will never be shaken can be, because exactly the same amount by which the cash treasure reduced, the note issue is reduced at the same time, and the statutory Determination is practically always feasible, as soon as the amount of the covered notes is not too high, even with the complete exhaustion of the bank's cash reserves, there would not be more notes in circulation than the Traffic cannot do without. Such a quota will but prevented the danger that in times of crisis the paper issuance is increased to the limit. In times of traffic congestion, the proliferation of paper currency brought about an apparent relief, which in fact only aggravates the hidden evil. The increase in paper issuance will make the settlement of such transactions fefe fefts, which must be settled when the crisis. In the excessive issuance of uncovered notes, and Although those issued by a state-recognized bank are Self-deception of the business public about the extent of means at his disposal, and thus the danger of a evaluation of the grades, which the compulsory course follows closely, We summarize the results of these considerations in the following thesis:

4. The principle of one-third coverage for the issue of banknotes has neither has there ever been a sufficient theoretical justification found, nor is it proven by experience. Rather would demonstrably be the case in the moment of a strong rush on the bank's cash reserves.

A security against excessive note issuance by the Central Bank can only be found in the fact that the The sum of uncovered note issuance is subject to quotas.

130

As already highlighted, neither the principle of the central bank, nor in that of decentralization which is once and for all theoretical Correct ones can be recognized. The possibility is not excluded that after a not too large number of years the general opinion of the business public with the same energy against the continued existence of a state bank, as is undeniably the case in currently advocates the preservation of such a system. The state It is therefore not wise to tie one's hands for a long period of years, Rather, the privilege is to be granted only for a short period of time. Should after the expiry of this period, public opinion has not changed, and the short duration of this privilege does not cause any damage flow, nothing stands in the way of granting the privilege for a new period

However, under the influence of the newly collected experiences and deeper theoretical discussions the public If the opinion is then against the extension of this privilege, then the state was given free rein to abolish it. These considerations the following thesis is based:

5. In the great change that has taken place in the views on the Bank freedom is taking place and is expected to take place in the next time will still go on, it is desirable that Privilege of the central bank only for a short period time (about 12 years).

One of the most serious problems affecting the development of banking in Germany is the large, one may say excessive emission of government paper money. That such paper means of payment are not accepted are missing, is subject to the current position of public Opinion no longer in doubt. The expression "paper money" contains an internal contradiction. Money can only be made from precious metals, from paper Only certificates can be produced. A document that can be redeemed at any time and with co Paper money not provided with a rate is essentially nothing other than a Banknote, the issuer of which is the state. The state treasury, however, is operations of banking transactions; where the state considers it appropriate If he considers it appropriate to conduct banking business, he has his own in= ftitut in the form of a main bank. Where, however, government bonds= money is even given the forced exchange rate or its redemption is refused you are on a slippery slope to a devalued currency. The strong issuance of government paper money in today's Germany is partly a consequence of our state disunity, in which the small States see themselves forced to the principle of fiscality, but partly also a consequence of our silver currency, which facilitates the making of larger payments in precious metals to a tedious, risky and time-consuming doing business. Both evils are coming to an end. There can be no doubt that in the not too distant future Germany will have the gold or at least the dual currency, and that then such payments, which today are made by government paper money.

9* 131

happened, can easily be carried out in gold, but that the Fiscality of individual states will no longer have the power to circulate lation of means of payment in Germany, the Nord= German Federal Constitution. It is advisable to begin the gradual introduction withdrawal of government paper money to such an extent that the same is completed at the same moment when the privilege of the new The Bundesbank to be founded ceases to exist. This is the basis for the following thesis:

6. The period within which this privilege is valid is to use, following the introduction of the gold- currency, all from the states of the North German to collect paper money issued by the federal government.

The issuance of so-called government paper money is suitable to understand the difference between money and securities—confused and a healthy development of the banking system to put insurmountable difficulties in the way.

That a constitutional state will hold acquired rights sacred requires a no further explanation. The concessions and privileges to Zettelbanks, which once have been granted, must therefore be maintained, however exorbitant some of them, especially in relation to the deadline, on which they appear (up to 90 years). But it is a
It is the state's responsibility to ensure that each bank does not exceed the undertaken obligations with equally scrupulous conscientiousness—comes, how their rights are respected and maintained. A note—Above all, the bank has the obligation to immediately exchange any note presented to it for
It may not be limited by the amount of money presented to it.
sum, nor by the mechanical difficulty of obtaining the same at a larger demand to pay immediately, to hold back from fulfilling their obligations to be punctually complied with. Failure to redeem a presented note is actually the state of insolvency, and this must be followed by the immediate opening of bankruptcy, the immediate placing of the bank under judicial control—administration. Common and strict provisions are laid down in to call life. This is the basis for the following thesis:

7. Granted banking privileges and concessions are certain—detention, but strict procedure against such
Banks that have failed to meet their obligations, including
Relation to the redemption of presented notes not
to fill, to prescribe.

There can be no doubt that some of the smaller
German states licensed note banks began their business operations in in a way that is not consistent with sound business management
The difficulty of managing such a bank
The reason for the audience to control the performance was that it lacked the possibility

are circulating with Damno. The Norddeutsche Hauptbank will make it their task, in each of the places where a private bank
is to establish a branch in order to present the
The fact that a private bank refuses to allow its notes
be accepted at the main bank and thus the presentation of their notes makes it difficult or avoids, is an irregular condition that can
Notes issued in Germany may not be
in Germany either only circulate at full value or not at all.
The Bank of the North German Confederation must therefore adhere to the principle

to accept all private notes issued in Germany as payment, so long as they are redeemed at the issuing office for the full amount while the non-payment of the amount will result in the legal consequences of bankruptcy and thus the closure of the bank's operations. This idea is expressed in the following thesis:

8. The main bank's task will be to initiate a regular exchange of notes the management of the to put the other note banks to the test.

We are now faced with the question of whether, in addition to the main bank and the previously licensed note banks and newly founded banks should be given permission to issue notes. This question seems must be answered in the affirmative for two reasons. Firstly, The almost universally prevailing notion in Germany is that an extensive Banking operations can only be profitable if the bank has the authority to Whether this idea is correct or incorrect, it must be respected to a certain extent because their violation would hamper the development of the banking system. Secondly, but the Federation wants and should reserve the right to later times from the principle of centralized, to that of the centralized banking activity. The transition from one to the other system would occur completely unexpectedly, if not in between the public would have the opportunity to participate in the circulation of private As soon as there is certainty that the non-redemption of presented notes will lead to the immediate closure of the bank the circulation of private banknotes is fraught with significant risks The frequently emphasized difficulty that the circulation a large number of different papers to create confusion in traffic could be prevented by all private notes in one and the same printing house, on the same paper, with the same pressure and be produced in the same format, so that the issuing bank only It remains to add the location, company and signature. The authority to Of course, the issuing of papers must not be unrestricted. So far, in almost all German states the principle that this power can only be granted by a concession The question arises whether this principle should be retained, or whether instead of the concessions a law certain normative conditions should be established in such a way that

133

In keeping with this, the emission of notes is generally permitted. We believe that we must choose the latter path. The same reason entities according to which the administrative practice in granting concessions is can be cast into the form of statutory provisions. However, the abolition of the licensing requirement would make it possible omitted to examine the integrity and solidity of the founders and to examine the actual question whether the establishment of a bank a need exists. However, these two deficiencies are a major concern The solidity of the entrepreneurs can only be seen in the eyes of

be examined from the perspective of the concession granting, while the solidity of the ongoing business operations are beyond ongoing control.

The question of whether there is a real need for the establishment of a new bank is present, will usually be answered with complete certainty by whether the share capital required for the establishment of the bank has been subscribed and is therefore available in the market for the designated purpose. A Normative condition, which stipulates that a note bank cannot be Operation may be continued until the subscribed share capital is fully is constantly paid in, would therefore be completely sufficient for the purpose. Against t Concession obligation in relation to banking operations, speak the same Circumstances which violate the licensing requirement in other branches of economic activity has been discussed many times and recently on this occasion fare when the question was whether it was necessary to establish shares= companies should require a concession. A more detailed discussion of the desirable content of these normative conditions would only then be useful if an agreement can be reached on the principles developed so far One principle seems to be in the foreground must be made, namely that the coupon of the private notes is a not too small. Payment by paper means should only occur when if the one with precious metal presents too great difficulties. With Considering that after the introduction of the gold standard, cash in Appoints of about 10 thalers, it is recommended to set the smallest denomination of banknotes at 25 thalers. Regarding the total amount of private notes to be issued is from some sides a quota on the unsecured banknote circulation, including that of private banks, Such a measure would, however, result in have that when this total is reached, new private note banks This would mean a deep A breach of the principle of banking freedom. A satisfactory solution could perhaps be found in such a way that the total amount of the note circulation of each bank, both covered and uncovered, to a aliquot part of their share capital, approximately $\frac{1}{2}$, is allocated; It is assumed that only such banks are authorized to issue notes be admitted at all, which are accompanied by a certain fully signed share capital before the audience, about a year without notes= edition and during this time through regular publication

134

their status according to a prescribed form that they their initial capital exclusively in genuine banking transactions, i.e. in exchange and Lombard traffic, and to have a have not suffered any loss. Based on all these considerations, The final thesis is the following:

9. The establishment of new note banks is not subject to cessions, but only to the observance of norms= matative conditions.

These normative conditions include the minimum

of the coupon and to determine that the notes
emission an aliquot part of the share capital not
exceeds.

25. Reasons for the draft law on the issue
of banknotes!)

of March 27, 1870.

According to Article 4 No. 4 of the Constitution of the North German Confederation under
Federal legislation contains the general provisions on the
banking

The adoption of these general provisions may be extended for the current year
not be considered. If the same were to be established,

First and foremost, the regulation of the authority to issue banknotes

The provisions to be made in this regard are the

The need for means of payment in the form of banknotes from commerce

separative meaning. Now, as is well known, the exclusively valid

Silver currency because of its large weight in relation to its value

this coin metal a large need for means of payment

in paper money or banknote form, which is not available to the same extent

would be if there were a legal circulation of gold coins. It

It follows from this that the designated need question is different

will be, depending on the envisaged regulation of the

The only currency to be retained in the coinage system was silver, or

introduction of gold coins as legal tender

Just as the need question is also the

extremely important legal determination of the smallest permissible banknote

appoints with the current coin system inseparably linked

change.

According to this, a federal legal determination of the general

solutions on banking before the regulation of the coinage

can only be justified if the latter is tackled in

very distant prospect.

) See also the appendix for a summary of banking legislation.

This is not the case. Rather, the Federal Council believed that the

preparations for a monetary order can no longer be postponed

and therefore decided first of all to discuss the

Circumstances which come into question in the regulation of the coinage system,

to have an inquiry carried out. The implementation of this decision is

later this year. A specific date for the

However, the legal order of the coinage cannot yet be

to consider for a not-so-distant future that it is unfair= would be ready, the general provisions on banking being and thereby at the same time for the order of the coin= question nevertheless inevitable revision of these provisions new difficulties to create opportunities.

The course of the matter is thus so far predetermined that it The settlement of the coin question, and therefore also the banking question, at the early year 1871 can be expected.

The factual difficulties which persist even after the completion of the coin= question of the federal regulation of the banking sector, unmistakable. They lie partly in the material itself, partly in the design, which the banking system in the area of the North German Confederation during over the last two decades. Because the federal The legal regulation of the authority to issue banknotes is thereby greatly This is made more difficult by the fact that this power has been granted to existing banks Periods are irrevocably awarded. The difficulty of a uniform Order based on uniform principles grows with the scope, which the concessions acquired for a longer period of time are currently being determined the general provisions on banking. There are signs that the spirit of speculation is becoming more, as had been the case since 1857, the foundation of lending banks, and the danger is imminent. suggests that the already significant difficulties up to the point where a federal regulation of the banking sector becomes possible, will increase significantly. |

In view of the fact that there is still some time to go before this regulation will pass, the federal legislature therefore has the urgent task to take precautions to prevent the feared increase in Difficulties caused by the creation of new and expansion of existing privileges are prevented. In other words, the task is to legal provision the existing powers in the federal territory to issuing of banknotes until the general federal legal provisions are issued to limit the provisions on banking to their present status.

This bill seeks to achieve this main purpose by that until the issuance of those general provisions, he shall acquire the Authority to issue banknotes by newly established and the Extension of this authority for existing banks in addition to the authorization

136

the state government dependent on a federal law. At the same time He wants to pave the way for future federal banking legislation by that the extension of existing note privileges in their statutory Expiry or upon the occurrence of their termination only subject to the Termination is possible with one year's notice.

The entirely interim character of the law finds its succinct Expression in the provision of § 6, according to which the law only applies until July 1, 1872 should be valid.

On the currently existing powers to issue banknotes the following could be determined.

The Prussian Bank is authorized to issue notes according to the needs of its business. However, according to the provisions of the banking regulations of October 5, 1846 (Prussian Law Collection p. 435) and the law of May 7, 1856 (Collection of Laws p. 342) except for the other transactions necessary cash and securities, the amount in circulation is at least one third by cash or silver bars, the rest by dis= bills of exchange, replaced by government securities up to the amount of $\frac{1}{2}$ million and Lombard claims may arise.

In fact, the bank's management has so far insisted that the cash in their hands represents a significantly larger part of their banknote circulation.

Of the notes, 10 million thalers may be issued in denominations of 10 thalers= Furthermore, the minimum amount of the appointments is 20 thalers set.

The note privilege of the Prussian Bank offers the legislation of the Federal Republic therefore had no difficulties because it could be terminated on 1 January is, so that it can be ensured that the order of the banking system a revision of the banking regulations is introduced by federal law.

The nine private note banks in the old provinces of Prussia are Authorized to issue one million thaler notes each. The concession of the same is usually only granted for 10 years and is also limited in duration to the bound by the unchanged continuation of the banking regulations of 7 October 1846, fo that their statutes, together with the banking regulations, are subject to revision= can be thrown.

In the newly acquired provinces of Prussia, the three private note banks in Frankfurt, Hanover and Homburg, which led to a note issue of 30 million guilders, 4 million thalers and 1 million Gulden, i.e. a total of 21714285 thalers. The note price vilegium runs at the Frankfurt Bank until 1879, at the Hanover and the Homburg until 1906.

There are five banknote-issuing banks in the Kingdom of Saxony: the Leipzig Bank, the Saxon Bank in Dresden, the Bautzen Bank, the Chemnitzer Stadtbank and the Leipziger Kasenverein.

The authority of the Leipzig Bank to issue banknotes is limited to a not limited to a certain amount, but by an amendment to the statutes of

December 5, 1863, stipulates that the banknotes in circulation and bank cash certificates and which can be withdrawn without prior notice at any time or deposits repayable with a notice period of less than three months up to a total amount of 6 million thalers, half of the amount over 6 million. However, the amount exceeding the thaler is two-thirds covered by coined or uncoined silver, otherwise by bills of exchange and discounted payments instructions must be covered. The notes are denominated in thalers and are issued in appoints of 10 thalers and more. The privilege The bank's existence runs until 1879, but the concession is granted. The privileges and legal exemptions granted to the Bank are reserved. Opportunity of time and circumstances to increase, decrease or completely to lift.

Likewise, the banknote issuing authority of the Saxon Bank of Dresden in the total amount of notes to be issued is not limited, however the equivalent value of the banknotes in circulation, as well as the repayable without prior notice or within three months. Deposits always one third in cash or silver bullion be available; one sixth can be covered by Lombard claims, the rest must be paid by money or bank bills of exchange, which must be valid for a maximum of three months to run, covered fine. The note denominations are 10 – 500 thalers. The bank's privilege lasts until 1910, but the bank is entitled to extension of their privilege, from July 18, 1890, as the date on which their older privilege ends, each of now from the time of the possible federal regulation of the banking issue without to submit to compensation.

The Landftändische Bank of Bautzen has the authority to issue one million thalers to issue notes.

The Chemnitzer Stadtbank is authorized to issue credit certificates in appoints 1 thaler, up to a total amount of 300,000 thalers. Their privilege runs until March 1874.

The Leipziger Kasenverein is entitled until 1892 to issue notes in total amounts of 1,000,000 thalers, but only in appoints of 100 thalers and more.

In Mecklenburg-Schwerin, the Bank of Rostock has the authority to issue 1¼ million thaler banknotes. The duration of the privilege. There are no reports from legium.

In the Grand Duchy of Saxony, the Weimar Bank has the authority to issue banknotes in a, its paid-up share capital (5 million thalers) the same total amount; their privilege runs until 1953.

In Oldenburg, the Oldenburgische Landesbank is authorized to issue 2 million thalers of government paper money in denominations of 10 and 5 thalers with the corresponding redemption obligation. Since the bank has the paper money used to increase their operating funds, it has the character

of banknotes guaranteed by the state. The founding= contract runs until 1878.

138

In Braunschweig, the Braunschweigische Bank has the authority to Issue of banknotes in denominations of 10 thalers and above, in the Ge= total amount of 4500000 thalers. For cash redemption, 3) million Taler circulating notes the fourth part, beyond that the third part of the surplus amount in circulation must be available in the bank. In addition to these The entire amount of the cash fund initially intended for redemption must always be of the notes put into circulation in easily realizable currencies, i.e. those which can be collected within three months at the latest, or in Money must be available in the bank. The privilege runs until 1952.

»In Saxony-Meiningen, the Mitteldeutsche Kreditbank in Meiningen the authority to increase the full amount of the paid-in share capital of Bank= to issue notes in denominations of at least 10 thalers, one third of which must be backed by cash or gold or silver bars. The permissible amount of banknotes in circulation is now 5 million thalers. The privilege legium runs until 1956.

In Saxe-Coburg-Gotha, the private bank of Gotha owns the power to issue banknotes in unlimited quantities; however, the total amount of notes in circulation does not exceed the amount of discounted and purchased bills of exchange and must be up to the amount of the paid-in Capital (1400000 thalers) to one third, beyond that half by cash or gold or silver bars covered fine. The notes are denominated in Taler currency, but the bank may also issue notes denominated in other German national currencies. The minimum amount of the Appoints is 10 thalers and a maximum of half the amount of the circulating notes for this amount. The bank's privilege runs until 1946.

In Anhalt, the Anhalt=Deffauische Landesbank has the authority to Issue of 1 million thaler banknotes; of which $\frac{1}{2}$ million in notes of 1, 2 and 5 thalers, million in notes of 10 thalers. The duration of the privilege legium is not determined.

In Schwarzburg-Sondershausen, the Thüringische Bank owns the power to issue banknotes in a deposited amount Share capital equal amount, of which $\frac{1}{4}$ in cash, the rest in Changes and easily realizable effects must be covered. Minimum of Notes: 20 thalers. The capital currently amounts to 2 million Taler and can only be increased with the permission of the state government. The duration of the privilege is not limited.

In Reuß j. L. the Geraer Bank has a branch of the largest limited authority to issue notes; however, the amount of the paid share capital issued banknotes one third, for all banknotes to be issued in excess of this amount shall be half the amount of the same

be represented by cash funds. The notes may be in denominations of 1, 5, 10, 50 and 100 thalers. The bank's privilege lasts until 1953.

In Schaumburg-Lippe, the Niedersächsische Bank zu Bückeburg an unlimited authority to issue Banknotes, provided that for one third of the notes in circulation

139

Cover is available, the riding is done by good not more than three months running must be covered by bills of exchange or good securities with a stock exchange price. The notes may be denominated in Taler, Mark Banko, Louisdor, South German, Austrian and Dutch currency. The bank's privilege lasts until 1956.

There are two banknote issuing banks in Lübeck:

the Lübeck private bank with the authority to pay up to twice the amount of their paid-in capital notes in thaler currency in appoints of not less than 10 thalers. A quarter of the notes in circulation must be cash. The paid-in capital amounts to 1 million Marks in current value, the permissible note issue is 800,000 thalers; the privilege runs until 1890;

Lübeck-based Commerzbank with the authority to issue 800,000 thalers in banknotes denominated in thaler currency in appoints of not less than 10 thalers, of which one third must be covered by cash. The privilege lasts until 1906.

Finally, in Bremen, the Bremer Bank has the authority to issue of banknotes up to the amount of the paid-in share capital and the reserve fund, with cash $\frac{1}{4}$ coverage. The share capital is 5 million thalers Gold and can only be increased with the approval of the Senate. The reserve fund amounts to 132411 thalers after the closing of 31 December 1869 Gold, the amount of permissible note issuance is therefore 5132410 thalers of gold. The notes are denominated in gold; an issue of silver denominated grades is permitted with the approval of the Senate. The minimum number of appoints is 5 Taler; only 10% of the permissible banknote circulation may be in minimal appoints circulate. The duration of the privilege is unlimited.

Of the non-Prussian banks listed here, five are in the
The remaining thirteen have a
Authority to issue banknotes totalling 3,029,500 thalers.

Throughout the Federal Republic, the authority to issue banknotes is held by six banks unlimited, from 25 other banks to a total of 61,000,000 thalers demarcated.

All 31 banks in the federal territory (apart from one small institutions whose banknote circulation does not even come close

If before the day of the entry into force of this Act the authority to issue
of banknotes with the restriction that the total

amount of notes to be issued is a fixed amount or a fixed amount

may not exceed a limited amount in relation to another sum,

for the lifting of this restriction or the increase of the day

the promulgation of this law, the total amount of the funds to be issued

Notes only by a decree issued at the request of the state governments involved

federal law.

§ 3.

If the duration of the rights acquired before the day of the entry into force of this Law

Power to issue banknotes limited to a certain period of time,

it can only be extended beyond this period by a, upon application

federal law passed by the state government concerned,

unless the holder of the authority to issue banknotes has the right

bindingly obliged to accept the withdrawal of this power upon expiry

each calendar year after prior one-year notice to let go.

The § 3, which provides an extension of the banknote privileges beyond their beyond the end date only under the condition that the same can be terminated with one-year period, will have practical significance only for some of the Prussian fch private banks in the old provinces, as the deadlines the other temporary banking privileges mostly moved so far ft that at the time of the adoption of the general provisions on the banking system will not have expired.

8 4.

If the duration of a contract concluded before the day of the entry into force of this Act acquired authority to issue banknotes by a State-owned

143

or a public authority, to a specific date
If the termination is limited to a specific period of time, this termination at the earliest permissible date, by virtue of present law, unless the holder of the authority to issue banknotes fures are legally bound to give one year's notice of termination for the end of each calendar year.

Section 4 actually affects the Preußische Bank, the only one whose privilege legium is subject to termination.

According to § 16 of the Banking Ordinance of 5 October 1846 and § 2 of the Law of 7 May 1856, the state is in favour of the Prussian Bank until 31 December of this year, the right to withdraw until 31 December 1871. repayment of the capital of the bank shareholders or the amendment of the Banking Regulations without the approval of the Assembly of the Most Stakeholders Bank shareholders. This right is exercised until the If no use has been made of the powers set out above, the State may only after 10 years. Since the future enactment of general federal legal provisions on banking a revision of the banking regulations corresponding to these provisions must go in hand, and the § 4 of the draft provides that in the During this year, a change in the Bank's regulations= order and the law of 7 May 1856, that the State according to the same only every ten years the right to demand repayment of the capital of the bank's shareholders or the amendment of the banking regulations without the approval of the meeting of the majority bank shareholders to order, henceforth at the end of each calendar year with one-year notice period can be exercised.

85th minute

The banknotes are considered to be the same as the government paper money whose Issue to a banking institution to strengthen its operating resources wearing is.

The \$ 5 is justified by the consideration that government paper money under the conditions specified in this paragraph, the State guaranteed banknotes are essentially identical.

During the third discussion of the draft law in the Reichstag (27th session of 24 March 1870) the above paragraphs received a single Modification by the fact that as Alinea 2 to § 1 the following amendment of the Member of Parliament v. Sybel was accepted:

If a bank has not yet completed its business operations before the date of entry into force has not actually made use of its authority to issue banknotes has, it can only do so in the future if it has obtained the authorization by a federal law.

144

The reason why the law was given retroactive effect was solely with the intention of bringing into being a princely state new banking institution in Greiz, which had already been licensed by the government, impede.

26. Pro memoria of the directors of the Braunschweig Bank concerning joint banknote issuance by private banks.

The regulation provided for in the Constitution of the North German Confederation of the banking sector has become a burning issue, which clearly calls for a speedy solution.

However, there still seems to be a wide range of views on what should happen. to part ways; but it is already clear that public opinion is generally inclined to favor the Prussian, with regard to a central bank of the North German Federal Government against the private banks issuing banknotes, and to influence legislation in this sense. Existing concessions will have to be formally respected; however, the Danger that the legislation of the North German Confederation in favour of a central institution makes provisions which apply to private banks will actually have a detrimental effect.

In order to counteract this danger, it is necessary that the Question initially interested banks out of their previous passivity=

step in, through appropriate joint steps, to resolve the chaos of desires and proposals and to find a solution that is in the interests of the banks themselves as well as public transport really serve the purpose help.

Among the reasons which the public has against the diversity of our banknote system is distrust in the solvency of the banks probably no longer countable. If it existed here and there before, it is this groundlessness through a series of years, rich in political and financial crises, fully presented. Not even one of the German Zettelbanken has emerged from these tests with dishonor! There are two very well-founded complaints:

The district in which the majority of the (especially non-Prussian) Private banknotes circulate at par value, is so narrow that these Notes in reality have their purpose of facilitating monetary transactions, can only fulfill very imperfectly; – and

the grades are sorted by place of issue, size of sections and Issue date so different that only the experienced cashier, but not the ordinary businessman can know all of them so well that to be on the safe side against counterfeits and amortized notes. Elimination of these two evils is ultimately the goal. what happens in the field of banking legislation, and what the banks themselves offer must also be directed

Perrot, Bismarck and the Jews. 10 145

if they want to achieve a useful, real independence further want to secure.

The issue is that the private banks are issuing their notes

mutually accept payment at full nominal value and at a common central point, and give them a one= uniform external form.

Following the example of the existing system in Scotland and Switzerland, Clearing System has often suggested that banks should deposit their notes a central office – Berlin – redeemed or exchanged.

This system cannot be used in this way for our German circumstances be considered suitable. The Scottish banks are on a Area of about 1460, the Swiss to one of about.

700 square miles with fairly similar industries of the Be= population, and it is therefore obvious that their

Notes generally circulate fairly evenly throughout the country and Central office for exchange. The banks of the North German Confederation are spread over an area of about 7500 square miles

with a population which in the individual regions represents the most cultivated in a variety of industries and therefore a, even in the context of

ratio to the emission height approximately uniform circulation of the different grades in the federal territory is not permitted. The exchange of A central office is therefore always one with considerable, regularly repeated recurring costs, more or less artificial and therefore do not fulfill their actual purpose. Despite all the Conventions the notes of other, especially distant banks in In many cases, we do not accept payment at par, because it is a long-standing practice will need to be changed before one gets used to it, e.g. in Königsberg Weimar, or in Posen to regard Meiningen banknotes as bill of exchange payment, so that the banks do not reissue such notes, but only use them for Substitution to Berlin. The experiences that the redemption of notes in Leipzig, are likely to be in the same way speak against such a system.

It has also been proposed that the banks should agree on a common form scheme of the notes, so that these in their external appearance and only in the text of the promise of payment the different charging deviation. But this would also only be half a measure rule, which apparently facilitates traffic, but in reality but would cause a deception of the audience. The notes appeared afterwards as unified, without in reality refining the still valid The distinction would be made by the outwardly consistent form only infinitely more difficult.

The Association of Banks for the Purpose of Issuing and Redemption of its notes must, if it is to fulfil its purpose, be a full-permanent, ie one which provides public transport really from the colorful sample card of "diverse" notes, which with-

146

under already a few miles from their place of origin no longer are fully valid, and the notes of private banks are exempted from makes it as popular and suitable means of payment everywhere as These are the notes of the Prussian Bank. But this is only possible if the private banks instead of their private notes

under joint and several liability a joint note which can be redeemed at a common central point.

At first glance, the difficulties that arise in such an Arrangement object to the statement, raise concerns; upon closer examination, prove they prove to be relatively easy to overcome, in any case they are not significant enough to be considered against the obvious advantages and to be allowed to prevent a great progress once it is desired.

The concerns will be based on two points in particular:

1. mutual liability, and

2. the relocation of metal stocks from the basements of the individual banks

into a common reservoir.

As regards the first point, it has already been noted above, that none of the existing German note banks, even in the most difficult times have given cause for concern regarding the security of their notes. The debts of the banks represented by issued notes are unconditionally privileged and can also be divided between those subject to joint and several liability. The debts of the united banks are mutually expressly recognised as such.

If, by the way, a third part as cash cover is continuously in common custody, then for the remaining two thirds the

Share capital and the special coverage to be controlled by the head office may under all circumstances be regarded as sufficient security.

A bank that fails to meet its obligation even once with the

If the strictest punctuality had been observed, one might

From the moment onwards, the headquarters with extensive equip executive authority.

The transfer of cash reserves to the central office to be established

There is nothing to worry about if you consider that the storage preservation in specially created rooms, under every conceivable, control to be exercised by the banks themselves and under federal commissioner's chemical co-closure would have to happen.

What is the purpose of the cash reserves of the private banks? Firstly, to calm the note holder; a central silver under public control's treasure will do this to an even greater extent. Then to the Empire's possibility of such payments for which the notes in question are not are suitable, namely to state treasuries and public administrations beyond the national borders; the note of the united banks is used for such purposes make the cumbersome silver money completely unnecessary. Finally, for the delivery the small actual need for metal money for wages etc.; this

10* 147

Demand alone will continue to exist, but on the whole it is sufficient the supply of metal money which the regular business of the bank's kasen feeds itself.

The consolidation of the now dispersed

Silver reserves not only bring a significant simplification of the currently complicated and much more expensive circulation process, but also other very significant advantages. In addition to the Metal treasures of the Prussian Bank a valuable barometer of money's market; it prevents banks from making laudable mistakes in critical times. forge to accumulate money far beyond the actual need

and thereby create an increased demand, which the money market still very alarmed; it also prevents individual banks from getting into such Times by particularly strong demand for the realization of their notes in her calm disposition and strong effectiveness. The measures taken in this regard in 1866 The experiences we had are still too fresh in our memory to It may require explanation what calming effect in stormy times the Bank managements as well as the public in the consciousness must stand up for all and all for one. Through such a By pooling the metal stocks, the banks gain a great advantage the Prussian Bank, which through its expansion across the entire state is able to regulate the movement of money same, and not from the random conditions of a place or a province, but above the current situation to stand.

For the implementation of this idea we refer to the beige= attached organizational draft, which we submit to your detailed review= highly recommend.

This plan is based on the principle of self-help and self-management; It resolves the question from the outset under what conditions new Note banks should be licensed, because there will be no new institute of this kind, which does not want to join the association, or whose censorship does not exist. He is sure of the sympathy of the public, because instead of these different notes, there is a universally valid, generally well-known paper money is offered, a paper money to which by virtue of the much higher amount of the share capital liable for it, a far more impressive certainty than even the notes of the Prussian fche Bank. Finally, it is our firm conviction that for economic and political reasons the warmest support on the part of the Federal Presidency and the Reichstag.

We have no doubt that, with the encouragement of these, our most important matters affecting your lively interest= meet, our positive and detailed proposals will, although from mature consideration, perhaps not immediately universally be well received, or at least deserve the merit of the concrete treatment

148

the question. Please be so kind as to first give us your views about the whole program; we intend to do this To be used as a basis for collecting material as soon as possible to prepare a formal oral hearing on the matter. Braunschweig, March 1870. Aug. Urbich, Alex. Benndorf, Directors of the Braunschweig Bank.

organizational proposal.

§ 1.

The private joint-stock banks of the North German
Federal governments unite to jointly issue and redeem banknotes.

82nd

For this purpose, they establish under common administration under the
Protection and control of the North German Confederation a central office in
Berlin.

§ 3.

The central office consists

a) a Board of Directors appointed by the participating banks

a voting ratio dependent on the share capital;

b) from salaried officials proposed by the Board of Directors

and appointed in the same way. In addition, each participating
Bank has the right to appoint a special control officer for
to determine the office;

c) from the Federal Commissioners to be appointed by the Federal Council.

§ 4.

The Central Bureau issues notes whose total amount corresponds to the total amount
the currently licensed notes of the individual banks,
whereas these banks refrain from issuing their own banknotes.

85th minute

Each bank shall be granted a sum corresponding to its privilege, or, where appropriate,
limited edition is permitted, contractually determined quantity
Federal notes were made available in return for the withdrawal of their private notes.

§ 6.

The new notes are only payable at the central office at any time.
Redemption at the individual bank cash desks is only possible in accordance with the
current cash reserves there, or after prior registration.

87th minute

To cover these federal notes, each bank has to deposit one third of its to deliver the withdrawn amount in cash to the central office.
For the remaining two thirds, she must have the usual
Have cover in the form of bills of exchange or appropriate securities available.

§ 8.

Whether and where, in view of local conditions, a part of the common Barftreasury in the general interest outside the central office is subject to a decision following a special request.

89th minute

The Central Office or the Board of Directors shall have the
fagreed to regularly review banks' portfolios and
Circumstances also to censor and the general assembly of the participants
to provide an accurate report.

§ 10.

The Central Office reports weekly to the participating banks on the
Status of cash reserves and banknote circulation. As soon as the
Cash reserves available to the administration are less than one third of the
Banks actually delivered notes, he calls on each bank to make one of its
Note withdrawal corresponding additional payment.

§ 11.

A bank which does not comply with such a request immediately,
will be excluded from the club without further notice. Regarding their
The Central Office has the right to the pending obligations of the association and
Obligation of immediate execution, for which purpose the assistance of the person concerned
Organs of the North German Confederation must be secured in advance.

§ 12.

On the unconditional or conditional revocation of the Articles of Association etc.
The General Meeting decides on the admission of each individual bank into the association.
the participants in such a way that, if not at least $\frac{1}{4}$ of all be
legitimate voices speak out in favor of the admission which has been rejected.

27. Official notices of the German trading day.
Regarding the banking issue.

According to Article 4 of the Constitution of the North German Confederation, the Banking is one of the subjects which will be subject to legislation in the future and administration of the Federation. The execution of the provisions

150

In any case, more far-reaching legal provisions will be necessary
Whatever view of banking one may hold,
however, there is complete agreement that the opposing
current situation cannot be maintained. It is inadmissible,
that in a single economic area different legislation on
The banking sector is dominated by the fact that in relation to licensing new
banks, as well as on the issue of circulating funds in one province
different rules prevailed than in the other. Nor can there be any
There is doubt that the actual conditions are unsatisfactory
It must be felt as a misfortune that in a country
Banks that are founded with the intention of carrying out their activities through a
to extend to another area.

The remaining committee of the German Trade Day believed the duty
to not idly observe the actions of governments, but
to endeavour to support them. He could care less
arrive to initiate theoretical discussions, because it would be a
Volumes of rich work include the for and against the unity and freedom
the banks' reasons. The remaining committee
had to recognize its main task as collecting material
from which the government could form a judgment on
how the banking question is discussed in the bosom of the German trading community
He was particularly concerned with the individual commercial corporations
to encourage them to express their wishes and where a clear
and certain views on the restructuring of the banking system
to ensure that the Chambers of Commerce or their affiliated
equivalent bodies should approach the issue more closely.

For this purpose, in November 1869, the permanent committee addressed its
Questionnaires were sent to all members with the purpose of obtaining a
facts the statistical material on the current activity and existence
of the banks, on the other hand to provoke statements about it,
in which direction banking legislation should progress in the future.

Unfortunately, the responses received have not yet led to this goal.
On the one hand, many chambers of commerce have not provided any answers
not arrived, on the other hand, the answers received are exhaustive
the meaning of the questions, are probably partly based on a misunderstanding
understanding of the questions posed. The remaining committee has from the beginning
his activity also aimed at convening a commission,
consisting of a part of its members and other expert
Men who were tasked with further processing the incoming material

process and the expression of public opinion about the bank=

This commission met in Berlin in the days from 23– 25 May 1870 fi) and held discussions. Of course can cover the entire vast area of the bank within a three-day period= question cannot be discussed in detail. It is impractical to have a number of Men whose professions were spread across the most diverse regions

151

Germany, to gather for as long as necessary to thoroughly discuss all relevant issues. It was equally impracticable to conduct the deliberations according to parliamentary custom through detailed reports, because the speaker could not anticipate what questions would be of interest to the Assembly would prefer to use the facility. And in fact it is not It would have been possible to avoid a relatively large proportion of the consultation time was taken away from the discussion about which questions the others are so far ahead in importance that they should preferably be given time and attention must be paid. The remaining committee has therefore decided to make the material available for consultation to bring into systematic form what has been presented in fragments, It is necessary to bring forward a number of resolutions and to again to the individual commercial bodies with the request, to make a specific statement as to the extent to which they support this resolution solutions and in which direction they may differ from the same ZZ, as the permanent committee its activity on this issue began, it seemed as if the settlement of all the questions of great urgency. The privilege of the Prussian bank was approaching its process, and it appeared as a first step towards establishing new relationships nife that this privilege is not expressly or implicitly granted in completely renewed in the same way. It seemed at that time that a Settlement of the whole question before the end of 1870 be, because, in case of a termination of the intended privilege= gium was not carried out, the latter was tacitly considered to be for a further twelve years be considered extended. In the meantime, the law of 27 March 1870 brought about a change in the situation in two directions. One= On the other hand, this has made it possible to extend the privilege of the Prussian Bank at any time with one year's notice. It is therefore the risk that again for a longer period of time unchanging conditions are created, and the ground is won for new creation= no matter in what direction they may be intended. On the other hand, the law also had the advantage of temporarily To prevent the establishment of new note banks and thereby aggravate to prevent the evil already mentioned, that banks are formed, whose activity does not extend to the territory in which they are established, fshould take place, but intend to limit their effectiveness to a local to expand into foreign territory. If, therefore, for the consultation of the trading day a free margin has been gained in terms of time, fuch, the circumstances already mentioned contradict the idea that a Settlement of the whole question in its entirety by way of

oral commission deliberations can be attempted, but rather the trading day to stick to the way, through a preparatory material its individual members to give specific and exhaustive answers to induce words.

152

The following gentlemen attended the meeting of the Bank Commission:

1. Bamberger, Dr. jur. in Mainz.
2. Becker, Chairman of the Chamber of Commerce in Leipzig and Director of the Leipzig Bank.
3. Benndorf, Director of the Braunschweig Bank.
4. Conrad, banker in Berlin.
5. von Dechend, President of the Main Bank Directorate in Berlin.
6. Delbrück, banker in Berlin, Chairman of the Committee of the German trading day.
7. Friedländer, banker in Breslau.
8. Fromberg, director of the Silesian Bank Association in Breslau.
9. Hinsberg, director of the Barmer Bankverein in Barmen.
10. Treasurer, merchant in Hamburg.
11. Ladenburg, banker in Mannheim.
12. Mendelssohn, Commercial Councillor and banker in Berlin.
13. Meyer, Dr. jur. in Wroclaw.
14. Mosle, merchant in Bremen.
15. Müller, merchant in Stuttgart.
16. Samter, banker in Königsberg.
17. Schottler, director of the bank in Danzig.
18. Seiffert, director of the bank in Weimar.
19. Spiegel, bank director in Lübeck.
20. Steiner, bank director in Stuttgart.
21. Stengel, merchant in Staßfurt.
22. Stephan, commercial councillor and banker in Königsberg.
23. Warsaw, Commercial Councillor and banker in Berlin.
24. Wesenfeld, manufacturer in Barmen.
25. Dr. Witte, Senator in Rostock.
26. Zuckfschwerdt, merchant in Magdeburg.

The first resolution the Commission reached is as follows:

The Prussian bank is to be preserved and converted into a bank of the North German Confederation or the Customs Union under Fest-granting of a concession to about 12 years become.

The Commission took a stand on the facts given by

They initially designed the banking system for the North German Confederation Only for the North German Confederation was there a competent

legislative power and administrative authority. It is not the hope
It is impossible that it will succeed, either through the treaties
on a case-by-case basis, whether through an extension of the competence of customs=
the decision which is made for the North German Confederation,
to the entire German territory. It would therefore be necessary to take into account
be taken so that the decisions are taken in a way that
can also win over the South German trading community for the same. As the

153

The next goal of the agitation could only be the uniform design of the bank=
essential to the North German Confederation.

The Commission also believed that it was not a question of
to create institutions that are destined to last forever.
From a practical point of view, it can only be a matter of
to make arrangements that will be satisfactory for the near future.
practical men must limit their view, and it would be just as doctrinal
narcissistic, to want to establish principles that should apply for all eternity,
than it should be understood as a purely theoretical endeavor, principles
to emphasize, which is well founded in science, but immediately through
the circumstances prevent the introduction into life. The return
fights are doubly important when it comes to awarding a
It is a monopoly, a privilege, and that is why the=
those members who, from a theoretical conviction, support the establishment of a
uniform with the exclusive right of note issue
Central Bank is good, did not object to the fact that the
Concession of the bank to be founded for the North German Confederation before the
hand is granted for a limited period of time.

The decision to preserve the Prussian bank is linked to the existing
conditions. N

The focus of banking in Prussia, it was explained,
since then in the hands of the Prussian main bank. The private banks play
a comparatively insignificant role compared to it. One could
few private banks can be imagined without the actual banking system
would be significantly modified – but not the Prussian main bank. Exist
these are not compatible with the means of exchange created by their note issuance,
the entire economic machinery, trade and production would be eye-
visibly come to a standstill and constantly have a significantly different appearance
Their continued existence therefore appears to be determined from the outset by the
actual circumstances required.

But it is not only the actual circumstances that determine their continuation
require existence. Experience and science agree that
formed economic conditions the existence of a large central bank
with an extensive network of branch banks. Never
Sometimes individual banks can replace a large central bank, because only

this could provide the necessary guarantee for a secure circulation of money. The question of whether such a central bank, as the Prussian Bank is now, can be produced in another way, takes precedence over the fact that it exists and has gained a firm footing in the economic conditions; not the question of whether it should continue to exist, but only how it should continue to exist be ventilated.

Small banks would never perform the same in large financial operations as, like a bank, which commands powerful financial resources; the latter is also necessary to serve as a regulator and in the event of emerging crises

154

to overcome the difficulty arising from the inadequacy of the current set of notes.

Of the members of all Prussian Chambers of Commerce, the charitable effectiveness of the Prussian bank was recognized in the most lively way. There would be no majority in any commercial body in Prussia to be persuaded to consider this institute as dispensable for the future. Also from the non-Prussian areas of the North German Confederation the Prussian bank has found the most lively recognition, and it is best known. It is known that from many non-Prussian places the wish has been expressed that the Prussian bank increased its effectiveness by establishing branches may also extend there. In the answers of the South German trade chambers, however, there is often resistance to the expansion of the Prussian bank to a wider area. This resistance allows but by no means the conclusion that in the countries of southern Germany with satisfied with the current banking conditions there. Rather lie, especially from Baden, but also from Württemberg unambiguous symptoms suggest that one is looking for an improvement in the financial conditions, and the long-standing negotiations of the Badische Chambers on the banking issue have confirmed this. The contradiction that partly in southern Germany against an expansion of the Prussian bank. The explanation for this is probably largely due to the fact that some not everywhere have a correct idea of the nature of this bank's power, in particular the view is widespread that the Prussian bank with the Prussian state organism in a closer connection, than is actually the case, and that an extension of the effectiveness of this institute could lead to bureaucratizing the traffic. If in this respect, more correct ideas would be widespread if insisted. It is particularly pointed out that the Prussian Bank has an activity through its branches everywhere only where it is from the middle of the trade is prompted by wishes and ideas to do so. It may be assumed that the resistance that the institute encountered in South Germany will be limited to narrower circles.

The beneficial effects which the Prussian bank had on trade and traffic, were from many sides in the most lively emphasized, not disputed by any side. It was shown that in no

other countries in the world, even the middle-class merchant and manufacturer easier to discount his bills of exchange without difficulty. It was It has also been shown that the expansion of a network of branches increases traffic from place to place in a rare way, and it was even principled supporters of banking freedom readily acknowledged that no other Central Bank neither in Austria, nor in France or England the needs of small traffic have been given such a great boost as the Prussian Bank. This side of the institute was brought into focus the effectiveness of the bank towards the public, and the feeft was unanimous in the fact that this aspect of effectiveness also

155

The future must be preserved. On the other hand, it was seen as a question that in the second row of importance and which can very well be seen as an open which the internal organization of the bank whether their administration is exclusively or predominantly purchasing male, or whether, as before, the state will manage the bank Only in passing was the wish expressed that the The involvement of the state ceases. One member put forward the alternative that Bank should be either a completely state institution or a completely private institution. As for the current situation, it has been brought to its substantial level= trains were assumed to be known, but experts confirmed the The following announcements have been made about details which are less The Prussian bank is mainly run by merchants, most of the board officials are from commercial professional circles and have their qualifications through a longer service either in a bank or in an export business proven; they must undergo an examination, which mainly substantively limited to commercial objects. After they had have been formed over a longer period of time in the various offices and have demonstrated their competence in practice, they will be Board of Directors officials were employed, so that in all offices only commercial educated directors are present. The main bank board, the leading authority, is also largely composed of merchants and indeed from the best forces that gradually emerged from the provinces= The President and two members of the Executive Board are against it. rium regularly studied men and are mostly from the officials of the Ministry of Trade, in which she had previously proved herself to be a competent Administrative officials must have proven themselves. It is therefore the knowledge= fcient element that permeates the entire state administration, also here This composition has proven itself to be extremely effective. A large part of the private banks have appointed their board members to the civil servants taken from the Prussian main bank. However, the attempt has been made whether by recruiting more educated men to achieve better results. Meanwhile, the conviction has gained ground broken that this is not the case; rather, some of those attempts It can therefore be assumed as proven that that the commercial element must predominate if the bank is an office should be managed fcratically. As a rule, no one is appointed as director

employed, who has not been employed at least at four or five other institutions as has proven himself competent to manage a banking business. The appointment is also position on a trial basis, and only when the ability has been fully proven, definitively. The central institution, the main bank directorate, is in charge of the whole business of the kind that it is of all the businesses that are in the province occur, receives precise knowledge, and not only of the total-sum, but from every bill of exchange, from every single transaction, what is done, down to the smallest details, and it is now the task to check

156

whether these transactions meet the material conditions and requirements to be met settlements. If a bill of exchange is discounted which has an unsound Nature has what is usually easy to see, then this is decided disapproved and immediate correction is required. In addition, there is a mood, which has proven itself to a high degree. The interest of the officials to the transactions to be concluded through a royalty fund an institution which, as far as is known, is not found anywhere else exists. Bank directors in the provinces are entitled to a certain royalty approved; however, it will not be paid out, but accumulated up to the future departure of the official. This bonus is liable for all Losses caused by the business of the official concerned and indeed so unconditionally that an appeal against an order which the royalties are only possible to the head of the bank. The latter cannot decide whether the reason for a Withdrawal of royalties is founded in every detail, because it This is a commercial arbitration. In fact, the The decision of the Executive Board is generally to be regarded as final. The decision is always made with regard to the quality ification of the official, but it has already happened that a Officials charged a sum of 20,000 thalers and for this his entire royalties that he had collected over a long series of years had been claimed, and not for a more serious Oversight, because his bail is liable for this, but because he did not with the caution that one would expect from a senior official may expect.!) This facility insures, on the one hand, the officials who are relatively not so highly paid, against the hardship of their families after their retirement from service or in the event of their death and on the other hand, it protects the bank against unsound transactions. The main bank= The directorate occupies a position that is not found anywhere else. It is forbidden for members to own bank shares, nor do they have a share in the profits and losses, They are without any personal interest. This results in the Administration takes higher perspectives and also the general interests It is claimed that those banking companies whose Members receive a royalty on the profits or the large sum of bank capital, never represent the general interests so comprehensively in Keep an eye on things and do not give the audience the same security The experiences made in other countries are presented as those which cannot lead to the

To appoint a college at the head of a bank, which is represented by its own pecuniary national interests. This is also an advantage of the Prussian institution found that the management was entrusted to a college and not be reserved for one individual. Apparently, in France, a similar Relationship exists in that at the head of the local bank a governor

i) Compare this with today's conditions!

157

and two sous-governors are standing; meanwhile, the positions are actually of them not much more than sinecures. There are discussions about it whether commissions of merchants who are still active as such, will be more involved in the management of the Prussian bank than before, However, the trade sector has spoken out against it. All trade Chambers that have been questioned about this have found it highly detrimental means that a merchant is put in a position to outperform his competitors to look into the pockets!) The merchants are always very willing to to accept the positions of bank agents, although such positions ments are by no means profitable. However, the Board of Directors has avoided appointing merchants as his agents. The main bank directorate ft is supported by a central committee, which consists mainly of bankers and buyers people, and from this central committee three persons are appointed who attend all meetings of the Main Bank Board and take note of all the bank's transactions. They keep adheres to the principle of not engaging in actual credit granting mix, but only check whether the discounted bills of exchange are good or not and whether the bank is not heading in a questionable direction.

One side raised the question of whether it would not be possible fe, the commercial element of the administration does not consist exclusively of the Berlin merchants, but also representatives of the large Trading and maritime centres should be included in this. The reply was that a such an approach would encounter very great practical difficulties. It is The main purpose of calling in the Central Committee is to determine the Discount and for this purpose the corporation must always come together quickly be called if the circumstances give rise to it. If representatives fentants from Hamburg, Königsberg and other distant places have to be drawn up, there would be a great deal of fuss until the decision is made. excitement throughout the country. This should be avoided and if Therefore, representatives from other places should also be included, They must therefore be excluded from the most important transactions. Although it was replied that it would be advisable to have foreign To involve representatives in such transactions, the completion of which less urgent, it was decided that further pursuit of this Question aside. Various objections were raised against the resolution adopted Concerns have been raised on several sides.

One of the negative voices does not want the Prussian bank as such and unconditionally, but only its expansion into a federal institution She motivates this vote as follows: "The abundance of duties and

Achievements for which she was raised in Prussia cannot be immediately replace it elsewhere; but equally certainly there is no reason the system on which it is based, with its weaknesses and

) Today, the spying out of the competition through the form of supervisory boards= positions of all leading bank directors, leading industrial leaders and parliamentarians tarier, who sometimes hold up to 100 supervisory board positions, the door is wide open.

158

driving to other circles. This is in principle the same system which has just suffered such miserable shipwreck in France. A bank according to this model, whether state or private, always find their main support in state protection and thereby into a dependency on the most serious consequences states.

Our banking system, as it certainly cannot have the task of to serve the state directly, at least not through the issuance of notes must not be reformed on such a basis. The focus is much more to invest more in the activities of private banks, whose existence depends on purely economic basis and whose credit is not based on the credit and welfare will of the state, but primarily on its own funds.

Such a basis is far healthier and can even in critical times provide much greater reassurance. The private banks have, however, Part paid some tuition fees, but with regard to their obligations has proven itself to be completely solid in repeated crises. have also, on the whole, done their duty.

That the services of the private banks are not as impressive as those of the Prussian bank, that individuals are not unjustly too afraid is a natural consequence of the various Position. The private banks are by far the largest in terms of their performance is limited by their statutes and also by circumstances that give them reason to There is a difference between being in unlimited amount of notes that the state accepts in all cash registers and thereby helps to keep it in circulation, or whether these notes are limited in their sum and also in the most noble part of the federation= The private banks are only given a relatively more favourable position, which means neither special state protection, nor significant extension of the individual powers but only the recognition contained in the legal permission of their natural development their right to exist; – so too are the private banks achieve something completely satisfactory.

The Prussian bank, especially in its present form, to a To expand the institution of the empire means actually to create a monopoly, –

means to suppress more and more all effective, beneficial competition. Therefore, the Prussian bank should continue to exist as such only for the time being. The advantages which one would gain from their dominion over the entire federation= area, are by creating a, on the individual banks based real central bank in a far more perfect way. Such a central bank, in its relationship to the individual banks essentially corresponding to the Issue Department of the Bank of England thought to combine the various note issues, only with the concerned banks, immediately exempts the traffic from the annoying amount of multiple notes, – immediately and generally represents

159

same currency, – promotes the now inadequate and difficult exchange equation between excess of money on the one hand and shortage on the other places through the banks themselves, which are actually called upon to do so, – transfers the great performance capability now limited to Prussia in the bank compartment immediately to all parts of the territory, without affecting the obligations and without affecting private rights, – and is finally the only means to set healthy limits on the cult of music While the banks now have a very significant part of their pay attention to keeping as many notes in circulation as possible, In order to be as efficient as possible, they will be reminded of this in such a facility not only no longer have any interest, but also through the natural be– strive to emancipate themselves as far as possible from the guardianship of control, be led by themselves to deal more and more with real capital (deposits) instead of capital surrogates (notes). The Prussian bank expanded by the Reichsanft does not achieve this, but only sets Other even significantly weaker founded tokens replaced the currently circulating.”

It was further said that such a resolution was unnecessary, it was understood quite by itself that the Prussian bank will continue to exist, and that it will also larger sphere of influence. However, this does not mean that that they must be given some kind of preferential position. Even if the principles of banking freedom are proclaimed, the Prussian bank will continue to exist and develop its effectiveness. Its services would be sought and it would therefore be completely unnecessary to give her any preferential position. One should establish the principles under which which banks and note banks in the North German Confederation be allowed to form and exist, and on the basis of these sentences the Prussian bank without giving it any privileged position A third party stressed that the An= view, which is a major factor in the continued existence of the Prussian bank. substantive interest, starting from the view that the previous system the issue of banknotes must always be in the foreground. The bank would have essentially the task of attracting idle capital and producing it tive uses. The latter is partly done through issuing of notes. In the economically advanced countries, England, America, Switzerland, however, has overcome this system and the main

The bank's most important function is that it offers deposits and current accounts Germany must also move towards this, as the excessive expenditure of paper money was dangerous. The Prussian bank must continue to exist, but without any privilege, because a high position granted to her and the preconceived opinion of the public for them will enable them to continue their operations, even without the use of banknotes Berlin is not the only center of major traffic, and especially for the banking and exchange business, in larger than in other countries, important places. It should be prevented that

160

a central bank centralizes the entire business. The proclamation of the Principles of banking freedom would be sufficient to prevent the Prussian bank to maintain the position which is best for them in the interest of the common good The current consultation is about the creation of new conditions for Germany and one should not try to to dictate to trade the paths it should take.

The following reply was made to these statements: It is completely impractical, the relationship of the Prussian bank in a new banking law to be passed to be passed over in silence. From the provision of the Federal Constitution, which makes banking a federal matter, follows with constitutional Necessity that in the future no individual state will have the right to interfere in banking matters. It is never acceptable that the Prussian state maintains a bank, since the banking system is a matter of the Federation. So let us remain silent about the Prussian bank, it would make their existence impossible in the future. If one wanted the Prussian bank has retained its essential features, one recognizes the need for such an institute for transport, then There is no other option under state law than to declare In the future, this bank should be an institution of the North German Confederation. However, throughout the entire territory of the Federation, it must respect those rights which it currently possesses in Prussia. Above all, that their notes are accepted in all public treasuries for payment Instead, they must be accepted. Hand in hand, their right go to establish branches in all areas of the North German Confederation. The question was also raised as to whether this extension would increase their capital, and there was agreement that with its current capital it is not in a position to To develop its activities throughout the entire territory of the Federation. It was It also stressed that if their capital increases, their ratio to the state should be re-regulated and in particular the question of a discussion among The question must be asked whether the state should retain its previous share of profits However, no decisions were made on this issue, because a final decision on this can only be made in agreement with the Prussian Ministry of Finance, which acquired in this respect rights. By finally agreeing that the term "central bank", which led to this misunderstanding

could give the impression that the activities of private institutions should be restricted imposed, the resolution was passed by 20 against 3
Votes were accepted. The following voted for it:

Bamberger, Conrad, v. Dechend, Delbrück, Friedländer, Fromberg,
Hinsberg, Ladenburg, Meyer, Mosle, Müller, Mendelssohn, Samter,
Schöttler, Seiffert, Spiegeler, Steiner, Stengel, Stephan, Warfschauer,
Wesenfeld, Witte, Zuckschwerdt,

and against: Becker, Benndorf, Kämmerer.

Perrot, Bismarck and the Jews. 11 161

The second resolution was worded as follows:

An unconditional freedom to establish note banks
should not exist.

This resolution was adopted unanimously. The theoretical standpoint
point according to which the issue of banknotes is a matter of common
Right and to the same extent as the issuance of
Bills of exchange, checks, etc. are open to everyone, found in the meeting
for practical reasons, not a single follower. The reasons for this
Resolution have not been specifically discussed, tacitly stating
from the most advanced supporters of banking freedom the concession
It was stated that such a far-reaching measure is not yet practically possible
The obvious reason for such a decision
can be found in the fact that an unrestricted freedom to emit
of banknotes for everyone cannot be conveniently introduced in any other way,
as hand in hand with a new legal regulation of the whole issue,
to what extent bearer securities can be issued by anyone.
In any case, the settlement of this question will take some time
take more time than is needed to definitively regulate the banking system
may run.

Third:

The right to issue banknotes is not necessarily limited to
to limit itself to a single Bundesbank.

This sentence provoked by far the most lively discussion. The minority
ity believed for theoretical and practical reasons the principle of
to hold on to the unity of notes and brought a
This motion should simply establish the principle that
the note unity is the goal to strive for and that
new central banks would no longer be licensed, at least in the future;
On the other hand, this measure completely ignored the discussion of the legal
question, what will happen after legal sanctioning of this principle with the already

existing central banks. It was of the opinion that that the solution of this legal question is left to a later stage of the discussion to be reserved.

The reasons for the principle of grade unity were first explained. taken from theoretical considerations about the principle of banknotes One speaker stated that the regulation of banknote circulation fe a part of the conditions of the general welfare and can from this Basically, it should not be left to competition. The circulation of notes equal to the circulation of paper money and demand the highest standard on trust and security; therefore, this valuable instrument, which is connected with a thousand threads of the general welfare, be entrusted to no one other than an institute supervised by the state. Here we find the greatest power, which is the best foundation for the matter and the greatest guarantee of intelligence. It is true that not principle, the state wisdom as the highest in the private industry

162

to be considered, but where the whole is to be represented, a large State with its extensive machinery provides the greatest guarantee for that the money question and its effects are correctly calculated. The advantage of banknotes consists in creating a certain capital, on whose Interest you participate in. However, these advantages are offset by the disadvantages and losses which arise in times of crisis and which those advantages parts can very easily outweigh the others. State control is required here. The note is a representative of easily realizable exchanges and since the number of good bills of exchange is limited, the number of Banknotes. However, an appropriate restriction can be can only be achieved by placing in the hands of a single institute the Power to issue notes is concentrated. The resolution formulated in section 2 have already shown that no one is of the opinion that the authority To issue notes, to release them without fail, the majority will therefore opt for a system of restriction, be it by means of con= cessation, whether by means of normative conditions. All restrictions but, which one can set up, only frighten the good and excite in this concern to submit to the restrictions; the bad but who, by issuing notes, only seeks to gain his individual advantage wants to pursue, allows himself to be restricted by the state-imposed restrictions in his Do not restrict. It was further argued that the coin unit is currently a goal of national aspiration in Germany and that one would contradict oneself if one had the possibility to create a large number of new stamps. Even under From another point of view, the concentration of the right to grade issue, to recommend to an institute. It is the task of the central bank to sense the shocks of the money market early and clearly, to serve as a warner and helper. This task is not left to them grow if it competes in the right to issue notes with a large number of private banks that can form at will. These considerations were further supported by the consideration of

the behavior of the private banks so far. The big bank has the task to create a reserve for the country in bad times. So far, Now the Prussian bank found itself in the need to provide for the small Banks, the circulation of banknotes has so far been less relied more on its cash reserves than on the cash reserves of the Prussian bank. The latter has set its reserves in such a way that in critical times it could have stood up for the private banks, it was in 1866 in the Necessity to use their metal primarily for private banks and on some days I have up to a million daily paid out for the other institutes. They presented notes and receive money in return to make their payments. Every bank only need not to prolong their bills of exchange as soon as they are due and thus obtain the means to obtain the notes from the Prussian bank. This situation had been tolerable up to now, the Prussian bank was in the

11* 163

been able to take over the private banks that have existed up to now. However, she will no longer be able to do so if in the future left to its own discretion to establish new note banks. The Prussian fche Bank has responded to a real need of trade and commerce fpeaked; on the other hand, the establishment of very many note banks can only to operations of the agiotage. Trains from the effectiveness of individual private banks, which raised the concern such institutions. When one of these banks years ago had a great loss and with a deficit of 6-700,000 thalers worked, her status remained at the same level, the status another bank a number of years ago was fundamentally wrong; a third and fourth bank must prove that they are in their status a value that was about half incorrect. Such a A central bank, like the Prussian one, could never decide because they are under the control of public opinion in a much wider Measures than the private banks. By issuing many different Securities will cause the public extensive loss and inconvenience convenience, it is not in the hands of the individual business= man, banknotes that were offered to him in lieu of payment= A member of the minority stated that he had a very large customer business in which he makes many millions. Despite this favourable position, he was not in a position to fight against the offers offered to him means of payment, he is forced to criticize both the coupons offered to him as foreign banknotes in payment= increase, otherwise he will lose his customers just like his smaller Competitors cancel. The public is therefore not able to to defend against poorly founded banknotes, and the state has the duty to to protect it against the issuance of such papers. It is a prejudice, that cheap money could be created using the banknote press. Hamburg had no central bank and for a number of years the money has been cheapest there Holland only had covered notes), and Holland also had ft had very cheap money for a number of years. For a long time Money is most expensive in America, and it is precisely in America that banknotes=

economically the most extensive. The restriction of the right to issue notes to issue to a single bank would eliminate competition in the area of banking system, because in addition to the main bank, a large number of deposit banks and the most beneficial effect on trade and trade. Only in the withdrawal of the right to issue notes private banks would find the right incentive to support the monetary and To maintain deposit transactions as desired in the general interest—worth it.

Finally, to justify the minority view, the history of the The same teaches that almost everywhere one can

) The fact was stated without immediate contradiction. Its Inaccuracy arises from the excess lights of the Dutch Bank.

164

systems of a majority of central banks to the system of banking unity In England, complete banking freedom had previously existed. reigns, this has led to such terrible suffering and enormous aberrations among the banks, that Peel felt compelled to adopt the principle to establish that new central banks may no longer be created and that the already existing ones on a certain quantity of the circulation funds were restricted. This principle has been followed in England ever since and no one is thinking about founding new note banks. In Frank= empire existed until 1848 a considerable number of provincial central banks. There, too, it was shown that in serious crises, were unsustainable and had to stop their payments. In Belgium, Until 1848, two central banks existed. They too were their questionable business activities are not able to continue their effectiveness and redeem their notes. Therefore, the state issued a single Note bank was founded. In Holland there has always been only one central bank. What fad Effects the Principle of Freedom of Music in America had, is so well known that not a word need be wasted on it.

In response to these reasons, the majority put forward the following arguments.

As indispensable as the existence of a large central bank is, it is not less the existence of several independent banks in addition to a central bank an economic necessity. Just as it would be wrong to have a country without great It would be equally wrong to leave the banking activities, even if those focused on creating means of exchange, i.e. issuing banknotes refers to, exclusively to one institute. The existence of a Central bank entails economic dangers that cannot possibly be ignored and should not be underestimated. The economy should not be expected to to rely on a bank, she rightly demands, through the possibility ability to establish several banks, the full guarantee of an undisturbed money= to have circulation. Monopolies have been eliminated everywhere, monopoly cannot be maintained in an area that is particularly

Freedom of movement demands in the area of money. One may all guarantees that seem indispensable for banks issuing banknotes, demand – but not that the entire economy be dependent on one bank.

Experience has also shown in Germany that the smaller banks outside of Prussia they had gained great economic importance. They must limit themselves to a smaller sphere of influence, but are within the same more efficient than the central bank, which relies more on large circumstances and financial operations on a grand scale.

Banknotes should not be considered a form of paper money. Rather, they are a form of credit, a business form, and must therefore be free like any other form of business. not the necessity of freedom, but the necessity of restriction. If we accept the proposition that the banknote is a Representative of the good exchange, it follows that instead of all good exchange rates may be issued. The ideal situation for

165

the existence of the means of circulation is perhaps that instead of a every bank bill of exchange deposited with the bank to the corresponding amount of notes would be issued, but no note without such a deposit. This goal in its perfection is achieved by no state institution can be achieved; however, this goal will be brought closer come if the right to issue notes is released than if one monopolize it. Sooner or later, freedom of issue of bearer securities of all kinds can be expected with certainty and one could not establish the principle that a single type of bearer securities, the banknotes, should remain excluded from this freedom. The Competition is of no small importance in all branches of business Value, one should not restrict it when it comes to the emission of notes It cannot be denied that many of the existing private note banks have paused in proceedings which cannot be defended. This was, however, largely due to the faulty Prussian banking legislation. The restrictions existing in Prussia would have led to central banks being established in places where the same had no favorable soil, while they might have had greater successes and worked in a better way within the Prussian state Not all private banks are accused of merely were brought into being by the pursuit of agiotage. From the Frankfurter Bank is widely acknowledged that its management is a is absolutely exemplary and that it is the need in its circles of the public just as the Prussian bank satisfied its own. In all the southern German states, in powerful and irresistible The trend towards the establishment of central banks has become apparent. The period in which banks were founded solely for the sake of premiums, has now been overcome, and it is not to be assumed that such a re- would return.

If a speaker mentions the support given by individual private banks (namely before the introduction of the German Commercial Code) incorrectly drawn up should be noted that such formal errors are basically do not belong here. Because in no case, what matters here, the values determined for note coverage were given too high and thus caused deception in the audience, which accepted the notes in payment. The shareholders have probably not yet fully understood the losses that were identifiable and which were of interest to them alone, in any case, very well known. In general, however, losses which individual banks have suffered at times, do not entitle them to demand from solid banks and to speak of poorly founded grades. Not a single German piece of paper bank has ever been "unsound" – unless one has business losses that no trader, not even the Prussian bank, be spared, as a sign of insolidarity. The notes no private bank is weaker, but on the contrary all are significantly better founded than those of the Prussian bank. And especially the smallest

166

Furthermore, the public, like the bankers, have learned a lot in the last 15 years. During the time of the so-called bank fraud in 1865, the depository site traffic understood almost nothing. Since that time, the public learned to deposit his money in the banks, and the banks would have

It is important to give the development of deposit traffic a to devote special care. It is not possible in the system of banking freedom to fear that undue importance would be placed on the banknote business

It should be taken into account that the introduction of the gold-currency. Hand in hand with this, the regulation

that no paper currency in an amount less than about 20–25 thalers may be spent. Such larger appointments

but would not pose nearly as much of a risk to traffic safety as the notes of 1–5 thalers that are still widely circulating. One must also take into account the existing legal relationships. Because of the once licensed private note banks are not possible to have complete freedom and to limit the issuing of banknotes in Germany to one bank.

Of the existing private note banks, some of the less solid concessions for a very long time, while the concessions of the Prussian private banks, which can largely be described as solid shall be fan ftabulated immediately. The proclamation of the principle of grades= unity will therefore have the undesirable result that of the existing

Private note banks, a part of the better ones are forced to dissolve, while some of the less solid ones can continue to exist unhindered.

It is not the task of the Prussian bank to provide the smaller banks with

If the Prussian bank were to receive its

own notes, this is merely the inevitable consequence

from the fact that they issued these notes; from the obligation to issue their notes to redeem, it could not dispense any more than any other banking institution

In addition, the Prussian bank had the smaller note=

banks have absolutely no obligation. They should not

get used to seeing themselves as small children who, in times

of distress and crisis to the state, to the central bank protection and help search. N

The relationship is in fact quite different. The private notes banks all know that the large institute offers them nothing less than a loving mother and helper in times of need. The Prussian bank discounted 3. B. no bill of exchange of more than 14 days, which contains the indorsement of a Private Note Bank; and if in its dispositions it exceeds the sum of circulating private banknotes, this is only done in the same sense in which they also describe other general relationships, 3. B. the state of exchange rates, the trade balance, harvest results, etc. must be taken into account. Private banks find it most convenient and comfortable filed, their, in each individual case, vanishingly small metal needs to be taken from the large reservoir in which the natural cycles accumulate the largest amount of cash.

167

and wildest banks are usually the strongest in this respect, because the nature of their business operations does not allow them to choose their investment moral obligations towards a loyal clientele. Everything that in this respect the so-called "robber state banks" are now accused, is based on traditional prejudices.

Due to the general usability of its notes, the Prussian Bank the superfluous in the trade, including the private banks in metal money put into circulation; what is more natural than that the private banks get it back from her! That the Prussian bank exchanged this metal for delivers her notes, one certainly cannot even with a note of Justification as support granted to private banks. This ratio can be achieved by combining the notes emission, whereby a, just as now only the Prussian, everywhere usable note is created, as well as by introducing the gold currency, which facilitated a more lively circulation of metal money, especially in the This is the case when foreign gold coins are imported into our country without Re-coining can circulate, undergo a significant change.

Contrary to the historical examples given, suppose that the crises which affected England and America also found any other interpretation than that there the system of notes freedom created a great danger. Thus, in relation to England, It has been shown that it was not the private banks that made the first major It has caused shocks, but rather the main banks are the ones who most and most frequently affected by these shocks. America can be said that the many crises that have hit the country come, had their causes least in the circulation of notes, that there are far more other causes that have a stronger impact on the excitement of dizzy On the one hand, the small size of the capital of American banks is mainly due to measured that many of them walked on unsound paths. In regard to

France pointed out that in 1848 the central bank, immediately the provincial banks, were unable to redeem their notes. If one draws on the experience of banking in other countries, Scotland and Switzerland should not be overlooked either. In Switzerland, there is fairly free competition; a number of central banks have been formed and banking freedom has led to the results has led to the fact that the circulation of banknotes has decreased from year to year and has become superfluous. It can therefore be assumed that, even if in Germany was allowed to establish a larger number of central banks would make the public more selective in accepting paper means of payment than before, and that it would be up to the individual to decide would reject such papers that do not suit him. It should not be said that the conditions of Scotland and Switzerland can be easily transferred to Germany. The freedom to write music will be made easier there, however, by the smaller circle on which

168

the circulation is limited, and in which a knowledge of the individual personalities prevail to a greater extent than with us. In any case, but these examples, that the system of note unity is not the only one, which can lead to prosperous credit relationships. It is also important to draw attention to the payment suspensions that have occurred in many countries, in Austria, France, England at the monopolized bank. Against this latter argument, the minority replied that the payment suspensions at the local banks were only symptomatic of the distressed situation of the state, and that, for example, in Austria, if it had not had its banks, other means would have been found to harm the state. It also made a Member of the minority pointed out that the Bank of the North German Federation, on whose maintenance the Assembly is unanimous, in will need more capital in the future than before. It is not increase that someone will be found who will provide the necessary capital if the bank is faced with competition from foreign institutions that are seeking love could form anew. The minority considered it Furthermore, it is questionable that two or more banks are located in the same place. It is possible that a person in need of credit can apply to any of these banks obtain credit and one lender does not receive anything from the other. Examples of this kind have recently been found on a larger scale in a Prussian city. The majority opposed this. held that this argument proves too much. Be it at all important, it also speaks against the competition of the deposit banks, because even with these it can happen that in one city two banks grant credit to one and the same person without asking the other know.

The grade unit desired by the minority, if one can agree with it, does not want to associate the concept of a monopoly, some things for themselves. In the sense of creating a monopoly for the Prussian bank, it could but even in principle it cannot be established as a goal to be pursued,

because it would be a mistake from the outset to set an unattainable goal. It might be possible to prevent the emergence of new note banks, but the existing ones must be taken into account in any case. If you put them on the "extinction budget", then you are hitting the mark rule, which only takes effect after two to three generations; if one wants their rights, then sacrifices must be made, which, in addition to everything proportionate to the conceivable benefit; if one wants to harass them their business practice to renounce, then one violates in undignified existing private rights, which is certainly no one's intention. Only the external unity: Anification of the banknote issue, whereby the banks without sacrifice to anyone, be adequately compensated for that, what they should give up, and at the same time among the very best, namely the opposite fideal control. In this sense, the principle of

169

Note unity is acceptable, but at the same time the freedom to establish new Note banks are completely harmless – and both are compatible. Finally, the above-mentioned resolution was adopted. voted for:

Becker, Benndorf, Fromberg, Hinsberg, Kämmerer, Ladenburg, Meyer, Mosle, Müller, Samter, Schottler, Seiffert, Spiegeler, Stephan, Steiner, Zuckfschwerdt,

On the other hand, those who voted for the grade unit were: Bamberger, Conrad, v. Dechend, Delbrück, Friedländer, Mendelssohn, Stengel, Warsaw, Wesenfeld, Witte).

Fourth:

For the establishment of central banks, there should not be a require a special concession.

1) The attitude of the banks in 1870 was subsequently reported by two members. Comments were submitted, the tendencies of which differed widely from each other. From one It is noted: "The Bank of France, which for years by its coloffal cash= stock, seven days after the first defeat of the French weapons stopped her cash payments. She was barely 100% covered for her total obligations (end of July 2285 million cash, bills of exchange and Lombard against 2287 mil Notes and deposits) too weak at the moment when the state has not even was really able, but only had the prospect of coming to the case, own Requirements to replace the usual protection. The Prussian Bank was not stronger. At the same time, it also had around 233 million obligations only 238 million, i.e. 102% of available funds. It also has not understood to evade services that are alien to their economic task were; that here the result was different is a fortunate circumstance, which obviously entirely different factors than the bank administration. The statements of the North German private note banks, on the other hand, yielded around 118 million at the end million obligations amounted to 171 million, i.e. 145% of the funds available. During the actual war panic a decrease in their total banknote circulation by about 4 million, while simultaneously increasing their cash reserves by about 8 million and the

nor their performance in bills of exchange, Lombard and loans by about 4½ million increased, not decreased, as is often claimed. They have with smaller means to satisfy the legitimate demands of their customers just as it did in Prussia has happened. Nowhere in the area of a private bank is there a solvent house in Verlegenheit, nowhere have the loan banks been significantly used and – most characteristically – they first stopped their activities in Bremen, Lübeck, Chemnitz, Leipzig, i.e. precisely in the most outstanding, outside the sphere of Prussian Bank in the federal territory." From another side, however, The following observation is made: "In July (in Prussia) the notes of the various various small German banks, sometimes completely unattainable, sometimes only with a discount of 3– 5%, whereas the notes of the Prussian bank at their value The distrust of the notes of the small banks only disappeared after the successes of the armies. Even in the defeated, financially shattered, From a France bleeding from a thousand wounds, the system of the note unit has become reliable proven, since one can only expect a temporary, hardly noticeable discount on the notes the French bank, whereas the French bank, which was not affected by the chaos of war, Switzerland, with its freedom to issue notes, fell into a hopeless situation, and a similar This would have been the case even more so in France, when, as before 1848, a number of note banks existed alongside the Bank of France, of which As is well known, the majority of them had to suspend their banknote redemption in 1848.

170

But if the principle of concession is adopted, is the licensing by means of legislation of the– to those through administration.

If one assumes that, in addition to the central bank, other banks should exist which have the right to issue banknotes, so they are entitled to do so either by way of normative conditions or on the basis of the special concession. If one decides in favour of the system of concessions, then in each individual If the supreme authority of the state decides on both the question of need and to check the trustworthiness of the entrepreneurs. This check can in turn be submitted either to the highest administrative authority, which is in the German Federation would be the Federal Council, or the legislative factors, in the North German Confederation, i.e. the Reichstag in conjunction with the Confederation rate. If, however, one decides for the system of Normative conditions or the regulative, so are by way of the Legislation has established once and for all the conditions under which Institutes can be formed which make the emission of notes their task It is then up to each individual to decide whether to use the facility or not, and the state has at most the task of exercising control over whether in the construction of such Banks and their management of the normative conditions The two systems of Concession and normative conditions could not be reconciled as was the case, for example, in the consultation of the Commercial Code was discussed with regard to the joint-stock companies; rather, one must choose one between the two.

For the system of normative conditions, it was argued that only the economic design can decide when, where, in what The extent to which central banks have to be formed. If anywhere, here is the state paternalism and decision on the question of needs, even if they are submitted to the legislative powers inadmissible. Task The purpose of legislation can only be to establish the norms once and for all, under which central banks may form, but not with the individual cases of their institution.

In contrast, it was argued that the system of concessions that it is hoped that in this way the number of note banks on a to the smallest possible extent. This hope increases when the authority to grant concessions should not be placed in the hands of the administrative authorities, but in those of the legislature. In Belgium and in Holland, for example, the legislative power also has the Power to establish private central banks, however, it is the legislature lative never thought of making use of this power. For this reason The reason for this was that those who spoke in favour of the licensing system who had previously declared themselves in principle in favour of the system of note unity. But even those who do not fully support the formation of private note banks=

171

ftantly exclude, nevertheless believed that it was a decision of the highest state authority is needed to create such an institute.

Anyone who wants to establish a central bank takes the credit of the Nation, and it is therefore entirely justified that the supreme Representatives of the nation should have their voice heard on whether they

Zuckschwerdt.

Possibly voted in favour of the concession being granted by the administrative authorities successes:

Bamberger, Conrad, v. Dechend, Friedländer, Mendelssohn, Meyer, Steiner, Stengel, Warsaw.

For the concession to be granted possibly through legislative successes, agreed:

Becker, Benndorf, Delbrück, Fromberg, Hinsberg, Kämmerer, Ladenburg, Mosle, Samter, Schottler, Seiffert, Spiegeler, Wesenfeld, Zuckerschwerdt.

The following abstained from voting on this question:

Müller, Stephan, Witte.

Fifth:

The establishment of issuing banks is to be carried out under internal compliance with the following normative conditions stand.

This sentence was adopted by 13 votes to 13. After both the system of note unity and the system of concessions was rejected on a case-by-case basis, it was essentially a necessity

172

to move on to the system of normative conditions. Meanwhile, various elements agreed on a negative vote, so that on this point, as mentioned, only a tie was reached was, and the voting ratio was as follows dimensions:

The following voted for the system of normative conditions:

Becker, Benndorf, Fromberg, Hinsberg, Kämmerer, Ladenburg, Mosle, Müller, Samter, Seiffert, Spiegeler, Steiner, Stephan.

The following people voted against this system:

Bamberger, Conrad, v. Dechend, Delbrück, Friedländer, Meyer, Mendelssohn, Schottler, Stengel, Warfauer, Wesenfeld, Witte, Zuckerschwerdt.

Regarding the individual normative conditions, the following was In general, it must be said that a dispute can be asserted made between those who wanted to apply the normative conditions as wanted to attach aggravating conditions, and those who wanted to On the part of the representatives of the principle of Bank unit was declared that, by using its basic view remained in the minority, she considered it her duty, to ensure that the new note banks that are to be formed remained as harmless as possible and that they did not shrink from the consequences were afraid to set up the normative conditions in such a way that the formation of new

issuing banks actually becomes impossible. On the other hand,
The reply was that the freedom to justify
central banks seriously, and that the normative conditions are such
to establish that a system of banking freedom actually exists. This

existing note banks, unless they are here and there taken over by corporations, such as
Municipalities, state estates, etc., as joint-stock companies
ftitutæd. In addition, the form of the stock corporation provides the only
Possibility of using a certain limited capital for a specific purpose
This view, however, was not popular with the majority.
Initially, individual voices spoke out in favour of limited partnerships
companies on shares from the right of note issue not necessarily

173

exclude. This form is a safe and reliable one. From another side
However, there was a great danger in allowing joint-stock companies or
limited partnerships founded on shares the right to issue notes
Neither in England nor in Scotland has there been any
a freedom existed, and especially in the last-mentioned country
consider solidarity as an indispensable complement to the bank
freedom. One should not remove all the barriers that have been drawn in other countries
the view that solidarity in England and
Scotland had degenerated into a mere form, and that if
an illimited society a crisis comes, only domestic servants and
that persons put forward turn out to be the owners is a completely erroneous one).
A member of the meeting mentioned that he himself-
had been involved in the bankruptcy of an illimited company and that he
as a result of the solidarity his money with interest from the first founders
the company has been reimbursed. In view of the fact that in
Scotland a bank issuing notes, at least six personal
Participants must have, a similar provision was requested here.
This proposal met with lively opposition, which was based on the following
Arguments supported:

The form of a general partnership with at least 6 partners

fe is a completely new one in Germany, occurring nowhere – and quite identical with the ban on the establishment of note banks. The business the limited edition of notes, waiving all and any kind of speculative operation is comparatively so unprofitable that no one with all his wealth and all his commercial Under this condition, not a single Central bank, and whoever wants to allow it at all, must also the way of capital association in the form of shares, which is customary in Germany or at most limited partnerships. In England, the Limited liability was not yet known when the banks were jointly and severally liable. The example is therefore not relevant for us. And the good experiences that have been made, especially in Scotland, with the systems there, it should be countered that the usual form has proved to be very effective. We do not replace the advantages of solidarity reaching the pinnacle of perfection through a number of other precautions: limitation of permitted businesses, restrictions, control, etc. One could argue about which of the two which is the better, but both combined constitute a prohibition.

Joint and several liability contradicts the principle of joint-stock companies, whose essence consists in the fact that individuals use a part of their wealth for common purposes, in contrast to the commercial companies in which the participants with their entire assets for a specific purpose. If one wants to give the joint-stock companies withhold the right to issue notes in order to prevent such transactions from the trading c

) Pgl. the period between 1915–31.

174

ties, so one comes logically to the point that each individual to grant the right to issue notes. There is not the slightest Reason, a certain number of people, so as proposed, 6 Persons, in community, to grant a right, and such to each individual to refuse them, especially since such a determination would be purely illusory, because even just one person who wants to issue notes will always have to pay 5 straws men find. The right to issue notes instead of stock companies to trading companies goes further in principle than previously is likely to be in the interests of the applicants and is in fact permissible. – If the personal responsibility associated with joint and several liability is missing in the joint-stock companies, and this lack from granting stock corporations the right to issue notes, should be pointed out that there are legal provisions against this precautions can be taken, and this is already done through the latest legislation with the release of the formation of joint-stock companies to a large extent happened – solidarity liability may prove beneficial in individual cases for the creditors have proven to be sustainable or even worth talking about It is not considered to be a barrier against misuse of the issue of notes This barrier, if it can be created at all, will only in the unconditional obligation to redeem the notes must.

Nevertheless, the normative condition stated above was
Adopted by 13 votes to 12.

A member then attempted to state that in the sense of this
flufffes a limited partnership with shares would be entitled to issue notes
to issue if it has six personally liable partners. But
This consequence was contradicted by others.

(b) A central bank shall have an initial capital of at least.
one million thalers and the amount of issued
Notes fhall not exceed the fully paid-up share capital=

Limiting the number to one million or half a million makes it impossible
to establish such institutes is downright illusory. It is necessary,
that when setting normative provisions, one should not pay attention
aimed at cutting off all and every abuse from the outset, because
This result will not affect the legislation for large or small banks

could ever achieve. The vote was to set a Maximum of one million thalers or less for the founding capital was rejected by 16 votes to 10. The Setting a minimum of three million thalers, with 5 votes for the view of the minority, and finally the above-mentioned Result achieved; that the note issue was limited to the amount of the founding capital. The reason for the limitation of the use of the product was that the latter is usually the measure for the extension of the natural sphere of influence of the bank hand over.

o) The smallest section shall not be less than ten thalers, after entry-introduction of the gold standard not less than twenty-five thalers.

This resolution was adopted in accordance with the written Expert opinions from a very large number of Chambers of Commerce and was The reason given is that payments in smaller amounts are very could probably be mediated by cash. A Additional proposal, according to which the amount to be paid in the smallest appointments issuing notes shall not exceed one tenth of the share capital.

d) Banknotes shall not have any priority in bankruptcy proceedings.

This proposal was accepted without further discussion as a matter of course.

unanimously accepted.

e) A part of the issued Notes should be paid in cash, the rest through discounts with at least two signatures, not longer than three Months run, be covered.

176

The question of third coverage will be discussed further below. The principle was established here that, as far as the coverage of Notes are not paid in cash, but only in bank bills of exchange. The already developed View that the note should be representative of good bank bills of exchange. The criteria of bankability, insofar as they are laid down in regulations at all fe can be determined, he was shown the presence of two signatures and found in a restriction of the orbital period to a maximum of 3 months. On the one hand, it was argued that in Bremen in general a fix monthly target is usual, and that setting a three-monthly Deadline for bank bills of exchange would significantly hinder trade. This However, this objection was refuted by the fact that the existing Banking institutions are in no way prevented from discounting bills of exchange that are than three months, but if these bills of exchange are used to cover notes

serve, this deadline must be observed. With regard to the Er= The requirement of two signatures emphasized that in fact However, even the Prussian bank occasionally issued bills of exchange with only one signature discounted that this does not comply with the existing regulations and any such operation is at the risk of the royalty funds of the the official who carries out the same.

As for Lombards, one speaker said that it was not understandable by what right Lombard transactions do not have the same ability to issue notes= cover, should be attributed as bills of exchange. At the same short expiry time and limited to good, easily realizable values, they offer at least the same security as the good bill of exchange; yes, they even have the advantage that they can be used without regard to the current solvency of the debtor can be realized at any time; and the underlying underlying business relationship is an economically justifiable one, as that from which the change arises. The possibility that through Lombardization the agiotage instead of legitimate trade under= supported, also affects the bill of exchange with the same right. And the extremely obvious way to dress Lombard transactions in the form of bills of exchange, on how weak a basis the adopted principle stands. – It is quite sufficient= come, the presence:

"good, easily realizable collateral with a reasonably short maturity" times"

As a sub-determination, the length of the expiry period be specified and further stipulated that bills of exchange must have two signatures and which collateral objects can generally be used to cover banknotes should be.

This is the corresponding provision in almost every bank statute, and it remains to be proven that they are too liberal. Meanwhile, Lombards are not recognized as sufficient cover, without prejudice to the understandable right of the bank to conduct Lombard transactions.

Perrot, Bismarck and the Jews. 12 177

) Note banks may only hold real estate for their own benefit= business needs, no mortgage funds, securities and purchase goods for their own account, neither land securities and mortgages, nor their shares or those of other Lending to private note banks, not granting blank credits, no bills of exchange with less than two signatures account, do not rediscount domestic bills of exchange, still have more than a month to run.

The meeting was guided by the desire to business operations of the note banks to exclude all such operations, which entail a greater risk or the soundness of the business operations are capable of impairing.

One member spoke out against these provisions as being too far-reaching, with the following motivation:

"If a bank which does not receive more than the amount of its effective capital issues notes, certain values for the full circulation sum has to be kept in stock, the security and redeemability of the notes; their entire capital is held as a reserve behind it and comes into consideration only in the second row; it is therefore not necessary to be as mobile at any time as the one for cashing notes certain active funds. One could safely, if not the whole, but left a significant part of that capital at their free disposal, if only all speculative transactions are absolutely excluded. Need to protect private banks in their, fraud by poorly founded To prevent efforts directed at grades as far as possible, has not yet been been proven! Why should the lending of paper bank shares (including shares!) is prohibited, and on the other hand, the shares of credit banks are p Why should the acquisition of a mortgage, for example, for greater security= position of discounted bills of exchange, as often happens, and on the other hand the Should discounting of the same bills of exchange be permitted without such security? Why should banks be prohibited from providing unquestionably secure To grant blank credits and thereby force such houses to In future cases, to "ride" bills of exchange, the value of which may only in the same signature? It cannot be denied that a moderate lending of own shares and those of other banks by This may possibly favour the stock market game, – that an excessive moderate exposure to mortgage collateral, thereby potentially wise a significant part of the funds is determined, – that finally a excessive granting of unsecured credits, thereby creating excessive Credit use is provoked, – that all such excesses the solid and mobile position of the bank. But completely Such operations cannot be avoided; and if they are banned, then nothing more is done than formal circumventions, as is the case everywhere= come where such regulations exist. – It is completely sufficient to have a to fix an appropriate limit, perhaps in the time that

178

In addition to the banknote cover, at least half of the capital in Cash, bills of exchange or Lombard must be available, and every speculative lation business on one's own account is prohibited.

The security remains much greater than that for the notes of the Prussian bank available!"

Despite these objections, the above restrictions, with adopted by a large majority, since a bank which complies with the above restrictions not wanting to subject himself to the restrictions, he would simply have to forego the iss must.

Only the last-mentioned provision led to a more lively discussion regarding rediscounting. A motion had been submitted, according to which a note bank may not rediscount domestic bills of exchange which has to last longer than ten days. However, this request was rejected as going too far. The general principle was thus firmly established that a paper bank may not trade with its giro, and that any rediscounting is reprehensible if it is carried out with the intention to exploit the Giro in this way. It was emphasized that some Private note banks have the practice of issuing bills of exchange with their Giro to throw themselves on the stock exchange and to protect themselves against higher Discount to create a business advantage. As completely harmless On the other hand, it means when a bank of notes is occasionally used in a single In this case, the situation of their business forces them to continue to sell long bill of exchange to get cash. Undoubtedly, it is impossible ensure through legal provisions that rediscounting is not business-like, but only on special occasions. Several voices speak out against a legal restriction. In order to prevent unsound trading with the Giro, it will be sufficient to stipulate that rediscounting may only be carried out on the orders of the Central Bank or that they are not carried out under the official discount rate. It is questionable to prohibit a bank from issuing its bills of exchange to be realized; it could thereby possibly be rendered incapable to redeem their notes. The term domestic bill of exchange an insufficiently determined one. If such a determination were to be made, ftitudinal wording of the same may even prohibit the acceptors to deliver the bill of exchange before maturity, less the discount. The majority found, however, in the determination as communicated above, a good means of rediscounting to a questionable or objectionable extent to put a stop to it.

g) Note banks may only offer interest-bearing deposits on accept at least two months' notice. If short dispositions are accepted, they are in terms of Coverage requirement equal to grades.

It was argued that the consequence of this

mood to also those institutions which deposits at take without issuing notes, to impose a similar restriction.

12* 179

Many banks have introduced the practice of paying out deposits on sight, and this facility has proven to be safe in various crises proven.

This motion was also accepted in view of the fact that In this way, the security of the business operations can be determined. A further proposal was that deposits should not exceed the amount of the share capital may be assumed. The same was

rejected because it was assumed that the maintenance of the deposit² business is an outstanding task of the bank.

h) In order to avoid bankruptcy, the bank must issue its notes immediately redeem for metal.

This request was considered self-evident and without any further justification adopted unanimously. Further proposals were not that note banks were set up at every location in the North German Confederation, where Notes issued by other banks within 24 hours of presentation, or perhaps that each bank has a deposit location in Berlin. However, these applications were rejected, as well as a mediation request that at least a redemption obligation in one of the three locations: Frankfurt, Leipzig or Berlin. It was described by one side as insufficient that the banknotes can only be redeemed where they are issued. If the cash supply a single bank is not sufficient to provide all redemption points To have the means, they must turn to the central bank and get money The proposal is feasible. Others, however, have objected disputed the feasibility because the notes were a means of circulation, which should only serve a certain circle. It is sufficient if the same be redeemed where they are issued, since every bank has a Interested in setting up as many redemption points as necessary for their business operations are necessary.

i) A provision to the effect that

the bank is obliged to also accept such forgeries of its to redeem notes which, when applying ordinary charges—

attention cannot be recognized as such, was eliminated by moving to the agenda. The meeting did not refuse to describe such a provision as appropriate, believed, however, that it could not be included in the normative provisions² It was argued in particular that the criterion according to which the obligation to pay compensation is too vague. A technical examination, as is required here, different people would behave very differently behave.

k) The status shall be published every month— consequences.

The need for regular publication of the status was considered self-evident by all sides and in many reports The Chambers of Commerce were particularly emphasized. Several parties have expressed their

Wish expressed that a weekly publication of the status as it was in the Prussian, English and French Banks were brought here. However, it was replied that these large banks to publish their status more frequently because they form the barometer from which the commercial public find out in what ratio the banknote circulation to cash. This is completely impossible for small banks. They have to while there is a lot of cash lying around, while at another time a large number of notes would be returned. From such facts, the audience cannot draw a conclusion, and the monthly publication is completely sufficient.

) The branches may not conduct any other business than the central offices.

A further proposal that private banks should not have branches was rejected because the banks were at least given the opportunity wanted to allow the establishment of branches to provide assistance where their help can be used. The applications were rejected, to add the following normative provisions:

m) Each central bank shall pay to the North German Federal Treasury the third part of the net profit, which is 5% of the share capital capital.

It was assumed that such a provision could not be included in the normative mood heard.

n) No private bank may be established at the seat of the Central Bank establish.

This provision was requested by analogy with the English. It was argued, however, that the German conditions are of a substantially different nature, and that central banks at the seat of Central office could be kept under far better control than those in remote small towns.

A subsequently submitted motion of the content, still the following Normative condition to add:

o) If one third of the share capital is recorded in the balance sheet as to be considered lost, the bank is obliged to liquidieren, i

was no longer up for discussion.

After the conclusion of the discussions on the normative conditions, The question is raised whether these normative conditions apply only to private note banks or even for the central bank. A No decision was taken in this regard because several

Members of the Commission who are prevented from attending due to other business and were not informed of the upcoming consultation,
Meanwhile, a member made the following statement to
It was stated in the minutes that it was not his intention to give the Prussian bank to grant any other privileges than those for which they

181

shipments from one place to another, where the money sent is needed, can be done free of charge. However, it has been
Pages, namely those who have a special interest in the Prussian bank interest, place particular emphasis on maintaining this
Privileges are not laid down.

Sixth:

There is a need for a standard for determining the
Ratio of cash reserves to banknote circulation.

The following gentlemen voted for this sentence:
Bamberger, Becker, Benndorf, Conrad, v. Dechend, Friedländer, Fromberg, Hinsberg, Kämmerer, Ladenburg, Mendelssohn, Meyer, Mosle, Stephan, Samter, Seiffert, Spiegeler, Stengel, Warfschauer, Wesenfeld, Witte, Zuckschwerdt.

The following voted against:

Delbrück, Müller, Schottler, Steiner.

The following considerations are linked to this sentence: One can the view that the banks and in particular the central bank special provisions on the amount of cover they hold in stock should not be made, as is the case in France, for example the case; or one can start from the view that a certain

ratio of the cover funds should be prescribed, and in doing so either to the current situation in Prussia, according to which the thirds= coverage is to be prescribed, or switch to such a facility as fit exists in England, according to which the sum of the notes to be issued without cover on a certain amount to be determined according to an arithmetic ratio contingent or finite, one can hold to the view that the The entire amount of the note should be covered by metal. By accepting the The above sentence excluded the two extremes. A member had indeed defended the view that it was theoretically justifiable that the issue of uncovered notes was not permitted at all, he had meanwhile decided to give practical consequences to this theoretical view not to give, acknowledging that such a provision the banknote business will only bring harm instead of benefit and therefore

182

would not be carried out by anyone. Likewise, those with= members of the minority, which generally has a certain relationship of did not want to prescribe the means of cover, but left everything to the free discretion to the bank administration. After accepting this The question therefore arose only whether one wanted to hold on to the systems of third coverage, or switch to the system of con= tingentization.

Seventh:

It was then decided by 22 votes to 4 that

a quota system should not be introduced.

A speaker tried to prove in a detailed lecture that for the For the prosperity of the country, a provision is essential that the Amount of uncovered notes to a certain yet to be determined Amount would have to be contingent. He declared that he would stick to the fight that in relation to means of payment the general principle is no It is valid that traffic expels what it does not need. The banknotes, which are guaranteed security, are available at every state treasury to be accepted in lieu of payment, are different from another paper means of payment, such as a bill of exchange. By providing the state with write that the note of the central bank is in payment at the state treasury may be given, he artificially creates an opportunity to give such a note and therefore prevent the note, when it is removed from circulation is no longer needed, is expelled. If the system of absolute banking freedom, such precautionary measures would prove to be superfluous, the greatest possible caution would then be of the public in the use and acceptance of banknotes; Until then, however, and especially under the present circumstances, the banknote is a preferred means of payment, which cannot be exchanged for money. love to be allowed to multiply. A banknote that has been given a high Faith is in a sense an instruction to the market, fe a permit to create new products before the

Consumption has created a gap in the stock. He therefore considers it for an irrefutable economic law that excessive emissions of banknotes first drives the metal money out of the country and then an artificial, unjustified increase in prices, which leads to crises must lead; he therefore considers it an imperative requirement of the public social welfare that the state should take precautions in this regard.

This view found lively support from various quarters.

Contradiction. It was stated that the system of Peel's Acts was in England felt was severely criticized, and only a few voices were raised for the maintenance of the same. It was in the year 1865 in the Prussian state House of Representatives, a motion for continuation was submitted by the Deputy Michaelis. gentling of banknotes. The same would, if it had been adopted, the most unspeakable abuses would have resulted At that time, Mr. Michaelis had set the quota figure at 60 million

183

lions. If this proposal had been passed at that time, At that time, crises occurred five different times. an incredible traffic jam, as soon as one sees that the Prussian Bank is approaching a state in which it can no longer do business In 1857, the Prussian bank had reached the limit of one-third coverage and have made the decision to strictly abide by the law As a result, it has exacerbated the crisis to the extreme. If they had the right at that time to complain about the restrictive regulations the one-third coverage, there would be no talk of a crisis Another side added that each contingent number bears the stamp of arbitrariness. How can one prove that 60 or 100 million is the correct sum, which exists uncovered may.

The possibility of unlimited circulation through notes without However, to support full metal coverage, it must be possible because An absolute limit for the need cannot be determined. On the On the other hand , we must also take into account the increasingly worrying increase in A limit must be drawn to the cult of music. If, as before, any real or perceived need for money through unconditional If we are to counteract this by increasing the issuance of banknotes, then we are always fhort to the paper currency, which now everyone except us and England The Peel Bank Act, in addition to its shortcomings, also have advantages that are to be recognized and the system can also be applied to We can apply this to ourselves if we only add as a rule what in England is merely exceptionally, namely the provision that an exceedance the quota number under the condition of a discount increase fshould be. With such a determination, production and speculation warned at the moment when the circulation approaches that limit and extensive, sustainable aid is nevertheless not ruled out.

The Prussian bank, for example, would have made such a provision as early as June

v. J. forced to increase the discount, warned the stock exchanges in good time and have eased, while now within 4 days it has jumped from 4 to 8% had to be, which exacerbated the war panic at the moment have.

The following voted in favour of setting a quota:
Kämmerer, Meyer, Schottler.

Eighth:

After, as mentioned, the system of quotas was rejected
The Assembly decided by 22 votes to 4,

that to cover the notes at least a third of the
circulating sum must be present in cash
fole. N

It was recognized by all sides that the third coverage as a principle
has its major shortcomings; proof that the bank is in a position to
The issue of notes could not be embarrassed if it received the third

Ninth.

During the debate, a member of the assembly said more= It has been emphasized that, in our opinion, the regulation a one-third coverage is not required, but rather the right to issue notes= ties, can only be related to the share capital of the bank. If one adheres to the principle he defends that it is Establishment of a note bank requires a minimum amount of 3 million, fuch would give banks the freedom to issue banknotes and deposit fites up to three times their share capital, without concern to have to, that thereby a careless or excessive circulation of notes would be promoted, provided that it is established by law that all in the Northern Confede issued notes can be exchanged at all other German central bank cash desks It was especially pointed out that the Prussian private banks would thus achieve a prosperous development, which

185

they had been stunted by the normative provisions at that time. It was taken for granted that the banks, in order to meet their redemption obligation to maintain a corresponding cash balance, even without being legally obliged to do so. It was also pointed out that that the proposal does not only facilitate the issue of notes, but in several cases it limits the fact that in critical times the The position of the central banks is more favourable, so that restrictions such as 1857 had to be applied by the Prussian bank, only in order to comply with the third coverage requirement no longer fear. Since this principle had been repeatedly and vigorously defended, fo it was finally put up for discussion. It was others have emphatically emphasized that science has in our proved in a refutable manner that there is a difference between the amount of the note iss and the amount of the share capital there is no internal connection. The share capital merely has the significance of a guarantee capital, and the raising of such guaranteed capital does not in itself constitute a right to increase the circulation of paper currency. For This view was supported by the following 16 votes: Bamberger, Becker, v. Dechend, Delbrück, Friedländer, Fromberg, Kämmerer, Ladenburg, Mendelssohn, Samter, Schöttler, Spiegeler, Steiner, Müller, Stephan;

the following two:

Hinsberg and Zuckfschwerdt.

while the rest abstained from voting.

Vote by Mr. Heinrich Kämmerer in Hamburg.

It can be assumed that most members of the
May in Berlin, the German Trade Commission=
day, concerning banking legislation, without a feeling of satisfaction
have gone together. The decisions taken seem in their entirety
not having met the wishes of any of the existing parties.
This unsatisfactory result may be due to the fact that
one had failed to first have a comprehensive discussion about the theory
of the banking sector before moving on to discussing the reform
of the current banking situation. The meeting was not
The task of improving the current structure of Prussian banking institutions
the rest of Germany, but first of all it had to
examine what kind of banking legislation is appropriate from the current point of view
recognized by science and experience as contemporary and normal

Negotiations of our commission partly ignored, partly hushed up
while they were notoriously influenced by many of the first economic
writers, as well as in numerous practical circles involved
be represented.

First of all, it is our wish to dispel the widely held idea that
any state bank or privileged credit bank, including the Prussian
Bank, as a kind of almighty providence hovering over the money market
and can be considered to dominate it.

The enormous upswing in domestic and international business=
exchange no longer allows dictatorship. State banks and privileged
Banks are not able to anticipate and paralyze the effects

fieren, which the traffic running alongside them and competing with them
The money market is no longer controlled by a central institution, be it
no matter how powerful, to control; through arbitrary interventions, such as, for example,
maintaining the low discount and increasing the issue of banknotes,
However, temporary effects can be achieved, but
they are dangerous because the motives for such measures are not certain
Basis, and because the natural course of the money market is thereby
On the contrary, it is the task of such privileged notes=
banks, with the approach of difficult times and crises preferably
to take care of their own safety and thereby gain the trust
of the public, which by increasing the cash fund, not
but is achieved by increasing the number of notes issued.

The Prussian bank has also repeatedly made inroads since 1857.
measures were taken to facilitate the redemption of notes
to prevent as far as possible and thus to use the cash fund in an unusual way
The proof of this is that the course of the Prussian bank=
notes in Hamburg repeatedly 1 to 11/2%, below the rate for silver thalers
fell; nevertheless, very large quantities of Prussian banknotes were
Central Germany to Hamburg, but with considerable loss
Silver thalers. Those measures of the Prussian Bank can be
the currently prevailing system of the same as appropriate and correct
be kept, but they do not correspond to the next and most important
Task of a note bank, namely: the unconditional redemption of the
Notes. The question is whether measures of the above kind remain effective and possible
after the Prussian Bank had taken over all of Germany, including Frankfurt

187

a. M. and Hamburg and thus the remaining existing ones
permanent German money markets will have been brought to a standstill.

These have so far, in times when the exchange rate has led to a deduction
of precious metals abroad, the Prussian Bank as
protective arrester. Whether the current banknote system of the Prussian Bank
would be sustainable if in the future all international claims on
It is doubtful whether anyone will approach them directly with precious metals.
The first condition of a good currency is the irrefutable
Confidence that it is suitable for international traffic. As long as
under certain circumstances the purchase of coins or precious metals against bank=
notes can be made difficult, is due to a blossoming of the international
exchange business, and the effort to mediate London
in transatlantic exchange transactions to make it increasingly unnecessary,
remain unsuccessful.

The danger that in all critical times, and in those where the
Exchange rates cause a withdrawal of precious metals abroad, regardless of
usually large cash payments on submitted notes are necessary,
the central banks the ability to apply increased
to use resources and to call upon a position as a helper in need

can therefore not be considered legitimate. Banks without issuing paper and who do not have to provide cover for the latter are in difficult times in a much more favourable location and, since they are closer to the audience than privileged central banks, act more individually than the latter, which leads to Elimination of local panic has often proved to be extremely beneficial Trade and monetary crises cannot be avoided at all as long as the The tendency to conduct business on a scale that leads to is not proportionate to the strengths of the entrepreneurs. Experience has shown that even the largest and most powerful states or privileged banks have not been able to prevent repeated crises and that the existence of such institutes indirectly rather leads to by encouraging the emergence of free banks in the main squares of trade and other modes of transport. A majority of Banks with freer movement promotes the first important task of banking in general, namely the accumulation of currently idle capital and the lucrative use of the same. The system of the giro and deposit banks is indisputably the contemporary one; the same has in England, the United States of America and Hamburg has proven itself brilliantly and has increased the importance of the note-issuing banks completely outstripped. Their general distribution also across Germany will have the most favourable influence on the money market; if all companies, businessmen and private individuals who have significant cash-turnover, and therefore more or less large cash in their keep their own cash in stock, deposit it in a bank instead, fuch a colofal capital is placed in the hands of the German banks, and It will be achieved that a main cause of the occurring money-

188

clamps, namely the retention of the circulating medium, which, through the provision of the individual for later-occurring losses, obligations has been brought about so far.

The common feature between note banks and deposit banks is the task of collecting capital and making it usable; the The difference between the two is that the paper banks use the unnatural choose the alternative way to raise their capital by issuing notes, which are used to ftablishing the circulating cash circulation funds, while the deposit banks accumulate temporarily unused capital and simpler and faster operation of money turnover achieve significant savings in the need for circulation funds. The The advantage of the depository bank system is that it serves the purpose of banks in general, namely to accumulate capital and increase the turnover to facilitate, in a more rational manner and to a greater extent can achieve than the paper banks, and further in that in the In the former system, paper money can be avoided entirely or at least only needs to be delivered in a form which each concerns about it, namely in the form completely without well-founded grades, if there is any need for such at all

To further explain this topic, the permitted here
Space is not enough, but the ones presented are not new, but
Motives that have long been widely recognized are likely to be of further and
be subjected to more thorough examination than in the previous agreements
actions of our commission have been bestowed upon them.

This demand seems all the more justified as the
stitution of the Prussian Bank in its present form, only with increased
capital, as a central bank for all of Germany and with federal privileges
was requested by mistake. The praises which were expressed in our commission
the Prussian Bank, the sender supports from the whole
conviction, as far as it relates to the reliability, reality and prudence
the management and the management, but he does not hold
their system for a contemporary, nor even the creation of a private
central bank in line with Germany's economic interests
speaking. It is not necessary to provide evidence that the Prussian
Bank does not adhere to the system of deposit and giro banks, but its
Main task in the issue of banknotes and in the disfonto and
Lombard business. It is worth remembering that the Commission of
The most competent party has declared that the Prussian Bank in the

The desire is justified that the fundamental side of the banking question of a

189

be subjected to further discussion. However, there are other motives
for the same wish.

There currently exist in the non-Prussian part of the German
Federal Republic, and in particular at the main trading centres good bank=
facilities and independent changing places, which are based on a long-established
Prosperity. They show no need for a significant
Change in their institutions and in particular no demand for
a German privileged central bank. The necessary consequence of the
Establishing such a system would mean the concentration of the entire German
banking and exchange business at the domicile of the Bundesbank. If
as a result of the political unity that has been established and the expected
common currency in an unforced way through the natural course
the conditions the entire banking and exchange business is concentrated in Berlin
trier and the non-Prussian important places, such as Frankfurt a. M.
should lose their previous position, this would be a providence,
which the changing circumstances of time have imposed, and which thereby
Those affected would have to accept this. But in the non-Prussian
Federal places through state aid or privileges that are granted to one before=
granted to the central institutes, such a total transformation of the

Banking system through legislation, the suffering places a justified right to object to this. After the political unity of Germany was achieved through glorious successes, if the reasons for the event have been firmly established, the possible objection cannot be that in the interest of political unity efforts the greatest possible unification and centralization in every other area is necessary, without taking into account the economic side of such transformations. A pursuit of banking freedom can neither be considered politically dangerous nor be suspected of particularism. We want equal measure and equality of weight, same coin, same banking legislation but no privileges, no State intervention in the free development of economic conditions. Such would be the imposition of a state bank or a privileged Central bank for all of Germany. The fact that our fatherland, the diversity of places where science, art, industry and Trade has reached a particular peak, a large part of its culture and its prosperity is undeniable. The former political Disunity in some respects the explanation for the Germany peculiar decentralization in the areas of industrial and of intellectual activity, but one should not confuse the blossoming child with the unclean bath. It would be foolish to throw a great jewel to be forcibly taken from the nation because it was great in dark times growing.

It cannot be denied that in some circles in Germany a widespread acceptance of the views expressed here on banking as a result of a long-standing habit of using banknotes and paper money has not yet been introduced. People have thus become accustomed to the use

190

this means of payment, that one can prove its existence and unchanged Continuation is an unavoidable need. In addition, however, the The view is widespread that by issuing paper money and banknotes a major economic gain is achieved for the state concerned by acquiring interest-free capital almost free of charge. The proponents of this view are, however, very numerous, refuted so thoroughly by the most competent economists that the question on this matter can be considered as decided.

No one claims that government paper money or banknotes issue a capital is created, and therefore this point does not require Discussion.

Money in coins is not capital in any other sense, as any other object that has an exchange value, it is no more or less capital than any commodity and any alienable or useful possession. Not only the cash brings when used Interest, but also any other capital, rent, lease, wages, Writer's fees are the interest on capital invested in residential buildings, land, labor, and mental ability. The coined money

is used to mediate sales and also serves as a general Value measure. The amount of demand for circulating money depends on the national economic level of the country in question, the need increases with the growth of general prosperity and the progress of production. Since the cash and the resources required for its production Metals are nothing more than exchangeable goods, so with increasing If the money or metal in question needs to be obtained from a neighbor countries or the production of the same through mining is a self-evident executory consequence and occurs in the same way as the acquisition of all other goods required for the country's consumption. Trade guarantees the Satisfaction of a real need, since the latter is precisely announces that prices have reached the level required to to make import profitable. An increase in the demand for Money expresses itself in the increase of the interest rate and the rising value against other values, e.g. goods, funds and bills of exchange to foreign places which causes the latter to fall in price and thus suitable means of exchange in order to ensure profitable export to other countries against payment in precious metals. The money supply regulates itself, provided that natural development is allowed to take its course and is not restricted by interventions by higher authorities. Such a case of disruption lies in the Existence of government paper money and privileged banknotes, which are for are unusable for international traffic and whose circulation not always a given by the circumstances, but often on decisions of the state or the bank boards, which are not always ignorant and unable to meet the real needs of their own country and its relations with foreign countries. Money is therefore a very important and delicate factor in both large and small

191

Traffic, yes, one can hunt, apart from the ethical side of human life, the most important. It is now in all areas of economic society and state institutions, the aim prevails, to achieve the highest level of solidity and practicality, without fear for the resulting higher costs. From the point of view of the people From an economic point of view, there is nothing to prevent a large capital for the purpose of producing the best known circulating medium while enormously larger capitals are used for other transport means, such as railways, port buildings and steamships Although there are no coupons attached to the circulating money, through the services it provides to the current owner, the same works productive as other tools of transport. This admittedly is It is only a question of finance, namely the following:

Is it possible without danger to remove a significant part of the circulating coins made of precious metals through state and privileged banknotes to replace it, it is then so large that it exceeds the profit which would be derived from Saving of precious metal, to an infinite extent over: meets?

In deciding this question we should not stop at the well-ordered financial situation of our fatherland!), because the future is ours hidden and all love for the fatherland cannot hide the humble feeling that the future fate of the same is in the hands of Providence. The majority of the major nations in Europe and America suffer fever under the pressure of devalued paper money, it consists of Banknotes or government paper money. Should not the spoilage experiences of so many states a condemnation of the System of paper currency clearly before us? If also the views presented here on the economic significance the paper circulation may find general recognition, However, the objection is often raised that banknotes for circulation indispensable. However, it would be inadmissible to immediately pass a law which completely prohibits the issue and circulation of banknotes prohibited, on the other hand, it is undoubtedly advisable to keep the banknotes, or at least the not fully founded, through a uniform banking legislation with transitional determinations and the resulting gradual modifications of the payment method dispensable. After the large-scale traffic through the general establishment of giro banks a payment system is carried out finely, as in London, New-York and Hamburg completely carried out, and started in Berlin by the Kasenverein, are Banknotes will no longer be necessary for large-scale transactions. For the money turnover with the domestic market, the emerging private banks in such a way that payments at other German locations are made by Bank transfers or a vista instructions (bank postal bills) can be made. If this route is burdened by a premium of 1/2 or 1/4%

1) Under the Prussian system a matter of course.

192

must, however, the postage which the banknote postage. The existing convenience for travelers to carry larger sums. Carrying money in banknotes can be done by the so common in England. Circular credit letters issued by banks against full payment and at the same time cover foreign countries, are completely replaced. Small-scale transactions do not require banknotes; in the non-Prussian North-Germany, the habituation to them is still little noticeable, but often a strong aversion. People prefer to use silver and gold pieces to carry with you, as often dirty and torn pieces of paper, and One encounters a reserved, half-ashamed feeling when one pays the price in paper for services rendered or items purchased. No matter how unjustified such peculiarities of the people may seem may, they nevertheless speak against the necessity of paper money in small sections. In England there are no notes from the English bank less than 5 pounds sterling, in France not less than 50 francs, until recently not less than 100 francs. Except in Germany, small paper money circulates almost only in bankrupt states. After the expected introduction of the Gold standard will eliminate any reason for retaining small banknotes be eliminated.

Should the complete abandonment of banknotes nevertheless be deemed unfeasible held, the new banking legislation would allow the issue to allow fully cash-funded banknotes. However, there would have to be no privilege legium, but to all banks which are subject to the law of the German commercial legislation, be granted the authority to issue such notes under the strictest control. Mainly the to legally oblige banks using the service to open a separate account and to keep a separate cash box for the banknote business and at the courts entitled to a general lien on all the holdings of these Cash, which therefore always corresponds to the full amount of banknotes in circulation, in favour of the holders of notes of their issue. Even The banks will only understandably be able to cover the Expenses and some profit to such an institution This coverage can be achieved by a small premium, which the borrowers pay. Since notes of this type are mainly used for payment mediation at neighboring places, they are one small premium, because either postage or bank transport costs Such a facility would have the great advantage It should be ensured that there are never more banknotes in circulation than the current needs, and that this does not interfere with the natural course of the money market. There can be no doubt that if the form and text are the same, the fully funded notes of a bank from any other bank which stands on the same legal ground as good payment would be accepted, and even if it were possible, to impose such a duty by law. Proposals of this kind prejudice the continued existence of the Prussian Bank, but the same

Perrot, Bismarck and the Jews. 13 193

would probably lose their privileges and the previous right the free issue of notes through active seizure of the deposit and Giro= fyftems, combined with other businesses, experienced a great boom also higher dividends would result from the elimination of state= However, the bank then needs a significant Increase in capital. The acquisition of the same will be an easy ft be, since investments in bank shares of a solid nature are very popular. The large surp drawing, which was made last spring when subscribing to a book in Berlin and two new banks built in Hamburg, provides evidence There can be no doubt that an issue of new shares even the amount of 100 million thalers will find the most willing takers The advantages that the solid foundation of the institute and the extensive branching of the existing branches, as well as the then enabled participation in the large negotiation business, guarantee the Prussian Bank the most favorable results in the future.

To facilitate the transitional phase, legislation could a date, such as a five-year one, must be set, until the expiry of which all German banks now authorized to issue banknotes will have their current Notes must have been redeemed in annual installments. If during this

period the long-standing habit of paper money has not been overcome, the proposed project of fully funded notes remains to be open.

Against the possible objection that the state for political reasons a continuation of publicly recognized paper money, because in the event of a catastrophe in the hands of Providence and complete exhaustion of funds, in issuing notes with Compulsory course is the only remedy against which, although perishable, Such an objection must be answered by saying that if such a If the intervention of a bank is not necessary, but the the State concerned can set the assignat press into operation itself.

In the event that neither the dispensability of banknotes nor the System of fully funded recognition should, if one is a bank want to have notes, to general banking freedom, as the only correct system that remains.

Opponents of banking freedom fear a flood of banknotes and a confusion due to the diversity of the same. The examples Switzerland and Scotland show, however, that the system prevailing there of central bank freedom under strict legislation no consequences of the be-fared kind, and there is probably nothing to explain why the effect similar institutions in Germany should be an opposite one. This system has the advantage that the height of the surrounding note amount is regulated exactly according to the real need and not according to the views of a central institute; also the harassment Due to differences in the grades, no shown, because the strict legislation, and in particular the prescribed

194

Regular publication of the bank status creates a level of trust and unification, which facilitates the circulation of different notes in all parts of the country. After the general implementation of the bank freedom, the real value of note circulation would become clearer it represent an increase in circulation, but rather a Restriction of the same is to be expected. This view is based on the Abolition of the privilege for individual institutes, which are protected by the same whose purpose and profit are mainly in the submission of their grades. This procedure will be continued after the Banking freedom is hampered by the emerging competition, and no more notes can be issued than the money market can bear. We have an excellent presentation of this subject in the 1867 works of the genius published in German in Paris and Leipzig Author JE Horn's "Bank Freedom".

A reference to this epoch-making and so far without successful The work of one of the first economists of our time, which has remained a refutation Time should be given to further discussion of the subject at this point

be preferable.

At the end of this presentation it might be appropriate to Summarize the result in the following short sentences:

No state bank, no privileged banks.

Gradual withdrawal of circulating banknotes and state= paper money.

General banking freedom for all under the law on joint-stock companies
foccupations of the comrades.

Permission to issue banknotes with full cash funding
under legally established control.

Vote of Mr. Hinsberg in Barmen.

In accordance with the decision of the Bank Commission, I take responsibility solution, some of the questions submitted to our consultation, in particular the question of banknote coverage will be discussed below.

On the last day of the Commission's meeting, it was time to short enough to discuss this subject in detail,
This circumstance is mostly to be attributed to the refusal of the vote fein.

My statement made in January 1870 at the request of the Handelstag view was the following:

"The principle of cash coverage in the ratio of one third of the issued notes does not appear to provide sufficient security for the note holder. Instead, it is to be standardized that, if the amount of notes and Deposits for immediate termination are twice or three times the one-time

13 * 195

paid responsible capital, this excess amount must always be available in cash."

It seems to me as if individual members of the commission (in agreement with the speaker, who in the compilation of the various reports, my proposal was qualified as the "most lax") have been of the opinion that this principle is an excessive and frivolous Note issue would require banks to pay three times the

amount of notes issued without holding a corresponding cash reserve, and would then be embarrassed in times of crisis.

Such an assessment of the sentence emerges, however, upon closer examination feconomy as not valid; however, the emission rights of individual banks would be expanded, while others would be restricted; the banks would However, not only do they have to keep the amounts in cash that are needed to increase the exceeding three times the share capital, but an additional cash reserve just as the Bank of England has done since 1844, and as it does now the banks working with one-third coverage always more like this third This extra cash reserve would increase the bank's power of action in critical times, which support trade and industry dustry, while the legally required cash (equivalent to the amount of notes and deposits which the exceeds three times the share capital) would normally suffice to To effect redemption of the returning notes.

While the interest of trade would be served by the If banks could provide energetic help in crises, the public would Moreover, have the reassuring certainty – without studying 30 bank= statutes, – that all note-issuing institutions must have the guarantee capital in a certain ratio to the maximum of the issued, not in metal covered notes.

It has not been disputed by anyone that the provisions in force ftituencies, which grant individual institutions unlimited note issuance= rightly assure, have their downsides.

For example, if the Bückeburger Bank has a cash reserve of 10 million lion thalers issued 30 million notes, so that 20 million without metal= æcal cover, while the bank would have 30 million current liabilities (a guaranteed capital of 2 million, of which $\frac{1}{4}$ million paid in cash, opposite), even the proponent of the view that “science has irrefutably demonstrated that there is a difference between the height of the share capital and the note issue there is no internal connection exist”, we must admit that this relationship leads to questionable consequences sequences; the note is not only about the question, whether it is immediately paid in cash, but whether it is fully redeemed at all; in The latter relationship is the ratio of the share capital to the quantity of notes of essential importance.

It seems to me that the science of the present question has not yet been definitively and unanimously decided;

admitted that several German economists have advocated the one-third coverage have expressed, the representatives of this principle abroad are very rare; in England in particular, where practical experience has long been have been collected, the third coverage has become just as unpopular as

in France.

The Peel Act presents England's view on the matter, as well as it existed 25 years ago; however, it has not lived up to expectations not complied with; the restrictive provisions on note issue have in several cases aggravated the crises, and the repeated necessary suspensions of the acts prove that in Redaction of the law placed too much emphasis on the quantity of notes without considering that the increase of English trade will require an increase in circulation funds in just 10 years and that the lack of these resources is particularly noticeable in crises must.

The history of the Peel Act proves irrefutably that the contingents, ie the limitation of the number of notes in a traffic area, for to be rejected for a longer period of time on a certain amount.

This obvious error in the Peels Act is, however, corrected by the principle is avoided; when applying it, it remains solely leaving it up to the market to absorb the quantities of notes it needs, to eject superfluous notes; if there is a need for increased traffic funds are used to establish new banks or to expand existing ones with strict provisions on the obligation to redeem immediately Banks in as many places in the empire as possible are afraid of floods assessment with grades is unfounded.

The view that was prevalent in the 1950s that business a central bank is a very lucrative one, one can issue notes of the West German Banks without a redemption point in the Eastern stamps and at the The idea that interest would be earned through slow returns has been proven false. The history of German banks over the last 15 years has sufficiently proved that a note only circulates where it is always in close proximity can be solved. f

On the other hand, my proposal follows the Peels Act closely in that it when determining the issue of notes, the uncovered notes are taken into account. The most correct judgment about the feasibility and practical value of the We gain a better understanding of the proposal when we imagine it applied in different moments and cases.

First of all, there is no need to prove that the English crises of 1857 and 1866 would not have been so dangerous if the bank had Issuance of unsecured notes in multiple amounts of the share capital would have been permitted, instead of the legally limited amount that the sufficiency of the share capital. The suspension of the Peel Act is nothing other than the granting of this right for a certain month ment.

The attached table provides information about the behaviour of the northern German note banks in the months of June and July of this year and about their performance according to the existing standards, compared with the performance capability if my suggestions are accepted.

All North German banks, insofar as they issue monthly statements public, with the exception of the Preußische Bank, had

end of June towards the end of July

Notes in circulation millions 74.3 m 70.5
with a deposit balance of 32.2 ah 47.5
the cash balance was – g 39.6 15 47.3
the changing status d 76.3 7 78.9
the total amount of notes issued and

Deposits amounted to ' 106.5 " 118.0

According to my principle, the maximum limit of the total note issue, including short-term deposits 225.09 million in June and 232.79 million in July. Without this limit, German industry would have significant help can be provided to get close to the with the existing one-third coverage, many of the banks are restricting their transactions had to.

In general, the table proves that a large part of the German Central banks from the partially unlimited issuance rights to which they are entitled right has made a very modest use of it; only in individual A significant circulation has developed in more important places. It can be concluded from this that in the future the Be– authority to extend the issue of notes may only be used by such institutions which would be involved in important commercial and industrial places, as was the case, for example, with the greater number of Prussian This is the case with private banks.

The following should be noted about the individual institutes:

The Prussian private banks have in the month of July ao continuously reduced their portfolio holdings, thus limiting their discount, while, working according to my proposal, each of them would have about 1 million for the discount traffic could have been more presen t.

The Frankfurt Bank, whose entire banknote quantity (and not in the sense my proposal, the uncovered amount) to three times the share capital, has also served well in this crisis and the change in stock significantly increased, although their forces were not greatly were suddenly able to handle the enormous traffic of the square on their own, when a major escrow house limited its operations.

The amount of banknotes issued during the crisis did not exceed the limit according to my suggestion was permissible. The establishment of a branch of the Reichsbank in Frankfurt, as well as an increase in the banking capital of the Frankfurter Bank, or the emission caused by it according to my principle

198

further notes, would be useful to the place, without affecting the solidity of the bank's operations.

According to my proposal, the Bremer Bank would stop issuing notes by about 9 million; the space would be less the
Lack of circulation funds in the case felt, and a
No one would fear a reduction in the solidity of the square
have.

The same can be said of the Leipzig Bank. The Saxon Bank, whose Note issuance is unlimited, would before the crisis, according to my proposal working, have had to limit their operations, while at the end July was below the limits required by my proposal.

The Prussian Bank, whose operations in 1856 and 1857 were within the Limits of my proposal would remain, but in 1870 it would exceed steps, as the table shows; this situation would, however, be
Difficulty could have been remedied by an increase in capital.

I leave out of consideration the institutes whose sphere of activity is a mixed and whose emission is of no significant importance.

If we now summarize the above, we recognize that my
The proposal can by no means be called "lax", since it restricts the emissions of several institutes, whereas it gives others more freedom the emission would be permitted and in a third category with the be fairly consistent with the current circumstances.

On the other hand, my proposal offers a significant advantage for all Banks, which stands out particularly in critical times and which I would like to thank I particularly recommend the attention of the Commission.

With third coverage, it is not only conceivable, but, in particular, at smaller banks, it is very easy that the cash reserves are reduced to an amount finds, the issued notes no longer represent this possibility imposes on the head of the central bank the duty in critical times, especially others to keep the cash balance intact and, if possible, to increase it. The resulting restrictive measures affect trade and industry all the harder because they need generous support, especially in critical times required, as was fully provided by the Prussian Bank in July 1870 was paid, but in 1857 it was not paid because of the third coverage However, no measure can protect an institute from the fact that one at a given moment his cash treasure through the reflux of notes

brought below $\frac{1}{2}$ of the circulation.

When assessing critical times, two cases must be distinguished:

Neither does the trust in the notes remain intact and it is only therefore, the larger circulation funds required by the circumstances to obtain, or all circumstances are called into question and it is urgent the mistrust in the existing conditions to convert the notes into cash

Both options can be used under the law of thirds=

coverage lead to the fact that there is no other way out than the violation of the law remains; trade and industry are then, however, through the previously applied

199

Restrictions have been damaged without any purpose. In my proposal

Every bank, like the English one, will always make sure that it has a spheres of influence and the legitimate

maintain a reserve of notes appropriate to the claims; if this falls below a certain wifen amount, the regulation is effected by increasing the discount,

The bank can, however, even in cases where its notes are rejected out of mistrust flowed back, proceed calmly with the redemption and at the same time the previous Discount operations in accordance with the receipts from the portfolio

continue; it remains under all circumstances within its

legal competence and has only one thing to consider, that it

does not reject any presented note; the cash reserve can be reduced to a minimum fink without restricting the bank's operations need.

To get a clear picture of the situation, we set the numbers

about the quantity of banknotes, cash, etc., concerning the Prussian bank, here;

The note reserve in the last line indicates the

according to my principle available amount in notes and cash.

. July 31st October 31st August 6th

During the crisis of 1857 the bank was subject to very strong restrictions
had to leave in order to receive the cash treasure, she would, according to my suggestion
working, the banknote reserve, instead of $11\frac{3}{4}$ million in December
1856 and $9\frac{1}{4}$ million in July 1857, respectively, to at least 20 million
lions and thus overcame the crisis without strong restrictions
have.

The reserve was increased in 1857 by increasing the capital of the bank by
3 4 4 million to be procured; by the same means the same generous
Support which the bank provided to the industry in the summer of 1870
made possible.

200

The bank would have had 40 million in capital and a cash balance of
89 million also in the mid-1870s to 210 million notes issued
The bank's position would be in the event of a strong re-
ftrômens of the notes would have been a less precarious one, if, in my opinion,
principles worked.

The return flow of 35 million for cash redemption could calmly
and without rushing to raise money abroad; the same
In the case of the presentation of 35 million banknotes, however, it brought
Third coverage to the limit of what is permitted and conditional restrictions on
strongest kind.

The fact that the notes did not flow back in 1870 is due to the success of our
Weapons, not thanks to the existing law on banknote coverage. This
However, I am convinced that we owe the restrictions on
1857; I cannot agree with the view that the dispositions of the
management of the bank, or even the increase of the bank capital, the restriction-
tions would have been necessary.

I believe I have proved above that the argument I represent
In principle, this would not facilitate the issue of notes, except
where such serve the common interest and in the most solid manner
would have been feasible; that the principle of restrictions for several
Institutes which, where desirable, however, by increasing

of the share capital can be raised; that when applying the principle the banks could do the same and more for trade and industry, as was the case in the crisis that has just ended; that in other moments the principle secures the position of the banks more and protects the public from unnecessary restrictions offers more guarantees, such as the principle of thirds cover.

A necessary condition for the application of the same is the obligation the banks to redeem their notes at as many places as possible. The Experiences of the last few months are too fresh in everyone's memory to be necessary seemed necessary to waste words on this point. The German trade demands and can demand that the evil of the wild notes an end be put to it.

I emphasize this point most strongly: The redeemability of the notes In many places, the most important condition for the reliability of a majority of banks; without this corrective measure, the proliferation of Banks, however, can lead to serious consequences, so that I Person would vote for the unity of the central bank if the redeemability should not be established by law in many places.

However, it is necessary to discuss the question of whether the legislative Factors of the German Empire are entitled to formerly be controlled by individual states granted concessions! The question should, however, be on the The banking sector can hardly be decided any differently than in the area of of railway construction, where the previously granted rights to individual companies rights were simply annulled in the interest of the whole.

201

For banks, it is all the more safe to do so in the overall interest of recognized necessary to implement by means of legislation, as it is such Banks that would no longer be able to issue notes under the new regulations want to spend, would be free to operate as credit banks in the future.

Should my above remarks reflect the majority view for left, the decision of the Commission would be that the amount the notes issued do not exceed the fully paid-up share capital should, fall by itself; however, it would – even if my proposal majority should not win – recommend that this limit be set only for those who are not to be backed by cash notes.

Should the provision remain in place as it is now drafted, so that the successful development of the German banking system is The same would also be made more difficult by the decision the joint and several liability of at least 7 bank participants, provided that the same execution takes place.

The form of the Joint Stock, which is completely uncommon in Germany banks would need a longer time before it would be naturalized. The

Experiences at central banks indicate a need for increased
Liability of the bank shareholders is not recognized at all. The decisions of the
Bank Commission, taking into account my above-mentioned motivated
Amendments would be summarized in the following law:

Article 1

Any share and share limited partnership is entitled to issue notes.
Company entitled whose business area is essentially based on the estimate
of bills of exchange, the granting of Lombard loans, as well as the acceptance
of deposits and whose share capital is at least 3 million
Taler are paid in cash.

Article 2

The central banks are particularly excluded from their sphere of influence
the purchase of real estate for purposes other than office use, the acquisition
of goods, shares, bonds, mortgages and other securities
for their own account, the acquisition and lending of their own shares,
the granting of credits in current accounts, the discount of bills of exchange
with less than two signatures, the discounting of bills of exchange,
which last longer than 1 month.

Article 3

Central banks may only issue notes of Tlr. 10 or denominations divisible by 10.
they must pay all amounts by which the total sum of the
notes and short deposits three times the paid-in share capital
exceeds, keep cash on hand at all times; the amount not covered by cash

202

of the notes issued must be in bills of exchange with at least two signatures,
which do not last longer than 3 months.

Among short deposits are those non-judicial deposits
understand, which can be withdrawn within one month.

Article 4

Each central bank is obliged to make available, upon request, its own
Cash notes immediately and also make arrangements to ensure that
their notes from all other central banks within the German
Reiches on request within 2 x 24 hours after presentation=

tation. Each central bank is obliged to issue the notes of each other bank in the German Reich, as soon as the necessary resources are made available to them.

Article 5

In case of non-compliance with any of the provisions of Articles 3 and 4, the Chancellor of the German Reich may liquidate the bank in question at the commercial court or the court competent for commercial matters of the district in which the relevant central bank has its head office~~=~~ has permission, and the courts are required to examine the application, and if they consider it justified, to declare liquidation and to appoint liquidators.

The relevant central bank has been informed of the Chancellor's proposal by Commercial courts and to provide written justification period of 14 days.

Article 6.

Each central bank pays to the treasury of the German Reich one third of the net income exceeding 5% of the share capital.

Article 7

All conflicting legal and statutory provisions are repealed by this law.

I have attempted to draft this law in order to make it easier for the public, which will have to judge the question, to provide an indication of the nature and ways in which the unity of legislation could be pursued, without hurting those involved too much.

I do not deny that it is not the task of the Bank Commission to make laws; on the other hand, the Reichstag may make a law in the form of a dressed report not unwillingly from the German trading day~~=~~ take.

The bill mentions a special status for the Prussian bank or the Reichsbank; a special provision is required it for the preservation of the institute, which has since been so beneficial for Prussia

and which has the vocation to spread its effectiveness throughout Germany to expand, in my opinion not.

The shareholders of the Preußische Bank will be happy to pay double amount of their previous participation in the Preußische Bank in shares the Reichsbank, provided that the management of the Prussian fche Bank. The dispute with the Prussian state is in payment of the capital and reserve shares of the same, and the facilities, stocks, etc. were transferred to the Reichsbank= can be conducted.

This then has the task of determining the monetary unit in Germany to initiate practically, by also operating in the area of 24 / Gulden= foot Taler= and Gulden bills are discounted and Taler notes are issued, such when redeemed and issued at a ratio of 7:4 against guilders calculating.

It would become apparent after a short period of time that the law in question would come the banking organization in Germany is as follows:

The Reichsbank with 40 to 50 million capital would be in all countries of the Empire in the more important places; besides it there were in the individual territories the Bavarian mortgages and bills of exchange= bank, the Badische Bank, the Sächsische Bank, the Bremer Bank, the Braunschweig Bank etc. The Prussian private banks would with larger capital a position similar to that of the aforementioned In= institute and the Frankfurt Bank and thereby the Prussian Provinces will enjoy the same advantages as the other countries of the In this way, the larger and the local need throughout the entire territory of the German Empire in the notes of all banks would be exchanged at all Places where notes are actually issued should be feasible.

Through this facility, which has actually existed for a long time between the Prussian main bank and Prussian provincial banks, whose Feasibility to a greater extent also in America and Scotland has been proven, the banknote amounts would soon become apparent, which by the banks domiciled in individual small states in their can be placed in a natural circulation area; undoubtedly some of these banks find that they are better off if they rely on the renounce the right to issue notes and to conduct exclusively credit banking business.

On the admission of notes into the coffers of the Reich or the The relevant tax authorities would have to decide, for example, with the measure= that only certain amounts of notes were kept in the state coffers are likely to be.

The public will have no trouble and losses with notes which are not to be attached at par; it is determined from the composition of the publications of the banks can see how strong the overall note= reserve, i.e. the power of action of the banks, and its operations accordingly as is the rule in England.

205

The German Reich will receive a share of the net profits of the central banks a significant income; after the Preußische Bank had
The feasibility of this provision has been proven for years and the Badische Bank has recently included it in its statute, there is probably no
Reason to let this taxable object go in order to
to seek compensation; the yield of this tax would be about 1 million per 1869 thalers.

28. The Bank Question)

by GD Augspurg,
Member of the Reichstag.
J.

Similar to the coin question, the banking question is also approaching the point where it is to be decided. Both are interests, which affect the well-being or suffering of each individual. If, nevertheless, and despite the thoroughness which is a trait of the German character applies to these questions, the vast majority of the population has a hardly credible ignorance and indifference, this explains
This phenomenon is only partly due to the fact that in the previous political breakdown Germany's crisis for the individual state the satisfactory solution such problems was extremely difficult, if not impossible, that one therefore considered it a waste of effort to even bother with them.
At the same time, however, Germany, which has experience in banking, As far as the child is concerned, it is still in childhood, so to speak, since it has not come to go through such crises as they are occurring in the countries of a widespread banking system until now as inevitable from time to time occurring consequence of the same?). But this circumstance would now have should also be a further incentive for the masses to learn about history and the To study the nature of such experiences as other peoples have had.

Such important interests of the common good are without question in the establishment of our schools too much above the learned studies neglected. A clear presentation of the main principles of economics

should be included in the teaching subjects of at least the upper classes of the gymnasiums?). It is by no means outside the scope of strength of young people and is of great importance, since only a few of to later engage with economics as a science

1) With the permission of the author, reprinted here from G. Hirth's "Annals etc."; the article was first published in the "Deutsches Handelsblatt". Perrot.

2, One must absolutely agree with the author's statements, because since then the banking question has acquired the same importance in Germany as in other countries, In Germany, too, the so-called "crises" have – perhaps even to an even greater extent – played a role. Especially the most recent times, the events from 1918 to the July 1931 (Danat Banks) provide the most apt example of this.

3) Still missing today.

206

Opportunity and therefore, if practical life is not directly points out, remain completely ignorant of it.

Much has been written about both questions, some good and Right, but even more wrong, and unfortunately those who are considered Wrong writing, keywords issued, the crowd fowing and to which it clings with the tenacity with which in the rule of those who allow themselves to think about an object want to avoid preconceived opinions, despite the fact that they have interpreted them in an incorrect sense.

Such keywords find the "universal coin agreement" and the "freedom of banking".

Just as the desire to immediately achieve a general monetary unification of the peoples to see come into life, prevented thousands from thinking about the special Needs of the much more immediate German monetary reform To think about it, the word "bank freedom" is also for many the term of a has become a good to be strived for, like freedom of nations, free trade, the free press and other forms of freedom to which they blindly adhere, without considering that there are many things in which the individual Freedom must be restricted if the interest of the whole should not be seriously damaged.

Does "banking freedom" mean the right of the individual or a company to establish banks or banking businesses for the purpose the collection of money and exchange transactions, the discounting of bills of exchange, the allocation of funds on mortgages or pledges, the Acceptance of deposits etc., in a word the mediation of credit for a larger or smaller part of the population, it would legally as well as economically wrong, such branches of business as any

which other legitimate branches of economic life have the least to put difficulties in the way. Complete freedom of movement is one of the main conditions of material well-being everywhere of the individual as well as of the population as a whole.

However, the concept of "bank freedom" is completely different from this, if This means the right to issue paper money, i.e. banknotes (promise to pay certain amounts of metal money) as a legally recognized means of exchange and payment in circulation to bet and make a profit.

The right to manufacture coined money (coinage) neither by its own officials nor by mint leaseholders under the supervision of the In all civilized nations, the authorities have always been the state governments The right, however, to use a surrogate for money, which The production of paper money is now left to the great Share the note banks. In the past, there was great abuse of the coin= shelves, the governments sought through official counterfeiting to exploit their subjects. But when they saw that both the Anter= tans like the foreign countries soon discovered the inferiority of the coins, that

207

As a result, the exchange value of the poorer coins is everywhere at its effective metal value fell, as the prices of all other economic goods increased to a corresponding extent, and that not only total traffic confusion in the country arose, but the governments felf were the worst, as they only got out once coins of the metals, but countless times as a result were in loss because the taxes were now continuously paid to them in the devalued Money was paid, with which they could not meet their needs in the previous stretching, – this abuse had to felffe on= hear and now the state everywhere ensures that the coinage of the metal= money is handled with strict observance of the law.

A distinction is made between metal and paper money. Only the former is real money, is an object of real value, of real legal validity. The term "paper money" is not correct, since The paper note has no real exchange value. Instead, it should are called "promises of money", although these promises of money, as long as they are in good credit, completely replace money in transactions and used as such, whether with benefit for the population, will be we continue to see.

However, the term "paper money" is generally used introduced, and it would be futile to insist on its abolition. One must confine oneself to returning them to their correct value= lead.

As is well known, there are two types of paper money, government paper money, Treasury bills or cash notes!), in which the state guarantees the payment of certain amount

1) The expressions "Schatzfein", "Kafenfschein" are completely incorrect, their derivation could be compared with that of lucus a non lucendo, since the coffers of the State would prove to be completely empty everywhere when it comes to redemption of a larger quantity of the issued payment promises, rather in the opposite. In such a case, only by law can a real capital be determined. But everyone who understands Latin knows that lucus contains darkness. On the other hand, the people do not know that for the large mass of cash notes everywhere there is emptiness in the state coffers, that in crises, such as an unfortunate war, an inevitable loss for the owners of the same. The Secretary of the Treasury of the United States the government paper money in a statement to Congress in 1869 "a dishonorable and contemptible circulation" means. The people are deceived by this and only realise this when they have already lost (late ift*). The Prussian cash notes were feverishly tried after the catastrophe of 1806. They devalued considerably, and many people lost their possessions. Their exchange value was at the end of June 1809 still at 36% of the nominal value, at the beginning of January 1812 at 831/0/, at the end of December 1812 to 44½%, at the end of June 1813 to 26/%%, on 8 July 1813 to 24½%, at the end of December 1813 to 49%, in January 1815 to 88%, January 1816 again to 99%. If the recent war against France had turned out unfortunate for us, we would like to use the 50 million thalers of German government paper money that are still in circulation.

*) See the experience with the red-stamped Reichsbank notes, which the German people had to do.

208

amounts to the presenter, and private paper money, banknotes or bank note in which the same promise is made by a bank.

Having long since become convinced of the reprehensibility of the procedure, Wanting to make a profit in the manufacture of metal money, Nevertheless, this purpose is still pursued everywhere when issuing the paper money, to pursue the promise of payment by opting for this promise to pay the same rent or interest as if one had actually used the metal money for this purpose lent, but the latter keeps it and adds it again to collect rent or interest from it.

So you win when you issue paper money or banknotes, by presenting these payment promises or debt documents of the country to the population and receive money or other capital in return but the loan thus obtained is for an indefinite period, i.e. for many years interest-free and used for management. However, the debt documents state that the money can be withdrawn at any time upon request to repay, but keeps it in his possession continuously, because the repayment

payment is not required.

This loan from the population to the state government (government bonds or money) or to the note banks (banknotes) but still finds itself under substantially different conditions. A certain number of banks or banking companies first have their shareholders pay the sum as their own capital, for which they will soon be paid by the country's population wants to claim the loan. It then operates with double Capital, both its own and that received as a loan, makes, in turn, Since it does not pay interest on the loan, it does good business and offers the country's population for their loan as additional security their own land or share capital.

whose redemption does not seem to be considered even now, despite the war reparations, The people could easily have suffered a loss of 30 to 40 million.

Although government paper money differs in many respects from private paper money only that the former is under all circumstances considered to be completely harmful and radical, both are nevertheless very similar in their general effects on the economic relations of the peoples. Both increase the means of exchange in an artificial way and thereby cause a partial devaluation of the precious metal; both are claims that they are beneficial to humanity and both have always only caused infinite damage. The inevitable consequence of a war of dubious Success is the decline in the exchange value of the state notes. If it increases after a ended war back to its previous position, – those who have their paper had to spend money that could not be kept in anticipation of better times, had to bear the heavy loss of devaluation and these are always the poorer popular classes, widows and orphans. The profit then goes to rich speculators, who acquire devalued paper at a ridiculous price and keep it until its value The responsibility for such plundering of the poorer But the popular class inevitably hits the state, hits the legislators, through whose negligence or ignorance such a "disgraceful and despicable" circulation medium was maintained, despite the fact that the means were available to issue paper money to redeem and eliminate it from the world forever.

Perrot, Bismarck and the Jews. 14 209

The situation is different with government paper money (which also often issued with a fixed exchange rate) and another category of Banks, of whose founding Northern Germany still has examples The state issuing paper money has no specific Capital to repay the loan, nor he has designated a special capital as security for it. He uses the loan received and leaves the repayment to the future. A Bank of this second category has only a relatively small own capital, which serves as security for the loan received It gets the loan from the population against its debt-documents, tries to manage them to the best of his ability and will also do good business in normal times, as it does not pay interest

make.

Both types of banks hold to the experience in ordinary times to satisfy a small part of their payment promises, which leads to Repayment is presented, a sum of money, usually after advance payment script the third part of the loan taken out in cash, in stock. The state also solves the small payment presented amounts of his debt documents to public treasuries. But both the state and the banks will give as soon as possible the redeemed promissory notes are issued again, i.e. they can be redeemed again from the population to make loans on it. A real repayment of the borrowed capital with the effect of such a The redemption and reissue of the promissory notes is merely pro forma and does not seem to have any other real purpose than to conceal the actual situation from the view of the crowd.

The population is in these circumstances in a strange state of economic immaturity. It is fraught with the paper slips, which documents their loan, as if they were money, is happy about the with such a means of circulation associated convenience like a child who is playing with a razor plays, about his smoothness, writes learned works about the advantages of credit economically, where one becomes rich simply through one's credit, without working, and praises her happiness in the newspapers when she comes with a new piece of paper bank has been blessed. She knows nothing about the fact that she is constantly lends enormous sums to individual privileged people without giving a single thaler To receive interest for exploiting them. She also knows little that the note banks have proved to be highly misleading in hundreds of cases. have proven to be rude machines; which metal, ie real capital consume and produce paper as a product that their general tendency is to protect the countries in which they are mainly used from an economic economic crisis to another.

According to the difference presented above, the existing banking systems into two main divisions,

those with secured capital, which therefore have a

210

double interest, on the one hand from the use of the larger part of their capital itself, on the other hand from the use of their promise of payment, and

those without secured capital, which initially pay the interest of their credit, i.e. from their issued payment promises, since their capital, as far as it exists, and in the absence of it, the third part of the amount of their payment promises, ie the amount of money paid to them by the population will be required, the so-called bank coverage with one third of cash reserves).

Those peoples who are most seriously affected by the calamities of the bank= crises, which, according to the usual expression, Experience "have become wise" (although their wisdom in this respect even now there is still much to be desired) the English and Americans, now adhere without exception to the first category of banking systems. We have three different systems there, the old Scottish system to on Sir Robert Peel's banking reform in 1844-45, the English (Peel's), according to which the Bank of England is administered, and the North American.

The Scottish system provided complete banking freedom and unlimited issuing of notes, but also unlimited, joint and several liability= ity of the shareholders with their entire assets for the Security of the notes issued and all other liabilities of the Bank. The shareholders thus deducted the interest on the one hand from their real Capital, depending on whether it was invested in one way or another, other= on the one hand from the means of payment put into circulation in the form of banknotes Only a certain amount that one has to pay to redeem the presented Keeping notes in cash did not bring in any interest. Security was it is good because the solidarity responsibility of the bank's managers with great proceeded with caution.

In the English system, the liability of the shareholder is limited owners on the amount of their shares (limited responsibility). Initially (in 1844) it was determined that the bank, whose actual share capital in a claim of 11 million Lftr. to the British State and further approximately 3 million government bonds of the consolidated debt, should be entitled to issue bank notes for this same amount. She therefore received double interest on this amount, as on the one hand the state paid interest on their claim, while on the other hand the public for 14 million liters of payment promise and, as if it were cash, also paid interest or discount thereon. In the claim against the The state was responsible for ensuring that the payment promises were properly fulfilled. The further provisions introduced by Sir Robert Peel were that

1) Mac Culloch says quite naively: "Those who issue such notes, coin as it were there credit". However, they turn their promises into coins and become rich. The rest of the population, however, has to work for this wealth and starve.

14* 211

a) the entire institution of the bank will be divided into two completely separate parts fould, with separate capital, special accounting, special officials and separate location, namely on the one hand the department for the issue of banknotes, on the other hand a second one for all other banks= shops;

b) that the bank should be legally authorized to issue a larger amount of payment promises or banknotes other than those issued by the Claims against the state guaranteed 14 million Lftr., but that should not make any profit from it, since the law prohibits her from obligation to pay for each pound sterling of notes issued over those 14 million Lftr. the same amount of precious metal in cash to keep in stock;

Sir Robert Peel's purpose was to control all the banknote traffic of the country in the Bank of England. But since this was impossible for the time being because a number of private banks in In previous years, the state granted the privilege of issuing banknotes for for a shorter or longer period of time and was not willing to give up to renounce, it was determined that gradually, as those privileges came to an end, the exclusive issuing of banknotes by the bank of England, and in this respect it was—
ft is true that the further issue of banknotes by the Bank of England will be limited to t third of the total amount that the then notes circulating in England from other banks, according to The extent to which they gradually experience the end of their entitlement According to Mac Culloch (Dictionary of commerce and commercial navigation. S. III.) were in England and Wales in 1846 199 Private and Joint Stock Banks are authorized to issue notes for total amount of 5011097 Eftr. to be spent. From the several times after the major banking crises reformed institution of these other banks we can foresee this here.

The North American system in its present form seeks the purpose To ensure the redemption of bank notes, please proceed as follows: it does not require concentration, but grants banking freedom to all Companies that want to set up paper banks also only require be— limited liability of shareholders for the amount of their shares, the law grants the authorization to issue notes only after the Be— involved in the hands of a specially designated state authority a sufficient capital, preferably in good government securities as pledge. For "/, of this deposited capital, at the daily rate rates, the bank in question may issue notes, but is at the same time obliged to always pay a third of the outstanding amount to redeem the notes presented. The North American Banks are therefore permitted, on the one hand, to use their own assets deposited as colla Capital in government securities to receive the interest which the be— countries pay on their contracted bonds, and furthermore

C

—

on the other hand, of $\frac{1}{2}$ of the issued note amount, the interest which the current traffic is permitted. The last third brings nothing because it is must be available in cash.

A fourth system, which I would like to call "the German one", although only a small minority of German banks have application, is, to my knowledge, most perfectly found in the Bremer Bank. In its statutes from 1856, § 74 states:

"The amount of notes to be issued may not at any time the amount of paid-in share capital including the reserve fund and must always be at least one third amount in cash or bullion equivalent to the circulating notes to be kept in stock in the bank for redemption."

Another very important provision is contained in § 16:

"Should the assets of the company be reduced by one-fourth of the share capital, the Board of Directors is obliged to take a decision the General Meeting on whether the business should be continued Should the assets increase to half of the share capital decrease, the company must be dissolved."

II.

All the above-mentioned banking systems grant shareholders a double interest profit. They receive their interest on the one hand from the actually existing capital, on the other hand from the issued payment promise, of which only that part of the cash capital, as no interest carrying, which must be kept ready in the box in order to to redeem future notes. At the same time, however, they strive to provide the holders their payment promises as complete security as possible for correct To allow redemption of the same by allowing the banks by law it is forbidden to put any promise of payment (a note) into circulation which are not covered by actually existing, already capital originally belonging to the property is covered. In the North American system, this capital must be deposited with the authority deposited, at the Bremer Bank it must be completely handed over to the bank administration be paid in. At the Bank of England it exists in the hands of the bank administration in the form of existing government bonds. The Scottish System (which is, however, practically only applicable to a limited area of the longest and perhaps the best proven) does not require a deposit in government bonds; but it demands security in solidarity and responsibility and almost exclusively in land ownership wealthy Men. A shareholder can only sell his share with the approval of the bank other wealthy people; otherwise, in the event of a fall, he the bank may also be considered liable at a later date. If a shareholder bankrupt with his private assets, then it is contractually agreed in advance with Approval of the law stipulated that he would refrain from any and all further exercise the rights of a shareholder of the bank must be waived, and that the further

Disposal of shares only with the consent of the directors can.

Completely deviating from all principles of these systems are the teachings of the newer French and German folk-economic school (e.g. Rentzsch, Dictionary of Popular Economics economics. Leipzig 1866. Article: "Banks and banking; banknote; Note banks" by A. Wagner). She claims:

1;

3.

There should be no special law or concession to justify a bank (including the bankers issuing banknotes), All and every monopoly and privilege should be abolished come (ie everyone should be allowed to strive to free themselves from the to provide the entire population with an interest-free loan by using the knowledge of the crowd in such questions);

the principle of limited liability of the partners is sufficient for

all types of banks. Basically, unlimited liability preferable, but it is not advisable to introduce them now; full observance of the principle of publicity in opportunities of the banks replace everything else. Monthly, weekly asset statements according to legally prescribed Forms, concealments, distortions in the strictest be punished by law. Annual accurate accounting and The responsibility of officials is self-evident;

the state should not concern itself with the capital of the bank or with the

extension of their music edition, nor finally by a certain ratio between this and the cash balance of the cash register, in short it should an unconditional and unrestricted issuing of notes may;

should certainly prescribe a material one, the backing of the banknotes=

of the law, the bank's regulations are recommended—
moderate coverage with one third of cash reserves, ie
i.e., if the bank only has $\frac{1}{3}$ cash and $\frac{2}{3}$, of the total amount of its
issued notes or promises of payment in bills of exchange or
other securities in stock, nothing further will be done by it
requested, it is authorized to issue unlimited
Promise of payment. Can the bank obtain the necessary credit
so that the public would accept their notes in payment,
it does not require any other business management purposes
capital. It “coins its credit” and extracts its profit from
the payment promises put into circulation by
for these promises received from the public the third
Part as “bank cover” for the redemption of existing notes
in cash, but the remaining two thirds are at your free disposal,
to earn interest. As long as she does good business,
everything goes well, but your losses exceed your profits,
every additional thaler is lost to the public, not to its shareholders,

insofar as they had not paid in their own capital, which the public
would have protected against loss. If the bank has to make payments
stop, the notes are worthless and there is general ruin.

The basic ideas from which the above view is based are

apparently the theoretically correct ones,

on the one hand, that the banks' own interests prompt their managers
correct economic principles in the operation of the business
to follow, e.g. never exceed their redemption capacity
to issue notes, otherwise they run the risk of ruining themselves
go;

on the other hand, that the public, the size of the population, in full
permanent publicity of banking relations, even better than the state
will be able to protect itself from fraudulent transactions.

Concerning the banks which are engaged in the operation of general banking
restrict business, these principles of freedom of movement can only
As far as the note banks are concerned, the whole process
ratio is changed by the fact that the bank's liability in the notes=
expenditure not on individual people, but on the mass of the population
and that an average of $\frac{9}{10}$ of this population
in protecting their interests in this case as a minor
must be seen and therefore require the care of the state if
not the former principle that the own interest of the bank owners
management of the business to an economically sound one until

is to be regarded as correct in its ultimate consequences.

However, the claim that the interests of bank owners and the public concerning the security of the notes, ie concerning the correct fulfillment of the payment promises are identical because both require proper economic management of the business requires is not enough; because

Firstly, it is obvious that not all conductors of extended ge= correctly calculate their forces, their strengths and the success of their operations; fotherwise there would not be so many failed ventures in the world, so many ruined speculators;

on the other hand, the temptation is very great to exceed the right measure

because without question the immediate consequence of excessive Note issue which is, the means of transport of the bank, the profit through mere issuing of payment promises, i.e. in lucky case, to achieve great success without cost;

Thirdly, the claim that every note issue is preceded by a demand

according to the notes, so a corresponding demand for traffic before— therefore, there could be talk of overspending, flooding

There is no question of banknotes (f. Rentzfch, Dictionary of the People= Wirtschaftslehre p. 92) is an absolutely erroneous one, because in all countries of the There are people in the world who are inclined to make up the missing capital through to acquire risky ventures, and the Board of Directors grants a bank during an apparently promising business period

215

some speculators, whether through carelessness or lack of Knowledge, more credit than they deserve, e.g. by discounting their Bills of exchange against bank notes, there is by no means a need for trade, but merely an unjustified speculation addiction of individuals individuals preceded;

Fourthly, the relationship is extremely unequal in that for the Bank owners have the possibility to demand a relatively to achieve considerable profit with little effort; for the population On the whole, however, in the fortunate case, there is simply no loss; while in the unfortunate case the bank owners, however, have to lose and the immediate managers of the bank may be the criminal justice system, but on the other hand a large number of people lose their possessions without ever even had the opportunity to benefit from the bank's banknote issues in any way= what benefit to derive.

The unspeakable misery which the unrestricted freedom of banking in England and North America has repeatedly brought upon the population, proves

better than all reasoning that such beautiful theories, if they even if they are presented ex cathedra, are built on sand.

The observance of the principle of publicity, the publication of Balance sheets, etc., on which the theory places such great emphasis, have by no means a great value in terms of business security. It can may well protect against the most serious abuses (7), but it will not every debt document, every existing bill of exchange listed individually and assessed according to its real value. Is it a deliberate deception on the part of the bank, it would not be difficult at all supply.

According to this theory, the founders of the bank need little or no not to have handed over any capital, they do not even need any real investment—may have; they have only understood how to fet themselves in a largely to provide credit to a public inexperienced in business matters, so that If you take their promises of payment and give money in return, their purpose is achieved first. That such a thing is possible, despite compliance with the condition that monthly or weekly asset statements are provided should be made public, prove hundreds of cases of English and American Canadian banks, where, when they declared themselves insolvent, hardly found any significant assets.

The distribution of the notes to the population is made easier by that the bank's interest in issuing as many notes as possible is with the interest of all those who are inclined to speculate to go beyond their actual strengths. To place their notes, the bank is less strict in the selection of people who make advances in notes than a capitalist would want, who would want fine cash= to borrow money, and those who can easily do so Those who have received advance payments will again ensure that the notes are housed.

216

As long as times are favorable, as long as the bank does good business, everything goes as desired. But if war, bad harvests, excessive excessive speculation, financial crises in other countries or as a result of any what other reason, mistrust instead of trust If the band performs, there should be a rush of the audience, which metal for fine notes, if the bank had already incurred business losses suffered, then suddenly everything can collapse.

But if the above liberal principles are to be applied, the State from all direct determination of capital, the issue of banknotes, etc. be kept away, then at least the principle of unlimited joint and several liability of all shareholders for their entire assets are to be recorded; the names of these Shareholders must always be publicly known and informed offered to sell their shares other than with the consent of the bank to pass into other hands; furthermore, the statutes—

ten of the bank stipulate in the most definite way that no thaler will be Promise of payment (notes) for the actually paid be issued beyond the shareholders' capital, and that if through unfortunate business a quarter of this capital lost, a general meeting should be called immediately should be convened to decide whether— whether to continue the business or whether to liquidate it feien.

Only in this way would the majority of the population, who are considered to be immature, to at least protect against the direct damage caused by bank insolvency. The indirectly arising from the existence of the notes in and of themselves However, it still has a disadvantage, as we will see.

The full liability of the shareholders should only be established in the second A series of calculations based on what would actually happen in the event of the bank's ir (which theoretically should be impossible in and of itself, because the Liquidation of the business would have to occur as soon as any significant part of the capital would be lost) – to cover the liabilities The next and economically much more important purpose would be exist that in case of unlimited liability, all shareholders have a significantly increased interest in organizing the Board of Directors in such a way fer and to place the management of the bank in such hands that it is not easy a deviation from sound principles in business management The condition that in case of loss of a quarter of the capital a general meeting of shareholders will be called to decide must, whether the business should be continued at all, would provide protection for themselves.

III.

That, generally speaking, the judgment of the crowd is not sufficient to protect them against loss due to insolvency of the note banks,

217

requires no proof. A characteristic feature of this type of immaturity is the striking ignorance and indifference with which such Questions in whose solution even the poorest person is more or less involved is, in general, by the general population outside the business world the ease with which they overcome all misery, all ruin ignored or forgotten, which has been represented for 150 years by paper money and banknote have come upon humanity.

The first banknotes were issued in North America, in the present state of Maffachu=fetts, issued around 1690, in 1694 the Bank of England was founded, where until then individual bankers, formerly goldsmiths, had run the business in be–

 Swedish Reichswchselbank sold before the middle of the previous
 century, all metal money left the country. Only since 1829 has there been
 such in Sweden.

) The inflation of 1919–1923 had its warning precursor here.

218

In England, the financial crises, mostly the result of the use of
 Note banks to generate profit, at regular intervals
 occurred, 1792–1793, 1814–1816, 1825–1826, 1837/1838, 1847, 1857,
 1866. Mac Culloch says: In 1793, 1814–1816 and 1825
 Until 1826 a very large proportion of the provincial banks stopped payments
 and produced by their fall an extent of bankruptcy and ruin that has
 seldom has been equalized in any other country. – – Such disasters were on
 the eve of again happening in 1837–1838 etc.

In North America, the Bank of North America (later Bank
 of the United States) granted the privilege of issuing banknotes;

In 1811 it was taken away from her, and in 1816 it was given again, after a number of private banks were established. The Bank of the United States had then in three years the country to the degree with grades exceeded and therefore advances and loans far beyond their capital made it so that in 1819 it was on the brink of ruin and, in order to not to declare bankruptcy, was forced to accept all the transactions that had been carried loans granted by the state suddenly with ruthless severity. She saved herself by doing so, but her debtors were bankrupt. General ruin spread throughout the country, a number of the most respected Trading houses, whose credits no one had doubted until then, collapsed, enormous quantities of goods were lost under half their previous price; in all major cities of the country Many thousands of workers were laid off and fell victim to hunger and misery. In 1828, there were States 544 banks, which issued on average 60% more banknotes, than its capital, while the Bank of the United States in 1832 their payment promises (notes) to 85% over their capital In 1837, the Bank of the United States suspended States made their payments and at the same time all other banks in the country was forced to take the same step, and from then until 1841 a period of general bankruptcy, misery and misery. Further Financial crises occurred in the United States in 1847 and 1857.

The financial crises caused by paper money in Austria 1810 and 1848 with their endless misfortune should remain in everyone's memory Even in a poorer and less speculative country In Spain, banknotes have played their role; in 1829, the Bank of San Carlos and killed thousands of people yours.

IV.

If Germany has largely been spared such experiences, on the one hand because his life in the political fragmentation was not was sufficiently developed to allow room for a great development of the fraudulent business, on the other hand also be recognized must be that in general the management of the existing German banks

219

a cautious and appropriate one, it is by no means much good from the special facilities of most German Note banks say.

If we ignore the question of whether the existence of note banks, which have the purpose of issuing notes and thereby make a profit, with the welfare of the entire state= population and only consider the questions

how the existing banks should be set up to
population all possible guarantees for the proper redemption of the
Notes also in the case of catastrophes such as unfortunate wars, bad harvests,
general trade crises, and furthermore
whether one – if note banks, which from the note issue a
make a profitable business, as a right to exist
should be viewed as such – as private banks have been licensed everywhere so far
or rather on the centralization of the German note banking system
as was done in England by the introduction of Peel's
banking policy has happened, –
future can not be denied that in the German institutions in a
In this respect, as in the other, there are major deficiencies.

What the security of redemption even among the most unfortunate public
As far as financial conditions are concerned, a large number of existing banks
with their institutions far from the principles of the first listed above
four systems away. There are banks that are legally entitled to
to issue any amount (without any restrictions) of banknotes,
without asking what the actual capital is
which must ensure their redemption in all cases; there are others,
whose paid-in capital shall amount to 200,000 Tlr., and which is legally
are entitled to issue notes for 1 million thalers, in other words
from the real capital at 4% 8000 thalers in legitimate interest to
and furthermore from promises of payment based on them
while maintaining bank coverage, an economically illegitimate
Interest of 26,000 thalers, i.e. 34,000 thalers from 200,000 thalers or 17%
annually! Although in our country in general the management of the banks
was a good one, it does not follow that it will remain so for all time.
will remain. The business practices that have occurred in recent decades
crises prove that even in Germany, under certain circumstances, one can
economic paths that we, like others,
Peoples are protected against excessive speculation and fraudulent transactions.
If, due to political circumstances, we have so far been denied space for
a great economic development was lacking, now fortunately
the barriers that hindered their course have fallen. But the more German
country is politically united and thus enabled to compete with other large
Peoples to compete in economic growth, the greater
the probability that the same risks will be encountered
like the others, and consequently it cannot possibly be approved,

220

if our legislation wants to despise the cliffs on which other
Nations have so often failed, to the ruin of hundreds of thousands.

Furthermore, without centralization of the banknote issue, those dangers of a
great development of business life must be significantly larger,
hardly requires any proof. It is a well-known fact that a state
where a country without significant metal circulation, where only paper

circulates, differs only slightly from economic ruin. Should therefore
If there is a circulation of notes at all, the total circulation
the means of exchange consist partly of cash and partly of banknotes
But then it is obvious that only one central office,
which is responsible for the entire music edition, can be in a position to
to maintain the correct relationship between both types of exchange
received that, as long as the right to issue bank notes is in the hands of a
Set of individual banks, each of which is a competitor of all other
is, since it is in their advantage to have as large a quantity of their bank as possible
to get the papers out to the people, it will be almost impossible to
beware that there is a constant danger of putting too much paper into circulation
and thereby displace metal money abroad.

The more centralized the issuing of banknotes is in a country, the
The economic conditions could be healthier in this respect.

V.

I now come to the fundamental question of whether it is in the interest
of the state that banknotes are issued with the purpose of achieving a
direct profit, and whether, if at all, bank
notes circulate, the issue will be left to the private industry
or should come from the state itself.

In England, the country where the paper banks have always played the greatest role
where, due to their facilities, in almost regular time-
periods of about 10 years, the whole business life through deep-
has been shaken by serious financial crises, and almost every time hundreds-
thousands of people have fallen into poverty,
just as in the United States, its rivals in such
experiences, avoided raising and examining such a question of principle.
fearch. Hence it is that in the writings of the well-known national
economists, Adam Smith, Ricardo, Mac Culloch, J. Stuart Mill., as well as
in Sir Robert Peel's speeches, despite many astute remarks
and practical remarks never look at the matter from the right point of view
They all take it without distinction
to,

because the use of precious metals as a means of exchange and payment creates two
Disadvantages, namely the constant wear and tear and the
Loss of coins, which Mac Culloch, for example, estimates at $\frac{1}{4}$ % annually

1) She despised them!

221

ftät (although he elsewhere as proof of the great uncertainty

according to the calculations, speaks of 1½%. (Dictionary p. 67 and p. 1054) and the considerable difficulty of sending gold as consequence of weight and volume;

because these problems are largely eliminated by using banknotes be avoided, and at the same time cost very little, finally

because those who, by virtue of their credit, can ensure that their promises of payment are accepted as real money and pay the same interest as if it were real money, – thereby increase your own income and at the same time contribute to to increase the prosperity of the entire population (ö),

fo the banknote system in general must remain in its current form be continued; it is only a matter of solving the problem, which Restrictions must be imposed on this type of industry by law, in order to avoid the financial crises that have been occurring periodically up to now, "to realize the 'beau ideal' of a paper currency without the wide-spread mischief and ruin produced by the often repeated bankruptcies of the country banks".

But that does not mean asking the questions in the right form. They should

rather, it should simply read as follows:

1. Can individual stock corporations claim a right to to issue banknotes in the usual way, which serve as circulation means for the entire population?
2. In the absence of such a right, can the State continue to allow the emission to continue as before without significantly to harm?
3. Is there another form of issuing notes that would be more advantageous would be recommended for the state, and what would this form be?

If the questions are posed in this way, their answers would be

in my opinion should take place in the following way:

1. The previous establishment of the note banks and their note issue basically means that the stock corporations concerned from the country's population a significant capital for indefinite A natural right to such Loans cannot be given. The majority of paper banks but has concessions and privileges from the state governments received. Whether and when they can be withdrawn, is a further question, the answer to which does not belong here.
2. To answer the second question, a detailed

Discussion, which we must therefore deal with first.

The benefits associated with the use of banknotes for society as a whole=
population of a state:

a) in the greatest ease of sending the paper compared to
precious metal,

222

b) in order to avoid the loss which the use of the
metal money for the state.

The disadvantages, however, are:

On the one hand, in the devaluation of the means of payment and baptism, which
alongside continuous production of precious metals, the increase of the same
is necessarily brought about by paper money;

on the other hand, in the increased fluctuations in the value of the national currency
and changes in the discount, as well as the constantly recurring money=
crises, which are an inevitable consequence of the previous use
of paper money (banknotes) with very extensive circulation
must.

As regards the first two points, they appear to be clear
everyone's eyes.

It is undoubtedly much easier and less expensive to make a significant
It is better to transport the same amount in banknotes than in gold, let alone
silver, however, upon closer inspection one must admit that the
The advantage of banknotes is not so exclusive that it can be considered
could be decisive for the question, because:

1. It is suitable for both small daily traffic and travel use,
– as soon as a country has the gold standard, – almost as easily and
It is less dangerous to have the necessary money in gold pieces with you
to carry than in paper, it is easier to lose a banknote, you leave
ft easier to steal a wallet with banknotes than the
Sum in gold, even counting the gold is not important here,
especially if one considers the greater security against accidents in
attack brings;

2. As far as small money transfers are concerned, the

Banknotes have not been used since the establishment of postal services
instructions have been met.

All banknotes up to 100 thalers appear completely unnecessary where there is sufficient gold circulation;

. for large traffic, Jo is good through the use of the exchange, the instructions and the clearing houses forries that the lack of banknotes hardly affects him would happen, especially if one considers, on the one hand, that as a rule, banknotes are only used for domestic traffic, and on the other hand that here too the danger of destruction and lorengehen is greater than with gold.

With regard to the loss associated with the wear and tear of gold and silver coins, and which, with extended use of the banknotes, is largely avoided, it cannot be denied that he really exists. But it may include the damage caused by fires and ships= sums lost annually to / or / % (Umpfenbach: Volks= economics p. 129; Xeller, International Monetary Unification p. 40; Mac Culloch, Dictionary of Comm. p. 67) or even a little higher

ca

223

ft beat finely, so this is in no case of sufficient importance to to be significant here.

This applies to the reasons given by English writers on the one hand, that in the case of destruction or disappearance of banknotes only the owner but not the entire population is harmed, on the other hand, that if the shareholders of the banks raise money by issuing banknotes thereby increasing the entire national wealth. If the profits they make come out of the pockets of the rest of the population and at the same time the use of banknotes for the entire population other significant disadvantages, yes, one will find such a increase in national wealth is hardly a serious concern, so that it is no more important than the first reason.

If we hereby all and fome the advantages of the banknote system have performed, one may, apart from the other side of the same, ask whether the world is less well off, whether trade and transport are less would flourish if there were no banknotes at all, if they were treated like Government paper money as something reprehensible, harmful to society as a whole similar to how public gambling is forever banned from the law chamber of abolished abuses? The part of traffic, where the notes might actually be missing, is the one small country towns (where there are no bankers) with larger towns for sending sums between 100 and 500 or 1000 thalers. Without considerable disadvantages, however, this need would be remedied by gold It is more a habit than a real need, which many

which makes banknotes appear as a useful means of transport.

If there were no serious disadvantages associated with the use of private paper money or bank notes, one could say of them:

on the one hand, that they are not directly or indirectly relevant to the overall interest considerable benefit that traffic does not need them, but could fulfil all his tasks without their help, but that

on the other hand, for the shareholders of the banks, however, a significant The means of enrichment is to allow them to Interest that they draw from their existing capital, even their promises of payment on this capital for the use to rent and thus one and the same capital in two directions to use or rent with a double interest rate or an even greater double capital gain, while half of their operating capital interest-free from the country's population was advanced;

that, if possible, this would facilitate traffic in to revitalize in an economically sound manner and finally- to increase the total national wealth, the use of banknotes should be approved like any other industry.

But let us now consider the costs associated with the issue of music Disadvantages, it will become apparent that these conditions are not

224

fulfill that a revitalization of traffic caused by them does not rest on an economically sound basis and that the final result is by no means a favorable one for the entire population of the state.

According to the above, the first significant disadvantage is the

Devaluation of the means of exchange and payment, i.e. both the Metal and paper money, which are characterized by their equal- continuous proliferation, on the one hand through the precious metal production, on the other hand through paper money issuance- fion is caused.

Money has, as is well known, a threefold character as a measure of value, exchange= and means of number. For all three functions, however, the continuity, the largest= possible immutability of its exchange value is a main requirement, finsofar as it can be achieved under human circumstances. The The fact that precious metals are more suitable than other valuables showed that maintaining a high level of value stability was already a the reasons which give them the determination, preferably as On the one hand, the difficult funding work of certain production values a significant and of one year

on the other hand, a fairly even one; on the other hand, their exchange value was protected against fluctuations by not causing them to such as grain, were consumed, that what was once extracted remained so that its quantity gradually increased, and that annually Added an ever smaller quantum in relation to the already existing, so from his side less and less of the influence exchange value and thereby cause actual fluctuations could, while on the other hand the continuously advancing Increase in the supply of precious metals, with which the need of People despite a growing population with increasing trade, could not keep pace with increasing craftsmanship and greater luxury, – caused a decrease in demand and this, as at the same time through better extraction methods and by facilitating transport the products= production costs also steadily decreased, a slowly progressive decline the exchange value of precious metals.

As is well known, there is metal and paper money. However, further up I have already mentioned that only the minted precious metal has full rights bears the name “money”, that it has its paper substitutes only can come to us in an inauthentic way, precisely because money as a measure of value is itself should be of as little changeable exchange value as possible, and this is determined by the fact that it is determined according to the production value of the e represents a considerable amount of human labour. An arbitrary without previous considerable work created exchange value can be of no existence because of the lightness of its further arbitrary creation.

Just as the monetary economy, compared to the former natural economy= society, a progress in economic development, is intended

Perrot, Bismarck and the Jews. 15 225

the same according to the teachings of modern economists with the credit economy as a perfection of the monetary economy. Against this However, there are very serious objections to this claim, and they I just want to be really fine in so far as one understands the credit economy as the simplification and facilitation of the monetary economy, but by no means if one considers their ever-increasing replacement by credit securities, through promises of money.

The defect of the natural economy is that it lacks a generally A valid measure of value, exchange and means of payment is missing. Such a thing can only in metal money and the credit economy also has nothing with which it can All their so-called “money surrogates” are nothing more than fpeak to precious metal, and if no real metal exists as cover stands behind them, they are nothing but vain appearance and deception, “moonshine”, as one hunts in English. Not only the measure of value and legal means of payment, but also the means of exchange must, in order not to be economical to bring about unhealthy conditions, a real one, only through strenuous valuable object to be produced by human labor, there must be existing precious

metal, not a mere promise of such that is never fulfilled. Only those credit securities can be issued which meet the two requirements conditions that, on the one hand, the promise contained in them contains no deception that the payment promised therein is in full sum and at the specified time, on the other hand that through their use does not seem to require a corresponding amount of human labour, but is actually saved, thus made usable for other purposes, and that this saving can only be achieved through them.

Both conditions are met neither by government paper money nor by the Banknotes. Immediate payment is promised in both. Wanted but at the same time the entire amount of the issued paper is Payment, it would appear that the required cash not present, that the promise cannot be strictly fulfilled; that furthermore, no real saving of human labour through this paper money The effect that is achieved has already been shown above.

From what has been said it follows that paper money is a special kind of If one looks at recent developments in the economic textbooks make the claim that all credit instruments in circulation, such as signed orders and bills of exchange, registered or bearer deposit slips, cheques, banknotes, redeemable government paper money, due coupons, stamps, etc. in principle not different from each other, but only formally and gradual in relation to their ability to replace money in circulation (Rentzsch, Dictionary of Economics, Art. "Credit" p. 201), I believe that I may actually describe this as a mistake.

The fundamental difference is that, while bills of exchange, instructions, Checks, coupons, etc. refer to capital, which must be available and is to be paid out in money, while sooner or later it will be paid

226

come and thus individually leave the scene, while the other only, so to speak, find means of transport to part of the existing capital with ease from one hand to the other, the measure to significantly reduce the work required for transport, – the Paper money and banknotes, on the contrary, are only for show draw on existing capital available for exchange (if over= at all, it is in any case intended for use other than their redemption) are in no way calculated to be to be paid individually and therefore not equal to those as a means of transport of capital, but rather as a means of production must be designated, determined, new previously not existing but to bring even fictitious capital into circulation and through this Juggling, whereby the human labour required for traffic is only in very little or not at all reduced, economically unhealthy To create conditions which must worsen to the extent that the creation of this merely imaginary capital, with which trade then

economics, is extended at will until a state bankruptcy or a bank crisis breaks out like a thunderstorm, to disrupt the economic to purify the air from the unhealthy elements and to remove the metal money to reinstate the rights which were contested by the paper.

If we understand capital as a given asset, which can be used for further production and it is

1. Capital of direct possession, namely:

a) usable land

b) natural products of every kind

c) Tools and machines fixed capital

d) by working with such-works brought

e) semi-liquid capital, credit securities which facilitate the transfer of fixed capital into liquid form, such as bills of exchange, instructions, coupons etc.,

1) liquid capital, cash or coined metal (but also paper money, as long as it exists);

2. Capital of indirect ownership, i.e.

Claims on solvent debtors Role in fixed capital belonging)

and define liquid capital as the form of ownership-tum, in which it is easily integrated into all the necessary for traffic parts, is accepted in payment by everyone, and therefore flows everywhere where an economic gap arises, it is clear the fundamental difference of the credit papers. Real exchange facilitation means those who make the transition from the fixed form of capital into the liquid, and which therefore rightly can be called semi-liquid They are a necessary tool for communication.

15* 227

traffic, while the credit securities, which already represent liquid capital, want to enter, are completely unnecessary for traffic.

The banknote as well as the treasury or cash certificate of the state However, the payment of the amount of money indicated thereon to the Both, however, are not in their entirety brought into the world sent to confirm the payment of this promised amount like a bill of exchange to really bring about the exchange of existing capital against to facilitate the existing capital, but on the contrary, to issuer of a payment in real money, to give him real capital in exchange for the fictitious In Rentzsch (Handwörterbuch Art. Banknotes p. 92) it says: "The profound difference in principle between the Paper money and all means of credit circulation, hence also the banknote,

lies in the two moments of irredeemability of paper money against other money and the compulsory exchange rate." In the effect on the economic conditions, this difference between paper money and banknote appears to be more an apparent than a real one; For even if the individual banknote, just as today, Paper money is redeemed upon presentation, – they are issued once a year In the ordinary course of things, the majority of them are not available for redemption= shown and are not intended for that purpose. Their purpose is constantly a capital that does not really exist, but is merely imagined in the Therefore, every banknote redeemed, every one The cash receipt presented for payment shall be put back into circulation as soon as possi Will one day, in the event of a threat of war or other catastrophe, all issued banknotes and cash vouchers presented for payment, So the money crisis is here. There is a lack of metal to redeem it.

From what has been said it follows that only metal money is suitable as value= measure, exchange and means of payment, because it alone has a real, in the production based on the human labour necessary for its promotion value and because the resulting continuity of its exchange value is a folute requirement for the exercise of those functions. It further follows that that all types of credit securities only have an economically correct can pursue a purpose other than that designed to facilitate monetary transactions, Exchange of an existing capital object for another also to simplify and facilitate existing ones, the work, but that they leave this right path as soon as they the determination received in addition to the real capital containing Metal money to create a permanent paper money, which has no pre= existing capital, is therefore worthless in and of itself and instead of one's own value constantly strives to introduce a fictitious capital into circulation to manage the land, which efforts always earlier or later end in national bankruptcies and financial crises. Finally, from the fact that, because value stability is such an important requirement of money is, any institution which gives this continuity of its value also to the metal=

228

money, reprehensible for economic reasons must seem, as long as there are no other even greater economic advantages, equal to the great saving of work when using the bills of exchange, instructions etc., are associated with it.

The account of the existing coined money on the one hand and the In addition, some of them are in cash, some are for industrial and commercial purposes. Precious metals related to luxury cannot be separated, nor can they be related on their stock as well as on their exchange value, because both are constantly in= flow together, because often all jewelry and other golden and silver equipment was melted down and coined, just like on the other Metal embossed on the side is reused for other processing.

The exchange value of precious metals must generally and in the long term

determined by the average production costs of the larger part which until the middle of this century was extracted from the mines of medium yield. This natural law that exchange value is determined by the production value, but is subject to and for itself in the case of precious metals a considerable modification by the general hazard-like character of the mining industry in the actually metal-rich areas of the globe, with hundreds of Mines, which cause temporary losses, nevertheless for a number of of years in anticipation of better returns, so long as other rich mines provide the owners with the means to do so. In the present case, there is also the fact that since the discovery the Californian and Australian gold deposits number in the thousands A lot of people have thrown themselves into mining, and thereby, Even if the results may not be satisfactory for many, so far huge amounts of precious metal have been and are still being mined.

The consequence of these circumstances and the continuing productivity of many rich mines has been that the previous balance between the production values measured according to the extraction work and the prevailing the exchange value of precious metals may be disturbed for many decades has been and that

the current exchange value of precious metals less by their production costs rather than by their profits– use value, i.e. through the law of demand and supply bid is determined.

The result of this design of precious metal production is reflected in the increasing devaluation of precious metals and the money minted by them, as well as all values determined according to this money of capital, salaries, wages, fees, daily wages of the workers etc., which have already had a striking effect on all material living conditions influence has exerted and continues to exert an incalculable extent threatens to exercise.

Money has no special value as such if one ignoring the fact that the legal circulation value in most countries is set

229

is that the minting costs are included in it, – but fine exchange value depends on that of the precious metals. We have all capital in solid, semi-liquid and liquid. Such a distinction is, however, no natural one, based on a particular quality of the property, but refers only to the use given to them. The After their extraction, precious metals form part of the existing solid capital, but if they are minted into coins, they become liquid capital, as described in more detail there.

The use of money as a measure of value is known to occur in the manner

instead, the value of each exchange object is determined according to a larger or smaller amount of this liquid capital. But what
As far as its own exchange value is concerned, it cannot be measured by itself, since measurement takes place through comparison and one cannot compare a thing with itself can be compared. The changes in the exchange value of metal money can therefore only be determined by the common rise or fall of the value of all other exchange objects.

In this respect, it can be said that the exchange value of money and behind him in the second row the one of the available precious metals to the Total exchange values of all other economic assets that are exchanged omened with natural goods, keeping it in balance. If one
Imagine that there was only metal money, and that suddenly in all parts of the inhabited earth the quantity of existing money and precious metals, i.e. the total means of exchange would be reduced to half, that the other Half of it disappeared irretrievably, it follows that in such a
If the remainder serves the purpose of the previous total stock
For each purchase or sale you could then only pay half of the use previously used money, and the necessary consequence would be fupon that the prices of all economic goods would fall by 50%, that the The exchange value of money would increase by the same amount, since for 50 thalers one co would have to buy and sell what would previously have cost 100 thalers.

The law of nature, which is expressed here directly in mathematical form,
On the other hand, where it is a question of an increase in the means of exchange apparently cannot have such an unconditional effect, since the Existence and increasing proliferation of means of exchange on the It would depend on the will of the owners whether they would reduce the price of their pro wanted to set; and yet the same natural law of demand and Offer is also not necessarily consistent here: any real Increase in the means of exchange like any other kind of valuable commodity fts causes a corresponding devaluation of the same if there is no simultaneous increase in demand for it.

The characteristic of such a devaluation is that it the personal opinion of the respective owner begins, and then communicates it to all other people). With each exchange

) The same phenomenon occurs, for example, when paper money is devalued in the fpecially instead. As long as the same has in the view of the owner the same value as the

230

Two or more people must be involved. If the owner of a
If the purchase of a valuable object satisfies his personal need, he wishes to exchange the surplus for other goods or to rent to others for use. If the same valuable object is also others are plentiful, the demand will be low, both for the exchange, as for the rental use, in the opposite

In this case, there will be strong demand. The lower the demand is, the more inclined the owner will be to sell the superfluous to give away.

If the means of exchange have changed, the liquid capital has changed considerably. Equal quantity, the owners will first meet their own needs. If the needs of every work amply satisfy by exchange, they will be more than otherwise buy, and then the money for which they have no use in exchange find, make it available to others on a rental basis. But it is also possible with other. If money is also plentiful, there will be little demand for it, the goods and other exchangeable goods will be priced higher and since a lot of surplus money is offered for rent, even want to pay a lower rental fee for it.

The exchange value of money and its rent for use thus pursue the same path: high exchange value (low commodity prices) and high utility rent (interest, discount) are mutually dependent, and vice versa lower Exchange value (high commodity prices) and low rent. However, the division of labor that has developed so far today is the use, which the totality of money can make, of far greater importance is than that of the individual owner, insofar as he uses it for the purpose of distributing exchange, the general use value also determines the Exchange value of money. Therefore, when there is a lack of liquid capital, the first thing is the rent for use, as a result of which the exchange value of the same increases (if the commodity prices), in case of abundance the rent falls first and as a result the exchange value falls (the prices of goods rise). Exchange value and Usage rents are therefore not of equal rank, although they differ from one another depend on each other, are mutually dependent. The rental is determined by the exchange value of money is calculated, but this value depends on which circulating metals, ie as long as he is convinced that the paper money will always be in To be able to convert an equal amount of metal money, is not exempt from any devaluation Speech. Only through his efforts to get rid of paper money, if necessary himself with a loss as a result of his distrust of his security, the devaluation and is passed on from one owner to another.

1) It is well known that in the business world the rent of money is less than actual interest but rather in the form of deduction interest (discount) in that from already prepared, current debt documents (accepted bills of exchange) calculated and then deducted from the nominal value of the same. Therefore In business life one does not speak of the prevailing interest rate, but of the state of Discounts. High discount and low commodity prices – low discount and high Commodity prices are mutually dependent and one can immediately conclude without hesitation on the others.

231

Rent can be deducted from the money. If over time the Precious metal and with it money devalued through continuous accumulation has been, this happened in the order that first large Stock was created, as a result of low rental costs; as a result of the low

Rent for use Decline in exchange value. The exchange value of money decreases does not change so easily in traffic, is not so sensitive to external Influences such as the rent. If it rises or falls, this is always the consequence of the fact that the rental rent preceded it in this respect.

The constant fluctuations in rent and exchange value of money initially take place in narrower business circles, where most noticeable, although depending on their strength they can also extend to other Distances and finally with sustained strong movement over the whole World trade. After the amount of liquid capital, which exists in the world at all, its average exchange value, its purchasing power is determined, it should be the same everywhere in the world assert in the same way, precisely because this capital is liquid when the same would not encounter any obstacles. The latter is, however, the case. One= feit, there is a lack of legal certainty in some parts of the world, and such Capital flees from certain areas; on the other hand, liquid capital appears in the form minted coins, but so far there are no world coins, not even individual international coins, and since the circulation values of the coins Mostly the minting costs are also not recognized abroad are usually used only for their own country. cash flows from one country to another, the lack of it must in foreign countries and consequently the higher value of precious metals be so significant that the transport costs and those of the As a further obstacle to the free movement of capital finally comes the use of banknotes which today in almost every country a part of the country= currency, which is rejected abroad.

There are also smaller business circles, in one and the same Land frequent fluctuations first in the rent, then as a result but also in the exchange value of money (in the prices of goods). There are times when liquid capital is plentiful, when it is can easily be exchanged for fixed or semi-liquid capital, (low discount, high prices of goods); there are others where many uses for cash, the lack of it becomes noticeable, others again, where enough liquid capital is available, but the owners are suspicious of its are concerned about security and keep it hidden, do not bring it to market (in both cases there is high discount and low prices for goods).

From what has been said it follows that the exchange value of precious metals and from them, which form the currency and the legal tender metal money, because it simultaneously represents the general measure of value and exchange means, in inevitable interaction with the size of its pre= rate and its resulting use as solid and liquid

capital; because every increase in this liquid capital, which is exchangeable, means of capital employed, a fall in the metal value brings a rise of the exchange value of all other goods and vice versa. If it were to

ensure that from now on all newly mined metal will only be used for the purposes of industry and luxury, no longer to increase the means of exchange would be used and in future the coining of precious metals stopped, this effect would stop. But that is simply impossible. Any increase in the production of metal causes a greater distribution of the metal—gained on the one hand from the fixed (use and production capital), on the other hand, to liquid capital.

The amount of total fixed capital which is the object of the sale traffic, requires a certain size of this traffic, which is required liquid capital. The total amount of all exchange transactions is with the amount of available liquid capital, as a medium of exchange, in Equilibria. The more means of exchange are available, the The greater part of it is used for each exchange, the smaller Exchange value is attached to each of its parts. But now a larger Amount of means of exchange available on the one hand through their material increase through the production of precious metals, on the other hand through simplification of their use, which makes it possible to use the same amount precious metal either in a given time a larger sum of to conduct barter transactions or even to exchange the same amount of precious metal to use funds for several simultaneous exchange transactions at once, thus doubling its exchange power and the resulting effect.

It follows that all credit papers which serve to facilitate trade to simplify the need for materially available means of exchange to reduce, exert the same effect on the exchange value of the same must be like a material increase in the means of exchange, namely that reduce their exchange value.

Consequently, the exchange value of money is reduced, the continuity of this exchange value, the ability of money to act as an unchanging measure of value serve, impaired:

on the one hand through the continuous production of precious metals, info= to the extent that it exceeds their consumption through wear and tear, on the other hand, through the use of any kind of credit instruments.

The question now is to what extent this constant devaluation of money is a necessary, unavoidable evil,

As far as the precious metal itself is concerned, there are two aspects to A reaction against further devaluation is expected, but unfortunately not to a in the near future, namely on the one hand by a decrease in production, on the other hand, through an increase in use, i.e. the need, the demand ask.

A decrease in production will occur sooner or later must, when the value of the precious metal has fallen so low that the The majority of mines can no longer be operated profitably.

But first, all known celestial bodies on the Earth's surface must Gold reserves are completely depleted, and it is beyond calculation, when such a reaction will occur, – probably not until after a number of decades, perhaps even later. A significant Increase in the consumption of precious metals, especially gold, would on the other hand, if it is achieved through the completion of the German Coin reform to implement international coin agreements between the most important trading nations, which would make it necessary to mint a special kind of international gold coins. It would soon Time will show a great need for such coins, and thus At least initially the further devaluation of gold would have been remedied. In the meantime, there are still thousands of experienced business people who consider such an idea to be a mere chimera, and what is even worse, The majority of governments also seem to have a clear understanding for the consequences of such a great economic progress close.

With regard to the precious metal itself, the near future there is hardly any hope of help.

It remains to be examined whether the devaluation of the precious metal metal, which is characterized by very extensive use of credit papers could be eliminated by restricting the latter, ie whether by more restricted use of credit securities a real economic disadvantage would arise, possibly whether it would be so significant that it would the progressive devaluation of precious metals.

As regards the latter, it hardly needs to be stated that if the previously very slow devaluation of precious metals by the since 20 years, enormously increased production in just as striking has been strengthened and accelerated, and as a result the prices all life needs with a few special causes Exceptions are continually increasing, this is a serious concern There must be a reason for this. All the millions of people who are not are directly involved in production or trade (in which case they for their business on average and in monetary terms a corresponding will achieve higher profit), all day laborers, all salaried civil servants, all on a certain salary or on traditional fees assigned classes of society, all those whose income in a certain pension are thereby placed in a precarious situation and are forced to restrict their needs more and more, to deny themselves the pleasures of life they are accustomed to because their income, which previously sufficient to cover such expenses, is now too low and they must feel even greater concern about the future. In the same way, the state's financial administration is losing any firm footing, The people's representatives of constitutional states have to pay higher Tax rates are required, albeit with the same austerity has been managed as before. Even the comparative statistics lose

the secure basis of its calculations, because it is not possible for it to precisely to prove by what percentage the exchange value of the legal metal= currency against all other economic values every year. has sunk.

No one will deny that in this depreciation of money a great, a very serious evil lies, which is thereby only made more serious that it is in constant progress and is changing in terms of its duration and finite extension eludes any calculation, so that to its every really useful means should be sought to combat it.

In order to determine whether a more restricted use of the credit instruments a disadvantage or advantage would arise, it is necessary to determine the nature and the to examine the results of their previous use in more detail.

According to the above classification, they are divided into

semi-liquid capital, namely bills of exchange, instructions, written Promises of payment, deposit slips, etc. and

liquid capital or paper money, which claims to have the same to perform services like coined metal.

Concerning the former, there can hardly be any doubt that it is impossible to do without them. They convey every kind of traffic, insofar as it involves a direct transfer of fixed capital into liquid, ie an immediate cash payment, is associated with difficulties, save an incalculable amount of human labour, allow The modern credit system enables the legitimate use of credit expansion of traffic by marking a special stage of transition of capital in solid form first into the semi-liquid form, and come again only be used where traffic really needs them, where a healthy economic relationship exists.

They are therefore just as much a need for transport as the coined money and rendered the most useful services in the production of new capital, insofar as it takes place with the help of trade.

Although it is a fact that without their use the metal: money (with unforeseeably lower traffic) a higher exchange rate value, the value of them for the whole of humanity benefits derived are so predominant that any restriction on their use would be a calamity, which is out of the question.

Let us now consider (since the reprehensibility of all government paper money even without discussion!)) – the banknotes, which is evident in terms of on their general usefulness or harmfulness, ie for the whole population of a state, the following:

a) since they appear as liquid capital, their first effect on traffic is exactly the same as that of an increase in the circulating metal money;

b) the liquid capital would be able to generate new capital for itself produce, it could be assumed that this form of liquid

1) Seems to go too far for me. Perrot.

235

Capital – (would you like to represent really existing capital or just an illusion) – would be able to do the same. But that is not the case. The production of capital takes place through human Work in conjunction with already existing fixed capital; is only supported by semi-liquid and liquid capital. However, with regard to the effect of this support, it is irrelevant whether the liquid capital is available in greater or lesser quantities is, if it is only sufficient to be properly distributed; because the smaller its quantity, the greater its power, – in other words, if only about half of the available metal money existed, one would still conduct the same business with it can as with his present quantity, because then his exchange-value would be twice as high. You can use banknotes to build fields buy, build factories, pay workers, who also again provide food, clothing and housing for banknotes Consequently, in such a case, the banknotes have contributed which exceeds the rent paid (national interest rate) If these banks notes but not available at all, there would be so much less liquid capital in the country, – in this case the purchase of the fields, the construction of factories, the payment of workers have among would have to remain? The resulting creation of new capital not even take place? Not at all! By issuing the banknotes The existing capital was absolutely limited in its ability to create new values to produce, not increased, the amount of circulating liquid Capital was increased, however”), but in the same way conditions, its exchange value and purchasing power are weakened. The same people with the same workforce, the same entrepreneurial spirit and the same Equipped with the same fixed capital as was initially available, have achieved the same successes. The cash at their disposal Metal money would have been a smaller sum, but one would have can supply it with it, because its exchange value is not affected by the issuance of banknotes would have been reduced.

It follows that the state, by issuing paper money, the note banks by issuing their payment promises by means of the annual interest drawn therefrom a non to obtain a justifiable substantial profit by the exchange value of the circulating metal money, i.e. the

legal national currency in proportion to the amount of their paper money to the total amount of circulating (liquid)
1) Not the full amount, since the issue of banknotes always results in has, in the event of devaluation of the national currency and increase in commodity prices of the circulating precious metal abroad, so that the remaining circulating funds consist of banknotes and a part of the former cash money, together but represent a larger sum than the previous precious metal alone.

236

capital and thereby reduce the large part of the population, which lives on fixed income, to significant damage, but secondarily the entire state—population by undermining the continuity of the legal measure of value.

On the other hand, there are no advantages for the whole population of the state through the issue of banknotes. In the state= paper money, taxpayers receive the interest saved on the cir= amount; but nevertheless, on the other hand, her A much greater pity.

Would it be possible to eliminate all paper money, all banknotes at once from the world, this would first of all put an end to the progressive development value of money must be opposed by a strong dam, the exchange value the same would rise again, the increase in the prices of all life= needs would again assume a backward movement; but also any partial withdrawal of the circulating measures of paper= money and banknotes would have a charitable effect for the common good.

The large precious metal production, which since the middle of this century the devaluation of money, the increase of all prices and thereby has had a disturbing and confusing effect on all material living conditions, can be estimated in round sums according to approximate calculations

in gold 4000 million thalers, total 5600 million.
in silver 1600 million thalers Prussian thalers

If we now consider that according to the newer statistical information on the paper money in circulation in Europe and North America

1,625 million thalers in government paper money
in banknotes 1825 million thalers
together 3450 million

, it is easy to calculate to what extent an abolition

all paper money which is so damaging to the value stability of the money effects of large-scale precious metal production would be canceled out.

The second major disadvantage of using banknotes is

according to the above
in the increased fluctuations in the exchange value of national currency and the discount rate, as well as the constantly recurring financial crises, which are an inevitable consequence must be therefrom, as soon as this use becomes a general and is expanding more and more.

This is of course not to say that all Trade crises were to be written on the account of the note banks. As the Businessman through excessive speculation, through too extensive Trust in the honesty of others, through wars and other disasters can be ruined, the history of trade also shows general Business crises occur, which at different times affect entire cities, entire

237

countries and sometimes spread across several countries at the same time The reason for this was over-speculation in commodity transactions, another time in government bonds, in railway shares, in banking and bill-taking. But no kind of small catastrophes have been so generally destructive, have become so regularly in relatively short intervals, especially in England and the United States, as the financial crises of the Note banks, as mentioned above, and especially this regularity with which they almost without exception from ten to ten years, should be proof to the unbiased observer, that the reason for this is not an accidental one, but a necessary, inner one which is caused by the further development of unhealthy economic Conditions, despite all precautionary measures, sooner or later lead to the same leads to disastrous results.

As is well known, a paper bank is not only used for the same purpose established to issue and redeem banknotes. Even the bank of England makes no exception, although by law is required to have a completely separate business for the issuing of notes department. Each bank of papers simultaneously makes Banking transactions of the most varied kinds, and if it is possible for her to and the manner in which it may exploit its payment promises, to almost double their business capital, i.e. to add a almost once again to use a large fortune than they themselves as property freedom, it follows that if it exercises this freedom as far as possible for their own benefit, thereby creating very peculiar, Economic conditions that deviate from the rule must be created.

The most obvious way in which the bank exploits its payment promises is

consists in the fact that it discounts bills of exchange (i.e. from reliable people accepted for payment terms of 3, 4, 6 and more months promise of payment by transferring to the previous owner their Amount paid out immediately after deduction of the deduction interest), advances against Interest payments on goods, government bonds and other valuables or opened credit directly for persons known to be solvent and transferred via all of them with their notes, that is, their own promises of payment, as if they were cash, in payment. So there is actually only a mutual Exchange of payment promises. The borrower, who liquid capital, presents a time-current bill of exchange to the at the disposal of the bank or he promises himself in a manner accepted by him Change to repay the loan received then and then. The Bank should, according to the rules of ordinary business, be treated as a loan cash metal money. Instead, however, it gives the person in need of money their own payment promises, which, according to their wording, are based on Demands are to be fulfilled immediately, but she knows that she in normal times only exceptionally presented for redemption, that they themselves, if at the maturity date of the received bill of exchange,

238

The amount of money is paid out, the bank slips or payment promise does not need to be fulfilled, but continue calmly can, with the amount of money paid by the acceptor of the bill of exchange other= to conduct extensive business.

The recipient of the banknotes can, however, exchange them for cash Exploit money, since everyone takes it from him as such, possibly giving it back to him Interest paid for it, the public in general, the total= population basically makes, by allowing the banknotes or promises of admission to circulation (as if they were cash), the bank an advance of capital for an indefinite period, because it (the bank) has the right to collect the amount of the bill of exchange handed over to it u paid out and can continue to use it economically; it is also the interest has been paid until the expiry of the bill of exchange, it is in exactly the same way as if you had given her cash instead of a bill of exchange. money paid out; while on the other hand every part of the audience, into whose hands their promises of payment come, the same in cash. Accepts money, possibly paying interest on it. Assuming that the money is circulated banknotes expire after 5 years without being presented for payment, fo the bank has not yet advanced a single thaler of real capital, fit has only issued promises of payment. In the meantime, she has paid the amount of the bill of exchange initially delivered to her for 5 years economically and little= ft can win 20% at the usual national interest rate. All However, the payment promises issued by the bank are calculated on the basis possibly never to be redeemed, as a floating debt of the bank to circulate among the population of the country, while with the making brilliant business wherever possible with money borrowed from the public. She knows from experience what amount of money she needs to pay for the upcoming notes have to be kept ready, some banks are also required to

that they deposit the third part of the amount of the notes issued in cash. But with that, their duties are also fulfilled; the rest of their capital borrowed by the population remains for their free use—addition.

Since one usually has a considerable amount of cash. can generate greater profit than the usual rental or the interest rate of about 4% P. a., Jo should therefore be according to usual concepts of Law and equity the bank just as it is with government bonds happens, attach coupons to their bank slips and give them to the respective owner pay the usual interest on it. It would then be in the same case, like a man who has been given capital at ordinary interest of one or more millions for business operations. As a capable businessman, he would pay the interest on it and yet can become rich because the business brings him much more would be higher than the usual interest rates.

But this has never been discussed before, and the banks would probably cry out in outrage if such claims were made

239

Everyone is used to checking bank notes to regard it as cash and to pay interest on it.

This is therefore not a healthy economic relationship from the outset, and it can hardly produce healthy consequences. Professor Tell⁸ struggle (The Principles of Money and Banking, Berlin 1867 p. 21) says that the over-issuance of notes has, among other harmful consequences, those of artificially increasing the prices of goods, causing of uncertainty of contracts, causing financial crises, causing of fraudulent transactions, in general the demoralization of a large number of people, and he is right with the modification that too much⁹ issuing notes is unavoidable, as long as one uses them at all, since the only real purpose of their use is the exploitation of the public and if this is taken away from her, her use serves no purpose has more, Mr. 3. Ph. Schneider (Staats- und Bankzettel. Gießen 1871, pp. 20–21) says: “There is hardly a country left that does not have its paper The example of making money with mere promises instead of work fcafe, was so seductive that the mind everywhere fell out of the saddle ... Those who took out loans in banknotes instead of Those who receive metal money also pay interest, only the issuers of the banknotes save or earn interest. The former are considered by the latter as Sponges used, which absorb substance from the rest.” Also There is not a word of exaggeration here.

Since the paper bank will do better business the more of its Notes she brings to the people, and since her enthusiasm is also supported by the fellow application of her sisters, the natural consequence is, that even with the best intentions of their management, they must act with caution

will not be as strict in the selection of their customers as a Capitalist from whom a loan in cash is demanded. It is a more pleasant feeling to place the notes than to place the money. This will enable a large number of business people to cause the loans received in notes from the note banks to be converted into un= to use it prudently by focusing on ventures beyond their. The interest of both the bank and its Buyers meet each other halfway to open the market to flood the country with paper, to devalue the national currency, by increasing their quantity, their quantum, because this weakens their exchange value, their purchasing power.

Under normal conditions and pure metal circulation, there is no lack of in the world on liquid capital, on money, precisely because it is liquid, and without Difficulty can come from all sides, and also because it nowhere on a specific amount of money, but on fine exchange= value, its purchasing power. The less money in circulation, the greater is its purchasing power, the smaller the quantity required for each individual Sales. But cash is currently rare in an area, at a business premises, first the rent for use, the discount, and then

240

Money or metal flows from all sides to fill the gaps. fill up.

Above we have mentioned, on the one hand, that it is well known that every kind of human traffic value activity of the medium of exchange, of money in the form of the national currency, a most important requirement it; on the other hand, that this value activity of money in the present use of the note banks by two different currents in the liquid capital, the strong production of precious metals and the increasing banknotes= issuing of the banks is continually being disrupted to the general detriment. We can add that for a prosperous flow of traffic also continuity of the rent of money, the discount necessary or at least highly desirable, which activity also in particular by the arbitrary enlargement or reduction of the circulating liquid capital was disturbed by the issue of banknotes must be.

If the national currency consists of pure metal money, it depends in this relationship depends at least on one factor, the metal market; but if it consists of a mixture of paper and metal, it is exposed to two currents from different sides and is located thereby naturally in a constant state of fluctuation.

It has been mentioned above that the means of population to reduce capital by issuing banknotes. be increased, since before there were grades, always and everywhere the sufficient liquid capital existed because it was not based on quantity, but

on exchange value, on purchasing power; and if its quantity is determined by the Issue of a tremendous amount of paper has been enlarged, fine purchase: force has been weakened in proportion. If a

A country blessed with paper banks would be completely isolated and would have no communication with other countries, the previously available cash would be

after the notes have been issued, they together form the circulation, and the exchange value, the purchasing power of the land formed from this mixture= currency would be directly proportional to the amount of notes issued compared to the previous metal circulation, the currency thus weakened by just as much been made worse. But since such isolation does not take place anywhere— finds, the real success of the music edition everywhere is that the

fworse currency compared to the prices of goods, government securities, Exchange in foreign currencies etc. increase, that this leads to the increase which drives imports because commodity prices abroad have not increased, However, since foreign countries do not accept banknotes but only metal money in payment assuming that a part of the circulating metal money is used to effect of purchases abroad, which part is therefore directly from the notes has been displaced, so that finally the circulating liquid capital, from Metal money and paper mixed, remains larger in quantity than the previous Metal circulation, despite the fact that part of the metal has flowed away, that fet not only weakened their purchasing power, but also caused greater sway

Perrot, Bismarck and the Jews. 16 241

effects of the discount and finally also of the exchange value of the currency remains subject to.

An often repeated experience has, however, proven that the Abel not limited to that, but that due to the fact that the interest both the note banks and their note buyers are constantly on the lookout increase in banknote issuance and displacement of metal money by paper a vision that often eludes the individual eye, but not less consistent chain of causes and effects will sooner or later lead to a general financial crisis. also hesitate, one day the day of reckoning always appears, on which the existing metal money is no longer sufficient to meet the need for Payments to foreign countries are sufficient to ensure that the population is at the door the note banks knocking to return their long suspended loan in metal= and then realizes with horror that there too the metal mostly converted into paper, that banknotes and bills of exchange of all kinds, but only a few coins are available. Then the crisis is there and with it destruction.

The general course of money transactions under the direction of the notes= banks, as it may be in a longer or shorter series depending on the circumstances of years, is with greater or lesser deviations— deviations such as the following:

Let us assume that a country has so far been in satisfactory traffic conditions, but that a number of note banks

was founded therein, and that this gradually exerted its influence on assert themselves by increasing their note issue from year to year.

It is a common belief in the business world that a
If commodity prices rise with approximately equal inventories for a period of prosperity, because it is assumed that the increased demand from the side of the consumers and proof of the increasing prosperity—fts, and since it is easier to make money in trade when prices are rising—win, as if the prices fall, so also the merchants feel are involved, it is obvious that a general increase in prices with satisfactory financial conditions of the country's population be identical.

However, one must not overlook the fact that commodity prices do not only affect the exchange value of the goods, but also in their entirety the changes in that of the money that forms the national currency that a rise in all commodity prices is indeed accompanied by an increase of consumption, of demand for goods, but with even greater Probability a corresponding devaluation of money But if you see this, it can lead to very dangerous errors arise.

If such a rise in commodity prices, i.e. such a development, devaluation of the national currency as a result of the fact that the note banks have much Paper has been issued, so in all probability there is already a

242

A considerable part of the previously circulating metal money was exported abroad However, it is still in the mixed currency of money and paper There is still plenty of liquid capital in circulation, the amount of which together with the rise in commodity prices caused by inflation, arouses entrepreneurial spirit and gives rise to speculations, which on the one hand, new demands on the issuing of banknotes by banks, on the other hand a further increase in prices and new purchases abroad, so that more metal money is again sold abroad. While the business world is eagerly participating in the lively movement of market, some making considerable profits, as a result increase their household expenses and other needs and also contribute to the increase in commodity prices, it is quite The situation is different for the rest of the population, especially in the countryside, by no means due to increased consumption cause for the increase in the price of Life needs had been given, which rather, since the whole movement from the issue of notes and the resulting devaluation of money—ft, has to struggle with hardship and worry because their income is the largest Parts consist of fixed amounts of money, and these have their previous purchasing power have lost.

The artificially created by speculation and mutual outbidding= The increase in commodity prices gives rise to continued strong

Import of goods from abroad where no special increase takes place—found, although the increase in demand is not entirely without. In contrast, exports, especially domestic exports, Industrial products are gradually being exported abroad because the factories When money is devalued, raw materials and other assets are needs to be paid dearly, and therefore higher sales prices must be demanded and which the previous foreign buyers do not want to approve because no higher prices can be obtained from them. In the same ratio, as such a state lasts longer, its effect becomes: take, more and more metal money goes abroad, as a result, and again as a reason for this, the quantum of the circulating paper, the currency thereby deteriorated even further, the prices and exports are reduced more and more!). But if a country can no longer cover the value of its imports through corresponding exports he has no choice but to use his circulating metal money to Such conditions do not become immediately apparent, so that they attract public attention. The audience, once used to the paper notes, does not notice at all or only superficially the Disappearance of metal money, as he is left with token coins. feels the rise in prices, suffers from it, but does not know the cause to explain and must endure the evil. The export business of a country usually takes place in two forms, through purchases of neighboring

1) All these prophetic words have been fulfilled in every detail – to the detriment of the German people!

16 * 243

Foreigners in the country itself and by sending goods, in particular Industrial products which domestic manufacturers and merchants use for have their invoice sold abroad. The latter form is especially towards distant countries, which are too remote, to seek to make direct purchases on their part in the country of production. A common consequence of the decreasing purchases by foreigners (the more advantageous and faster way of selling) usually consists in the manufacturers are more inclined or rather forced to work for the to seek buyers in more distant foreign countries due to the abundance of their products, to increase the number of broadcasts for their own account. The consequences of this fures are of several kinds; firstly, such dispatches require many months, not infrequently years before they are settled and the result in figures is established so that it allows a firm judgment as to profit or loss; Secondly, the final result of such in this form is usually made shipments of goods less favorable for the senders than if they could have continued to purchase their products directly from buyers of the neighboring countries, but finally the Owner of such shipments of goods in the long time required, before the proceeds reach their hands, sooner or later in financial difficulty, require advance payments and find them most easily on the slips of paper= banks, which, since they always pay in paper, leads to an increased

There is a reason for the issue of money. So one works in the hands of the other, in order to gradually restore the economy of a country blessed with paper money to undermine human health.

The shipments of goods will continue despite the perhaps unfavourable outcome in the lack of other sales and in the hope of better results repeated, and a number of years may pass during which for the statistician the export of the country apparently more than its import or less equal, although in reality the export significantly less favourable results for the assets of the residents than before.

But if in this way the difference between one and export, the shortfall of the latter by outflow of the still in the The transfer of circulating cash abroad was covered and the National currency has been continually deteriorating, so a stage to enter where the traffic no longer requires cash for exports can bring, because almost only paper is in circulation, which is why the owners the banknotes present themselves at the banks to be redeemed for money This is always a very unfavorable sign and usually the sure precursor of the thunderstorm, which is now accompanied by a sudden rush of the public demanding metal payment, due to the difficulty of its satisfaction and the eventual collapse of the banks and all common ruin; because as soon as a greater need arises for cash, banks tend to restrict their transactions; They seek to limit and increase the discounting of bills of exchange

244

This ends the discount, which under such circumstances often in whole has risen from 3% to 10, 12% and higher in a short period of time. At the same time they terminate the businessmen who are known to be safe in normal times opened credits and collect their debts everywhere; because their pursuit is primarily about maintaining their credit by continuing to redeem all presented notes with metal money. However, the rush will increasingly stronger. The increase in the discount rate caused money— The crisis has caused consternation in the business world, people are trying to sell goods but nobody demands goods now, everyone needs money, the goods prices begin to fall, and just as quickly as the discount rate rises, often descend in a few days in an unbelievable way. Nevertheless, But there are no buyers, the financial squeeze is getting worse. Now everyone man is suspicious, tries to protect himself on all sides, the safest Bills of exchange are rejected, they only want money, which is nowhere to be found, the mistrust quickly spreads among those not part of the business world The people are besieging the doors of the banks to To obtain metal money for fine banknotes. Terror reigns everywhere, experienced businessmen lose their composure; enormous amounts of goods are sold at ridiculous prices, some well-founded Wealth is lost in a matter of days. Finally, fthe banks can no longer cope with the rush, they are putting their cash

payment and the confusion is complete. The factories stop working, the shipyards, house buildings stand abandoned, all traffic comes to a standstill, even the day laborers can no longer find employment and wander around the streets starving with their families until the reaction occurs, the low commodity prices the metal money again from outside attract, and gradually the trust returns and the external Things seem to be returning to their old ways, but only in appearance; for the attentive observer, such a business location, – and sometimes it is all the major business locations of the country, as one has experienced more than once in England and North America has, – the election site after the end of a great battle. A lot previously highly respected business houses have been ruined and become insolvent declared that the banks would be liquidated and some would be able to reopen their business. The majority are bankrupt. Many families who have lost their fortune at the banks or at the individual bankers on interest, have been reduced to begging, and the general result is the destruction of trouble of a large sum of prosperity and peaceful family life = happiness!)

This is the approximate picture of a financial crisis, as it occurs in large properly developed traffic conditions, in the normal course of Things after regular periods of time from the system of free movement of many competing note banks,

) This “reactionary” with his “outdated, backward views” has Period from 1918 to 1981 was anticipated in every detail.

245

although external special circumstances can also contribute to them suddenly and even less expected to bring about, such as general crop failures, wars, business disasters abroad, etc.

The seeds of this lie in the deterioration and gradual Devaluation of the national currency due to the outflow of metal money and its replacement by mere paper, as well as in the interest that every bank has in maintaining its To increase the issue of notes as far as possible, i.e. the state currency to deteriorate.

The danger may be greater where traffic is less concentrated at individual points concentrated, where as in Germany, the note banks on larger or smaller distances are scattered over the country, less than in England and North America; but, as the same causes produce the same effects entail, then sooner or later the root of the problem must be found. derbens, the economic insufficiency, which from the beginning in the creation of banknotes, spread their growth, their ramifications expand and entangle ever more tightly until they envelop everything and finally into the abyss.

If one studies the history of the various financial crises of this kind, such one almost always finds that the business world immediately before the catastrophe occurred in a period of general prosperity, or, more correctly, said, believed to be found, from which then the ruin with a
Sometimes a storm broke out of a clear sky; and one reads not rare, as those who describe such calamities, their naive surprise at the sudden change. But it is clear, that what was thought to be prosperity was only apparent, that in reality, traffic is already in a state of complete unhealthiness because the high prices of goods, which the large number of speculative lations were not a symptom of the general prosperity of the country, On the contrary, they showed that the national currency had deteriorated, that the Metal money flowed out of the country and everywhere was replaced by mere paper promise of payment had been replaced.

Between all countries linked by trade there exists a ft would be a fluctuating exchange rate. However, it always has a more or less solid basis, which the actual equilibrium (the "al pari" in business language) and either boß in weight size of the same precious metal, which forms the basis of the national currencies serves (festes al pari) or, if one country is after silver, the other after Gold is considered as a further factor in the calculation of the price of the outside of the national currency, foreign metal in each of the two Countries need (fluctuating al pari). As an example, we can take two after gold calculating trading places, London and Bremen. After the gold= weight of a sovereign, it has a value in Bremen gold thalers of 6 Taler 10% Grt. Consequently, the equal rate, the al pari between London and Bremen 100 £ 615 Bremen gold coins. The real bill of exchange=

246

The price is by no means always at 615, but rises above it or falls below par, depending on the influence of supply and demand. If a significant quantity of gold coins is now shipped from England to shipped to the continent and in circulation through increased expenditure replaced by banknotes, the English national currency deteriorates in accordingly. Suppose (despite the fact that they are far from consists entirely of golden sovereigns, but is heavily mixed with paper), that the demand for bills of exchange on England affects the exchange rate between London Bremen until then on the equal rate of 100 £ = 615 Tlr. Gold received, as a result of this deterioration of the English country- currency due to the outflow of gold the real exchange rate to 612, 610 or even fall lower; because the deterioration of the national currency, in which normally a larger quantity of paper would have been put into circulation, than the amount of gold sent abroad, would in natural course of events caused an increase in commodity prices in England As a result, the Bremen businessman who sells goods from England, pay a higher price there; he could therefore no longer buy as much for 100 " as before, would therefore

also no longer be inclined to pay 615 Tlr. gold for it, ie the demand decreased, the price would have to fall. The same relationship as between London and Bremen, however, exists between England and the whole foreign country, and for the same reason a less favourable situation for England would have to A change in the exchange rate will occur as soon as the outflow of gold and larger Issue of paper the English national currency deteriorated. The Exchange rate changes are therefore in the same way as commodity prices Measure of the exchange value of the national currency.

According to the newer English theory, which Sir Robert Peel in his banking reform, which was later promoted by Mac Culloch, these fluctuations should now be the exchange rates abroad as a measure of value for the country currency can be used, so you should

(a) the national currency from a continuous mutual agreement proportions of the quantity changing mixture of gold coins and banknotes pass grades;

b) one should try to achieve that the music edition for the whole country is concentrated on a single bank, because only such a be able to maintain the correct proportion of the quantity of both parts of the country= to monitor the currency according to a regulated plan;

c) as soon as a common change of course of all courses (ie a common fame change of all foreign exchange rates to the detriment of England; because a single course can consist of many random modes= fications of demand) is noticed, one should conclude recognize that the national currency has deteriorated, that too much paper and too little money in circulation. Consequently

247

d) in this case, the directors of the State Note Bank shall immediately inform the Try to control the evil by pulling in paper and thereby correct, ie restore the previous relationship. This happens but especially by increasing the discount, whereby the goods= prices are pushed down, whose owners have to suffer, i.e. directly by the fluctuations resulting from the existence of banknotes the market may be damaged.

If both must be admitted that a concentration of notes= issuing in a single bank, however, allows for better monitoring and the country is therefore better protected against financial crises than unlimited free and competition in music publishing; and furthermore,

that the fall of all exchange rates on foreign countries is a fairly certain A symptom of this is that a deterioration of the national currency through

excessive issuance of banknotes has taken place, it is
ftill now, to such reasoning, the question arises:

(e) if it is established that a national product made of paper and metal
currency is worse than a pure metal currency; if furthermore
It is clear that such a mixed national currency will cause fluctuations
in their value are unavoidable, and a concentration
the music edition under impeccable management in the best case for
ensure that these fluctuations in value are
to balance again; finally, when it is established that all fluctuations
in the value of the national currency not only for the entire population,
but also in particular for the trade an undoubted
evils,

why then do we keep the use of banknotes everywhere
at? why not ban the issue of all
and every banknote?

It is difficult to find an answer to this question other than,

that once one gets used to the Abel, and that it would seem hard,
a number of bank shareholders who also once believed in the exploitation of the
The entire population is accustomed to this privilege by issuing banknotes.
legium suddenly!)

248

calls it "interest". But if a paper bank increases its profits by issuing
printed payment promises the amount of available liquid capital,
fhe would in that case also rightly claim a usage rent
can, if this is beneficial for the national economy, for the entire population
the capacity of capital production would be increased. But this is not the
case; since every increase in liquid capital increases its exchange value,
fhis purchasing power is reduced accordingly, fo the productive power of the

circulating liquid capital has remained the same, it just has a worse Form assumed by partially displacing the metal with paper Will this deterioration of the national currency a lot of people whose income consists of fixed amounts, fdamaged, the entire population also suffers from the paper caused fluctuations in the exchange value of the national currency, is finally through the banknotes the danger of monetary crises has been conjured up, – so the bank in question has no reasonable grounds for granting a usage permit rent from their payment promises, rather, a Such a demand would turn the correct relationship on its head. may assume that a well-organized state has the same claim on credit, like a well-founded bank. From government bonds= money can be ignored, since its use is recognized as an old Abuse, which hopefully will not last much longer at least in our country– will be retained. Just as every state owes its owners Government bonds paid annual interest, such as the enjoyment of a good credit does not grant him the right to exemption from interest payments, also the best-settled note bank, if it is allowed to make its payment» liabilities instead of with hard cash, just with promises of payment to pay, be obliged to pay rent, i.e. interest for to pay the liquid capital held in their hands. It can only be considered as a Imitation of the old sin committed by the state governments of Issue of government paper, if the note banks still today, instead of even for received capital to pay interest, which in turn is paid by the population on the debt documents or payment orders delivered to it– fpeak to be paid for. In any case, the – good= courage of this population.

Has a paper bank for a longer period of time the privilege of banknotes= issue and refuses to desist; the law would be difficult for her Doing an injustice if it decreed that the issue of notes should be continued but also like all other bonds the usual interest rate should be subject to the fuffi cient fublication, so that each note should be subject to t redeemable interest coupon.

According to what has been said, the first two of the above The questions posed (p. 248) can be answered by saying that

1. impossible a bank stock company or any other part of the state

citizen could claim a natural right, in the previous manner

249

to issue notes, i.e. to obtain an interest-free loan at the expense of the entire population, but that it is up to the individual States, regarding the ignorance of the governments shared privileges with the individual existing banks= to add;

2. that it is equally impossible for the States to own interests, the further edition of music in to allow the previous way, because the same
a) in and of itself every national currency by increasing the exchange

means must devalue;

b) because it must continue to contribute to this devaluation, by their natural tendency to direct their gravity towards is aimed at expelling metal money from circulation and to replace it with paper, thus worsening the means of exchange, to keep the discount constantly fluctuating;

c) because they are by their nature the healthy economic conditions undermined and led to exaggerated speculation and fraud. there must be a business reason;

d) because sooner or later they arise from internal logical development its effects lead to bank crises, thus to general financial ruin of the state population; because it is in and of itself an injustice that the country= population, without even realizing it, will pay bank shareholders enormous sums year in, year out to advance interest-free without requiring any corresponding consideration—to receive service, since the banknotes do not in any way affect the circulation in a way that cannot be achieved by other means would be replaced;

Finally, because the majority of the population is dependent on the wage earner up to the minister, insofar as his income is in fixed certain amounts of money, partly through which of the banknotes caused devaluation of the national currency, as Mixture of paper and metal, most difficult to hold in his interests are harmed; fo all that remains to answer the third question is,

3. that there is no form of music publishing that can replace

the current one, because

(a) the freedom of circulation afforded by the use of banknotes Relief, as shown above, is not significant enough to justify to compensate for any damage caused by them in any form perform;

b) because their mere existence is sufficient to make any national currency mixing of metal money with paper, and the by increasing the already enormous metal= production to further devalue the already devalued means of exchange;

—

f

—

250

o) because it would make no sense for the state to be at the expense of the country= population itself instead of the bank shareholders by issuing banknotes wanted to earn interest in order to soon transfer it to the same to allow the population to benefit again;

because for several reasons it seems absolutely impractical that the state governments, in addition to the abusive manner, continue= permanent existence of government paper money in Germany, a further direct influence on arbitrary increase of exchange and means of payment should be received;

because the proposal made by other parties to ban banknotes to continue to use, but the cause of the to eliminate the economic abuses by one ignores the interest in ever-increasing publication of the same= and for this purpose use the sheet music instead of the paper= banks of an independent, but without vested interest of the senior officials administered institution, which under simultaneous supervision of the state government and people's representation in the white man would have to put notes into circulation so that they reach the full Amount of the issue in precious metal, — because such For several reasons, the proposal is not suitable for practical implementation. management; because on the one hand, such an institution, even if subject to the supervision of the people's representatives, initially must be directly dependent on the state government, on the other hand would the storage of such a large amount of precious metal at one and the same place can contain multiple dangers; finally it would also be very difficult to find a capable leader of one of the In any case, the utmost reliability of the officials necessary institution without any personal interest in its consequences In any case, the inevitable consequences associated evils are more significant than those caused by traffic= advantage achieved by facilitation.

Therefore, the final decision can only be that the use of any and all paper money is reprehensible and should be abolished must be, not only of state money, but also of private paper money, the banknotes.

29. The consolidation of German government paper money.
By Dr. Georg Hirth.

A judgment and confession that cannot be valued highly enough about the nature as previously certain economic matters were "prestigious" from certain quarters. prepared", the response of the Hamburg Chamber of Commerce contains

u With the permission of the author, from the "Annals" published by him of the German Empire" was reprinted. Perrot.

251

to the circular of the Trading Day Committee, whereby it well-known report of his banking commission of May 1870 for the assessment The Hamburg Chamber of Commerce says: "About the science= There has been so much discussion recently about the substantive and practical issues of b written and published, and the valuable material increases so abundant and varied that it would be difficult to to present essentially new points of view and arguments. However, if The main purpose of this circular is to from the votes to be requested from the individual German trading corporations for or against the individual theses put forward, majority decisions and a predominant view of the German commercial community about the future Reich legislation concerning banking, we can derive a such an attempt is only questionable and futile. should already be within the individual trade colleges the result of Voting on general theoretical propositions, which are usually very can be realized in different ways and extents and through various Conditions tend to be modified and restricted, often by chance and without any particular practical value. Even more unfortunate, It would be possible to base the adoption of the bill on the mere number of voting corpora this or that thesis and the desire for its application on the part of the majori= activity of the German trading class."

A very interesting judgment that the organizers of economics= reports, inquiries and congresses on the one hand, and the Federal Council and the Reichstag on the other hand should take it very warmly to heart.

But if one wanted to wait with the solution of the paper money question until the Scholars discuss the concepts of "money", "capital", "money surrogate", "Means of exchange and circulation", "credit" etc., and the owners of all these beautiful things would have voluntarily declared that they understand nothing of the scholarly dispute, but nevertheless respond to the unheard-of want to renounce the fomāfe that they derive from the ambiguity of the terms and the profit the legislators have drawn so far – then of course it would be better to the whole question of the legislative program for several years= Fortunately, things are at least looking good after a One direction is clear: justice demands under all circumstances a decision; it is not about new freedoms (for which the German people have learned to wait patiently), as much= more about the elimination of a gross and dangerous injustice, to eliminate dual rights for the relatives of one and the same state system.

The owners of the German banks, who are permitted to artificially fured means of payment are put into circulation every year, approximately 7 to 8 million thalers in interest on capital they do not own, i.e. they obtain from their fellow citizens under the protection of wrong laws a rent or tax which incidentally almost equals the yield of the coffee=

252

customs duties!). Such a "Reich tax" of several thousand It goes without saying that privileged persons can no longer be charged with It is obvious that half measures are the solution to the important question would only delay and make it more difficult; and that understandably There are only two options to choose from: either complete release or strict prohibition of private paper money production, in both cases excluding all and any business transactions between the State and private individuals.

Whichever of the two paths the legislation may take, the state will have to insist on the currently partially private to take back the ceded coin and money rack for oneself Because even if every "German" is legally permitted is, through interest-free notes even outside the limits of the bill of exchange= right, even without stamp duty, to "use his credit" at will ", the state has only the choice of either taking all these pieces of paper without exception or not a single one of them as "money" to be considered, accepted as full payment and passed on. However, but the time has not yet come for the establishment of the most flourishing communism

has come, the state will only do what it has done itself and alone, without any effect of privately manufactured "money" as such, there is This is now in minted coins or in so-called cash notes. The effect of a Taxation can and will be, after the private money production state protection and supervision have been removed, only the paper money created by the state itself and not backed by cash have, as well as the coins with a compulsory exchange rate, insofar as their fineness does not correspond to its nominal value, a albeit small entail a compliant taxation of the public.

Insofar as the impending solution to the banknote issue initially it is only a matter of regulating private money production by law, refp. to release or abolish, the question of what to do with the counter to the currently circulating government paper money, probably also

) The Prussian Bank, for example, had a profit of profit of 4478854 thalers and after deducting interest on the working capital a net profit profit of 3468 962 thalers; after deduction of / for the reserve account remaining 2890802 thalers, half of which went to the state and the other half to the "bargain share" In total there were 2250 private individuals, each of whom received an average of 8889 th share in the operating fund, but in 1870

a) $4\frac{1}{2}\%$ interest = 400 thalers

b) Extra dividend = 642 "

in total 1042 thalers

received, a total of $11\frac{3}{4}\%$ of the invested capital. And yet it is precisely the Preuß. Bank, where the significant participation of the state in the profits Taxation of the people for the benefit of privileged individuals in a somewhat more decent appears. Compared to the profit of almost $4\frac{1}{2}$ million thalers (or 27% of the operation capital) is of course the important item: 21670 Tlr. 27 Sgr. for the production of banknotes! –

253

be done independently. This should not be overlooked that their Settlement in connection with the closely related banknotes and especially with the coin question would be very desirable; however, In this connection, too, for the time being, not much more than a financial treatment). Because it would be a huge mistake grasp, if one wanted to immediately after the introduction of the gold standard and Elimination of banknotes, the replacement of the latter in circulation by a corresponding increase in government paper money. Apart from Other serious concerns are contradicted by the fact that such an increase in the interest-free debt indirectly increases the burden the taxpayer means that without urgent and permanent proven need not to introduce new taxes at all,

least of all those whose economic consequences are not fully clear are overlooked and where in critical moments more than the tax amount itself is at stake. One would do well to order the transitional stage required by the monetary and banking reform use the most solid and simple means possible: for example, the mints and central treasuries of the state the obligation to protect against fraud deposit of coins or bars and payment of a small commission, coin notes that can be redeemed at any time (i.e. safe notes in the actual Without a doubt, we would be the perpetrator of the realization of an economic ideal that can be practically realized To have tried it out would be an achievement in itself).

It is therefore not advisable to simply increase the number of of government paper money in Germany, there are, on the other hand,

1) As soon as the German state paper money is consolidated and the Reich is Anyone who has acquired unconditional right of disposal by taking over the debt may at any Establishing a different relationship between the appoints of different nominal value, as the coin reform requires.

2) Dr. Heinrich Kämmerer from Hamburg, one of the few radical members the Bank Commission of the trading day (which consisted of nine bank directors, including President of the Main Bank Directorate in Berlin, Mr. v. Dechend, and a stately number of other banking interests), recommends in its separate vote with general banking freedom for all companies subject to the law on joint-stock companies cooperatives "Permission to issue banknotes with full cash funding under legally established control." The banks in question would be legally undertake to maintain a separate account and a separate cash box for the banknote business and to file a general lien on all holdings with the appropriate court this fund for the benefit of the holders of notes of their issue. Mr. Kämmerer thinks that the small premium that the recipients of the notes would be happy to pay I don't think so; moreover, the Creation of paper means of payment should not be left to chance remain than the minting of coins; in my opinion, the state has the obligation to provide the possibility of temporarily replacing metal with paper, just as well as he exchanged gold coins for silver coins and coins in general for Bars. Paper money, fully backed by cash, is nothing but a special Form of the coin. That the state is able to carry out all these simple exchange transactions to obtain it most cheaply and reliably requires no justification.

254

the financial circumstances of the federal states are such that even an immediate Abolition or significant reduction of the same, or the Conversion of interest-free into interest-bearing debt, great difficulties. Economically, too, the continuation consisting of 40-60 million Tlr. of paper money is to be considered harmless, soon as soon as it, with full state authority, meets all the requirements of free traffic throughout the empire.

This condition applies to almost half of the current in Germany circulating government paper money is not allowed; indeed, the treasury rate at the public treasuries is not for any of the existing papers obligatory, only tacitly and temporarily, one has now probably in all federal states the Prussian banknotes (rather because of the urgent need of a general paper, and out of courtesy towards the German supremacy, rather than out of love for their finances) a kind of exception. It can also be argued that the federal states are subordinate do not regard each other's banknotes as "money", not the slightest object, because these non-interest-bearing notes bear the issuing Governments continually charge interest, which, if they remain within the limits of the indebted State, as a tax, they are levied outside, as a federal donation. Also by introducing simple reciprocity, which in principle could not be rejected, would In this case, a just situation is not brought about, since it only provides a equal distribution of unequal burdens, not also of advantages Therefore, the federal states are still not only entitled, but to protect their financial national interests formally obliged to uphold the laws prohibiting "foreign" paper money But if one now distinguishes between the obviously just tendency these laws and the general traffic interests of citizens as against currently in Germany, such a decisive contradiction exists, that the public prosecutor would actually "embarrass himself" if he wanted to ual provisions in the individual case – then he The current paper money anarchy appears not only to be economically, but also as a moral emergency. Nothing damages the reputation of the state so sensitive than penal laws that no one observes, against which even the best called guardians of the law are absent daily and hourly; and in these The high contracting parties put each other in an embarrassing state of distress, who made an eternal alliance under the name of the "German Empire" have closed.

1) Two years after the founding of the North German Confederation, on April 22, 1869, In Prussia a "law concerning the restrictions on payment by means of foreign paper money and similar tokens in the newly acquired country= sharing", in which the use of not only foreign banknotes or other non-interest-bearing bearer bonds of foreign corporations, companies or private individuals, but also from foreign government securities

money, insofar as the individual pieces are denominated in less than 10 thalers, with a A fine of up to 50 thalers is threatened. (Collection of Laws 1869 p. 561.)

255

The legislative factors of the former North German Confederation have As is well known, the question of government paper money has already been dealt with twice On 2 June 1869, the Reichstag adopted a motion with a very large majority of MP Braun (Hersfeld) to the effect: "to encourage the Federal Chancellor

request that a bill be submitted to the Reichstag as soon as possible, which, in implementation of Article 4 of the Federal Constitution, the issue of state cash registers of the northern German federal states!" Since this resolution had no further consequences, the Reichstag in the ordinary Session of the year 1870, a motion introduced by MP Miquel and passed by MP. Grumbrecht amended bill, which also adopted by the Federal Council and became federal law?).

may be extended until the statutory period provided for by Article 4 No. 3 of the Federal ical determination of the principles governing the issuance of paper money by the Federal States only on the basis of a, on the application of the participating state government issued paper money or its issue should be permitted; the paper money currently in circulation should be replaced by to replace the confiscated stamps with new stamps, or

It is permitted to exchange paper money of a lower denomination nominal values are not replaced by paper money of higher nominal value become.

Neither this law nor the previous resolution address the actual state of emergency, even if they aim to aggravate the same

Already in the session of the Reichstag on 2 June 1860, Federal Commissioner Geh. Rat Michaelis argued that the difficulties the regulation of this question much less in the conditions of the future paper money issue, but rather in the order of the existing, paper money already in circulation, with which to deal he rightly sees it as a task not only of legislation, but especially and primarily the art of finance. He explained that if the Authorization of the individual federal states to issue paper money effectively ordered, ie limited according to the proportion of the population should be able to enable a larger number of federal states would have to bear very significant interest burdens. However, it remained at this hint.

The matter is simply this:

The aim is to achieve complete free movement and full state recognition any "money" that is issued in the name and with the authority of even the smallest Federal State. This demand is a natural consequence

1) See Stenograph. Reports of the Reichstag 1869, p. 1244ff.

2) Law of 16 June 1870 on the issue of paper money, Federal Law Gazette p. 507. The law was issued in Berlin on August 5, 1870 and came into force on the 19th of that month in the Northern German Confederation; furthermore on 1 January 1871 in Baden and South Hesse while in Bavaria and Württemberg its binding force only came into force on 1 January 1872 occurs. – See Stenographical Reports of the Reichstag, Ordinary Session 1870, pp. 574 – 58 and 708ff.

the economic unity and freedom of movement that has been achieved, on the other hand it is absolutely necessary that in a union of states the dignity and prestige of the individual members are not systematically ruined, which happens when the states publicly denounce each other as reckless debtors. In this respect, the reform is more "federalistic" than "unitary" – at least from the point of view of public morality.

However, if the Reich declares that the interest-free cash notes of the Federal Republic of states should be treated as "money" by all public coffers, In other words, the interest on interest-free debts of the federal states will henceforth be administered by the entire Reich and its members borne, or: until the moment when the repayment of these debts on the part of the federal states, the Reich itself becomes the debtor, and since the interest-free debts are also non-cancellable, it will probably remain this debtor for all eternity.

That the states with relatively low paper money issues, Prussia forward, cannot enter into such an agreement, of course by itself. In order to bring about the necessary reform,

either, to enable simple reciprocity, each federal

state immediately limited its paper money issue to a certain amount to reduce or increase the size of its population have;

or the Reich formally enters into force as a joint debtor and the

Settlement of differences between the federal states takes place on reason for a Reich law.

In the former case, the independence of the financial economy of the Individual states are only limited insofar as those whose interest-free debt exceeded the conventional amount, would be forced to To withdraw excess cash notes for cash or to convert them into an interest-bearing guilt, perhaps even a certain relationship between the pieces of different nominal values. Moreover, states would remain debtors and keep their own notes. For traffic This means of information would be sufficient, even if notes of the same shape and drawing is essential for facilitating control. On the other hand, individual states would face significant and lasting Burdens arising from the issuance of interest-bearing bonds.

The situation is quite different if the German Empire interest-bearing debts of the individual states. The Reich can set deadlines permit and grant relief, just as general taxes The Reich is in a position to initially give the states their entire accept interest-free debt and the terms of interest and gradual amortization as cheaply as possible. On this I would like to place particular emphasis on the latter point. If you want to get what is to wish that the reform in question will soon lead to a mutually satisfactory

efficiency, the states whose financial strength are mainly used, offer certain advantages,

Perrot, Bismarck and the Jews. 17 257

while the states that are in the favourable position to regulate to stand as creditors of the Reich, must renounce a brilliant to do business. It should not be forgotten here that the interest-free public debts date from a time when the reconstruction of the Reich of the German Nation was not yet mentioned, for reasons and conditions, in the design of which today's financiers mostly have no share!). In particular, it must also be considered that the Reich's constitution gives the Reich the right to regulate the "principles" of the emission of funded and unfunded paper money, that this timing but chiefly be given retroactive force in this way can allow individual states to enact laws without their consent. right of disposal with regard to their older liabilities From the negotiations in the constituent Reichstag (1867) it is I am not aware of anything that would justify such an interpretation.

In general, it is a law that has a general Understanding between the federal states must be the basis, actually a compromise law. On the one hand, there are the states with great Paper debt: the debt that can be taken from them and transferred to the Reich wants to bear, does not press them too much, because they do not have to pay interest; Of course, for all sorts of reasons, they are quite happy to get rid of the odious paper money but because of the interest they are looking for a solution as long as possible. On the other hand, the states with low paper money emission: they claim that their coffers are filled with previously unknown banknotes, so that they not only a foreign non-interest-bearing debt, but in fact also its interest accept that they must therefore be compensated in full. Among the latter states, Prussia has the decisive say; But we can expect even more self-sacrificing dedication from the Prussian government. feels in this matter, as not only the non-interest-bearing Prussian cash notes, but also the notes of the Prussian bank regarding their circulation in German "abroad" so far more favourably than the paper money of any other state. It is here of course always assuming that the privilege of the Prussian Bank ceases to exist at all or at least as a Royal Prussian privilege; Because of the significant share of the state in the profits of these Bank is about half of the issued by the same and not redeemable by cash covered notes to the account of the Prussian government, i.e. if not legally, then at least de facto as Prussian state paper-money. If one considers only 35 million Tlr. Prussian Banknotes for the interest-free national debt of 18 $\frac{1}{4}$ million thalers, fo

1) One of the few exceptions is the Württemberg non-interest-bearing bond of July 16, 1871 in the amount of 3 million guilders. This has not yet been issued, but

but still room for maneuver until 1 January 1872, since only on this day the Reich law of 16 June 1870 on the issue of paper money in Württemberg (as well as in Bavaria) has acquired binding force.

258

At present in Prussia per head of the population there are 2%/,; Ir. Paper money, the interest of which does not go to the state as such, but to the Prussian or German public. Without the abolition of the banking privilege, Prussia would not be one of the states with "low paper money circulation"; it would voluntarily engage in similar Location, like Oldenburg opposite the Oldenburgische Landesbank.

My suggestion now is:

The states with paper money overload in general from the interest on debt exceeding their population rate= amount, but to impose on them the obligation to amortize this amount within 25 years, annually at 4% fieren; furthermore, the amount of the substituted treasury notes to be issued issuing Reich paper money to $\frac{1}{2}$ Tlr. per capita to be determined.

With the prospect of having completely settled its deficit after 25 years, It cannot be difficult for the States concerned to to agree to an immediate settlement of the paper money issue. Standardizing the per capita amount to 1 Tlr. brings for the whole Reich an increase in the currently circulating paper money by about 4% million thalers with it, but is due to the fact that several states with a total of 2 million inhabitants do not have their own paper money at all, somewhat justifies and significantly reduces the amounts to be amortised. This new interest-free debt of the Reich is only supposed to be a supple= mentary character and as a repayment subsidy of 4% annually to the individual states in accordance with the law. Its sole purpose is to protect states with large interest-free debt to temporarily dismiss them and make them more inclined to reform.

How the financial obligations and rights would be structured, can be seen from the following table. It should be noted that that the headcount of the population is the number of local state officials belonging to the population, as in the calculation of matriculation contributions, The figures given for Bavaria and Alsace=Lorraine are not based on payment, but on calculation or estimation. the census of December 1, 1871, the whole table should be a substantially take on a different form, since the population is not only the basis for the legal share in the general paper money circulation, but also the calculation the differences and amortization rates. Furthermore, it is not It should be noted that in the table the "amount of interest-free debt" the amounts actually issued are indicated (including the still the 3 million guilders of the new Württemberg to be issued this year=

Bergische loan of July 16, 1871 and that of the Oldenburgische Landesbank transferred 2 million Tlr. of Oldenburg state paper money); while When implementing the consolidation proposed here, only the exchange presented pieces of the different issues into consideration would come, but experience teaches that with every redemption, especially

certain amounts are missing from the smaller appointments. In addition,
 we refer to the “proof of
 Paper money issues of the states of the North German Confederation”, printed
 in the Annalen 1870, p. 117.

The law concerning the issue of an interest-free loan
 on the part of the German Empire, would be something like this:

8 1.

The following, contracted in the form of paper money (cash notes, etc.)

uninterest-bearing bonds
 (follows the list and detailed description of the bonds)

are transferred as a common interest-free debt from the German Reich
 taken, with the proviso that the funds in the designated cash registers
 presented pieces (cash receipts, etc.) of those bonds from the day of
 From the date of entry into force of this law until January 1, 1873 against new Reichs=
 cash register receipts can be exchanged.

On the amount of the delivered and exchanged state treasury notes
 In addition, Reichskassenscheine are only issued on the basis of the
 provision in paragraph 4 of section 2 of this law.

82nd

Up to the amount of 1½ thalers for each head of their count
 from 1 December 1871 as resident and citizen
 Population can make claims to the individual federal states on the part of the
 German Empire may not be raised.

If this amount is exceeded by the nominal value of the government bonds exchanged pursuant
 cash register receipts are exceeded, the relevant federal state has the resulting
 difference in annual installments of 4% until complete extinction

to be paid immediately to the general treasury of the Reich.

On the other hand, the nominal value of the state treasuries exchanged for \$ 1 remains
it seems to fall short of the amount mentioned in paragraph 1, the relevant
Federal State the resulting difference in annual rates of 4%
until full compensation from the general treasury of the German Reich
to get paid.

Insofar as these payments are made pursuant to paragraph 2 of this section
amounts to be paid to the Reich Treasury are not sufficient, the same
by means of interest-free Reichskassenscheine. (See § 1, paragraph 2.)

§ 3.

The Reichskassenscheine are issued in denominations of one third each.
values of 100 Tlr. and of 50 Tir., and each to one sixth in such
of 25 thalers and 10 thalers). An obligation to

5 This draft obviously does not take into account any of the
the changes necessary for the coin reform.

261

State Treasury notes set up for exchange, pieces of one and the same
There is no obligation to sell the shares at their nominal value.

§ 4.

The Reichskassenscheine are used for all payments from and to cash registers
of the German Reich and the federal states at their full nominal value
assumed.

§ 5.

From 1 July 1872, the State Treasury Notes will no longer be issued in public
treasury as payment, but only for redemption against Reich treasury=
feem to be accepted at those treasuries which the Reich Chancellor
will be right.

From 1 January 1873, state treasury notes may no longer be issued
passed on or offered in payment.

The received state treasury notes are destroyed by fire
and the amounts destroyed, specifying the series and the nominal value
the pieces were made public).

§ 6.

On the investigation, detection, prosecution and punishment of forgery samples or imitations of Reichskassenscheine, except the relevant provisions of the Criminal Code of the German Reich, the legal provisions previously enacted in the individual federal states on the detection etc. of counterfeiting or imitation of cash registers instructions or forgery of public documents.

8 7.

The provisions of the Act on the management of interest-free debts shall apply of the law of 19 June 1868, concerning the administration of the custom Federal loan to be issued under the law of November 6, 1867 (Federal Law Gazette 1868 p. 339 ff.).

The expenses arising under the present law and revenues are to be added to the Reich budget every year").

§ 8.

All provisions contrary to this law are repealed.

1) Pgl. according to § 17 of the Prussian Law of 24 February 1850 (Collection of Laws 1850, ©. 573.

2) You would have to appear here in two places: once at the administration the federal debt, then in the matricular contributions, where the individual federal differences to be paid or received by states are to be calculated in a similar manner would be, as previously, the shares in the postal surpluses, the discounts on the embassy costs.

262

The instructions necessary for the implementation of this law shall be issued the Chancellor; the treasuries where the exchange of state funds think against Reichskassenscheine, the same determines according to appointment of the Federal Council's Committee on Accounting.

Finally, I expressly state that I support the proposed Standardization of the amount of the interest-free Reich debt at 1½ Tir. per capita of the population only as long as the States which face heavy burdens from the reform, on a wide scale: In principle, I am in favor of complete abolition of interest-free government paper money, in the firm belief that "coin notes" that can be redeemed at any time and are fully covered by cash, the issue of the state for a small fee that only reimburses the costs

to mediate the interests of the whole in the most perfect would be served; especially the interests of the civil service and the so-called Working population, whose income consists of fixed salaries and wages and which are referred to as the "financial operations" of the so monstrously pampered big capital first and foremost. However, a sudden abolition cannot be expected now. the speech; if the friends of the same on the generally favorable state of our public finances, especially on the French war reparations, with the help of which the repayment of the interest-free debts must be easy, so the financiers not without reason that the German Empire, with its current conditions, With 50–60 million thalers of paper money, neither currency differences nor other difficulties to be expected. As things stand now, the careful avoidance of any attack on "legitimate property" abilities", one will have to be happy to initially achieve a cheap consolidation of the German government paper money, the gradual reduction and leaving complete abolition to the future.

Munich, end of September 1871.

Postscript. A recently published brochure by Mr. HV v. Unruh) is therefore of particular value and interest because it reasoned judgment of someone who is intimately familiar with our economic situation, in the legislation and control of the Prussian financial system experienced and yet completely independent and unbiased man on the solution of the next practical task in the paper money question,

1) These disadvantages, which the author had already foreseen at that time, are found in today's time (Danat=Banken) has become the truth in its most blatant form.

2) The banking question before the Commission of the German Trade Day examined by HV von Unruh, Member of the Reichstag. Berlin, J. Springer, 1871.

263

namely the reorganization of the relations of the Prussian Bank. It is also of particular practical value that the author deals with various scathing criticism, first of all, against the decisions of the Trade Day Committee appointed commission of so-called "experts", as is always useful is – we did this last year on a large scale in our western Neighbours experienced, – when a pseudo-authority has a firm hand on it Mr. von Unruh has earned the merit of Took the trouble to create a flower reading of bank= from the qu. trading day report theoretical sayings, all of which come from the mouth the expert majority. We share them as important "Material" here, adding that the sayings to a to e are from an An= supporters of the central bank monopoly, those to d to f from the friends of the

private note banks.

a) "The advantage of banknotes is that they allow a certain amount of capital create, in whose interest one participates!?"

b) "The note is a representative of easily realizable bills of exchange."

c) "The circulation of banknotes is similar to the circulation of paper money and therefore demands the highest standards of trust and security!)"

d) "Banknotes must not be considered as a form of paper money. They are a form of credit, a form of business, and must therefore be free, like any other form of business."

e) "The most ideal state for the existence of the circulating medium is much easier than that of any bank-like, at the bank behind bills of exchange for the corresponding amount are issued would, but that no note without such a deposit would circulate may."

(f) 'The possibility of regulating circulation in unlimited quantities by means of notes without full metal coverage, must be given, because an absolute limit for the need cannot be determined", etc.

Now combine a with f and you get the very profitable formula:

"The advantage of banknotes is that they allow a certain amount of capital to be stored in order to create a quantity in whose unlimited interest one can participate unlimitedly zipiert" .. . Man – that is, the happy holders of bank shares.

The partly contradictory "resolutions" of the trade tagsskommiffion, which called for the preservation of the Prussian Bank as a "Reichsbank" recommend the establishment of private note banks but by special concessions and only subject to compliance with normative conditions, namely the $\frac{1}{4}$ cash cover)), Mr. von Unruh countered the following, strikingly motivated theses:

1) Mr. v Unruh did not take up this sentence, but it is no less interesting. Effant than the others, especially in conjunction with a and d.

2) Regarding b of the normative conditions it says: "The amount of notes issued shall be the fully paid-up share capital"; in contrast, Resolution IX states: "There is a gap between the amount of the note issue and the amount of the share capital internal connection is not; the share capital has only the meaning of a guaranteed capital."

expressed, tax the public partly in favor of the bank themselves, partly in favour of those who want to use bank credit as widely as possible want to exploit.

2. It is not a children's fairy tale, but a naked reality that notes and all paper means of circulation the export of metal money favorable, regarding the same out of the country.

3. Cheap money – high prices of goods, expensive money, low prices; The next consequence of the artificial price increase is one that is not natural harm to consumers and all those affected by the situation who live on fixed wages and salaries. Non-metal covered Notes are the enemy of cash, both gold and silver.

4. The most serious consequence of money made liquid through paper and the resulting artificial increase in the price of goods lies in the stimulation of unhealthy speculation. The natural limit which the supply of cash otherwise sets for speculation, has disappeared due to the printing press.

5. The danger of major crises is not reduced by large-scale banknote issuance averted, but by stimulating and facilitating the over-speculation and overproduction are made considerably easier.

6. The State can at least do nothing to grant a share in the profit of a bank an equivalent for the exorbitant obligation to accept banknotes in public treasuries. Such a Speculation is not based on sound financial policy, but is nothing but the application of banking policy to the state finances.

7. The state has no reason to issue notes not backed by metal in fine boxes under all circumstances and at all times in full payment gain weight.

Mr. v. Unruh sums up his program on the banking issue with these words: together: "We strive for restriction and gradual fideation of all notes not covered with metal, possible Restriction of all paper money in general and free-issue of deposit and giro banks. We want We should neither lose sight of this goal nor stray too far distance, but also not rushing. We do not think it dangerous if a well-founded and well-organized bank still has a For a number of years, a quantity of non-metal-backed notes in circulation which with its metal stock and other, always in metal to be converted is in such a ratio that a stoppage of cash redemption can never occur. After the introduction the gold standard will soon show whether and when this artificial increase in the circulating medium is still necessary or not."

This program could have been a little tighter,

must be more radical. Mr. von Unruh compares the previous Banknote nonsense with the equally reprehensible protective tariffs; these too should not be abolished suddenly, but gradually, if one did not want to cause the most sensitive embarrassments and losses. So it fits but not the example: the protective tariffs!), which, moreover, in Germany country behaves towards the note banks like a mosquito to an elephant, only cover individual necessities of life, while the unbacked paper money life in general has become more expensive and continues to lead to the worst abuses among the entire "fixed population", i.e. the civil servants and wage earners workers. All salary and pension increases, all wages increases with or without strike are only very imperfect expedients?); As long as the state maintains "money" as a legal means of payment and exchange and does not strictly ensure that no one "fabricates money", because he himself, so long one cannot speak of a solution to the social question. The gradual abolition of unbacked banknotes or the legally permitted abuse that individual private individuals use for their own benefit. From a purely economic point of view, doing so means as much as if one were to speak of the vigorous prosecution of a counterfeiter= society only wanted to avoid it because the discovery would make liable to protect the interests of the temporary holders of false money feared harm.

I think that, for reasons of justice alone, the state may like endowment of the note banks cannot continue for a moment longer let go when he is forced to. "In money matters, comfort ends", say the executor and other people; and opposite the paper banks Should the state completely forget this true word? Just think, not the current "money", but grain formed the general legal currency= and means of exchange, and speculative minds have succeeded in "supporting" of traffic not only instructions on grain, but even legal to put recognized paper grain into circulation; one is finally behind the fraud and its dangers for the people (especially the country)) economy come, but do not dare to prohibit it all at once, and

1) Over the last 6 decades, protective tariffs have been used to bring the farmers and the workers into opposition to each other.

2) With the constant fluctuations and devaluations of money, which primarily on artificial manufacture, and only secondarily on natural production increase of the latter (ie, precious metal production), it would be actually fair that all fixed salaries and wages are not paid in money, but in kind paid, or at least at short intervals according to the respective prices of the Natural resources necessary for life would be assessed. Of course, this would require that the taxes would also be corrected or calculated in a similar way. All our Tax, salary and wage rates are based on the false assumption that the "Money" endowed with state authority or giving the appearance of such authority is a have a fairly constant exchange and purchasing power; but this is not the case, with each

Million thrown into the world market in metal or paper, the Power of money. The feeling of this process is the "healthy core" that is in the strikes.

266

the paper=grain=manufacturers received for a considerable transitional period permission to continue their cheap competition with the honest farmer= to add! But in the case where fi) the farmer would find himself, is currently the entire population – with the exception of those who "Percentages" where the greater or lesser value of money plays no role.

If, after the expiry of the various banking privileges and after implemented gold standard for a certain transitional period really still a need should be met by means of cash not covered by paper money, only the state has the task of creating such a thing; probably enough The current government paper money circulating in Germany, whose Consolidation is recommended above. In any case, normal conditions in our money and price relationships only then will a ge= A sound basis for solving the social question can only be achieved when the state will have taken what belongs to the state alone: money= shelf.

3. Bismarck and Perrot and the 5 Ara=Articles from 1875.

(Based on an article by Karl Perrot.)

This book was hushed up, bought up by the opponents and made it disappear. Perrot was not wealthy enough to reprint His brother also searched in vain for a publisher Even after Bismarck's death, fear of him still had an effect after and before the clique whose intention Bismarck had carried out.

The reader has been able to convince himself that the content, apart from the smaller numbers of the conditions at that time, with every word on the is to be applied today.

All of us who lived through the time before the war as thinking people with= can tell you that in the Second Reich the people were much better off than today, but only rarely an inventor, a

a devilish idea that did not fail to have the intended effect. Since
the Reformation, the Hohenzollern princes' aspirations were always
to balance the confessional differences among the people – the
To maintain peace between the different Christian denominations.
They had succeeded in making religious passions sleep.

A small conflict arose between the Empire and the Roman
Curia, as such have often existed in the course of time. As with
As on previous occasions, it would have been possible to
diplomatic means. Here, however, the Alliance-Israelite
a welcome opportunity to divert the anti-Jewish
and his influence. The Jewish gazettes,
led by the “Berliner Tageblatt”, blew a fire that had been burning for centuries
for the good of the people. It incited the Kulturkampf. Bismarck, as
convinced Protestant, did not notice the trap set for him and went with the
his own enthusiasm against the Curia. The old unfortunate dispute between
Catholicism and Protestantism flared up until finally a powerful
word of Emperor William the Great put an end to the dispute.

But the purpose was achieved – the people and the Chancellor were convinced of the
Jewish question has been thoroughly diverted.

But Dr. Franz Perrot did not allow himself to be distracted. With growing

He was concerned that the Jewish influence on Bismarck was becoming ever greater. In the meantime, many German-conscious men shared his concerns.

How he launched a second general attack in the "Ara=Articles" against Bismarck's His brother Karl Perrot describes again in the earlier mentioned journal:

The publication of the following historical memoirs appears to me at the end of my fighting life as a double duty, because the few who have written about the significant period of the so-called "Ara=Articles" have dared to speak freely, have so far been hushed up, and I as the only surviving brother of Franz Perrot owns the almost forgotten Material that helps to explain the turning point of the German economy at that time history. In this fight for the noblest goods of Germany My brother was almost alone. I helped him honestly and to the best of my ability as Employees, but ultimately he is in this so unequal battle and, despairing of the good cause of the German people, departed from this world, while throughout my life I carried the hatred our powerful opponents must feel.

Prince Bismarck, in his "Thoughts and Memories", refers to the Ara=Article in the chapter "Break with the Conservatives" on page 153/154 but remarkably avoids getting to the core of the It deviates from the main issue at hand, which is the direct influence of his trusted banker Bleichröder implemented totally misguided and harmful financial and economic policies, which, despite the most brilliant conditions, led to the great crisis in 1873 He only finds a few very harsh words about

269

the author of the articles. – Dr. Franz Perrot is never a "Bismarck=enemy". He even valued him very highly and had him during the so-called conflict period, when he was misunderstood by the whole world, with all warmth But Perrot had the rare courage, even though with a heavy heart, to take up the fight with the great Chancellor when it became necessary, and he has at least partially triumphed in this. –

The first effect of the Stock Corporation Act was the already mentioned great green era until 1873 and the subsequent collapse.

This was what the conservatives rightly said to the great chancellor and what caused them to rebel against the powerful influence of a without responsibility behind the scenes, like Bleichröder, and against the organized by him and his followers, the interests of the financial and economic policy that is contrary to the interests of the German people This was also the main reason for the rift between the Chancellor and the Conservatives; everything else that is being defended is of a secondary nature been.

But since all the conservative ideas were unsuccessful, fo Perrot made the editor-in-chief of the Kreuzzeitung, Mr. v. Nathufius= Ludom, Mr. v. Dieft=Daber and especially Mr. Dr. v. Wedemeyer, the a great influence in this party, the proposal to replace it with a sharp attack on this system in the press to the great Chancellor a different financial and economic policy and to limit the influence the banker Bleichröder and the ministers acting in his interest Camphausen and Delbrück – and in this way the so-called Ara articles.

When my brother showed me the first, much sharper draft, When the original, published a little later, was read, a tension developed between us the following conversation recorded by me:

"You attack the man of the century here in an exceptionally sharp manner
"Can't you soften these articles a little?"

"I am not attacking the man of the century, but the millennium, which he has left his mark on. One is not the friend of a great man, if you know everything that he does, is called blindly good, but when one warns him of mistakes warns and seeks to correct them. I want a shadow from his name and, if necessary, to another, our common German interests force a sensible economic policy. The great Bismarck can only be done with red-hot iron, not with rose water– be forced and therefore I cannot and may not weaken."

"Couldn't you and your conservative comrades have another try make, in a friendly way through personal influence this goal to reach?"

270

"No, Roon, Wedemeyer and Dieft=Daber have already made this attempt repeatedly made in vain. Unfortunately, the great Chancellor does not tolerate any charactere, but only creatures beside them."

"Suppose you actually had the desired success, and it you would succeed in destroying the pillars of the current system Camphausen and Delbrück to throw you down, these falling pillars would crush you too. Because with the cult now being practiced with Bismarck, you would undoubtedly become impossible for a longer period of time."

"I am fully aware of that. But someone must tell Marcius Curtius, who is jumping into the breach here."

"Then let's go for it in God's name!"

The articles about "The Ara Bleichröder=Delbrück=Camphausen and the New German Economic Policy" in issue 148 of the "Neue Preußische (Kreuz-) Zeitung" on 29 June 1875. Some young politicians today talk about them without even knowing them.

We reproduce the articles here in their original wording:

Ara=Article. From June 29, 1875.

I:

Rarely, perhaps never in world history, is a period of time for a grandiose national economic policy would have been more favorable than the period after the war of 1870/71 was for Germany.

Perhaps never before in German history was there a time more concerned with making great contributions to the lasting welfare of the nation to achieve more creative work than in the last four years, and perhaps never has a great economic moment been more miserably frustrated, regrettably more stunted, more completely botched than the time of the French billions in payments in Germany.

The immortal merit of these extremely outstanding Results of our latest German national economic policy achieved However, this should be attributed to Mr Delbrück and Mr Camphausen fein.

In the recent 77th session of the Prussian Deputies= hauses, Mr. Camphausen replied to Mr. v. Kardorff that he renounced "to his friend Delbrück" the right to work for the "in= to be regarded as the "intellectual author of our entire economic policy". However, we are not entirely sure whether the time limit for Mr Delbrück is not point where he will honor this "intellectual authorship" would like to reject it, and according to our knowledge the circumstances, the honor of this "intellectual authorship" is likely to Even Mr Delbrück hardly completely, or even in the main can be blamed, – this honour will surely be in the last instance from the great financial-national-economic spiritus familiaris of the new German Empire, the – Mr. v. Bleichröder claimed

271

It seems absolutely necessary to inform the German public as completely as possible about the enormous merits of Mr. G. v. Bleich= Röder, since he, in extremely well calculated modesty, extremely carefully avoids his extraordinary services to the new German national economy and the evaporation of the wealth without leaving a trace liarden to come into the light of publicity. And since the large so-called "national liberal" press prefers to be in the hands of religious

enjoyed, or more or less directly or indirectly dependent on them
People, the intention of his modesty has so far been entirely
been crowned with success.

Mr. G. v. Bleichröder is, as we add in parentheses,
Mosaic faith and ruling banker, the former incidentally
almost automatically follows from the latter, since, for example, in 1861 in Prussia, out
Of the bankers, only 92 were Christians, while the remaining 550 were Jews.
This, however, as I said, in parentheses.

If the financial and economic policy of the new German Reich
and, respectively, also of the North German Confederation on unbiased ground—
judges constantly have the impression of pure banker politics, ie a policy
by and for bankers, this could not be done under the circumstances of the
The people in charge of these matters are not at all surprised,
because Mr. G. v. Bleichröder is himself a banker and Mr. Delbrück is a relative
of a bank — Delbrück, Leo & Co. — and Mr. Camphausen is the
Brother of a bank — Camphausen & Comp.

If at the same time the monetary and economic policy of the German Reich
always the impression of Jewish politics, ie by and for Jews
Politics and legislation, this is also very understandable, since the
intellectual originator of this policy, Mr. G. v. Bleichröder, himself a Jew,
and the minority of banking businesses operated by Christian owners
only the policy of the banking majority can and does drive, as
because in every respect the management and leadership in this area is complete=
come into the hands of our fellow citizens of the Mosaic faith.
In addition, our fellow citizens of the Semitic race and the Mosaic faith
at the same time the intellectual leadership of the legislation in our representative bodi
bodies — with the exception of the manor house, of course.
Messrs Lasker, Bamberger and the two close friends, admittedly only
Mr. HB Oppenheim, who recently came to the Reichstag, is Jewish
and are the actual leaders of the so-called "national liberal" majority of the
Reichstag and the Prussian Second Chamber. Mr. Miquel represents
the Christian minority of banker liberalism, which is associated with the
femifc leadership through thick and thin. What is new in this way
German legislation in favour of our German banking business, which,
as mentioned, are predominantly in the hands of Jews, in the ruling
banking circles and with the support of the Jewish leaders of our parliament
policy is desired and planned, that supports, propagates and promotes
with never-ending zeal and great skill, at least in

272

most of their governing bodies from our fellow citizens of the Mosaic faith
partly dependent, partly influenced so-called "national liberal" press in thousands=
harmonious echo throughout Germany.

The expression "Jewish policy", which we used above, is
not familiar to the German public, and even appears to them

as inadmissible. There are very obvious reasons for this. We will yes, actually ruled by the Jews at the moment. In quite correct Wür= However, due to the circumstances, they do not wish that the country they govern German audience of Christian religion the behind the scenes golden wire ropes, by means of which the very cleverly laid mechanism of the existing monetary government. In general The public of Christian religion and German nationality should also Government as what it is, as long as possible not to recognize and For at the moment in which the Christian German Population becomes aware that the Jews in Germany, like all= forward, systematically and systematically, a comprehensive and highly skilful pursue a policy that is almost exclusively aimed at the benefit of our fellow citizens of the Mosaic faith and Jewish nationality, – at the same moment, we say, in which the Christian German Be= population becomes aware of this, there must of course also be a reaction against the extremely subtle and cleverly combined stock market policy, and it can be considered as= then the position of the Jews in our state life is not unaffected by this remain.

But since our so-called “national liberal”, but essentially thoroughly Jewish stock market political press any such enlightenment to the German To keep the public away from Christian religion as far as possible fought, we will, in order not to be seen as uncomprehending zealots or unchristian-intolerant Hepp=Hepp=Rufer, holding the hand the facts will probably have to become clearer, as we have until then in these brief hints could be.

II.

When such significant changes take place in a country as 1866 and 1871 in Germany, the circles of high finance, which, as we have seen, consist of more than five-sixths Jews, such To follow changes not only passively with the greatest interest, but they also actively seek to exert their influence as far as possible to bring such men into the decisive positions, which is as favorable as possible for Jewish banking and stock exchange operations Promise to take a stand. It is the governing banking not indifferent who is President of the Reich Chancellery and who is Prussian-German Finance Minister. Yes, the wisdom and foresight of the governing

1) Even in the 1970s, this was a disastrous situation for the German people. state reached.

Perrot, Bismarck and the Jews. 18 273

Jewish banking business goes so far that it not only affects the states as such through loans, try to make themselves as dependent as possible, but

also seek in principle, ie for reasons of the designated monetary dominance= politics, with the leading statesmen as many personal-financial to gain points of contact.

So we know that the debts of Mr. v. Beuft at that time were the same always in close contact with the high financial circles, and it is almost self-evident that Mr. v. Beuft has fine information about the direction to be taken in financial and economic policy in Austria especially among the highly financial circles that are so close to him There are even reports available which show that surprising fact that Mr. v. Beust became leader of the Austrian state fortunes, with the debts of Mr. v. Beuft and the influence of the highly financial circles in Vienna It is a well-known fact that with the Ara Beuft in Austria at the same time the great era of stock and stock market fraud came into being, which was supposed to bring about an "economic upswing"), whereas in reality Austria is on the brink of economic ruin brought closer, while the highly financial patrons of the Lord v. Beuft had rich harvests.

Even with Prince Bismarck, even before he became Minister in Prussia was made, high-finance circles came into contact. The intimate Mr. von Bleichröder's relations with the Prince may, at least indirectly, ftill the pre-ministerial time of the prince, when he, in order to with a meager Prussian ambassador's salary and without significant assets to represent his sovereign in Petersburg, Paris and Frankfurt but had to have good advice in financial matters.

It is now a very obvious conjecture that at that time, when it was acted, the fo significant position of a President of the Federal Chancellor= office, the advice of experienced friends, which has already proven itself from the financial circles knew how to insinuate themselves easily, in order to to a man who not only has the outstanding ability of Mr. Delbrück, but also as cousin of the Delbrück Bank, Leo & Co. with a likely greater understanding of the interests of banking and stock exchange circles, which was reported at the places mentioned in any case, the necessary information was not missing.

The economic policy inaugurated by Mr Delbrück supports this Conjecture more than sufficient. A minister and President of the Reich Chancellery, who is able to proclaim from the tribune of the Reichstag that the secret of our time is "not to lose interest", fufficiency, judging from this alone, is likely to move in terms which could not be more desirable in our financial circles. Traffic His Excellency with these circles in the so-called Millionaire Club in Behrenstraße

1) Who does not involuntarily draw comparisons with today's times?

in Berlin does not indicate a great difference in views. As is well known, Mr. Delbrück has been close to Mr. Camphausen for some time friends, and this friendship of the two bachelors, as well as the equality of the quality of financial and economic views is likely to have been not have been ineffective in order to qualify Mr. Camphausen for the position as Finance Minister in Prussia and thus also for Germany recommend.

III.

Mr. Camphausen, we said, may have had an intimate friendship with Mr. Delbrück and the relatives of the political-economic scientific views mainly his elevation to the ministerial post At the same time, however, and almost self-evidently, the Camphausen's financial views on financial and economic issues to the leading financial circles were known and pleasant. Therefore it happened that Mr. Camphausen, who was previously President of the Prussian Sea Trading Company was immediately attacked by the entire so-called "national liberal", mainly directed and inspired by our fellow citizens of the Mosaic faith, the press, which is incredibly dependent on financial circles, in all keys and praised to the skies. Only the then Lord The "Post" belonging to Strousberg made lively opposition. It is said that Dr. Strousberg felt himself called to be Finance Minister. Perhaps he also wished his powerful tribesmen the future Minister not.

In informed financial circles, Mr. Camphausen was already known as Head of the Seehandlung known as an exceptional friend of the stock exchange, and shortly after Mr. Camphausen joined the Ministry of Finance we were able to obtain from the best-informed sources the statement hear: "Do not expect anything from Mr. Camphausen, – he is one of our biggest – let's say, stock market friends." Of course, this could High finance circles only recommend Mr. Camphausen to the utmost Such a minister had to be highly capable of managing German finances to conduct in its greatest epoch entirely in the spirit of those circles.

The two Dioscuri Delbrück-Camphausen worked together since then in the financial and economic rebirth of the North German Confederation and then the new German Empire. But how far both gentlemen have the "intellectual authorship of this rebirth, This requires further elucidation. We have already noted that Mr. Camphausen has flatly rejected this authorship. We only suggested that Mr Delbrück was unlikely to be the "intellectual authorship" of the new German financial and economic policy will be inclined and able to claim it for themselves if one abstracted from the more innocent and less significant measures. And so our attention was focused on the highest government circles so close to Mr. v. Bleichröder.

As already indicated, as everywhere, also in North Germany Federation and German Empire, the high finance, which mostly consisted of Jews keep a watchful eye on the state finances and economy policy, and do not omit anything that may affect the course of this policy in any way can have a beneficial effect on their minds. So, above all, the highest ruling banker in every country, who of course is always a Jew, an extraordinary interest in working with the leading statesmen and those who could become so, to be in intimate relationships and situating himself towards them so that his advice regarding the financial and economic matters, always heard and, if possible, That Mr. v. Bleichröder, who is also in Berlin Representatives of the also ruling Rothschild family are to position themselves seeks, and does not lack success, is basically self-evident and lies in the nature of the circumstances. It is known that Mr. v. Bleichröder with the Prince=Chancellor often. And with how cautious clever calculation Mr. v. Bleichröder each not absolutely unavoidable Even if we avoid personal public appearances, we are sufficiently informed that the same not only in the personal financial affairs of the Prince=Chancellor, but also regarding the Reich, financial and economic policy successfully heard his advice The fact that sometimes detours are used, sometimes intentionally with the required selection of third parties is pushed forward, nothing to the point. Mr. v. Bleichröder behaves so cautiously, that he is never actually seen in public, that not even his photograph=graphy in the shop windows, nor his portrait and biography in the He only wishes to be behind the scenes as a great To act as director of the comedy. Because we know from good sources that the most important financial laws of the new German Empire are thanks to the "intellectual authority" of Mr. v. Bleichröder.

To the influence of Mr. v. Bleichröder on the Delbrück=Camp= In order to appreciate this, one important fact cannot be overlooked. The Prince Chancellor has, as far as our judgment and our in= formations of any kind, the consortium Bleichröder=Delbrück=Camp= hausen the intellectual inspiration of the New German economic laws fitus was given completely in Enterprise. The otherwise so penetrating The prince's understanding, his practical view and his eminently independent judgment, seem to be deliberately placed in the face of questions of economic legislation To stop and leave to the same men whose position we are trying to clarify here.

IV.

That the new German financial and economic policy is based on wonderful Ways of changing, leading to great failures and incalculable damage

was to those who did not swim with the great current,
has long since become clear.

276

There was the Stock Corporation Act of 1870, which gave us the entire founding and agiotage fraud of recent years, – a law, which Dr. Lasker declared in 1873 to be “piecemeal”, after he had it helped to do and accepted without hesitation.

There is the most complete possible evaporation of the billions!), without thereby creating some substantial and lasting benefit for the nation a first-rate achievement. Minister, who gave banking business and were less close to the stock market powers, as the gentlemen Delbrück=Camphausen, would have used the billions of dollars to build the Reich and the federal states from the debt subservience of the banking transactions of our Israelite citizens and to establish a state economic system inaugurate the facilities dedicated to the general benefit= to deliver without having to pay tributary charges to the banking business and to become and remain dependent on them. The danger that such could really happen, was eminent, and our Jewish fellow citizens should congratulate themselves that in Germany and Prussia two ministers are at the helm were, like Mr. Delbrück and Mr. Camphausen, and that a banker how Mr. v. Bleichröder gained the ear and trust of the leading German statesman and his fellow ministers. The fact is that certain Circles threatening danger of a healthy and rational German financial– and economic policy, which limited banking operations to a modest, reduced to the extent that it meets real needs and the Börjen– fwindle would have put a strong stop to it, but was fortunately avoided.

But not only Messrs Bleichröder–Delbrüd–Lamphaufen can do this merit, but also to the Reich and Landtag under Led by Messrs Lasker=Bamberger and supported by Messrs Oppen= heim=Miquel=v. Kardorff, his share in this service must be vindicated.

The crown and the main piece of the billions of dollars evaporated is in any case the famous “disability fund”. Despite the best and finest financial policy in the sense of our stock market dominance, at the end of all ends, of the billions still a lump of pp. 200 million thalers left over, with which one would have been forced to do something useful without making use of Jewish banking Then Mr. v. Bleichröder made the rare discovery of the self– depleting disability fund. That the Reichstag has approved this crowning achievement of our financial building without any significant objection is one of the most incontrovertible proofs of the profession of our time to legislation.

Last but not least, among the major financial laws, we highlight the Ara Bleichröder=Delbrück=Camphaufen nor the creation of those great privileged central joint-stock bank, which was called the Reichsbank

and whose task is to control the German debt system
even more than before in the hands of the most powerful of our bankers
Our two isrealist fellow citizens Bamberger and Lasker

1) This refers to the 5 billion paid by France to Germany in 1871.

277

In the Reichstag, the following people have been working to establish this institute:
outstanding achievements. The nation has benefited from their leadership in this
enormously important question with unlimited confidence after
which was inspired and ruled by them and their co-religionists.
"national liberal" press had long since persistently kept quiet about everything
which led to a healthy enlightenment of the relevant circumstances in the public.
niffe could have led.

Banking, stock and stock exchange privileges are, as the things
They are therefore protected by the
Jewish press, Jewish scholars and Jewish
Protected and promoted by the people's representatives with all their might.

V.

After we have examined the context of our new German state economy=
politics with the interests of the banking and stock exchange dominance, as they are
isrealitarian fellow citizens, will be discussed with those
our fellow citizens who have not yet been completely freed from the Jewish=national=
liberal phraseology, the question arises as to what
will happen, since the inevitable consequences of the described financial
and economic policy already befall Germany?

Our fellow citizens of the Mosaic faith are already preparing themselves, similar to
on previous occasions, a scapegoat to atone for all that
Germany's coming disaster. And this sacrifice is indeed
none other than – His Excellency the Minister of Finance and Vice=
Prime Minister Camphausen himself.

Of course, no one should think that our Jewish
Fellow citizens of Bleichröder=Lasker=Bamberger basically for all the beautiful
Things are responsible. And so that this thought does not take hold
As mentioned, the slaughter of a great sacrifice is necessary, which
this time in no other form can suffice than in the stately person
our once much celebrated Vice-President. The same Jewish
Stock exchange papers, which once with well-considered calculation proclaimed the Hosanna
about the minister appointed under the patronage of their Lord von Bleichröder,
have been shouting "Crucify" every now and then for some time now, as a precaution.

This was already reported in the issue of the "Berliner Börsen-Kurier" on
November 23, 1874 No. 546 reads: "Rarely are optimistic

colored statements of a minister about the events so feverish, as in the present case those which Mr. Camphausen in the bank debate about the situation of our currency and coin conditions. Rarely has a "professional minister" been embarrassed similar to that which the fact and necessity of a discount increase because of those very circumstances involved – the Mr. Camphausen describes as the rosiest in the world those inability in financial matters, that vain self-reflection and the bloating at the expense of the truth is rarely so shamefully evident occurred, as in this case. Mr. Camphausen loves to use his favorable

278

financial situation, regardless of whether his words are mocked by the general Calamity, the collapse of trade and commerce, – regardless of whether this apparently favourable situation is not achieved through, but due to fine management of the business is brought about At Mr. Camphausen the nation may at least as much, as with unbridled speculation (that is to say: useless shares and premium loss, if the golden blessing of billions has become a curse to her today is and it seems to be getting more and more." – Then the The newspaper even spoke of a "cheeky game with the material interests of the people, which are sacrificed in favor of impotent financial tricks at risk".

Such language against a Prussian-German finance minister and Vice-Minister President has so far been the most unashamed and subordinate Angle press not taken out and against someone who this type of press had not previously considered it as hers, so to speak, she would also have not possible. Certainly also a nice success of the discussed conditions.

But Mr. Camphausen is not the man who can easily and could easily be pushed aside. The "Berliner Börsen-Kurier" drew temporarily retracted his claws.

Now Mr Kardorff, who is known to have been a member of the Board of Directors and is involved in the founding of several joint-stock companies, shortly before the end of the session of the Prussian Landtag a new attack on Mr. Camphausen tried to make him at least morally acceptable in the eyes of the Publikum responsible for all future financial and economic disasters. The reason for this was the beautiful story of the millions, which the maritime trade!) of the discount company from state funds without Security against 2½%. Incidentally, there is even more of the: something nice happened, and the Jewish Reichstag member Mr. Frankfurter Burger is said to have been a questioner in a Reichstag commission on the interest-bearing investment of the available Reich funds provides sufficient have not received the future, at least that is what the financial papers reported.

However, Mr. Camphausen is not clumsy and lacks above all not the required accountability. His statement that the funds could not be used

were to be invested at interest – is apparently only aimed at the uninitiated
We are sure that if it is His Excellency's private assets
If the market had acted, more than 2% would have been possible.
We are of the opinion that the state should not allow such percentage transactions
He always takes the money out of one pocket
into the other, and it is no loss for him if he has the cash in stock
The amounts to be held are not invested at all with interest.

Mr. v. Kardorff, however, uses such an opportunity to catch several flies with
to close the deal in one fell swoop. The sea trade, whatever one may think of it,

1) Did not a Prussian

Sea trade engaged in monetary transactions with a certain Barmat and Kutisker=
let go?

279

as one likes, is inconvenient for our fellow citizens of high finance, because
the sole power in financial matters, which the backers of the so-called Reichs=
bank, there is still something standing in the way and the Prussian state
could, under certain circumstances, escape the sole control of the so-called Reichsbank.
This maritime trade does a lot of business, the percentages of which
the holders of Reichsbank shares in the form of dividends and Tan=
tiemen also want to have. It is therefore understandable that a jo talent=
full and useful member of the Reich and Landtag, like Mr. v. Kar=
dorff, who hoped to render essential services to the future of the so-called Reichsbank if
he attacked the shipping company. Whether he personally participated in the agio of the Re
We will leave it open whether he remained uninvolved. Mr. v. Kardorff therefore met my
at least two birds with one stone when he fought against the sea trade
and tried to offend Mr. Camphausen.

However, Mr. Camphausen intends to make a grand retreat.

He knows that a comprehensive protective or rather prohibitive tariff
is on the way, as our masters of industry will take the money they share=
white even lost on the stock exchange, but at least since 1873 as a result of the
Stock exchange and large-scale industry, the era of fraud that was specifically inaugurated
have, through some lucrative protective tariff privileges soon bring back
Mr. v. Kardorff is just the man to pursue his financial-industrial
Friends who oratorically describe themselves as the "German industrial and economic
to perform services in the Reichstag and Landtag, which his employment
appointment to administrative positions and his participation in various
Financial matters should appear highly justified.

Mr. Camphausen, as I said, correctly predicts that the powerful
Coalition of large industrial protectionists with the Jewish high finance
should reach its goal in the not too distant future. And since at the same time Mr. Camp=
hausen sees his financial policy now in its fruits, he will do everything
to hold on until the question arises whether he will be included in the new protection
customs era with consent or not. Then, that is what Mr. Camphausen

ft already declared, he will resign as a great free trader and announce his departure in a sense with the halo of loyalty for a great economic surrounded by a scientific principle.

That is what Mr. Camphausen thinks, but perhaps things will turn out differently. Perhaps all the paper and writings of Mr. Wolff, a Jewish National Newspaper, which was edited by Mr. Dernburg, which is no longer of the Mosaic faith, is edited, not further sufficient to cover the bareness of the Bleichröder-Delbrück-Camphausenfen Politics always has to be covered anew.

For our part, however, we considered it to be entirely in the interest of the state It is time to explain these things in more detail. Otherwise we will be lost in darkness and perhaps even worse circumstances. – –

So far the famous so-called “Ara=Articles” of the militant Haupt=man of the artillery Dr. Perrot, who, when published, caused tremendous caused a stir, – twice the relevant edition of the “Neue

280

Preußische Zeitung" sold out and had to be reprinted. The Ara=Articles had an earthquake-like effect and marked a turning point in the History of the German economy. Through it, Bismarck received the strongest ft impetus to the new economic policy, through it the almighty Influences of the banker Bleichröder diminished and the pillars of the Big capital overthrew Camphausen and Delbrück. The conservatives were downright dismayed and frightened by their victory and did not understand to exploit him and did not support the author of the Ara articles, Dr. Perrot, nor its bearer, Dr. Wedemeyer, as it should have been.

The opponents were all the more active, and the entire liberal press raged against the allegedly poisonous Ara articles, but was careful not to with one exception, the facts in question mention, let alone address the subject. Especially The Chancellor's answer in his 1898 speech appears interesting. published “Thoughts and Memories” on the Ara=Article. The The most characteristic passage there (Volume II, page 153) is as follows:

“As the “Kreuz=Zeitung”, because I support parliamentary rule and atheism proclaimed, had already started a feud on February 11, 1872, under Nathufius-Ludom 1875 with the so-called “Ara=Articles” Perrot the slander campaign against me, I wrote to Amsberg, one of our highest legal authorities and to the Minister of Justice with the question, whether, if I filed a criminal complaint, a conviction of the author with Security is to be expected, otherwise I would refrain from such a because an acquittal would give my opponents new pretexts The answer of both and my own The opinion of the lawyer consulted was that the conviction was likely, but I was not sure about the cautious formulation. At that time I had

the filing of criminal charges has not yet established any specific principles and the experiences I had during the conflict were not exactly encouraging. When Perrot's articles appeared, I also saw not yet predict the extent of the slander campaign against me from my former party comrades and especially in the circles of my peers."

Furthermore: "Between me and all the declarants, many of whom have so far to my acquaintances, even to my friends, was, nad)- to whom they listened to the defamatory insults written by Perrot= were able to completely eliminate the possibility of personal contact= cut." (Page 156.)

The Chancellor has therefore spoken in his memoirs of lies, slander, defamatory insult, but goes beyond the world-historical Subject, the fact that the banker Bleichröder the economy, ins= especially the financial policy, indeed the entire internal and external policy of the Ger Reich unconstitutionally as an irresponsible advisor behind the backdrops to the greatest detriment of the general public and also of the power of the empire, out of the way.

281

I must here commemorate my deceased brother, the faithful until death, patriot who sacrificed himself for the fatherland, the friend and admirer of the Iron Chancellor against these entirely unjustified accusations and defend accusations. I leave it to the great Chancellor answer it himself, because his afterword to the Ara articles fits perfectly excellent. It says:

"One of the author's main intentions was to describe the so-called 'national liberal' papers, which constantly benefit from the blessing of our new German "liberal economic legislation", finally to a serious answer to the question of what the banknote privileges, the Share privileges, stock exchange privileges and certain tax privileges with economic freedom? It has not been possible until now to to obtain an answer to this from the national liberal press. Even the attempts, which eventually escalated to the most severe provocation slid helplessly past the triple-armored ore with which the national= liberal press had girded on this issue. That the author Statesmen who are the bearers of the dangerous and pernicious held un-German economic policy, as such, It goes without saying that the author is using a sword-sharp Clarity was essential in the above-mentioned tendency of the so-called "national liberal" press to avoid any treatment of this issue à tout prix simply to remain silent.

As for the Prince Chancellor, the author of the Ara article a great admirer of the same and he has been so at one time, when most of today's admirers of Prince Bismarck were not yet,

namely during the period of conflict and from the first appearance of the prince. At that time, when the so-called 'liberal' press, which today calls the author of the Ara=Article barks angrily and zealously, could not find any insults, which were hard enough to impose on the now celebrated Reich Chancellor to accumulate, in that time the author of the Ara article has gone further, much further seen as this liberal-called press, he has already at that time in the reviled and vilified Mr. von Bismarck the man of the future suspected the man who was minded and able to act, and to act in the greatest world-historical style, while a whole House full of liberal deputies and their press were only able to babble, to rant and rave. We saw the statesmanlike disposition of the man and sensed his mighty plans, his future greatness, as the Success worshippers of today, who believe that they should now envy us, the today's Reich Chancellor was still being pelted with excrement in the most zealous and hat

"The fact that the Chancellor, especially with regard to economic policy, has done much more the impulse of the ruling majority and its advisors in these questions, as a personal initiative, is a very generally accepted assumption, which could hardly have been made by the prince or by anyone be disputed. But the prince is no less in favor of this policy, and in our opinion this policy is therefore

282

no less disastrous for the Reich. We considered it our duty to have a presentation of this opinion sent to the Reich Chancellor. Under all circumstances, the author's purpose was not any personal, but exclusively one aimed at the well-being of Germany."

This is what Dr. Franz Perrot says, who is known to every impartial person as the great patriot appears, who, putting aside his personal interests the last breath and the last penny for his conviction So that everyone can form their own opinion, I have the Ara= articles printed verbatim and one will have to admit upon objective examination, that this is not about "lies and slander". By the way Prince Bismarck, who found the inexorable articles quite uncomfortable, feen, must have recognized this, because he has Dr. Franz Perrot shortly after the publication of the articles – a consular office in Tunis offered. That was as good as a declaration of honor. My brother but has bitterly refused to accept this position.

Another valuable testimony that Dr. Perrot is not at all concerned with the pernicious influence of Bleichröder, the recognized representative of the interests of the world so hostile to the solid Prussian financial policy= Rothschild House exaggerated, but only reported truthfully and with That the Germans warned quite urgently is undoubtedly evident from the reports published : published, far too little noticed memoirs of the Vicomte de Goutaut= Biron, the first ambassador who, after the great war of 1870/71, French Republic to the German Empire. He calls Bleich= Röder as Bismarck's agent, who repeatedly trusted him.

used his communications, and was fully informed about the plans and deeds views of the Reich Chancellor; he also seems to have played a malicious role in the conflict between the Reich Chancellor and Count Harri von Arnim.

Apart from his proposal to give the German people the five billion French war reparations through the purchase of German private railways to maintain, thereby increasing the power of the German Empire extraordinarily Dr. Perrot has also made other reform plans. He has represented the Conservative Party as its economic politician prompted the nationalization of the railway system to be its main task to make. Through a fine suggestion of a mixed carriage space and weight tariff system, which unfortunately was only partially implemented, was the Tariff system of the railways has been simplified greatly, also stems from it the proposal of a zone tariff for the Hungarian state railways, which by the Minister v. Banhas. The parcel postage the German Reichspost was reformed according to his suggestions.

He would have given his country and the community many useful service. But when he was abandoned by almost everyone on November 10, 1891, succumbing to the unequal battles, was dying, he addressed the words to me: "If all these struggles have been in vain, then our German fatherland be hopelessly exposed to corruption?" – We let us hope that he was mistaken."

283

4. Afterword.

Dr. Franz Perrot was not mistaken!

After reading the original documents, there is still a whole number of documents: brochures, books, magazines about the Economic development, as Perrot saw it, – one will think and read Bismarck's memories in some parts with different eyes than before. It is at least striking that the great Chancellor from the Archives articles nothing else than an insult to his person, which was not the purpose and aim of the articles, which is also the The author himself has expressed this here. It is strange that Bismarck referred to the The main aim of the same, the interest of the German nation, with no Words are entered into. One has the feeling that he is dealing with the attacked Jewish clique, especially Bleichröder, feels identical. The It is not far-fetched to assume that there are strong ties between the Chancellor and his Jewish advisor, whom he did not want to get rid of it, or could not! To investigate this would be an interesting, but still dangerous task for the historian. No one was allowed to approach Bleichröder without incurring the relentless wrath Bismarck's attention, which Stöcker later had to experience.

Perrot subsequently felt this, as he successfully

means were used to deprive him of his Reichstag mandate Hersfeld=Hühnfeld to chase away.

Perrot's language was for the parliamentary customs of the time an extraordinarily sharp one, especially in fine Ara=articles. Compare but we combine the noble and reserved expression with today's tone in the parliaments, then we must note with regret how much the morals have fallen into decay. Good education, the Prussian thinking was a matter of course. Only gradually did the destructive Jewish element in German intellectual life wide.

The evil continues to develop, encouraged by the world= war and its shameful end, – to this day. Forty Years have passed since Perrot's death. His loyal comrade, this brother has been sleeping the eternal sleep for fourteen years. But their thank you live, have risen! The great right-wing radical movement

284

fights the fight against Jewish corruption after the Perrots and with and after them so many brave German men, the banner in the dying hand, have fallen away.

We are all the heirs of the dragon seed in economic legislation of the great Chancellor, which was somewhat softened for the moment by the sharp attacks of Perrot and his like-minded friends. But the The basic idea remained unchanged and the authors knew how to had to work, and how they could be interpreted into an instrument the robbery of the capable and hardworking German people, and to their Enrichment.

The revolution of 1918 tore down the last barriers. Since then, we are experiencing crisis after crisis in ever faster succession. A bright spotlight is t the crash in Austria with the credit institution in Vienna on the disastrous Role of the Rothschilds in European history. many millions, while the hard-working savers are left with the fruits of their labor were brought.

Now, while this book is in print, the crash of the Danat banks is coming in Germany. The government intervention to save the Danat banks proves that the system of being ruled by bankers in Germany has come into full development. The financial legislative machine, as fit was put into operation by the great Chancellor, works, handled by run by the skilled hands of the banking giants, with high levels of activity. Berliner Nachtausgabe of 15 July 1931 brings in No. 168 about the Negotiations of the Cabinet, which were conducted through discussions in the Reich Finance ministry, as a first point:

“Reduction of the coverage limit for the German currency from 40 to 30%,

i.e. by 10%, with the possibility of an increase in banknote circulation by 1 billion.

Simultaneous increase in the discount rate.

The Reich government has apparently, after long deliberations, reached the conclusion It has come to the conclusion that the necessary increase in the circulation of banknotes setting the coverage limit and not by introducing an internal replacement currency is to be achieved, whereby they are apparently aware of the version that a currency coverage of 30% also means a there is sufficient basis of trust in the currency.

The government will probably issue a longer appeal to this Reduction of the coverage limit. With this measure This involves an increase in the Reichsbank's discount rate. The Reichsbank Board of Directors discussed this issue today. In addition one must comply with the legal obligations that a note tax of the Reichsbank to the Reich.

The Reichsbank Act provides for the possibility of a temporary period The reduction of the coverage limit is given if the General Council the Reichsbank agrees to this measure. The General Council must

28 5

the Reichsbank all votes except one vote on a decision for such a measure."

We have reason to hope that in the Third Reich a thorough Change is created. The pointers we have received from the great leaders the national opposition in their economic programs, coincide with Perrot's thoughts, which despite all the oppression among the best of our people. May they finally bear fruit in Third Reich, then Dr. Franz Perrot did not live in vain.

L. Feldmüller=Perrot.
Berlin in July 1931.

286

5. Brief overview of the development of banking legislation.

Law on the issue of paper money. From June 16, 1870

(BG Bl. p. 507).

Law on the Issuance of Banknotes of March 27, 1871

(BG Bl. p. 51). (Banknote Blocking Act!).)

Article 18 of the Coin Law of 9 July 1873 (RG Bl. p. 233).

Law concerning the issue of Reichskassenscheine. From April 30, 1874

(RG Bl. p. 40). Amendment June 5, 1906 (RG Bl. p. 730).

Bank Law?) From 14 March 1875 (RG Bl. p. 177):

Title 1 (§§ 1–11) General provisions.

Title II (§§ 12–41) Reichsbank and its organisation.

Title III (§§ 42ff.) Private central banks.

Vorwort.

Der Leser ist unzweifelhaft berechtigt, ehe er sich der Lektüre eines Buches oder einer Brochüre überlässt, den Zweck der darin enthaltenen Veröffentlichungen zu erfahren, um so von vorneherein klar darüber zu sein, wie er sein kritisches Urtheil zu stimmen hat, um nach vollendetem Lesen Genuss und Erwartung in richtiger Harmonie zu finden.

Dies Buch kann und soll nicht etwa, wie sein Titel sich deuten liesse, eine haarkleine Darstellung der historischen Momente in dem Entwicklungsgange des Lebens des deutschen Reichskanzlers folgerichtig enthalten, (wie der «kleine Otto» noch in Schönhausen mit «die Beene baumelte» und derlei nichtigen Unsinn mehr, findet ja der Leser zur Genüge im Reptilienbuche von Hesekiel.) — sondern sich lediglich mit denjenigen Thatsachen beschäftigen, welche äusserlich eingewirkt haben auf den Gang der politischen und wirthschaftlichen Ereignisse sowohl im Allgemeinen als in specie für Deutschland.

Es soll in diesen Blättern gewissermassen das

Gewicht des Fürsten Bismarck als eines grossen Diplomaten und bedeutenden Menschen durch Prüfung seiner politischen Handlungen und Recognoscirung seines Charakters festgestellt werden, ein Unternehmen, das, wenn mit Ernst und Liebe angefasst, recht wohl zu Resultaten führen kann, welche jeder denkende Staatsbürger zu eigenem Nutzen beherzigen sollte.

Wenn aber das Resultat dieser Prüfungen ein für den Reichskanzler ungünstiges ist, d. h. sollte er als zu leicht befunden werden, so wird der Leser sich zur Linderung seines Entsetzens vergegenwärtigen müssen, dass bis heute der Fürst Bismarck sein Gewicht in der öffentlichen Meinung stets selbst bestimmte und nach den flüssigen Millionen des Welfenfonds und anderer disponibler Kapitalien regulirt hat, und dass Diejenigen, welche sich unterfingen, nachzuwiegen, unweigerlich in jene festen, aber kleinen Cabinets à part verschwanden, wo ihnen die Lust verging, über etwas Anderes als ihre eigene Dummheit nachzudenken.

Somit können die Erwartungen des Lesers als keine hochgespannten betrachtet werden und kann der Verfasser nur wünschen, dass die in diesem Büchlein niedergelegten, nicht erst durch die reichskanzlerischen Reptilien «richtig gestellten», sondern

unverfälschten Wahrheiten dazu beitragen mögen, dem Fürsten Bismarck das ihm gebührende Erinnerungsszeichen in den Herzen der Mit- und Nachwelt aufzurichten als Warnungstafel vor politischer Götzendienerei und Selbst-Erniedrigung der Menschennatur.

Juli, 1877.

Der Verfasser.

Vorwort zur zweiten Auflage.

Was wir fürchten mussten, ist eingetreten. Die preussische Polizei hat ihre ganze brutale Allmacht aufgeboten, um diese Schrift sofort nach Erscheinen gewaltsam zu unterdrücken. Es ist überflüssig, Worte zu verlieren über die Art und Weise, mit welchen Mitteln die polizeiliche Prozedur vor sich gegangen ist — die Thatsache, dass es geschehen das unabänderliche Faktum spricht deutlich genug für die bodenlose politische Corruption Deutschlands und für das Erkennen der Nothwendigkeit seitens der Gewalthaber, die Wahrheit allenthalben zu unter-

drücken, wo sie an die Oberfläche tritt, um den Kampf gegen die Lüge und den Götzendienst zu beginnen. Und von jeher haben Preussens Gewalthaber, deren Fuss die deutsche Nation heute im Staube hält, um ihrer Existenz willen den Kampf gegen die Wahrheit geführt und diese Wahrheit durch einen korrumpirten Richterstand, durch eine schmäbliche Polizei-Willkür mit dem Stempel des Verbrechens zu versehen. Wo aber die Wahrheit zum Verbrechen geworden, dort auch ist sie ihres baldigen Sieges um so sicherer und weder der Büttel noch das Gefängniss werden lange im Stande sein, ein System zu stützen, dessen Existenz selbst ein Verbrechen ist.

Wir übergeben diese zweite Auflage in revidirter Ausgabe dem denkenden Publikum und werden Sorge tragen, dass dieselbe ohne Beihülfe der polizeilichen Vorsehung bald vergriffen werden kann.

I. Capitel.

Bismarck als Staatsmann und Diplomat.

Jedes Mal, wenn der Fürst Bismarck Anstalten traf, sich vom Schauplatze seiner Thätigkeit zurückzuziehen, so gab es auch stets einen Faktor, der ihn zwang, sobald als möglich zurückzukehren, ob mit oder ohne Erreichung derjenigen Forderungen, welche er an sein Weiterverbleiben im Amte knüpfte. Es ist zweifellos, dass Fürst Bismarck sehr wohl weiss, dass die Bedeutung, Macht und Einfluss eines Staatsmannes weder in seinem Namen oder Titel, noch auch in dem, was er einmal in der Vergangenheit gewesen ist, oder geleistet hat, liegt, sondern lediglich in dem, was er in der Gegenwart leistet oder thut und was er, so zu sagen, mit seiner Person beherrscht. Auch auf diesem Gebiete ist die Arbeit das allein Produktive. Stets, wenn der Reichskanzler «abgehen» oder sich «entlasten» wollte, empfand er zunächst die Macht der festgeschlossenen preussischen Bureaukratie und sowie er wenige Tage neben der Staatsmaschine stand, fühlte er, diess da-

selbe weder ihn noch irgend einen Anderen zu ihrem Betriebe brauche.

Um daher dem Schicksale eines Kaunitz zu entgehen, kehrte der «kranke» Fürst immer wieder zurück, und so sehr auch nach jeder neuen «Krisis» von ihm die wichtigsten Aemter in die Hände willensloser Creaturen gelegt wurden, — die preussische Bureaukratie als solche hat Fürst Bismarck nie besiegen können, dieselbe ist vielmehr mit zur Signatur des lockeren Reichsorganismus geworden.

Fürst Bismarck ist Despot — er hat Alles, was er sich unterwerfen konnte, durch Gewalt, List, Bestechung u. s. w. zu seinen Füßen vereinigt — Polizei, Richterstand, Presse, das Judenthum, die Börse. Die Beamten seines Ressorts sind seine Sklaven, die Diplomaten seine Automaten*), welche er soweit dressirt hat, dass er sich vorbehält, ihre Herzens- und Eheverbindungen zu kontroliren. Die Männer seiner nächsten Umgebung bilden den charakterlosen Rahmen eines tyrannischen, unmoralischen Systems. Die Verachtung aber seiner nächsten Umgebung bildet für den Fürsten Bismarck den Massstab

*) «Meine Botschafter», sagte Fürst Bismarck zu einem Mitgliede der Pariser Gesandtschaft, «müssen einschwenken, auf Commando, wie die Unteroffiziere, ohne zu fragen: warum?»

für die Beurtheilung der Menschen ausserhalb seiner Sphäre und damit seiner eigenen Ueberhebung.

Aber die anderen Ressorts — es gibt noch Minister neben ihm, die zwar weniger anmassend und gewalthätig, dafür aber um so fleissiger und gelehrter sind, und deren Beamten aus einem alten geschulten Heer bestehen, in dessen Reihen kein einziger Mann den bedächtigen, sicheren Schritt aufgiebt, der ihn mit nothwendiger Gewissheit bei normaler Lebensdauer vom Referendar oder Aspiranten bis zum Geheimrath bringt. Mit dieser Bureaukratie kann zwar jeder bedächtige und einem langsamen heilbringenden Entwicklungsgange zugeneigte Staatsmann regieren, nicht aber ein von einem Extrem in's andere überspringende, seine Launen als Quelle der Weisheit betrachtende und ausgehende, durch die Erfolge verwöhnte Junker, dem weder die sittliche Ueberzeugung der Rechtschaffenheit und Nützlichkeit seiner Handlungen innewohnt, noch der daran denkt, den ganzen Staatsorganismus als etwas anderes zu betrachten als das Werkzeug fieberhaften Verlangens nach immer höherer Machtvollkommenheit, immer neuer Befriedigung unendlich n Ehrgeizes.

Das preussische Beamtenthum ist die Bremse an dem Ruhmeswagen des Fürsten Bismarck, der,

als zögen ihn finstere Gewalten, Alles sich ihm in den Weg Stellende unter seinen Rädern zu zermalmen versucht. Dem preussischen Beamtenthum auch hat das deutsche Volk es zum Theil zu danken, wenn es noch nicht gänzlich in dem Paroxysmus vor seinem Götzen Bismarck untergegangen ist, wenn es noch nicht völligem Elend und dem Hohn des Auslandes ob seiner grenzenlosen geistigen Sklaverei anheimgefallen ist.

Der preussische Beamte hat nur einen Weg im Leben, denjenigen, welchen ihm die Tradition vorgezeichnet: Er dient keinem Minister, keinem Parlament, keinem Volke — er dient seinem König! Ob da sein Minister Manteuffel oder Bebel oder wie sonst heisst, das kümmert den Beamten als solchen nicht — er ist das Stück einer grossen Maschine, als deren Glied er sein Pensum arbeitet, wie es ihm aus den Händen eines andern Gliedes zukommt, ohne Ueberstürzung, ohne Liebe, ohne Missmuth. Die Maschinerie knarrt Tag für Tag dieselbe Melodie; zu Extravaganzen ist sie nicht eingerichtet. Kein Minister ist im Stande, ein Aktenstück oder eine Arbeit einen Tag früher zu bekommen, als dies bei dem monotonen Gange der Dinge möglich ist, d. h. bis dasselbe erst durch alle Bureaux gelaufen, allenthalben mit der nöthigen

Sorgfalt geprüft, seine bestimmte Zeit in jeder Registratur zugebracht hat u. s. w. So ist jeder Ressortminister unweigerlich der Sklave seiner Untergebenen und muss seinen Geschäftsgang nach ihrer Thätigkeit regeln. Was kümmert den einzelnen Beamten, ja, was kümmert es alle Beamte, dass es über ihrem Minister noch einen Kanzler giebt, welcher diesen zu der Unmöglichkeit treiben will, seine Beamten zu abenteuerlichem Eifer anzuspornen? Der Beamte weiss ganz genau, wie langsam eine Arbeit gemacht werden muss, um ohne Störung an die Aussenwelt zu treten; er weiss genau, wann die Gehaltsquittungen fällig sind, so genau, wie er an den Jahren den vierten, den dritten Kronen-Orden, den vierten, den dritten rothen Adler, die zweite, die dritte, die vierte Gehaltserhöhung mit dem steigenden Range und den steigenden Dienstjahren in Rechnung zu stellen hat.

Wollten daher auch die Collegen des Reichskanzlers ihm in seinem Sturmlaufen auf alles Bestehende folgen, sie vermöchten es nicht einmal; ihre Ressortbeamten würden sie daran hindern, ihre Beamten in ihrer Solidarität der Negirung alles Neuen, alles Veränderten, alles Nichthergebrachten. Und nun gar das feine Gefühl der Beamten unter sich für die Competenz der einzelnen Ressorts, ja der

Einzelnen unter ihnen. Der Mann, welcher hier Experimental-Regierung treiben will, muss mit anderen Gaben des Geistes und Charakters ausgestattet sein, als der Fürst Bismarck, d. h. er muss wirklich ein Herkules sein sowohl an Begabung wie an Charakter, kurz er darf nicht ein Herkules sein nur von Reptilien-Gnaden.

Nannten wir nun oben die Beamten, welche das Unglück haben, in dem Ressort des Reichskanzleramts zu arbeiten, Sklaven des Reichskanzlers, so ist dies nur in dem Sinne zu verstehen, dass sie, eingeschüchtert und furchtsam, widerwillig, devot unter der ihnen zu Theil werdenden brutalen Behandlung geworden sind, dass es aber gerade darum dem Reichskanzler noch viel schwieriger wird, so exakt und so schnell bedient zu werden, als diess der Beamtenorganismus zulässt in denjenigen Ressorts, wo der Beamte in seiner vollen Würde ohne tägliche moralische Fusstritte ruhig arbeitet. Wohl hat der Reichskanzler so viele seiner unfähigen Creaturen als möglich in seine Nähe gebracht und kränkt durch dieselben und ihre rasche Beförderung die alten Beamten zur Genüge, aber die persönliche Sklaverei in eine amtliche Sklaverei zu verwandeln wird ihm nie gelingen, solange ihm nicht die Machtbefugniss gegeben ist, alte und treue Beamte, welche

ihrem Könige länger und treuer dienen, als er, nach seiner Laune auf die Strasse zu werfen. In diesen Verhältnissen aber besteht auch für den Reichskanzler die Unmöglichkeit, trotz seiner Bülow's, Hofmann, Wilke, Zitelmann und anderer Priester der reichskanzlerischen Unfehlbarkeit, ein solides Zusammenwirken und ein segensreiches positives Schaffen des Reichskanzler- und auswärtigen Amtes mit den andern Ministern herbeizuführen.

So lange die alte preussische Beamtenehre nicht hinabgesunken ist in den Sumpf eines gewissenlosen Streberthums, so lange wird der Reichskanzler auch darauf verzichten müssen, den «Nero» seines Jahrhunderts zu spielen, so lange wird er sich mit der Rolle des Luftschiffers begnügen müssen, dem der Zufall den Hals bricht.

Hamlet ruft beim Anblick des ausgegrabenen Schädels eines Diplomaten, nachdem er denselben phrenologisch untersucht hat, bekanntlich aus: «A politician, that would circumvent God!» (Ein Diplomat, der selbst seinen Herrgott hintergangen haben würde!) Wir haben nichts dagegen einzuwenden, wenn dieses höchste Lob eines Diplomaten dem Fürsten Bismarck vindicirt wird, um so mehr, als wir uns dann des vollen Einverständnisses mit seinen bezahlten und unbezahlten Reptilien erfreuen, welche

ihn den grössten Diplomaten dieses Jahrhunderts nennen. Es ist selbstredend, dass er darum als General der Kavallerie nicht mindestens ebenso ein Unikum des Jahrhunderts sein kann. Dass Fürst Bismarck das Urtheil Hamlet's acceptirt, ist mehr als wahrscheinlich, denn die von ihm gestiftete diplomatische Schule ist nichts als seine eigene unsichtbare Hand, welche eine Anzahl gutbesoldeter, faulenzender, unwissender Drahtpuppen leitet, denen neben dieser mechanischen Thätigkeit jede andere Bewegung, und damit natürlich auch jede eigene Denkübung durch Strafgesetzparagraphen verboten bleibt. Zuwiderhandelnde erreicht das Schicksal Arnims, bei dessen Herbeiführung der Kanzler jedenfalls in seiner ganzen diplomatischen Grösse erschienen ist, das heisst im Sinne Hamlet's.

Hat das Volk im Allgemeinen einen unbestimmten Abscheu vor Diplomaten von jeher besessen, so ist es dem Reichskanzler unbedingt Dank schuldig, dass es heute mit dem Schüler, welchem Mephistopheles die Carrière eines Rechtsverdreher's schildert, ausrufen kann: «Mein Abscheu ward durch Euch vermehrt!»

Da es unzweifelhaft ist, dass der Reichskanzler die Diplomatie in dem Sinne Hamlet's aufgefasst hat, wie dies schon eine Aufzählung einiger bekannter

Thatsachen weiter unten bis zur Evidenz erweist, hat er natürlich auch das Recht, in diesem sonst verabscheuungswürdigen Gewerbe den ersten Rang einzunehmen. Diesen hat er in Deutschland sich denn auch zu bewahren gewusst dadurch, dass er die zu diesem Gewerbe theils durch ihre Dummheit und Ehrlichkeit, theils durch ihre Sentimentalität unbrauchbaren deutschen Diplomaten in eine Civilstrafkompagnie verwandelte, welche sie erscheinen lassen als eine gedungene Zahl von gut bezahlten Subjekten, die sich zu abscheulichen Handlungen missbrauchen lassen, deren verantwortlicher Anstifter immer der deutsche Reichskanzler bleibt.

Und es lässt sich nicht verkennen, das Zeug hat er zum grossen Diplomaten im Hamlet'schen Sinne, der deutsche Reichskanzler, der ehemalige Junker auf Schönhausen. Wie immer nur derjenige in der Politik grosse «Erfolge», welche die denkfaule Menge anstaunt und bewundert, erringen kann, der sich von den Fesseln grundsätzlicher oder persönlicher Rücksichten zu befreien versteht, so hat in hervorragender Weise auch der Fürst Bismarck bewiesen, dass er in hohem Maasse die Fähigkeit besitzt, sich von alledem loszusagen, was ihm lange auch noch so theuer gewesen. Wäre er seiner junkerlich-feudalen Idiosynkrasie treu geblieben

und hätte sich damit begnügt, die Gutspolizei zu reformiren, er würde den Untergang dieses Instituts auf Schönhausen beweinen. Wäre er seinen ursprünglichen Abneigungen gegen das Judenthum treu geblieben, er würde sich nicht der wirksamen Hülfe dieser ersten aller Grossmächte zu erfreuen gehabt haben. Ebensowenig hat er sich durch Gefühlsrücksichten für Personen beeinflussen lassen, wenn er vor der Alternative stand, entweder Personen oder politische Combinationen zu opfern. Er wäre auch, hätte er im Alterthum gelebt, nicht gerade wegen seiner aufopfernden Freundschaft unsterblich geworden, an welcher das Griechenthum sich erbaute bei Männern wie Achilles und Patroklos, Orestes und Pylades.

Der Dichter sagt zwar, wenn er den Helden seines Drama's für eine Idee oder eine Person sterben lässt:

«Beglückt wer Treue rein im Busen trägt,

Kein Opfer wird ihn je gereuen.»

Aber wenn man die Wahl hat, ruhmvoll zu sterben oder ruhmvoll zu leben, so wird Mancher das Letztere wählen.

So auch der Reichskanzler. Seine seltene Gabe, hemmende Fesseln, durch welche sonst Sterbliche sich an Theorien oder Personen gekettet fühlen, zu sprengen, erklärt zur Genüge die plötzlichen Wen-

dungen, die schroffen Gegensätze in seinen politischen Programmen, in seinen politischen Zuneigungen.

Beispielsweise im Erfurter Parlament der heftigste Gegner der von Radowitz erstrebten Einigung Deutschlands, verehrt man ihn heute als Stifter derselben. Nachdem er für den Gang nach Olmütz, das preussische Canossa, plaidirt hatte, wo Oesterreich die reumüthige Huldigung Preussens empfang, sehen wir ihn kurze Zeit darauf mit Hülfe des über Olmütz hocherfreuten russischen Gesandten, Baron v. Budberg, als preussischen Bundestagsgesandten in Frankfurt nach der paritätischen Cigarre verlangen*)

Im Frühjahr 1859, als der österreichisch-französische Krieg auszubrechen drohte, und der damalige Minister des auswärtigen Amts sich damit begnügte, die in Hof- und Militärkreisen vorwaltende Neigung zu einem Bündniss mit Oesterreich zu bekämpfen, verlangte Bismarck das Bündniss mit Frankreich gegen Oesterreich. In einem Anfang 1876

*) Bekanntlich beging Graf Leo Thun, der damalige österreichische Geschäftsträger in Frankfurt, die Unvorsichtigkeit, den österreichisch gesinnten Bismarck mit der brennenden Cigarre zu empfangen, was den Letzteren so verdross, dass er dieselbe Unhöflichkeit beging und sich gleichfalls eine Cigarre anzündete. Seitdem ist Bismarck Antiösterreicher. Verf.

veröffentlichten, an den Minister des Auswärtigen gerichteten Schreiben vom 16. Mai 1859 tritt der damalige preussische Gesandte in Petersburg, Herr v. Bismarck für sein eigenes, dem Minister entgegengesetztes politisches Programm mit einer peremptorischen Bestimmtheit auf, wie sie heute kein Botschafter dem Reichskanzler gegenüber kundgeben würde, ohne von preussischen Criminalgerichten zum Zuchthäusler degradirt zu werden.

Herr v. Bismarck hat den König von Hannover gegen seine rebellischen Stände geschützt und später den König von Hannover als Rebellen abgesetzt. Das Vermögen dieses Königs dient seinem «Ruhme» und dem Laster der Corruptur.

Er hat die kurhessische Verfassung ausser Wirksamkeit gesetzt, und sie dann mittelst Gendarmen wieder eingeführt. Schliesslich hat er den Kurfürsten selbst ausgeführt.

Er hat den Grafen Ledochowski, der seine Whistpartie in Brüssel dem Aufenthalt in Posen vorzog, gegen den Wunsch vieler deutscher Katholiken als Erzbischof nach Posen und dann in das Gefängniss nach Ostrowo geschickt.

Er hat demselben Erzbischof gestattet, so viel Jesuiten einzuführen, als er wolle, und dann dieselben Jesuiten vertrieben.

Er hat die altkatholische Bewegung als nicht lebensfähig bezeichnet und ihr dann einen sehr lebensfähigen, ja lebenslustigen Bischof gegeben.

Er hat den reactionären Herrn v. Gerlach lange Zeit als seinen Lehrmeister und Freund verehrt; später hat er ihn als seinen grimmigsten Gegner gehasst.

Er hat den Wirkl. Geheimen Rath Wagener als intimsten Rathgeber gebraucht und mit dessen geistigen Fähigkeiten sich selbst das Relief staatsmännischer Weisheit zu geben gewusst. Später hat er Wagener erst Lasker, dann den Reptilien und zuletzt dem Executor überlassen.

Er war lange der Führer der reactionären Partei, jetzt ist er das Haupt der liberal-jüdischen Partei des Geldsacks.

Er benutzte die feudale, christliche, antijüdische Presse, um seinen konservativen Neigungen Ausdruck zu geben und verschaffte sich auf diese Weise den ersten positiven politischen Einfluss. Er hat den Ruin der konservativ-christlichen Partei gefördert, als er die Unterstützung seiner veränderten Politik bei Juden und Judengenossen suchen musste und fand. Die Corruption der Gesinnung ist die Basis seiner Grösse — Gründer und Juden theilen die

Annehmlichkeiten seines Ruhmes und feiern ihm als ihren Herrn und Meister.

Das klingt allerdings etwas anders, als die salbungsvollen Weihereden, welche die Reptilien dem deutschen Reichskanzler spenden, ihm, dem Gründer der «deutschen nationalen Einheit». Gerade, was die Letztere anbetrifft, so will der Verfasser gleich an dieser Stelle einige Erläuterungen geben, welche, wenn auch für reichsfreundliche Trommelfelle etwas schmerzlich klingend, doch besser geeignet sind, einer späteren Geschichtsschreibung, d. h. einer ehrlichen, als Unterlage zu dienen, denn alle Sybel'schen und Treitschke'schen furiösen Fanfaronnaden*)

*) Wir bitten den Leser zu beachten, dass es bei dem engen Rahmen dieser Brochüre, welcher später ein eingehendes Buch über Bismarck folgen wird, sobald dessen Thätigkeit als vollständig abgeschlossen gelten kann, unmöglich ist, mehr als die Beweismittel für die aufgestellten Behauptungen anzudeuten. Auch kann bei der aphoristischen Behandlung des Stoffes nur der Gesamteindruck des sich in verschiedenen Kapiteln zerstreuten Beweismaterials dem Gewicht der einzelnen Anschuldigungen gegenüber als positiver Massstab gelten. Verurtheilen kann zwar Jeder und an Verurtheilungen wird es wohl auch nicht fehlen. Die thatsächlichen Anführungen jedoch zu widerlegen, wird Niemand versuchen wollen und diese allein sind es, welche in einer nüchternen Zeit und bei wiedergeklärter Anschauungsweise

Nach den Reptilien ist der Reichskanzler bekanntlich der einzige Erfinder, Urheber und Schöpfer der deutsch-nationalen Politik und Jeder, welcher daran zu zweifeln wagt, ist ein Reichsfeind, selbst Diejenigen, welche früher dem Reichskanzler im Interesse der deutsch-nationalen Politik Opposition machten, als Fürst Bismarck noch der rabiateste Gegner derselben war. Gründe sind bei den Reptilien bekanntlich billig wie Brombeeren und sie bedienen sich bei ihrer Anwendung derselben Logik, welche man seiner Zeit anwandte, um den christlichen Pöbel achthundert Jahre nach der Kreuzigung Christi zu einer allgemeinen Judenhetze aufzustacheln. So ist es denn auch gekommen, dass gerade diejenige Partei, welche auf das Banner ihres demokratischen Prinzips von jeher die «Einigung Deutschlands» geschrieben hatte, die Fortschritts-Partei, einfach zu den «Reichsfeinden» geworfen worden ist, weil sie den geringen Muth besass, in schwächer Weise dem Militär-Etat hin und wieder zu opponiren, während doch in dem Militär-Etat Das wurzelt, was der Reichskanzler als die einzig heilbringende «deutsch-nationale» Politik bezeichnet.

für das endliche geschichtliche Urtheil ausschlaggebend
sind. Verf.

Andere Leute freilich sind anderer Ansicht als unsere modernen Geschichtsschreiber, aber diese Letzteren haben ja eben auch nur die Pflicht, nicht etwa Geschichte zu schreiben, sondern dieselbe zu machen, und zwar ad hoc!

Als nach dem Jahre 1848 die liberale Partei und das liberale Ministerium die Einigung Deutschlands zu ihrem Programm gemacht hatten, war es eine politische Nothwendigkeit, dass die reactionäre Partei diese Tendenz auf das heftigste bekämpfte, eben weil eine jede Opposition in jeder Frage Opposition machen muss, jedenfalls so lange, als sie nicht selber zur Regierung gelangt. Diesem löblichen Grundsatz huldigte, wie schon erwähnt, Herr von Bismarck auch im Erfurter Parlament, wo er zu derjenigen deutschfeindlichen Partei gehörte, die man heutzutage als «Reichsfeinde» bezeichnet, in deren Augen die schwarz-roth-goldenen Farben als Symbol der verächtlichsten politischen Gesinnung galten.

Um die liberale, deutschgesonnene Regierung zu stürzen, verbanden sich Herr von Bismarck und Genossen mit dem Auslande und zwangen Preussen, nach Canossa — d. h. nach Olmütz zu gehen, wohin Herr v. Manteuffel den heutigen Reichskanzler trotz seiner Verdienste um diese De-

müthigung Deutschlands nicht mitnahm. Der Vortheil aber, welchen Herr von Bismarck aus diesem Gange nach Canossa gezogen hat, ist bekannt — er avancirte vom Deichhauptmann zum Bundesstagsgesandten in Frankfurt.

Nachdem die liberale Regierung gestürzt war, fiel der Zweck fort, welcher Herrn v. Bismarck veranlasst hatte, die deutsch-nationale Politik derselben zu bekämpfen und er war zu klug, um nicht einzusehen, dass mit einer nationalen Politik grosse *politische* und damit auch *persönliche* Erfolge zu erzielen seien. Kurz, Herr v. Bismarck bekehrte sich, während seine Parteigenossen grösstentheils unbekehrt blieben. Seine hinterpommer'schen Hintermänner versprachen sich keinen Vortheil von seinen persönlichen Erfolgen.

Unter dem Ministerium der neuen Aera, welches mit dem Sturze Manteuffels an's Ruder kam, entfaltete die bis dahin unterdrückte liberale Partei wieder ihre frühere Thätigkeit in deutsch-nationaler Richtung. Es wurde die Grundlage zum Nationalverein gelegt, welchem ein grosser Theil derjenigen Männer angehörte, welche heute als die verrufensten Gründer und politischen Götzendiener in Ministerium, Parlament und der «höheren» Gesellschaft die gnatu ab Sirgeben für die trostlose,

sittliche und politische Corruption, welche die «innere» Thätigkeit des grossen Reichskanzlers dem deutschen Vaterlande eingebracht hat.

Nachdem zwischen dem liberalen Ministerium und der Kammer der Conflict wegen der Militärfrage unlösbar geworden war, wurde Herr v. Bismarck, welcher von dem Augenblicke an, wo er zu der Stellung eines Bundestagsgesandten gelangte, die richtige Taktik befolgt hatte, nämlich die Politik eines *jeden* Ministeriums zu tadeln, vom preussischen Gesandten in Paris zum Ministerpräsidenten gemacht.

In Berlin angekommen, versuchte es der neue Ministerpräsident vergeblich, einen Compromiss in der Militärfrage herbeizuführen, indem er den König zu Concessionen zu bewegen suchte. Es ist That-
sache, dass König Wilhelm I. ihm auf sein Andrängen erwiderte: «In diesem Falle hätte er auch mit seinen *früheren Ministern* weiterregieren können.»

Vergeblich versuchte Herr von Bismarck trotzdem immer noch, seinen Frieden mit der Opposition zu machen und die Mittel, welche er zu diesem Zweck anwendete, waren der famosen Komödie mit dem in Avignon gepflückten Oelzweige vollständig analog, so dass es ihm in der That gelang, die liberale Partei betreffs seiner Fähigkeit zu täuschen,

sich wiederum eines Besseren belehren zu lassen, d. h. seine früheren Parteigrundsätze einfach aufzugeben. Da die Opposition nicht mit Herrn v. Bismarck gehen wollte, so ging Herr v. Bismarck gegen die Opposition und der Nationalverein wurde von ihm auf das heftigste verfolgt; zum zweiten Male wurde Herr v. Bismarck aus Parteirücksichten der heftigste *Gegner* deutsch-nationaler Bestrebungen.

So hat Herr v. Bismarck allerdings die nationale Politik nur dann bekämpft, wenn es sein persönliches Interesse erheischte, wenn sie eine gegen ihn gerichtete Waffe in der Hand seiner Gegner war. In dem Augenblicke, wo er seinem Gegner diese Waffe aus der Hand winden konnte, um sie selbst als Waffe gegen seine Feinde zu gebrauchen, that er dies mit meisterhafter Geschicklichkeit. Mit meisterhafter Geschicklichkeit überbot er seine Gegner in liberalen Forderungen, indem er im Jahre 1865 ein deutsches Parlament auf Grund allgemeiner direkter Wahlen verlangte.

Nachdem Moltke mit dem Volk in Waffen die Oesterreicher bei Sadowa geschlagen und die Kleinstaaten mit deutschem Blut die preussische Politik Bismarcks höchst unnützer Weise sanctionirten, benützte Herr v. Bismarck sofort die Erfolge der

preussischen Heere und ihrer Führer, um für sich neues Kapital daraus zu schlagen, d. h. um das von ihm im Erturter Parlament und später so brutal bekämpfte national-deutsche Programm als das seinige zu proklamiren.

Hat Hamlet Recht? Während die liberale Partei ohne Unterschied seit jeher und beharrlich eine deutsch-nationale Politik verfolgte, ist Herr v. Bismarck einer solchen Richtung immer nur dann zugethan gewesen, wenn er Aussicht hatte, dass *ihm* die Resultate einer solchen Politik zu gute kommen würden. Was bei der liberalen Partei Zweck war, ist bei Herrn v. Bismarck stets nur Mittel zum Zweck gewesen. Kleinlichen Rücksichten hat Deutschland es demnach nur zu danken, wenn es überhaupt irgendwo Ursache zum Dank findet, dass Herr v. Bismarck sich die höheren Zwecke Anderer aneignete.

Ob Herr v. Bismarck noch einmal Gelegenheit finden wird, sein charakteristisches Talent im Abstreifen von politischen Grundsätzen zu produziren, dürfte wohl zweifelhaft sein. Er müsste denn von seiner heutigen preussisch-nationalen Politik einen neuen Sprung zurückthun auf den Boden deutsch-nationaler Politik und dazu fehlt es ihm, wenn auch gegebenen Falls nicht an Willen, so doch an Zeit

und Möglichkeit, denn die nächste politische Umwälzung der Dinge in Deutschland wird nie etwas Anderes bedeuten können, als gerade das Begräbniß des Systems Bismarck überhaupt in allen seinen Nüancen.

Es ist bereits dargethan, dass der Herr von Bismarck von jeher das Glück hatte, den rechten Augenblick zu benützen, um die Erfolge Anderer für sich nutzbar zu machen und dass ihn darin die Fähigkeit unterstützte, seine Grundsätze je nach Gebrauch mit derselben Leichtigkeit wie ein Paar Strümpfe zu wechseln. Es steht geschichtlich fest, dass, wenn Oesterreich im Jahre 1866 den von allen Mächten empfohlenen Congress, statt denselben abzulehnen, angenommen hätte, der Waffengang zwischen ihm und Deutschland in weite Ferne gerückt wäre. Was wäre die Folge gewesen? Herr v. Bismarck hätte vielleicht jene bedeutsame Wandlung seiner Grundsätze nach den Erfolgen Moltke's nicht vollziehen können und der Reichskanzler wäre heute noch nicht in die Lage gekommen, den Träger der deutsch-nationalen Idee abzugeben, ja, vielleicht sogar niemals.

Aber wie der Jude Cohn, um das Glück seiner Collecte der blöden Welt zu demonstriren, an seine Thür mit grossen goldenen Lettern schreibt:

«Gottes Segen bei Cohn!» — so kann auch der Reichskanzler sich Glück wünschen zu der damaligen Halsstarrigkeit Oesterreichs, wie zu der Dummheit Napoleons III, welcher so freundlich war, die Hand dazu zu bieten, den Krieg zwischen Preussen und Oesterreich zum Ausbruch zu bringen. Napoleon wollte, wenn beide Mächte genügend ermattet seien, mit ungeschwächten Kräften und dem Virgilischen «Quos ego!» dazwischen fahren. Ein allerdings gut zurechtgelegter Kunstgriff der in der Weltgeschichte so beliebten Trinkgelderpolitik. Nachdem jedoch Moltke in so unerhört kurzer Zeit den Krieg entschieden hatte, war Napoleon überrascht und seine Bemühungen, von dem mächtigen Sieger schliesslich doch noch ein Trinkgeld einzukassiren, führten ihn auf den Weg der dilatorischen Unterhandlungen, ein Weg, der ihn naturgemäss bis zu der selbstgegrabenen Grube führte, in welche er versank.

Der Kanzler hat mehr Glück als Lazarus Samson Cohn. Wer in der Lotterie spielt, hat wenigstens den Wunsch, dasjenige Ereigniss eintreten zu sehen, dem er seinen Erfolg verdankt. Wer aber einen Erfolg Ereignissen verdankt, welche er zu vermeiden sich bemühte, oder deren Nichteintreffen er wenigstens erwartete, von dem sagt man: «Er habe mehr Glück

als Verstand.» Und man hat mit dieser Bezeichnung stets das Richtige getroffen auch beim «grossen» Bismarck, selbst wenn man zugibt, dass er öfter in seinem Leben Spuren eines scharfen Verstandes gezeigt hat.

Wenn Jemand in der Erwartung von Krieg den Auftrag ertheilt, auf die Baisse zu spekuliren, hingegen aus Versehen der entgegengesetzte Auftrag ausgeführt wird, und diese auf die Erhaltung des Friedens gegründete Hausse-Spekulation sich hauptsächlich als die richtige und gewinnbringende erweist, so hat ein solcher Spekulant mehr Glück als Verstand gehabt.

Als Frankreich im Jahre 1870 aus der hohenzollern'schen Candidatur für den spanischen Thron einen Kriegsfall machte, war Graf Bismarck dermassen auf die Vermeidung eines Krieges bedacht, dass er sich sogar einer grossen diplomatischen Niederlage unterzog, indem er der beisspiellos frechen Forderung Frankreichs nachgab und den Verzicht der Hohenzollern auf den spanischen Thron zulies und befürwortete.

Nun hat der Fürst Bismarck unzweifelhaft seine gegenwärtige Machtstellung im In- und Auslande gerade diesem Kriege mit Frankreich zu verdanken, den er um jeden Preis vermeiden

wollte, wie er dies übrigens bereits durch seine Nachgiebigkeit in der Luxemburger Frage bekundet hatte, eine Nachgiebigkeit, welche das kriegslustige Süddeutschland in höchstem Maasse entrüstete. Hätte der Krieg mit Frankreich in der Absicht des Grafen v. Bismarck gelegen, wie der Krieg gegen Oesterreich im Jahre 1866 unzweifelhaft in seiner Absicht lag, so müsste man, obwohl der Ausgang des Krieges nicht von seiner persönlichen Einwirkung abhing und obwohl auch bei diesem, wie bei jedem anderen Kriege, das Glück eine gewisse Rolle gespielt hat, nichtsdestoweniger von ihm sagen müssen, dass er ebenso viel Verstand als Glück gehabt habe.

Nachdem Herr v. Bismarck aber diesen Krieg, der ihn auf seine Höhe emporgehoben hat, um jeden Preis hat zu hintertreiben gesucht, wird man betreffs seiner gegenwärtigen Machtstellung unbestritten zu der Ueberzeugung gelangen müssen, dass er mehr Glück als Verstand gehabt hat, gerade wie jener Börsenspieler, welcher seinen Reichthum einer Spekulation verdankt, welche im völligen Gegensatz zu dem von ihm ertheilten Auftrage stand.

Das ist bis zum französischen Kriege der grosse Staatsmann, dessen weitsichtiger Blick und dessen ungeheurer Verstand von jeher wusste, wie Alles

kommen würde und der vermöge dieser Eigenschaften die Ereignisse der Zukunft auf die Melodie seiner Pfeife dressirte!

Das ist derselbe Staatsmann, welcher sich vor dem Kriege mit Frankreich fürchtete und demselben, als er dennoch ausbrach, als sittliches Motiv jene Fabel von der Beleidigung des Königs Wilhelm durch Benedetti in Ems unterschob, um die niedrigen Leidenschaften im Volke, die Rachsucht und den Hass, zu erregen.

Wir können hier absehen von jedem näheren Eingehen auf Details, welche dem Ausbruche des deutsch-französischen Krieges ausserdem vorhergingen, um uns den Vorwurf mangelnden Patriotismus für das deutsche Vaterland zu ersparen, und begnügen uns damit, nur noch das Wort zu citiren, welches Kaiser Wilhelm in seiner Ehrlichkeit und ohne Auftrag des Reichskanzlers ausgesprochen:

«A Ems, il n'y a eu ni insulté ni insulteur!»

II. Capitel.

Bismarck, der Socialismus, die Volkswirthschaft und die Corruption.

Der Fürst Bismarck hielt bekanntlich am 9. Februar 1876 im deutschen Reichstage eine derjenigen langen Reden, welche von den Reptilien, als die Gesamtsumme sämmtlicher momentan auf der Welt sich befindenden Weisheit darstellend, pflichtschuldigst verkündigt zu werden pflegen. Es war bei Gelegenheit der Berathung der Strafgesetznovelle und Bismarck vertrat mit seiner gewöhnlichen Energie die festere Knebelung der Presse, der er nicht nur die Schuld an dem allgemeinen politischen Misstrauen, sondern auch an der materiellen Nothlage des Landes in die Schuhe zu schieben versuchte. Es kann sich hier selbstverständlich nicht darum handeln, den Nachweis zu führen, dass der Reichskanzler sich frei von aller eigenen Schuld wusste — diesen Glauben in allen Dingen zu besitzen, hat er ja die ausgeprägteste Neigung — wir wollen nur seine Naïvetät konstatiren auf einem Gebiete, welches zu kultiviren ein Staatsmann die Pflicht hat, wenn er überhaupt den Anspruch erhebt, als solcher zu

gelten. Dass der Reichskanzler aber auf diesem Gebiete Nichts weiss, lässt überhaupt vermuthen, dass er von dem ihm an Geist so weit überragenden Wagener überhaupt Nichts gelernt, oder doch wenigstens Nichts behalten hat und dass der Letztere somit verantwortlich zu machen ist für die nach mancher Richtung hin so gefährliche Unwissenheit des Fürsten Bismarck.

Es ist wohl natürlich, dass der Reichskanzler weder die Reptilien noch die übrige bestochene gesinnungstüchtige Gründerpresse verantwortlich macht für das Verbreiten von Nachrichten, welche Besorgnisse erregen für die Zukunft des Landes und das öffentliche Misstrauen wecken gegen die volkswirtschaftlichen Rezepte der väterlichen Regierung und namentlich gegen die «besitzende Klasse», d. h. die armen «Gründer» des Parlaments und der Judenbörse, ehe dieselben den letzten Groschen des arbeitenden Volkes in Sicherheit gebracht haben. So ist es denn neben der ultramontanen namentlich die socialistische Presse, welche der Reichskanzler für die Nothlage verantwortlich macht und, indem wir seine dahingehenden Aeusserungen wörtlich reproduziren, glauben wir am besten seine hohe Beschränktheit auf dem sozialen Gebiete darzuthun. Er sagte a. a. O.:

«Einstweilen leiden unter diesen Gerüchten (der sensationsbedürftigen Presse) nur die Geschäfte; *) die Geschäfte leiden aber auch unter einer anderen Art von Presse, ich möchte sie diejenige nennen, die im Dunkeln wirkt, nur bei dem Lichte einer Blendlaterne. Diese Presse hat ihre Verbreitung vorzugsweise unter Leuten von wenig Mitteln und wenig Bildung, **) die nicht im Stande sind, die Irrthümer und dreisten Lügen, welche man ihnen aufbürdet, zu kontroliren. Diese Art der Presse hat bei dem gemeinen Mann, der mit Recht glaubt, dass er in üblen Verhältnissen lebt, ein leichtes Spiel, indem sie ihn glauben macht, dass er durch weniger Arbeit und durch eine Anweisung auf das Vermögen seiner Mitbürger dieser Lage dauernd abhelfen könne. Diese Art der Presse, diese demokratisch-socialistischen Umtriebe haben wesentlich mit dazu beigetragen, den geschäftlichen Druck, unter dem wir uns befinden, hervorzurufen. Sie haben sicher die deutsche Arbeit vertheuert und vermindert. Der deutsche Arbeiter bei gleichem Lohn leistet weniger als der französische und englische Arbeiter; der ausländische Arbeiter arbeitet mehr und geschickter

*) Der Börse?

Verf.

**) Also nicht unter Gründern?

Verf.

als der deutsche und dadurch sind wir konkurrenzunfähig (sic!) geworden. Die socialistischen Umtriebe haben die Leute auf unrealisirebare Hoffnungen verwiesen, die sie von regelmässiger fleissiger Arbeit abhalten und desshalb klage ich die Führer an, dass sie an der Noth des Arbeiterstandes wesentlich mit Schuld sind. Wenn diese Zusände fort dauern, so gehen wir der *Verarmung* entgegen, das wird die Zuchtruthe sein, welche *Gott* über diese Excesse verhängt.»

Es is wohl nicht leicht möglich, in wenigen Sätzen ungereimteres Zeug zu sprechen als es hier geschehen und wir zweifeln nicht, dass selbst der «Reichsfreund» bedenklich den Kopf schütteln würde über diesen mittelalterlichen Erguss, wenn ein Anderer als Fürst Bismarck ihn zu Tage gefördert hätte.

Dass wir der Verarmung entgegengegangen sind, ist Thatsache, dass wir dem vollständigsten Ruin entgehen, ebenfalls. Ob dies die Zuchtruthe Gottes ist für demokratisch-socialistische Umtriebe oder die natürliche Folge unserer grundfalschen manchesterlichen Volkswirthschaft, der gesetzlich patronisirten Plünderung des Volkes durch den gewissenlosen Schwindel, des Militarismus, der politischen Unsicherheit und der jämmerlichen Stel-

lung, welche der deutschen Industrie und dem deutschen Arbeiter in Deutschland zugewiesen ist und eine Entwicklung nicht gestattet, das, glauben wir, ist nicht schwer zu entscheiden.

Diese angebliche Zuchtruthe Gottes ist einfach nichts Anderes als das eigene Produkt der Unfähigkeit und Unehrllichkeit der herrschenden Klassen gegenüber dem arbeitenden Volke und sollten wirkliche Excesse eines Tages das Vorhandensein einer Anweisung auf das «Vermögen der Besitzenden» konstatiren, so mögen sich diejenigen nicht wundern, welche dem Volke einen wohl begründeten Anspruch auf das ihm mit Unrecht geraubte Gut hinterlassen haben.

Der Reichskanzler giebt an anderer Stelle seiner Rede zu, dass weder er noch der grösste Theil der Mitglieder des Reichstages den Socialismus und seine Forderungen in der ihm dienenden Literatur studirt haben. Es ist dies eine Entschuldigung für seine Unwissenheit und zugleich ein Vorwurf, der ihn selbst trifft desshalb, weil er mit solcher Leichtfertigkeit seine Autorität missbraucht, um den Klassenhass zu schüren.

Sehen wir uns um in der Vergangenheit des Reichskanzlers, so finden wir nirgends, dass er irgend einem Studium obgelegen. Selbst Hesekiel ver-

mag dies mit dem besten Willen nicht nachzuweisen, und nur einmal erzählt er, wie der Herr v. Bismarck-Schönhausen mit dem Herrn v. Arnim-Kröchlendorff, seinem Schwager, am 7. März 1846 einer Sitzung des «Vereins für das Wohl der arbeitenden Klassen» in Potsdam beiwohnen wollte.

Als Fürst Bismarck seine Philippika gegen den Socialismus losliess, mag er wohl über diesen einen Versuch noch nicht hinausgekommen sein, denn er meinte ganz harmlos: «Nicht Alle sind auf socialem Gebiet so gelehrt als der Abgeordnete Bamberger.» Nun, wer Herrn Bamberger kennt, der weiss, dass auf diesem Gebiete eine grosse Gelehrsamkeit ihn auch nicht drückt. Aber ihn zeichnet ein feiner Raçen-Instinkt, mittels dessen er die Gefahr wittert, welche der Socialismus in jeder Form für das antisociale, die Gesellschaft und den Staat seit zwei Jahrtausenden mit providentieller Sicherheit auflösende *Judenthum* in sich trägt, in hohem Grade aus, und dieser Instinkt der Selbsterhaltung giebt ihm sogar ein annähernd richtiges Urtheil über die Zweckmässigkeit nächster Massregeln, denn in die Tiefe dringt nicht der Geist des Semiten.

Graf Eulenburg hatte damals gleichzeitig sich die zu einem socialen Speech nöthige Gelehrsamkeit aus der sehr einseitigen und unbedeutenden Schu-

ster'schen Broschüre von einem seiner Rätthe zusammenschneiden lassen und mit der ihn stets auszeichnenden Gemüthlichkeit gemeint, wenn der Reichstag sich seinen Folgerungen, die er auf Grund so bequemen und schnellen Studiums kühn genug zog, nicht anschliesse, so werde die Zeit kommen, in der

«die Flinte schiesst, der Säbel haut.»

Wir fürchten, offen gesagt, auch letzteres — besonders in einem Lande, dessen Minister dieser Frage gegenüber solche Nonchalance entwickeln und dessen Abgeordnete auf Herrn Bamberger als Experten blicken. Indessen braucht man nicht dieselbe Abneigung gegen Pulvergeruch zu haben, wie der Abgeordnete Bamberger und kann doch finden, dass Graf Eulenburg in jenem Augenblick dem «leichtherzigen» Olivier ähnelte. Ueber solche Sachen scherzt man nicht; überdies haut zwar der Säbel, aber man weiss nie genau — Wen, und es gibt Flinten, welche um die Ecke schiessen.

Fürst Bismarck verschmäht es, mit Studien zu prunken, welche — seine Rätthe in ein paar Stunden gemacht haben. Seine offizielle Rede am 9. Februar 1876 und eine ähnliche von ihm zu Tage geförderte offiziöse Causerie kurz vorher beim Reichseisenbahn-Diner deuten auf eigene zu

diesem Behufe schleunig vorgenommene Anschauungen. Der Reichskanzler hatte nicht weit zu gehen. Ganz in seiner Nähe sah er täglich die französischen Arbeiter am Palais Pless und die deutschen Arbeiter am Palais Radziwill in Thätigkeit. Dabei machte er die Entdeckung, dass der französische Arbeiter mehr leiste als der deutsche.

Hier also liegt nach Bismarck der Grund der Krisis und der Grund der Concurrenzunfähigkeit der deutschen Industrie. Warum aber leistet der deutsche Arbeiter weniger? Weil er nach Bismarck auf Bebel und Hasselmann hört. Darum belehren wir ihn durch Wort und Schrift, dass Letztere Utopisten sind und — die Krisis ist vorüber!

Da haben wir den Reichskanzler auf dem bekannten Schultze-Delitzsch'schen Bildungsstandpunkt, den er sich bei seinem Winteraufenthalt in so gründlicher Weise angeeignet hat. Das ist die sociale Wintertheorie des Fürsten Bismarck!

Im Sommer geht er auf's Land. Was er dort gelernt, hat er den Gründern und Juden an seiner Tafelrunde zum Besten gegeben. Aus seiner socialen Sommertheorie leuchtet zur Evidenz hervor, dass dieselbe durch die gesunde Varziner

Waldluft, welche er mit Wagener gemeinschaftlich genossen, erzeugt ist. Fürst Bismarck hat Besitzungen in Pommern, in der Mark und in Lauenburg. Auf seinen Domänen tritt ihm die sociale Frage entgegen, aber die Form ist ganz verschieden, er muss die Sachen sehen wie sie sind. Er versichert, dass in Lauenburg die Arbeitsnoth grösser sei, als anderwärts, weil die Unmöglichkeit vorläge, sich anzusiedeln. Einen Gegensatz bildeten die Verhältnisse in Schönhausen und einem Theile Pommerns, wo die sogenannten Büdnerverhältnisse*) den ländlichen Familien die Möglichkeit einer Existenz böten, wenn auch der Mann nebenbei auf Arbeit gehen müsse. Dieses Verhältniss halte er, Bismarck, für das richtige. Die Massregeln in Bezug auf die Dismembration in Pommern halte er für nicht glücklich gewählt. Durch seine industriellen Anlagen in Pommern**) habe er die Erfahrung gemacht, dass die innerhalb der Tagelöhnerfamilien sich durch besondere Begabung und Fleiss hervorthuenden Individuen Gelegenheit fänden, sich emporzuschwingen; desshalb sei dort kein Mangel an Arbeitskräften. Er halte also industrielle An-

*) Hausbesitz mit Garten und Ackerland bis zu zwei Morgen.
Verf.

**) Reichs-Papierstofffabrik, Brennerei etc.

lagen in Verbindung mit der Landwirthschaft für einen Hebel auch unserer gewöhnlichen Tagelöhnerverhältnisse und glaube desshalb, dass die grosse Ausbreitung des Socialismus in Holstein mit darauf zurückzuführen sei, dass dort ähnliche Ansiedelungen nach Lage der Gesetzgebung unmöglich seien. Die Unzufriedenen seien die, welche Etwas gelernt hätten und sich den Weg zum Vorwärtskommen versperrt sähen.

Hier also haben wir die sociale Sommertheorie des Fürsten Bismarck und sehen ihn plötzlich auf dem Standpunkt der heftigsten Gegner des Herrn Schultze-Delitzsch und seiner Wohlfahrts-Theorien. Mag nun das Verdienst, dem Reichskanzler eine erträgliche sociale Sommertheorie beigebracht zu haben, lediglich dasjenige des wirklichen Geh. Rath Wagener sein — es ist gleichgültig; der Fürst Bismarck hat sie eine Zeit lang für die seine ausgegeben. Zwischen beiden Theorien des Reichskanzlers braucht man in Bezug auf ihren Werth keine Abwägung. Es genügt die einfache Frage: Wenn der Socialismus die Leistungsfähigkeit der von ihm ergriffenen Arbeiter schwächt, wie kommt es, dass die von dem Socialismus früher und heute noch heftiger und allgemeiner erfüllten

französischen Arbeiter mehr leisten als die deutschen, denen der Socialismus noch sehr neu und unter denen er nicht so verbreitet ist als unter den französischen?»

Wenn aber der Reichskanzler seine sociale Sommertheorie in annähernd vernünftiger Weise entwickelt, so sollte man doch auch erwarten dürfen, dass er dieselbe praktisch zu verwerthen suchen werde. Aber hier stossen wir wieder auf die bekannte Fähigkeit des «grossen» Mannes, seine Anschauungen zu wechseln wie seine Hemden, und so hat er denn auch nach dieser Richtung hin genau das Gegentheil von dem gethan, was er selbst als gut und vernünftig gepredigt.

An Fürst Bismarcks Tische sassen Miquèl, Lascker und Consorten, die personifizirten Vertreter der antisocialen Theorien, der falschen Wirthschaftsprincipien. Sie hauptsächlich sind es, welche der Aera Bismarck die Krisis geschaffen — ihre Wirksamkeit ist dem deutschen Reiche weit verhängnissvoller geworden, als es hundert Bebel je vermocht hätten. Diesen Leuten entwickelte der Reichskanzler seine Ideen — sie lobten dieselben wie Alles, was aus Bismarck's Munde kommt; der «grosse» Mann war befriedigt und — vergass, was er für Augenblicke gewollt.

Der Fürst Bismarck weiss als Landedelmann, dass ein reichgewordener Kaufmann, der sich ein Gut kauft und es selbst bewirthschaftet, Unsinn macht und das Gut ruinirt; trotzdem hat er seine Zustimmung gegeben, dass ein jüdischer Advokat die ganze altpreussische Gesetzgebung modernisirte. Obgleich Lasker von Handwerk und Fabrikation absolut nichts versteht, durfte er ein Nothgewerbegesetz schaffen. Fürst Bismarck mit seinen Wirthschaftspolitikern, den Bamberger, Lasker, Miquèl etc. hat die Grundlage des deutschen Wohlstandes zerstört: Die gute Erziehung der deutschen Industrie-Arbeiter.

Wer sich seine Wirthschaftsgesetze von den semitischen Rabulisten des Berliner Mühlendamms machen lässt, der soll sich nicht wundern, wenn die deutsche Industrie den Charakter der Trödelbude annimmt: Billig und schlecht!

Aber es genügte dem grossen Reichskanzler nicht, auf Laskers Rath die Productionskraft der Nation zu schwächen, — er hat auch auf Miquèl's Betreiben eine Verschiebung der Besitz- und Einkommen-Verhältnisse möglich gemacht: Aktien-gesetz. Eine Verschiebung, welche die producirenden Klassen ärmer, die geldumschlagenden Klassen reicher macht und damit nothwendig den Socialismus erzeugt.

Die Arbeiter sind das Object einer falschen Wirthschaftspolitik. Sie leiden unter ihr am meisten. Die Träger dieser Politik sind die Männer der Tafelrunde des Fürsten Bismarck. Ein eigenthümliches Schauspiel! Die Väter der socialen Revolution verdammen Diejenigen, welche die Revolution dereinst machen werden!

Bismarck hatte im Jahre 1867—68 plötzlich die Ueberzeugung gefasst, dass für den Grundbesitzerstand etwas gethan werden müsse, namentlich bezüglich der Hypotheken-Verhältnisse. Sein Instinct leitete ihn ganz richtig. Durch Lothar Bucher bewog er den verdienstvollen Dr. Rodbertus, ein Werk über das Rentenprinzip zu schreiben. Auf Grund dieses urdeutschen Schuldprinzips wäre eine Reform der Landschaften, wäre die Ansiedlung kleiner, grundbesitzender Arbeiter, wäre eine durchgreifende Steuer- und Wirthschaftsreform möglich gewesen. Rodbertus hat der eigenen Idee des Fürsten Bismarck den praktischen Ausdruck gegeben. Und das Resultat??? Das Buch lag einige Wochen auf des Fürsten Tisch und — — — — — Herr Miquèl erhielt die Unterschrift unter die Concession der Preussischen Central-Boden-Credit-Aktien-Gesellschaft!

Das soziale Reformbedürfniss des Reichskanzlers gebar eine antisociale Massregel, kraft deren einige Banquiers und ihre politischen Agenten zur Ausbeutung des Grundbesitzes gesetzlich autorisirt wurden.

Mit diesem Akte vollzog Fürst Bismarck selbst die Grundsteinlegung des ganzen so üppig in's Kraut geschossenen verhängnissvollen Gründer- und Wucher-Schwindels der neuesten Aera!*)

Fürst Bismarck hatte es vermuthlich in Frankreich gelernt, dass der Staatsmann für seine Erfolge einer grossen ihm zur Seite stehenden Geldmacht bedürfe. Ja, er musste bitter daran erinnert werden, als der französische Krieg ausbrach und das Kriegsanlehen des Norddeutschen Bundes ein so jämmerliches Fiasco machte. Der überraschende Erfolg der deutschen Heere unter Moltke jedoch machte dieses Fiasco wieder wett und brachte dem Deutschen

*) Der Verf. verschmäht es, hier auf die Processe zu reagiren, welche in Folge der aufgestellten Behauptungen, Fürst Bismarck sei bei der Gründung genannten Instituts materiell betheiligt worden, eingeleitet sind. Den schwerwiegenden Vorwurf, die Etablirung dieses anrühigen, mit ungesetzlichen Privilegien ausgerüsteten Instituts ermöglicht, ja befördert zu haben, wird er nie von sich abwälzen können.

Reiche einen grossartigen politischen und materiellen Erfolg.

Bismarck und die Milliarden traten ihre wirtschaftliche Herrschaft in Deutschland an. Mit dem Goldregen sollte die wirtschaftliche Blüthe forcirt werden. Banken, industrielle Etablissements, Eisenbahnen schossen wie Pilze aus der Erde, und der Werth des Geldes sank rapide unter dem Steigen der Productionskosten. Aber es war ja da. Der glänzende Prospect für die Nutzbarmachung der Milliarden verhieß Deutschland unerhörten Wohlstand und ewige Glückseligkeit. Die patriotischen Geldmächte rissen die Regierung fort in den Taumel der Gloire auch auf wirtschaftlichem Gebiet. Bismarck zierte sich mit der Genialität eines neuen Colbert und — überlieferte das Vermögen des Staates den Gründerjuden und ihren Genossen im Parlament und an der Börse. Der «Diskontoring» sowie der «Rothschild-Bleichröder-Ring» bemächtigten sich der Führung und fanden sich für schimmerndes Gold bald stark genug vertreten in der Regierung und Gesetzgebung, um die ganze wirtschaftliche Maschinerie für den Kapitalismus zu annektiren.

Die bezahlten Agenten der «patriotischen» Geldmächte drängten sich selbst in die nächste Umgebung des Kaisers. Minister a. D., wie v. Bernuth und

v. Bonin waren ihm Werkzeuge wie die vortragenden Rätthe im Cabinet des Kaisers, z. B. die Wirkl. Geh. Rätthe Wehrmann, Schumann und Andere.

Das Grosskapital benützte seine Macht vortreflich. Es gebrauchte ein Gesetz, um das arbeitende Volk mit seinem Hab und Gut sich dienstbar zu machen. Man schuf das Aktiengesetz und das Volk zeigte sich bereit, an dem glänzenden Schwindel zu profitiren — es war ein vom Waffenerfolge beraushtes, im Grössenwahnwitz befangenes Volk!

Das Grosskapital verlangte die unbedingte Herrschaft über alle Credit-Institute des Landes, auch über die Königliche Bank. Das Reichsbankgesetz überlieferte auch die Reichsbank den Juden; ein Blick auf die Namen des Direktoriums und Curatoriums beweist diese Thatsache zur Genüge. Das Grosskapital verlangte Mobilisirung des Grundbesitzes und ein Institut, mittelst dessen die Hanse- mann, Bleichröder, Rothschild den Grund und Boden in ihre Hände bringen konnten. Das Hypotheken- und Subhastationsgesetz entspricht allen Wünschen der Geldgewaltigen — die Preussische Centralbodenkreditgesellschaft ist ihre Gründung. Auch die kleinen Juden brauchten eine kleine Gabe, um gross zu werden. Daher schaffte man die Wuchergesetze ab und setzte an ihre

Stelle Strafgesetzbestimmungen, unter und mit welchen das kleine Volk Moses unverdrossen und ungehängt dem Goj den Hals abschneidet.

Dem Fürsten Bismarck gebührt das Verdienst, die Juden und ihre Genossen zur herrschenden Clique in Deutschland erhoben zu haben. Sein Manchestertrio Camphausen - Delbrück - Michaelis hat die Judenwirthschaft in Deutschland inaugurirt, und wer über die zunehmende Verarmung der Landwirthschaft und der steigenden Besitzlosigkeit der mittleren und ärmeren Klassen sich verwundern will, der sehe sich den Wahlspruch des Juden etwas näher an. Er stimmt genau überein mit den Prinzipien der radicalen Freihändler: **Reich werden, ohne zu arbeiten; ernten, ohne zu säen.** Und wer sind die Wortführer des Manchesterthums in Parlament, Presse und Vereinen? Juden! — beschnittene und unbeschnittene Hamburger, Leipziger, Königsberger, Stettiner. Juden waren es, welche mit Hülfe des Cobden-Clubs grosse Summen darauf verwendeten, um die Presse in ihre Hände zu bringen. Wie viele Zeitungen Deutschlands sind heute frei vom Judaismus?

Juden waren die Hauptstützen des reichskanzlerischen Systems bei Einführung der einseitigen, freihändlerischen Handelsverträge. Man erinnere sich

nur der Thätigkeit des Abgeordneten Reichenheim, der Vertrauensmänner Liebermann und Rothschild und Anderer.

Juden sind es, welche den deutschen Handelstag majorisiren, und in den Delegirten der Seestädte unter Dr. Alex. Meyer bis vor Kurzem die Führung besassen.

Juden sind es, welche im volkswirthschaftlichen Congress die Gesetze der freien, entfesselten Speculation entworfen, und welche noch auf der letzten Bremer Versammlung in den Namen Philippsohn, Weigert, Jakobsohn, Braun u. s. w. ihre internationalen Advokaten fanden.

Juden sind es, welche die wirthschaftliche Gesetzgebung im Reichstage am wirksamsten betreiben; das Schwindel-Aktiengesetz, die Wucherfreiheit, den Contraktbruch, die Bestechlichkeit der Richter sanktionirt und in den Bamberger, Oppenheim, Lasker u. s. w. ihre Propheten besitzen.

Juden sind es, welche in den einzelnen wirthschaftlichen Vereinen, die sich durch die eingetretene Nothlage gebildet haben, unter dem Deckmantel des Humanismus dem bankerotten Manchesterthum noch heute das Wort reden und die Arbeit ausser Landes treiben, um im Zwischenhandel, ohne Arbeit, ihren Schacher weiter fortführen zu können.

Die Protektion der Juden im Deutschen Reiche ist eines der schwärzesten Merkmale des gloriosen Reiches Bismarck und seine Folge die Verarmung des arbeitenden Volkes, die Demoralisirung aller Kreise der Gesellschaft, die widerliche Verschmelzung von Geld- und Geburtsadel.

Zwei Beispiele genügen. Der internationale Schwindel des Gotthardbahn-Unternehmens ist in Scene gesetzt unter der Aegide Bismarcks und ausgeführt von dem semitischen Gründer-Ringe Diskonto-Gesellschaft-Bleichröder-Oppenheim. Der Name Deutschlands ist dadurch im Auslande schwer besudelt worden.

Man vergegenwärtige sich ferner den kolossalen rumänischen Eisenbahnschwindel, entritt von Strousberg, den Herzögen Ratibor, Ujest und Graf Lehdorff-Steinort. Nachdem dieses Consortium das deutsche Publikum schwer geschädigt, ward es durch Intervention des Reichskanzlers selbst ermöglicht, dass dies hochadelige Consortium den Kopf aus der Schlinge ziehen konnte, und die Häuser Diskontogesellschaft-Bleichröder gründeten, um das deutsche Kapital zu «retten», den Schwindel um. Sie wurden in Folge dessen in den Adelsstand erhoben, oder vielleicht richtiger gesagt «nobilitirt». Die Frucht ihrer Bemühungen ist der vollständige Ver-

lust des deutschen Kapitals zu Gunsten der Gründer. Sie sind nichts als die Leichenräuber Strousberg's. Die diplomatischen Verhandlungs-Akten zwischen dem Reichskanzleramt und der rumänischen Regierung standen dem Juden Bleichröder zur Einsicht offen!

Es ist unnöthig, an dieser Stelle zu begründen, wie tief der Judaismus mit seinen laxen Grundsätzen selbst in diejenigen Kreise eingedrungen ist, welche früher der Stolz des Hohenzollerenthums, die Basis seiner sittlichen Existenz bildeten. Ein Blick auf das Buch Otto Glagau's, ein Blättern in dem Buche «Politische Gründer» von Dr. R. Meyer (leider jetzt verboten) — und dem wahren Vaterlandsfreunde zeigt sich in entsetzensvoller Wirklichkeit mitten unter den berüchtigtsten Gründerjuden ein grosser Theil der Volksvertretung, der höchste Adel des Landes, das höchstgestellte Beamtenthum. Alle, Alle haben sie dem Schimmer des goldenen Kalbes nicht zu widerstehen vermocht und glänzende Namen empfangen den Sold für die Verdeckung des Schwindels aus den schmierigen Händen des Wucherers und ehemaligen Trödeljuden.

Und der Fürst Bismarck selbst ist dem Einflusse des Judenthums unterlegen. Juden und Judengenossen bilden seine Gesellschaft, sie sind sein

täglicher Umgang und seine politischen Rathgeber, seine Hauptkulturkämpfer. Der Jude Bleichröder «fruktificirt» sein Vermögen und die Beziehungen zwischen der reichskanzlerischen Familie und derjenigen des gerichtlich notorischen Wucherers sind die intimsten.

Fürst Bismarck dachte nicht immer so über die Juden, wie heute. Im Jahre 1847 am 15. Juni*) griff er als Abgeordneter in der sog. «Curie der drei Stände» in die Juden-Emancipations-Debatte ein und sagte u. A.:

— — — «Ich bin kein Feind der Juden, und wenn sie meine Feinde sein sollten, so ver-gebe ich Ihnen. Ich liebe sie sogar unter Um-ständen**) Ich gönne ihnen auch alle Rechte, nur nicht das, in einem christlichen Staate ein obrigkeitliches Amt zu beklei-den. Ueber den Begriff eines christlichen Staates haben wir von dem Herrn Minister des Schatzes und von einem andern Herrn auf der Ministerbank

*) Hesekiel. Das Buch vom Fürsten Bismarck. Seite 102 u. f.

**) Es ist bekannt, dass Bismarck bei seinem selbst von Hesekiel geschilderten wüsten Leben stets bis über die Ohren in Schulden stekte und dabei vollständig in die Hände der Juden gerathen war.

Worte gehört, die ich fast ganz unterschreibe; dagegen haben wir auch gestern gehört, dass der christliche Staat eine müssige Fiction, eine Erfindung neuerer Staatsphilosophen sei. Ich bin der Meinung, dass der Begriff des christlichen Staates so alt sei, wie das ci-devant heilige römische Reich, so alt, wie sämtliche europäische Staaten, dass er gerade der Boden sei, in welchem diese Staaten Wurzel geschlagen haben und dass jeder Staat, wenn er seine Dauer gesichert sehen, wenn er seine Berechtigung zur Existenz nur nachweisen will, sobald sie bestritten wird, auf religiösen Grundlagen, sich befinden muss.» — — — — —
 — — — — —

Bismarck führt dann aus, dass er einen christlichen Staat nur denjenigen nenne, welcher sich die Aufgabe gestellt habe, die christliche Lehre zu realisiren, zu verwirklichen und sagt ferner:

«Wenn indess auch die Lösung nicht immer gelingt, so glaube ich doch, die Realisirung der christlichen Lehre sei der Zweck des Staates; dass wir aber mit Hülfe der Juden diesem Zwecke näher kommen sollten als bisher, kann ich nicht glauben! — — — — — Ferner haben mehrere Redner wieder, wie in fast allen Fragen auf das nachahmenswerthe Beispiel von England und Frankreich

verwiesen. Diese Frage hat dort weniger Wichtigkeit, weil die Juden dort nicht so zahlreich sind wie hier — — etc.»

Und heute? Juden, gewässerte und ungewässerte, zertrümmern im Einverständniss mit dem Reichskanzler oder in dessen Auftrage Kirche und Religion; Juden sprechen Recht vom Throne der Themis, Juden machen die Gesetze, welche der christlichen Aufgabe des Staates Hohn sprechen; — der Judaismus macht sich breit in den Ministerien und den Salons der Minister; dem Judaismus und seinen unheilvollen Einflüssen ist darauf auch Bismarck im Laufe der Zeit verfallen — er ist bewusst oder unbewusst eine Kreatur des Judenthums.

Juden auch waren es, welche dem Justizminister des Fürsten Bismarck, Herrn Leonhardt, im vorigen Jahre die gesetzliche Befugniß ertheilten, an Richter Gratificationen zu vertheilen.

Also auch dieser wichtigste Theil der Staatsmaschine — der Richterstand — musste korrumpirt werden unter den Augen des grössten aller lebenden und todtten Staatsmänner. Das ist mehr als stark, das ist monströs.

Der Adel ist unter Aufopferung seiner bisherigen Standestraditionen, welche ihm die Betheiligung an dem für die Finanziere vorbehaltenen

Geldgeschäfte verboten, zum grossen Theil unter die Gründer gegangen. Ein grosser Theil der hochgestellten Staatsmänner gleichfalls, weil Fürst Bismarck seinen Geheimräthen die Betheiligung an Gründungen speciell gestattete! Das Parlament ist durch die darin waltenden Gründer und Eisenbahnspekulanten korrumpirt. Das Brotkorbgesetz gewährt den Geistlichen eine Geldprämie auf kirchliche Felonie.

Und somit hat denn auch der deutsche Reichstag auf Antrag der Regierung beschlossen, dem Publikum den erforderlichen Schutz gegen die Corruption des Richterstandes zu versagen.

Der Justizminister hat als Mitglied desjenigen politischen Gewalthaber-Kollegiums, welches man Ministerium nennt, und dessen Bestand von dem jeweiligen politischen Einflusse abhängt, den es im Lande ausübt, ein offenes und unleugbares Interesse daran, sich denjenigen politischen Einfluss zu Nutze zu machen, über welchen die Richter in jedem Lande, gleichviel ob im monarchisch- oder parlamentarisch-despotischen, verfügen.

Nach dem Satze: «Geld regiert die Welt!» muss man dem Gelde den gleichen Einfluss auf die Richter wie auf andere Menschen zugestehen. Die Bestechlichkeit der Richter, welche durch die mannig-

fachsten Mittel gefördert werden kann, ist eine Klage, welche von Seiten aller Geschäfte wiederkehrt. Die Auszeichnung von Staatsanwälten und Richtern, welche auffällig zu deren Wirksamkeit in politischen Prozessen der Neuzeit harmonirt, ist in hohem Grade bedenklich für die Pflege des Unabhängigkeitssinnes der preussischen Richter. Jetzt werden dieselben auch noch mit Geld unterstützt und zwar direct von den Gewalthabern. Der Justizminister Bismarck's behauptete im Reichstage, Gratifikationen würden nur in Unglücksfällen bewilligt. Die Abgeordneten Haenel und Reichensperger wiesen nach, dass dies nicht der Fall sei, sondern vielmehr unter höchst eigenthümlichen Umständen Gratifikationen vertheilt worden seien. Herr Reichensperger erbot sich, dem Justizminister privatim Dinge zu erzählen, welche er im öffentlichen Interesse verschweigen zu müssen glaube. Wie corruptirt muss ein Parlament sein, das den Richter der Laune und dem Willen des Justizministers und damit dem Fürsten Bismarck überliefert!

Der Staat hat die Pflicht, jedem Beamten dasjenige Mass von Gehalt zu gewähren, welches erforderlich ist, um seine und seiner Familie Lebensbedürfnisse vollständig bestreiten zu können. Diese Pflicht aber liegt ihm am dringendsten ob gegenüber

dem Richterstande, um diesem die möglichste Unabhängigkeit zu gewähren. Wenn aber der Staat dieser Verpflichtung nachgekommen ist und dem Richter die Mittel zu seiner Existenz in ausgiebigem Masse gewährt hat, dann hat er weder das Recht noch auch die Pflicht, demselben Ersatz für die ihm sonst zustossenden Unglücksfälle zu gewähren. Wenn der Richter durch Krankheitsfälle, durch Brandschaden, durch Spekulation in faulen Aktien u. s. w. Schaden erleidet, so verbleiben ihm die Subsistenzmittel, welche der Staat ihm gewährt, nach wie vor ungeschmälert. Ein Corrupturpfonds für den Richterstand ist eine Institution, deren Unmoralität ekelerregend wirkt.

Und nicht allein das. Selbst über die Grenzen des deutschen Reiches hinaus hat der mächtige Bismarck die Corruption im Richterstande zu fördern versucht, allerdings mit einem Erfolge, der beschämend für Deutschland ist. In einem Schreiben des Auswärtigen Amtes zu Berlin *) an den Grafen Arnim in Paris findet sich die Aeusserung, dass die Mandements der Bischöfe von Angers und Nîmes nach französischem Recht unter den Begriff der *provocation directe à la désobéissance aux lois* zu bringen sein würden, «wenn die Regierung

*) **Pro nihilo.** Seite 104. Verlagsmagazin, Zürich.

auch nur ein ganz geringes Mass von gutem Willen besässe.»

Bei solchen Anschauungen kann es allerdings nicht Wunder nehmen, wenn die Aera Bismarck so reich ist an politischen Verurtheilungen, über welche der noch nicht von dem Ruhmgeheul der Reptile berauschte Mensch sich entsetzen muss. Aber dem Richter ist es ja leicht gemacht im heiligen Deutschland. Er befindet sich ja mit seinen Urtheilen in Uebereinstimmung mit der «öffentlichen» Meinung. Und die öffentliche Meinung in Deutschland ist der Reptilienfonds!

Unter einer solchen Justiz aber war es auch nur möglich, dass der brutalste wirthschaftliche Plünderungsprozess in Deutschland zu solcher Blüthe gelangen konnte. Der berüchtigten Preussischen Centralbodenkreditaktiengesellschaft folgten eine Unzahl ähnlicher Institute, welche sich allmählig das gesammte Grundeigenthum der Bevölkerung dienstbar gemacht haben. Strousberg urtheilt in seinem Buche u. A. über diese Institute, indem er den von ihnen betriebenen schmachlichen Wucher nachweist, folgendermassen: «Dieser Wucher frisst Haus- und Grundbesitzer vollständig auf und mögen sich die heute Wohlsituirten nur nicht trösten. Wenn sie Kinder haben, ihr Vermögen theilen müssen, so

wird es nur eine Zeitfrage sein, wie bald Letztere vermögenslos dastehen werden.»

Aber nicht allein, dass die Reichsregierung es gestattete und die Strafjustiz sich unfähig oder unwillig fand, es zu verhindern, dass das Volk von Gründern und Schwindlern nach allen Richtungen hin ausgebeutet wurde — sie leistete auch durch directe Staatssubventionen dem Volksbetrug geradezu Vorschub. Der Finanzminister Camphausen borgte Millionen aus Staatsmitteln dem Gründer-*ring* der Diskontogesellschaft und zwar, «um keine Zinsen zu verlieren» (sic!) zu $2\frac{3}{4}$ Prozent. Und selbst, als der Jammer in Deutschland grösser und grösser wurde, als das Volk zur Besinnung kam und vor den gierigen Händen seiner Blutsauger zu retten suchte, was noch zu retten war — mit einem Worte, als der nahende «Krach» sich fühlbar machte, da verläugnete die Regierung Bismarck auch ihre Sympathien für die Gründer nicht und dieselben wurden vom Staate aus Staatsmitteln *subventionirt*.

Hiermit beginnt nun, nachdem das Privatpublikum ausgebeutet war, die Periode des grossen Raubzuges gegen das Eigenthum der Gesamtheit, des Staates. Aus den Milliarden waren grosse nationale

Fonds gebildet — der Invalidenfonds, der Festungsbaufonds, der Reichstagsgebäudefonds, der Provinzialdotationsfonds. Die Regierung öffnete die Truhen der Nation und überlieferte dem Gründer- und Wucherthum die mobilen Kapitalien. Die Gründer und Wucherer hinterlegten für das baare Geld die Aktien und Obligationen ihrer Eisenbahn-Schwindelunternehmungen. Ihre Ladenhüter repräsentiren heute das Kapital der Nation. Und der grösste Theil der Schuld fällt auf den Fürsten Bismarck selbst. Abgesehen davon, dass er als Träger der Regierungsgewalt für die masslose Verwirthschaftungspolitik an und für sich die Verantwortlichkeit übernehmen muss, hat er auch durch persönliches Eingreifen die schwerste Schuld auf sich geladen. Als im Reichstage die bittersten Vorwürfe laut wurden, dass der Reichsinvalidenfonds der Börse und dem Wucherthum dienstbar gemacht sei, da erklärte das sächsische Bundesrathsmitglied, zugleich Mitglied des Curatoriums des Reichsinvalidenfonds, Herr v. Nostiz-Wallwitz, die Gründerpapiere seien fast alle vor Zusammentritt der ordnungsmässigen Verwaltungsbehörde *auf Befehl des Reichskanzlers* für den Fonds angekauft worden! Der Reichskanzler war nicht anwesend. Eugen Richter konstatirte öffentlich, die ganze Schuld

trage der Fürst Bismarck allein — und von der Ministerbank widersprach Niemand!

Wie natürlich, war es die oppositionelle Partei des Centrums, welche den Versuch machte, dem wirthschaftlichen Schwindel auf den Grund zu gehen und ihr Führer Windthorst drohte, sehr «konkret» zu werden. Leider blieb der ganze Feldzug des Centrumsein schwächlicher Versuch und eine schwächliche Rede des Herrn v. Schorlemer-Alst charakterisirte zur Genüge das Schweigen Windthorst's. Fürst Bismarck hatte eine neue Probe seines Talents, die Menschen zu täuschen, abgelegt. Er liess aussprengen, dass er des Culturkampfes müde und seinen Frieden mit der Kirche machen wolle. Das Centrum erleichterte ihm diese Absicht, denn es schwieg und — fiel hinein. Ein zweiter ähnlicher Versuch wurde kurz darauf von den Conservativen gemacht. Es sollte volle und gründliche Untersuchung durch Niedersetzung einer Commission gefordert werden. Herrn v. Below-Saleske, das beredteste Mitglied der Conservativen, fiel die Redner-Rolle zu. Zwei Tage vor dem grossen Akt — es war Alles vorbereitet — zeigte Herr v. Below sich noch dem Verfasser dieses gegenüber fest entschlossen. Am Abend desselben Tages hatte er eine Unterredung mit dem Fürsten Bismarck. Folgen-

den Tages verliess Herr v. Below Berlin und nahm seine Vorsätze, sowie seine Rede mit sich. Die konservativen Blätter lösten wenige Tage darauf dies Räthsel, indem sie behaupteten, sichere Gewähr dafür zu haben, dass der Reichskanzler jetzt mit dem Liberalismus brechen wolle, er werde jetzt konservativ werden!

So ist es denn weiter und weiter bergab gegangen mit der deutschen Volkswirthschaft und so wird es weiter bergab gehen, bis der glänzende Schimmer des Systems Bismarck vor den Consequenzen des steigenden Elends erbleicht, bis die Massen sich empören, oder die Nationen in mörderischen Kriegen auf den Ruinen ihrer letzten Habe den nackten Despotismus als Trophäe aufbauen. Fürst Bismarck hat Recht, er ist ein grosser Mann — die Dummheit der grossen Masse hat ihm dieses Recht verliehen. Das deutsche Selbstbewusstsein beugt sich sklavisch dem Tyrannen Bismarck. Die Begriffe haben sich verwirrt, verdunkelt bis zur Apathie durch niedrige Leidenschaften. So liegt das germanische Volk im Staube vor einem Götzen, dessen Haupttugenden bestehen in Schlaueit, Mitelmässigkeit, Brutalität und Unzuverlässigkeit.

Meyer in seinem vortrefflichen Buche: «Politische Gründer», entrollt an der Hand der That-

sachen ein wahrhaft grauenenerregendes Bild der stets wachsenden Corruption in Deutschland unter der Aera Bismarck. Und mit Recht frägt er am Schlusse: «Wer aber ist Schuld? Wir scheuen uns nicht, es zu sagen. Der Mann ist Schuld, der seine immense Macht nie ein einziges Mal gebraucht hat, diesem Verderben Einhalt zu thun. Wer so den Stempel seines Wesens seiner Zeit aufdrückt und aufzudrücken den Anspruch macht, wie der Fürst Bismarck, der ist verantwortlich für die Gestalt des Zeichens, welches unsere Gesellschaft an der Stirne trägt. — — — — —

Das deutsche Reich in seiner heutigen Gestalt ist nicht der Gesamt-Ausdruck aller in der Nation schlummernden Kräfte. Diese werden vielmehr unterdrückt und an der Entfaltung gehindert durch den furchtbaren Druck, den der Capitalismus auf Deutschland ausübt, eine Capitalherrschaft, die ihre Entstehung allein dem Umstande dankt, dass der Fürst Bismarck ihr seinen gewaltigen Arm lieh. Und wer sich dagegen auflehnt, der ist ein Reichsfeind, der wird geächtet, zermalmt. — — — — —

Fürst Bismarck hat von seiner Macht einen so rücksichtslosen Gebrauch gemacht, dass Deutschland

sich in einem Zustande des Servilismus befindet, der auf der civilisirten Welt keine Analogie und in der Geschichte nur eine Parallele findet und diese einzige Parallele ist — eine Fabel, die Fabel von Gessler's Hut! — — — — —

Der «Staat», das «Reich», die «Regierung», alle diese Begriffe, sie sind immer nur die Umschreibung eines Begriffes, des «Säkularmenschen» Bismarck. — — — — So lange der Fürst Bismarck das allein mächtige Idol bleibt, wird die deutsche Nation dem Reich, das Reich dem Kanzler geopfert werden, und der Kanzler — gehört den Juden und Gründern!»

III. Capitel.

Fürst Bismarck und die Presse.

Der geistreiche Verfasser von **Pro Nihilo** sagt: «Unser Land (Deutschland) ist die eigentliche Heimat, und unsere Zeit die Zeit der centralisirten und monopolisirten Produktion der öffentlichen Meinung im Dienste der Gewalt.»

Die deutsche Presse ist in der Lage, dies nicht allein richtige, sondern wahrscheinlich auch sehr kompetente Urtheil ohne Widerspruch hinnehmen zu müssen. Sie ist im Dienste des Fürsten Bismarck und des von ihm protegirten Börsen- und Gründerwesens vollständig jeder selbstthätigen Beurtheilung irgend welcher innerer oder äusserer Fragen unfähig — sie ist die vollständigste willenslose Maschine all' des intriguanten Gaukelspiels geworden, das des grossen Bismarck Weg bezeichnet. Sie konstruirt ihm den Spiegel, wie er sich gern selbst sieht, als den überlebensgrossen, wahrheitsliebenden, ehrlichen, offenen, weisen Staatsmann, als den Menschen sonder Furcht und Tadel, gütig, gerecht, geistreich und bescheiden.

Und mit dieser selbstgeschaffenen Grösse geht Hand in Hand das Interesse derjenigen Clique, welcher der Fürst Bismarck sich unbedingt ergeben hat und welche heute seine einzige Stärke ist: die Grtinder und Juden als Repräsentanten des allmächtigen Kapitalismus.

Auf Kosten der Interessen des Reiches und des gesunden Volkssinnes schafft man der durch die Reptilienpresse korrumpirten Masse den Götzen, um auf Kosten des materiellen Wohlstandes der Nation ihm als würdiges Pendant das goldene Kalb an die Seite zu stellen.

Der Reichskanzler hat von jeher denselben feinen Instinkt besessen wie das Judenthum. Er hat so wenig wie Letzteres die Bedeutung der Presse unterschätzt und mit dem Judenthum, das ihm die gefährlichste Konkurrenz machte, hat er sich verbinden müssen, hat er die Interessen des Reiches identifizirt, um die Presse mit Erfolg in seinen Dienst zu zwingen. Und man wird zugeben müssen — beide Parteien haben ihren Vertrag bis heute ehrlich gehalten. Die Juden-Presse schuf und erhält den reichskanzlerischen Nimbus — er begleicht seine Schuld dem nationalliberalen Semitismus durch seine schweigende Heerfolge in der systematischen Ausbeutung des Volkes. Manus manum lavat! Aber ob der Fürst

Bismarck wohl schon zu der Erkenntniss gekommen ist, dass seine Grösse nur noch kunstvoll über dem Meere der Corruption schwebt und dass, wenn er aufhört, der stumme Packträger seiner Partei zu sein, welche er vielleicht von sich abhängig glaubt, dann dieselbe Macht, welche ihn zum «Herkules des Jahrhunderts» ausgerufen hat, ihn vernichten wird? Wir glauben schwerlich! Denn noch schiebt der Reichskanzler wenigstens mit vermöge der zu seiner Verfügung stehenden ungeheuren Kapitalien, aber er schiebt nicht allein, an seinem Wagen schiebt noch die ganze Macht der Juden- und Gründerpresse, der Kapitalismus, welcher stark genug ist, den Reichskanzler, wenn er seine Bahnen verlässt, auf ein anderes Geleise zu schieben oder unter die Räder seines eigenen Ruhmeswagens zu zermalmen.

Es ist interessant zu sehen, wie Bismarck schon zu der Zeit, als er noch Gesandter in Petersburg war, die deutsche Presse beurtheilte und wie er dazu rieth, es Oesterreich, welches die meisten deutschen Blätter bestach, nachzumachen. So schreibt er u. A. aus Petersburg vom 12. Mai 1859: — — «Die meisten Correspondenten schreiben für ihren Lebensunterhalt, die meisten Blätter haben die Rentabilität zu ihrem Hauptzweck und an einigen unserer und anderer Blätter vermag ein erfahrener Leser

leicht zu erkennen, ob sie eine Subvention Oesterreichs wiederum erhalten haben, sie bald erwarten, oder sie durch drohende Winke herbeiführen wollen. Ich glaube, dass wir einen erheblichen Umschlag in die Stimmung bringen könnten, wenn wir gegen die Ueberhebungen unserer deutschen Bundesgenossen die Saite selbstständiger preussischer Politik in der Presse anschlagen etc.»

Man sieht, der «ehrliche», «offene» Staatsmann suchte die Reptilienpolitik schon damals nicht durch die Wahrheit, sondern ebenfalls durch Reptilien zu bekämpfen. Damals auch war dem deutschen Manne, wie er sich in dem gleichen Briefe ausdrückt, die «Kreuzzeitung» nicht preussisch genug. Der betreffende Brief ist an den damaligen Minister des Auswärtigen, v. Schleinitz, adressirt.

Dass Bismarck auch damals schon sehr empfindlich war gegen Angriffe in der Presse, zeigt ein zweiter Brief aus Petersburg vom 22. Aug. 1866, worin er sich bitter beklagt über die Zeitungen «Nationalverein», «Magdeburger», «Ostpreussische» etc. und in die Worte ausbricht: «Dieses einfältige Federvieh der deutschen Presse merkt gar nicht, dass es gegen das bessere Theil seiner eigenen Bestrebungen arbeitet, wenn es mich angreift.»

Nun, dieses einfältige Federvieh von damals hat sich längst bekehrt und Alles, was von Personen an den Nationalverein und die Bestrebungen des Judenthums, unter dem Deckmantel der Freiheit die Völker gegen ihre Herrscher zu insurgiren, erinnert, befindet sich im Hauptquartier Bismarck's als Reptil, Wucherer oder Gründer.

Man kann die Verachtung begreiflich finden, welche Fürst Bismarck gegen die Menschheit im Allgemeinen empfindet, wenn man annimmt, dass er die Menschheit im Besonderen nach denjenigen Elementen beurtheilt, die seine eigene Gesellschaft ausmachen und um welche ihn schwerlich irgend ein nüchterner, anständiger Mensch beneiden wird. Aber die Menge der unsauberen Gesellen in seiner nächsten Umgebung ist erforderlich, um dem grossen Manne stets gewärtig zu halten, dass er noch über eine ganze Menge von Menschen hinausragt, die er, um den Unterschied effektvoller zu gestalten, stets sich selbst auszusuchen in der Lage ist.

«Hunde sind wir ja doch!» sagt Ludwig Bamberger — und er muss als Freund und Rathgeber des Fürsten Bismarck seine Stellung am besten begreifen. Hat doch der Fürst Bismarck diesen Mann in der «Nordd. Allg. Zeitung» als

passenden Führer einer liberal-konservativen Kammer-Majorität bezeichnet. Bamberger ist der bekannte Mainzer Revolutionsjude, der 1848 Freischaaren nach Kirchheim-Bolanden führte und sie dort von den Preussen niederschliessen liess, nachdem er sich selbst in Sicherheit gebracht hatte. Er ist der Mitgründer der «Deutschen Bank» und ihrer ganzen Schwindeleien; — er ist der Mann, der in öffentlicher Gerichtssitzung sich für satisfaktionsunfähig erklären lassen musste und es vorzog, einen — Eid zu leisten, wegen dessen ihn der Staatsanwalt noch nicht belangte. Mit diesen Leuten sich messen, Durchlaucht, ist keine Kunst.

Am 16. Mai 1864, als es sich um die Conferenz wegen des Schicksals der Herzogthümer Schleswig-Holstein handelte, schreibt Bismarck u. A.: «Die augenblickliche Lage aber ist so geartet, dass es mir zweckdienlich erscheint, gegen das Dänenthum auf der Conferenz alle Hunde loszulassen, welche bellen wollen — das gesammte Geläut der Meute wirkt dahin zusammen etc.»

Hier kommandirt der grosse Mann also schon die preussische Pressmeute, mittelst welcher er bis heute seine «ehrliche», «offene» Politik betreibt!

Und wie der Fürst Bismarck diese Meute benutzt, wie er sie dressirte nicht bloss für den

Dienst auf dem Gebiete der äusseren und inneren Politik, nein, wie er zu den nichtswürdigsten persönlichen Rache-Akten dies schamlose Pressgesindel verwerthete, das hat die Neuzeit gelehrt, und ganz allein auf sein Conto fällt auch die Schuld an dem Reptilientreiben der letzten Zeit, welches darauf gerichtet ist, die deutsche Kaiserin beim deutschen Volke zu diskreditiren. Wenn bei Tische jene Heiterkeit über den Fürsten Bismarck kommt, welche nach dem Genuss reichlicher und starker Getränke einzutreten pflegt, dann entstehen jene Nachtschlügen, welche in Gestalt hingeworfener Bemerkungen den Reptilien als Lösungswort gelten, nach welcher Richtung und auf welche Personen sie ihre verleumdende und besudelnde Thätigkeit zu richten haben.

Und was die offiziöse Pressthätigkeit der Creaturen des Reichskanzlers zu Tage fördert, auch das gilt der gesammten Judenpresse als Orakel, denn die Feinde des Reichskanzlers sind die Feinde des Judenthums und umgekehrt. Im Handelstheile der officiösen Presse herrschen die Juden, im politischen Theile der Judenpresse herrscht der deutsche Reichskanzler. Wie ist es da wohl denkbar, dass einer solchen Pressmacht und der durch sie genährten Corruption der Massen

gegenüber die Wahrheit zu Worte kommt? Die einflussreichsten und im Vertrauen des Kaisers hochstehenden Personen hat der Reichskanzler, sobald sie ihm missliebig geworden, durch seine «Kosacken» gestürzt. Der Kaiser selbst bezeichnete als Opfer der Rancüne des Reichskanzlers die Goltz, Savigny, Thile, Usedom, Werther etc. Der Reichskanzler hat bekanntlich eine grosse Abneigung gegen Alle, welche geistig höher stehen als er und welche er desshalb als eine stete Gefahr für seine Unfehlbarkeit betrachtet. Unabhängigkeit der Gesinnung ist ihm gleichbedeutend mit Verrath an seiner Person. Darum hat er denn auch nie ohne Weiteres beim Kaiser mit seinen Wünschen auf Beseitigung dieses oder jenes seiner Collegen durchdringen können (die Affairen Stosch und Hegel sind wohl noch in Aller Gedächtniss), und das niederträchtige Mittel der Verleumdung und Beschimpfung durch die Presse hat immer erhalten müssen, um den Kaiser seiner ergebensten und vor allen Dingen uneigennützigsten Diener zu berauben. In **Pro Nihilo** wird diese Prozedur so illustriert:

«So oft nun der Reichskanzler bei Sr. Majestät eine gewisse Abneigung konstatirt, allen seinen wechselnden Geschmacksrichtungen zu folgen, beginnt das oft gesehene, aber doch noch widerwärtige Schauspiel,

dass die Pressmeute über den missliebig gewordenen Minister oder Botschafter herfällt und ihn in der Ehre beschädigt. Angriffe des leitenden Ministers auf seine Collegen oder Untergebenen vor versammeltem Parlamente vervollständigen das öffentliche Scharmützel unter dem nie fehlenden Beifall der «Kosacken» und der Botschafterfraction. Unliebsame Scenen im Ministerconseil, unliebsame Correspondenzen, ungezwungene Aeusserungen im Salon oder nach Tisch thun das Uebrige. Schliesslich wird das Opfer müde — und ein Mann geht freiwillig über Bord. — Un homme à la mer!»

Das ist der «ehrliche», «offene» Staatsmann, dessen Machtstellung und Grösse lediglich bedingt ist durch ein ewig sich fortspinnendes System von Intrigue und Gewaltthätigkeit.

So ist Deutschland die Heimat der öffentlichen Meinungsfabrikation geworden und weit über seine Grenzen hinaus wird mit deutschem Gelde der Name Bismarck und sein glorioses System verherrlicht auf Kosten der deutschen Nation, ihrer Ehrlichkeit und ihrer geistigen wie materiellen Entwicklung.

Wie weit es dem Reichskanzler, abgesehen von allen indirecten und für ihn ohne Kosten zu bewerkstellenden Bestechungen von Personen gelungen ist, mit Hülfe des Welfenfonds die deutsche Presse

sich dienstbar zu machen, davon gibt das Weltblatt, der «Kladderadatsch» den schlagendsten Beweis.

Vergeblich hatte Herr v. Bismarck schon während der Conflictsperiode sich vermittelst der Staatsanwaltschaft die Sympathien des «Kladderadatsch» zu verschaffen gesucht — es nützte nichts und nur einmal gelang es ihm, Herrn Dohm, den Redacteur desselben, in's Gefängniss zu bringen. Aber der Reichskanzler weiss sich zu helfen und in der Kunst, die menschlichen Schwächen sich nutzbar zu machen, ist er dem Herrn Dohm weit überlegen.

Eines Tages — es war am 19. Juni 1873 — überraschte der Reichskanzler Herrn Dohm mit einer Einladung, also mit der gleichen Ehre, wie sie dem bekannten Coupletsänger Helmerding zu Theil wurde, der seitdem das ständige Reptil des Fürsten Bismarck auf den Berliner Bühnen repräsentirt.

Herr Dohm folgte natürlich dieser Einladung und — — — seit jenem Abend hat Herr Dohm kein Spottgedicht mehr, wohl aber manches Lobgedicht auf seinen hohen Gastgeber publicirt, ein Huldigungsgewerbe, das der Aufgabe eines Witzblattes schnurstracks zuwiderläuft.

Herr Dohm hat als Ersatz für seinen Verzicht auf die Person des Reichskanzlers eine um so ergie-

bigere Quelle des Spottes gesucht und gefunden in den Klerikalen und in all' dem, was diese als erhaben verehren und von andern als erhaben verehrt wissen wollen. Verfasser ist bereit, dem Herrn Dohm den Beweis dafür zu liefern, dass die Haltung des «Kladderadatsch» der Controle des Auswärtigen Amtes resp. Herrn v. Bülow oder Herrn von Radowitz untersteht oder unterstanden hat.

Dem «ehrlichen», «offenen» Staatsmann aber ist jedes Mittel, das ihm seine Machtstellung und der Welfenfonds gewähren, recht, um die öffentliche Meinung für sich nutzbar zu machen und sich mit so vielen «Hunden» zu umgeben, dass die Meute stark genug ist, jeden dem Kanzler missliebigen Menschen sofort zu zerfleischen.

Lassen wir es genug sein. Gleiche Interessen führen auch die ursprünglich heterogensten Elemente zusammen. Der Reichskanzler und der semitische Kapitalismus — sie haben ein gleichmässiges Interesse an der Corrupirung der Nation — ersterer für seine Macht und Grösse, letzterer für seinen Geldsack.

Sapienti sat!

IV. Capitel.

Fürst Bismarck und der Culturkampf.

Seitdem der Fürst Bismarck seine Anschauungen über den christlichen Staat zu Gunsten des Judenthums von sich abgestreift hat und damit sich auf den Boden stellte, den er in seiner Rede bei der Juden-Emancipationsfrage als einen unmöglichen für die Existenz der Staaten bezeichnete*) befindet sich Deutschland in dem glücklichen Besitze des sogenannten «Culturkampfes».

Man könnte nun glauben, dass die ganze Inszenirung des Culturkampfes einen berechtigten und vorausgesehenen Prinzipienkampf involvire, in welchem es sich wirklich darum handelte, den traditionell christlichen Staat vor Uebergriffen der Kirche zu schützen, und in der That erntet ja der Fürst Bismarck von den Reptilien und Juden täglich das grösste Lob ob seines mannhaften Streitens für die geistige Freiheit der deutschen Nation. Die grosse Menge jauchzt dazu Bravo! und schimpft, da dies in Deutschland einmal Mode ge-

*) Vergl. Seite 46.

worden und auch als patriotisch gilt, wacker mit auf die «Pfaffen». Aber «den Teufel merkt das Völkchen nie», sagt Göthe, und so merkt denn der deutsche Michel in seiner Alteration über die «geistige» Freiheit auch nicht, wie er mit seiner bürgerlichen Freiheit und seinem materiellen Besitz allmählig der politischen Despotie und dem Kapitalismus, d. h. der Judenherrschaft, in die Arme fällt.

Als der Reichskanzler den «Culturkampf» begann, da befand er sich genau in derselben Lage, wie immer vor grossen Staats-Aktionen. Er selbst wollte ihn durchaus nicht, aber Laune und Selbstüberhebung trieben ihn hinein.

So ist es bekannt, dass er gerade in dem preussischen katholischen Adel seit Beginn seiner politischen Thätigkeit eine wirksame, zuverlässige konservative Stütze schätzte und dass bei ihm der Plan fast zur Ausführung gelangte, den Bischof v. Ketteler, übrigens einer der unterrichtetsten Politiker und schärfsten Beobachter der socialen Zustände, zum Erzbischof von Köln, resp. zum Fürsten Primas von Deutschland zu machen. Dadurch wäre dann der katholischen Kirche in Deutschland eine Unabhängigkeit von Rom gewährt worden, welche es durchaus ermöglichte, einen dauernden konfessionellen und politischen Frieden zu sichern.

Wir haben schon einmal angeführt, dass der Erzbischof Ledochowski, welcher jetzt dem Culturkampf zum Opfer gefallen ist, von Bismarck selbst nach Deutschland berufen wurde, und dass es dem Herrn von Bismarck keine Scrupel machte, den Jesuiten jede mögliche Freiheit in Deutschland zu gewähren.

Auch die Unfehlbarkeitserklärung des Papstes im Ernst als einen Grund für den beginnenden Feldzug gegen Rom zu betrachten, fiel dem Fürsten Bismarck durchaus nicht ein und die Besetzung Rom's durch italienische Truppen geschah ohne Zustimmung Bismarck's, der sie nur darum nicht hinderte, weil er sie nicht hindern konnte.

Erst als im ersten deutschen Reichstage die ultramontanen Kampfhähne aus Süddeutschland und Rheinland-Westphalen sich den mancherlei Bestrebungen, welche auf den Umsturz der konservativen Gesetzgebung und der von Bismarck geforderten Umgestaltung des Reiches pflichtgemäss im Sinne ihrer Wähler widersetzten, als der Mann, der sich übermächtig dünkte, eine Opposition fand, welche er nicht ertragen konnte und welche geistig zu bekämpfen er unfähig sich erwies, da wurde er zornig und beschloss, wie immer in solchen Fällen, die Opposition zu vernichten. Da sein Zorn indes-

sen nicht die einzelnen oppositionellen Gegner treffen konnte, so war es natürlich, dass er sich gegen die ganze Fraction des conservativen Centrums richtete.

Die Nationalliberalen schürten nach Leibeskräften, die Reptilien und Juden schrieen: «Verrath! Verrath an dem Schöpfer der deutschen Einheit, Verrath an Deutschland selbst» — und der Culturkampf war fertig.

So liegt die Sache nach unserer Meinung höchst einfach und diese Meinung ist begründet in der Natur und dem Wesen des Reichskanzlers selbst, wie sich ja fast alle politischen Actionen desselben durch persönliche unüberlegte Eingriffe als Ausflüsse momentaner Erregungen, meist des Zornes, Hasses, oder Rachegefühls documentiren.

Meyer in seinem Buche: «Politische Gründer», schiebt dem Fürsten Bismarck die Absicht einer grossen Staats-Aktion unter. Um dem Fürsten Bismarck Gerechtigkeit widerfahren zu lassen, wollen wir diese Auslassung hierhersetzen. Meyer sagt:

«Es ist nicht undenkbar, dass in Folge der ungeahnten Siege und der Wiederherstellung des deutschen Kaiserthums dem Fürsten der Gedanke kam, oder ihm nahegelegt wurde*), die religiöse

*) Wenn Meyer einen Anhalt für seine Vermuthungen hat, so können dieselben sich lediglich auf Wünsche

Einheit im neuen Reiche wiederherzustellen. Zwar war das alte Reich an dem Streben der Habsburgischen Kaiser, diese Einheit auf katholischer Basis zu erhalten, im dreissigjährigen Kriege gespalten und somit der Auflösung entgegengeführt worden. Allein der Gedanke hat für den Mächtigen grossen Reiz. Auch Friedrich Wilhelm III hatte in schwacher Stunde sich ihm hingegeben, als er die Union zwischen Lutheranern und Reformirten schuf und mittelst Dragonaden durchzuführen suchte. Diese Union hat der evangelischen Kirche und dem Christenthum in Preussen unendlich geschadet. Bismarck war in Paris und Petersburg nicht ohne zu lernen. Der Gallikanismus schon musste ihm gefallen. Auch läuft der ältere Plan, einen Primas für Deutschland zu ernennen, ja auf die Zusammenfassung der deutschen Katholiken und auf eine freilich mit dem katholischen Kirchenbegriff nie vollkommen zu vereinbarende (? Ungarn? Verf.) grössere Selbstständigkeit von Rom hinaus. Indess scheint von der Kaiser-Proklamation in Versailles ab die Idee einer

oder Aeusserungen Wagener's stützen, der allerdings zu jener Zeit noch grossen Einfluss auf den Fürsten besass und dem vor allen Dingen auch ein so grossartiges Project eher untergeschoben werden kann, als dem Reichskanzler selbst.

Verf.

Nachbildung der russischen Kirche mit dem Kaiser-Patriarchen an der Spitze erwacht zu sein. Der freimaurerisch-humanitär angehauchte Altkatholizismus erschien vielleicht geeignet, den Katholizismus und Protestantismus in eine deutsche Nationalkirche mit dem Kaiser als Summus Episcopus zu verschmelzen.»

Wie schon gesagt, dieses wunderbare, genial-abenteuerliche Project kann nicht vom Fürsten Bismarck herrühren, es sei denn, dass er gehofft hat, es selbst neben dem Gewaltherrscher auch noch zum Nationalpapst zu bringen. Wenn Meyer aber versucht, Bennigsen, Miquèl und Consorten für die Belebung dieser Idee verantwortlich zu machen, so können wir dies unmöglich zugeben, da nach keiner Weise ersichtlich ist, wie die Gründer und Juden bei Stiftung einer Nationalkirche Etwas verdienen sollten. Dass jedoch die semitisch-national-liberale Partei unter Führung des spiritus familiaris des Cultusministers Falk, des Herrn Dr. Hammacher*), den Altkatholizismus erfunden und gefördert hat, ist zweifellos, wie es ja stets im Interesse des politischen Gründerthums gelegen hat, die kirchlichen Spaltungen zu fördern, den religiösen

*) Einer der berüchtigtsten parlamentarischen
Gründer. Verf.

Hass zu schüren, um so desto sicherer die Herrschaft über den Staat und das Vermögen der Staatsbürger an sich zu reissen.

Die Sache machte sich von selber. Nachdem der Reichskanzler mit dem Gros der Conservativen, dem Centrum, sich überworfen hatte, stellten sich ihm für die nöthigen Cultur-Vorarbeiten zu dem grossen politischen und wirthschaftlichen Raubzuge die vereinigten semitisch-liberalen Parteien um so unbedingt zur Verfügung, als auch der Reichskanzler fühlen musste, dass eine Regierung der Minorität*) bald ein bedeutendes Minus für seine eigene Machtstellung ergeben würde. Daher verfiel der Fürst Bismarck der «liberalen» Majorität und verlor bald jeden Halt in dem kirchlichen Kampfe, und, wenn irgend Jemand unklar ist über die Endziele dieser Bewegung, so ist es seit einigen Jahren der Reichskanzler selbst. Er ist von Massregel zu Massregel gedrängt worden, und da noch keine einzige irgend einen andern positiven Erfolg aufzu-

*) Bekanntlich äusserte Bismarck s. Z. vor Uebernahme der Stellung eines Ministerpräsidenten gegenüber dem alten Lord Feuerbrand (Palmerston), er wolle der Welt zeigen, wie man mit Minoritäten regiere. Palmerston bezeichnete demnächst Bismarck mit mehr Gemüthsruhe als Höflichkeit einen Abenteurer. Verf.

weisen hat, als die steigende Erbitterung der 15 Millionen Katholiken Deutschlands und die Verschärfung des konfessionellen Hasses, so dürfte es überhaupt unmöglich sein, zu bestimmen, wann und mit welchem Erfolge die letzten Massregeln getroffen werden. Für den Staat kann der Erfolg stets nur ein negativer bleiben; positiv allein bleibt der unberechenbare Schaden, welcher dem Volke unter der Aegide des Culturkampfes in sittlicher und materieller Beziehung zugefügt worden ist, sowie die Gefahr, welche für den Staat fortdauernd sich daraus ergibt, dass eine grosse Minorität gegen ihn in verzweifelter Kampfe steht.

Inscenirt wurde der Culturkampf durch die berüchtigte Jesuitenrede, welche Wagener im Auftrage des Reichskanzlers hielt. Bitter belohnt wurde Wagener für diese That mit der Gründerrede Lasker's, welche den damals mächtigen Mann und Nebenbuhler Bismarck's beseitigte. *)

*) In den betheiligten Kreisen wird mit Bestimmtheit versichert, dass Lasker seine berüchtigte Rede gegen Wagener-Putbus-Biron auf des Reichskanzlers Bestellung gehalten hat, trotzdem feststeht, dass Bismarck selbst die Veranlassung gewesen, dass Putbus sich für die Gründung der Berliner Nordbahn interessirte. Letzteres muss Fürst Putbus bestätigen. Verf.

Im Jahre 1873, als sowohl Wagner wie Blankenburg (Zimmerhausen) noch einen erheblichen Einfluss auf den Reichskanzler ausübten — Bismarck hat sich trotz Wagners Sturz des Rathes desselben bis zu Neujahr 1876 bedient — war es gelungen, den Fürsten für das Project einer vollständigen Trennung der Kirche vom Staat zu gewinnen, allerdings auf einer Grundlage, welche den Stimmführern der liberalen Majorität um so weniger behagte, als die Durchführung dieses Projectes bei einigermaßen gutem Willen den Frieden zwischen den staatlichen und kirchlichen Gewalten in sichere Aussicht stellte.

Auf Grund dieser Geneigtheit des Reichskanzlers hat Verfasser dieser Brochüre im Juni des Jahres 1874 im Auftrage Wagner's für den Fürsten eine längere Auseinandersetzung über die Möglichkeit einer definitiven Beilegung des Culturkampfes geschrieben, eine Arbeit, welche nicht nur den Beifall der hochgestellten conservativen protestantischen Männer gefunden, sondern auch von den Führern des Centrums, so besonders von Windthorst und Reichensperger als trefflich anerkannt worden ist. Leider ging es auch mit diesem Project nicht anders als mit der Rodbertus'schen Abhandlung über das Rentenprinzip — der Reichskanzler hatte sich als

konservativer Junker und Staatsmann eine Zeit lang dafür begeistert, um es alsbald seinen Freunden, den Gründern und Juden, als Makulatur zu opfern.

An der Tafelrunde des Fürsten Bismarck aber sitzen die Väter des vollständig überflüssigen Culturkampfes und diese haben den sich so gross dünkenden Staatsmann so tief in denselben zu verstricken gewusst, dass er nicht mehr herauskann. Die Presse der Juden und die Reptilien feiern den eitlen Mann als den Heros der Geistesfreiheit und die Massen glauben der albernen Vorspiegelung, der Culturkampf könne nur beendet werden durch einen neuen «Büsergang» nach Canossa!

Aber lag der Culturkampf schon im Interesse der liberalen semitischen Majorität, welche die Religion überhaupt abschaffen möchte, um ihre politische Herrschaft zu befestigen, so war er ihnen noch um Vieles willkommener als Coulisse für ihre Ausbeutungspläne. Während man das Volk mit dem Culturkampf beschäftigte und auf die «Pfaffen» hetzte, haben die Bennigsen, Miquèl, Bamberger, Hammacher und Genossen den Schwindel der Gründerjahre etablirt und so eine Art selbstständigen «Culturkampf» getrieben, der weit praktischere Resultate als der reichskanzlerische aufzuweisen hat — die radikale Ausplünderung des

arbeitenden Volkes. Und heute noch muss der Culturkampf die Handhabe bieten, das Volk von der Fährte der Gründer abzulenken und preussische Stadt- und Kreisrichter entscheiden in kirchlichen und politischen Prozessen, wo sich kein Richter findet, den gemeinsten Schwindel und brutalsten Diebstahl Derer «von uns're Lait» und Genossen zu ahnden.

Dem Fürsten Bismarck gebührt die Ehre der Erfindung des «Culturkampfes» mittelst Polizei, Gefängniswärter und Exekutor, eine Erfindung, um deren Werth ihn schwerlich Jemand beneiden kann.

Wie aber der «Culturkampf» immer intensiver und aussichtsloser sich gestaltet, so werden auch die Mittel, mit welchen er von Seiten seines ruhmreichen Urhebers geführt wird, immer roher, immer gewaltthätiger und rufen eine Erbitterung hervor, deren fortdauernde Steigerung von den unberechenbarsten Folgen für das deutsche Vaterland werden muss, ja unter Umständen sogar seinen Bestand gefährden kann.

Nachdem man ununterbrochen die Priester der katholischen Kirche durch Absetzungen, schwere Strafen u. s. w. mürbe zu machen versucht hat, nachdem man durch das sog. «Brotkorbgesetz» ver-

suchte, den Klerus auszuhungern, ohne Etwas mehr zu erreichen, als die grössere Standhaftigkeit und Opferwilligkeit des katholischen Volkes, hat man sich über ihre Erziehungs- und Wohlthätigkeits-Anstalten mit brutaler Hand hergemacht ohne Rücksichtnahme auf deren mehr oder minder für das Allgemeine segensreiche Thätigkeit, ja, man hat geradezu Greise, Wittwen und Waisen aus sicherem Asyl in das Elend der Landstrasse hinausgetrieben, um — Denen, die da glauben, es gebe neben dem allmächtigen Bismarck noch einen Gott, der auf den Dienst demüthiger Herzen Anspruch machen kann, zu demonstrieren, dass dieser Glaube ein Aberglaube sei.

Sehen wir uns unter den vielen Ungeheuerlichkeiten des «Culturkampfes» einmal nach einem recht schlagenden Beispiel neueren Datums um.

In Hinsbeck, einer stillen Landgemeinde der Rheinprovinz, steht ein Hospital, welches von einem benachbarten Grundbesitzer errichtet worden ist, dessen hoher Wohlthätigkeitssinn aber um deswillen vor den Augen des Fürsten Bismarck keine Gnade zu finden vermag, weil die ihn beherrschende ultramontane Gesinnung ihn von vorneherein als Verbrecher kennzeichnet. In diesem Hospital wurden ein Vierteljahrhundert lang die armen Waisen der benach-

barten Gemeinden hauptsächlich auf Kosten jenes reichsfeindlichen Menschenfreundes erzogen und die Kranken und Altersschwachen gepflegt, und zwar wurde die Erziehung und Pflege von Schwestern eines geistlichen Ordens geleitet. Alle umliegenden Gemeinden nahmen Theil an dieser Wohlthätigkeits-Anstalt, welche durch keine staatliche oder kommunale Einrichtung hätte ersetzt werden können. Dank der ihnen zu Theil gewordenen Erziehung wurden die Waisenkinder mit dem 15. Jahre in den Stand gesetzt, sich ihr Brot selbstständig zu erwerben. Alle Diejenigen, welche rechtschaffenes und fleissiges Gesinde brauchten, wandten sich an jene Waisen-Anstalt.

Dank dem Culturkampfe und dessen glorreichen Erfinders des Fürsten Bismarck wurden die Waisen aus dem Hospital vertrieben und zwar eines schönen Tages auf die Strasse gesetzt. Auf gleiche Weise ist mit zahlreichen anderen Waisen-Anstalten am Rhein verfahren worden. In Ehrenfeld bei Cöln, wo sich eine grossartige Anstalt derselben Art befindet, wurden die Waisenkinder bei der Auflösung der Anstalt den Mindestfordernden zur Pflege ausgeliefert.

Welche Erbitterung ein solches Verfahren in der katholischen Bevölkerung erregt, lässt sich

denken und, wenn der Himmel Deutschland nicht vor neuen Kriegsplänen seines Bismarck schützt, so könnte es sich leicht ereignen, dass die 15 Millionen glaubenstreuer Katholiken in die Versuchung geriethen, Schutz bei auswärtigen Feinden zu suchen, wie die Ungarn im Jahr 1866 bei Preussen Schutz gegen ihre eigene Regierung suchten.

Und nahe genug war Deutschland daran, im Frühjahr 1875 in einen neuen Krieg gegen Frankreich und Belgien wegen des Culturkampfes verwickelt zu werden*), wenn nicht fremde Gewalten den kriegslustigen, viel gereizten Kanzler in seine Schranken zurückgewiesen. Fürst Bismarck fühlt sich verwaist in seinem «Culturkampf» und somit wird stets in ihm das Bedürfniss rege gehalten, auch den Nachbarländern die Segnungen seiner genialen Erfindung zugänglich zu machen und von wahrhaft tragischer Bedeutung für den Frieden sind seine fieberhaften Versuche nach dieser Richtung. Jeder Hirtenbrief irgend eines französischen Bischofs bringt ihn in Extase, jeder Vorgang im Vatikan bringt seine Nerven in heftige Schwingung — statt das brennende Streichholz einfach auszulöschen, wird der diplomatische Apparat, die ganze Reptilien- und

*) Siehe: Fürst Bismarck und die orientalische Frage.
Verf.

Juden-Meute losgelassen und das Streichholz in's Stroh geworfen. Fürst Bismarck giebt dann dem Culturkampf neue Nahrung, der Unwillen der Nation ist wiederum erregt und der grosse Kanzler in Uebereinstimmung mit dem Volke, d. h. mit der öffentlichen Meinung, mit den Reptilienfonds, den Gründern und Juden. Wie lange Fürst Bismarck noch mit dem Feuer spielen wird, wie lange es währen mag, bis die entfesselte Lohe ihren blutigen Schein über neue Schlachtfelder wirft — das ist lediglich eine Frage der Zeit. Und die Zeit wird sie beantworten, wenn die Geschichte die Culturaufgaben zu lösen beginnt, deren sich die Nationen unfähig und unwürdig erwiesen haben. Dann klagt über eure zertrümmerten Götzen, ihr armseligen und kurzsichtigen «Culturkämpfer» des neunzehnten Jahrhunderts!

Und fragen wir hier einmal, ob Deutschland noch das mächtige, vom wilden Patriotismus erfüllte Volk sein kann, wenn Herr v. Moltke gezwungen wird, den «Culturkampf» des grossen Bismarck mit dem Schwerte fortzusetzen. Wo sind Deutschlands Reserven?

Freilich — das deutsche Heer, es ist dasselbe glänzende, starke, unerschütterte Bollwerk Deutschlands — aber ein vom Culturkampf bis in Aller

Herzen erbittertes, unzufriedenes, von der Socialdemokratie unterwühltes, vom Börsen- und Grünschwindel an den Bettelstab gebrachtes Volk, willenlos preisgegeben einer semitisch-liberalen Gesetzgebungsmaschine, welche auf immer abschüssigerem Wege in immer fieberhafterer Eile dem sittlichen und materiellen Ruin entgegenarbeitet — ist das eine Reserve, welche Garantien zu bieten im Stande ist nur für einen siegreichen Culturkampf mit Feuer und Schwert?

Hat der ruhmgekrönte Herkules des neunzehnten Jahrhunderts diese Fragen sich schon gestellt? Wir glauben nicht, denn die Grösse des Fürsten Bismarck ist der unerschütterliche Glaube an sein brutales Glück. Die Verantwortlichkeit theilt er mit der sich vor ihm im Staube wälzenden blöden Menge.

V. Capitel.

Fürst Bismarck und das deutsche Kaiserpaar.

Da Fürst Bismarck nach Aussage der Reptilien der grösste und mächtigste Mann des Jahrhunderts ist, so ist es wohl selbstverständlich, dass er auch das Recht hat, sich in solchen Formen zu bewegen, welche dazu dienen, seinen Mitmenschen die ganze Verachtung zu demonstrieren, die er in seiner erhabenen Seele denselben gegenüber empfindet.

Und so ist es denn dem Reichskanzler auch mit Hülfe des Reptilienfonds gelungen, den sonst an ihm wahrnehmbaren Merkmalen eines grossen Mannes ein neues Zeichen hinzuzufügen durch die Praktizirung ganz neuer gesellschaftlicher Lehren.

Von der souveränen Verachtung, welche der Reichskanzler seinen Mitmenschen zu Theil werden lässt, sind einzig und allein die Juden Bleichröder und Lasker, sowie die Herren Tschischwitz, Miquél, Mathiae und Bennigsen ausgeschlossen. Allenfalls erfreut sich Herr Tessendorff momentan vielleicht noch einer wohlwollenden Herablassung seines Kostgebers.

Alles, was sonst in Deutschland und besonders in den Kreisen, welche als «hochanständig» und «hochgebildet» gelten, sich existenzberechtigt glaubt, ist dem grossen Manne gleichgültig und verabscheuungswürdig, und von dieser seiner Praxis kann selbst der kaiserliche Hof und seine Umgebung sich nicht als ausgeschlossen betrachten. Wie es dem Fürsten Bismarck nie darum zu thun gewesen ist, der deutschen Nation eine würdigere Stellung anzuweisen, als dieselbe in seiner eigenen Achtung einnimmt, so hat er auch nie Bedenken getragen, seiner Rücksichtslosigkeit die Würde des Kaiserpaares zu opfern zu Gunsten entweder des Gefühls seiner eigenen Grösse oder zu Gunsten der Reptilien.

In welch' hoher Achtung die deutsche Nation selbst bei ihrem grossen Bismarck steht, das äusserte er selbst in einem jener Augenblicke erheiteter Liebenswürdigkeit, welche den Fürsten öfter vielleicht als gut sein dürfte, auszeichnen. Er fand nämlich Veranlassung, die Ansicht auszusprechen, dass dem Feldmarschall von Manteuffel die demselben gewährte Dotation zu klein scheine, und fügte wörtlich Folgendes hinzu: «Je mehr der Mensch Geld habe, desto mehr verlange er. Er wisse dies aus eigener Erfahrung. Jeder Mensch sei käuflich. *Kein Deutscher wider-*

stehe einer baaren Summe von 10,000 Friedrichsd'or.« Diesen Ausspruch des Fürsten Bismarck werden wir auf Erfordern durch einen Zeugen erhärten lassen. *) Dass der Fürst Bismarck in der Hinenansetzung hergebrachter, ihm jedoch lästiger Formen, sehr gross ist, können wir um so lieber als richtig anerkennen, weil die Reptilien alles Dasjenige, was dem Reichskanzler missfällt, als abscheulichen Missbrauch bezeichnen. So sind es denn namentlich auch die Formen bei Hofe, welche dem Herrn v. Bismarck besonders missfallen und welche ihn daher veranlassen, hin und wieder diesem Missfallen durch Rücksichtslosigkeiten aller Art Luft zu machen.

Dass der Reichskanzler bei diesem Verfahren nicht besonders hoch in der Gunst Derjenigen steht, welche ihrer gesellschaftlichen Stellung durch besonderes anständiges und würdevolles Benehmen ein sittliches Relief zu verleihen wissen, ist wohl natürlich, und dass dieses besonders der Fall ist bei den Mitgliedern des Königlichen Hauses, kann natürlich Niemanden überraschen.

Glücklicher Weise jedoch sind die Mitglieder

*) Wenn auch der Verfasser dieser Broschüre seine Anonymität für's Erste bewahrt, wird er doch nicht anstehen, bei Inanspruchnahme seiner Verantwortlichkeit für seine Angaben mit seiner Person einzustehen.

der hohenzollern'schen Königsfamilie vollkommen in der Lage, den Anstrengungen des Reichskanzlers, die hergebrachten Anstandsformen zu durchbrechen, erfolgreichen Widerstand zu leisten und dieselben, wo sie sich in allzu unartiger Weise äussern, mit dem Bewusstsein der sittlichen Ueberlegenheit zu ignoriren.

Etwas Anderes ist es aber, wenn der Fürst Bismarck dem Monarchen gegenüber seine Macht in einer Weise geltend macht, welche die Würde desselben verletzt, d. h. wo die Rücksichtslosigkeiten öffentlich vor dem ganzen Lande zu Tage treten. In diesem Falle kann wohl der Monarch seinem Kanzler verzeihen oder seinen Unwillen unterdrücken, wenn das Gefühl angewöhnter Abhängigkeit ihn drückt, aber die öffentliche Stimme muss ein solches Verfahren um deswillen scharf tadeln, weil in dem Herrscher eines Landes das Volk beleidigt wird.

Wir verweisen hier zunächst auf das Kapitel «Bismarck und Arnim» und die darin dem Reichskanzler nachgewiesene Duldung einer Beschimpfung des deutschen Kaisers und erwähnen hier nur eines Falles, welcher ein besonders merkwürdiges Licht wirft auf das Verhältniss zwischen dem Monarchen und seinem mächtigen Kanzler.

Bekanntlich existirt in konstitutionellen Staaten allgemein das Herkommen, dass sich der erste Mi-

nister in der Umgebung des Monarchen befindet, wenn Letzterer das Parlament in Person eröffnet. So war es bisher in Preussen, so überhaupt auch in Deutschland.

Im Herbst des letzten Jahres war offiziell angekündigt worden, dass der Kaiser den deutschen Reichstag in Person eröffnen werde und auch der Reichskanzler musste dies für um so nothwendiger halten, als es sich um Dinge in der bevorstehenden Session handelte, welche ausser dem Reichskanzler Niemanden gefallen konnten (Justizgesetze etc.) und daher eine Pression von höchster Stelle wünschenswerth erscheinen liessen.

Kurz vor Eröffnung der Session hatte der Fürst Bismarck seinem Monarchen die Thronrede unterbreitet und zwar in einer Form, welche dem Kaiser trotz seiner Vorliebe für seinen Kanzler nicht recht behagen wollte. Er sträubte sich demgemäss in mildester Form, wo ein Befehl von ihm genügt hätte, die Angelegenheit in der ihm gut dünkenden Weise zu erledigen. Leider aber hat der deutsche Kaiser augenscheinlich nicht mehr den Muth, oder sagen wir milder, die Kraft, seinem ersten Diener zu gebieten, während der Letztere vollkommen den Muth sowohl als die Kraft besitzt, seinem kaiserlichen Herrn zu trotzen,

Der Fürst Bismarck liess den Kaiser allein, d. h. er wurde krank und zwar nach der Versicherung der Reptilien so krank, dass er der Eröffnung des Parlaments nicht beiwohnen konnte.

Kaiser Wilhelm aber, die Unmöglichkeit einsehend, dem Lande das Schauspiel zu bieten, dass der deutsche Kaiser das deutsche Parlament in Abwesenheit seines Kanzlers eröffne, wurde gleichfalls krank und der Herr Hofmann eröffnete den Reichstag mit Verlesung einer Thronrede, wie sie in den Intentionen des Reichskanzlers und nicht in denen des Kaisers gelegen hatte.

Es versteht sich von selbst, dass sowohl der Kanzler als sein gütiger Kaiser nach gehaltener Thronrede durch ihre Leibärzte den Reptilien den Genesungsschein ausstellen liessen.

Der Kaiser hat den Versuch, seinem Kanzler Opposition zu machen, nicht wiederholt*). Er hat

*) Es muss hier erwähnt werden, dass in den letzten Affairen Gruner und Hegel unzweideutig zu Tage getreten ist, wie der deutsche Kaiser einem Einflusse wieder zugänglich geworden zu sein scheint, welcher ihn veranlasste, doch in ihm persönlich nahe liegenden Fällen gegen den Rath und ohne die Mitwirkung des Kanzlers zu handeln. Bei Verfolg dieses Verfahrens dürfte der Kaiser Wilhelm bald in der Lage sein, zu erfahren, dass der Reichskanzler klug genug ist, trotz einiger harter

dem deutschen Reichstage vielmehr seine höchste Zufriedenheit ausgesprochen für die niederträchtige Gesinnungslosigkeit, mit welcher die «liberalen» Parteien dem Reichskanzler die Justizgesetze apportirt haben.

Damit belobte der Kaiser eine Handlung, welche das deutsche Volk in seiner grossen Majorität auf's schärfste nicht nur verdammt hat, sondern auf das schärfste zu verdammen auch unzweifelhaft die berechtigtesten Gründe hat.

Der intellectuelle Urheber dieser Gesetze, der Reichskanzler, lud damit auf die Schultern des Kaisers die Verantwortlichkeit für seine eigenen Handlungen und stellte zwischen sich und den Unwillen der Nation die unantastbare Person des Monarchen.

So hat sich der Einfluss des Reichskanzlers auf den Kaiser zum bestimmenden Regierungsfaktor ausgebildet und der Reichskanzler hat um so leichteres Spiel gehabt, als ihm der unqualifizirbaren Mittel genug zu Gebote stehen, jedem anderen Einfluss durch Beseitigung Derjenigen zu begegnen, welche das Ohr des Monarchen mit patriotischen Vor-

Lehren, seine eigene unentbehrliche Person nicht in Gefahr zu bringen.

Verf.

stellungen und Rathschlägen belästigen, ohne dazu vom Fürsten Bismarck beauftragt zu sein.*)

Man hat gegen die absolute Monarchie stets den Einwand erhoben, dass der absolute Monarch zwar das Recht habe, Alles zu hören, dass er aber faktisch nur das höre, was ihn seine nächste Umgebung hören lassen wolle. Wenn nun die staatsrechtliche Doctrin, wonach der konstitutionelle Monarch nur das zu hören bekommen darf, was seine Minister ihn hören lassen wollen, Geltung hat oder erhält, so würde diejenige intellektuelle Abschliessung, welche bei dem absoluten Herrscher de facto besteht, bei einem konstitutionellen Monarchen zu einer Abschliessung de jure werden. Der konstitutionelle Monarch übernimmt danach von Rechtswegen in intellektueller Beziehung die Rolle eines Kaspar Hauser.

*) Eine Partei bei Hofe scheint augenblicklich unvorsichtig genug, den General von Schweinitz, Deutschlands jetziger Botschafter in Petersburg, als Nachfolger des Fürsten Bismarck auf den Schild zu erheben. Man muss hierbei in Betracht ziehen, dass der deutsche Reichskanzler unter russischem Einfluss seine Carrière machte und dass seine wankelmüthige Orientpolitik ihn stürzen muss. Herr v. Schweinitz aber dürfte trotz seiner unzweifelhaften Aussichten nicht zu beneiden sein. Verf.

Wir ziehen hier keine weiteren Schlüsse. Auch für uns ist der Kaiser Wilhelm mit seiner stattlichen ehrwürdigen Gestalt, umgeben von dem bestgeschultesten und glänzendsten Heere der Welt, eine imposante Erscheinung und der Begriff «Helden-Kaiser» wird durch diese Erscheinung nach unseren Begriffen vollständig gedeckt. Zweifellos ist es, dass in dieser Rolle Kaiser Wilhelm selbst sich glücklich fühlt und der Ueberzeugung lebt, er habe diese Herrlichkeit nächst Moltke und sich selber der unendlichen Weisheit und dem eminenten Scharfsinn des Fürsten Bismarck zu verdanken. Da wir aber der Meinung sind, dass der Kaiser einer Nation nicht nur der oberste Kriegsherr, sondern auch der Landesvater seines Volkes zu sein den Beruf hat und uns die Reptilien nirgendwo verrathen haben, dass sich die landesväterliche Fürsorge beim Kaiser Wilhelm ausser in allgemeiner Theilnahme auch durch bestimmte selbstständige Handlungen zum Wohle der Nation dokumentirt hat, so müssen wir annehmen, dass Kaiser Wilhelm als oberster Kriegsherr so beschäftigt ist, dass er keine Zeit findet, sich selbst noch in seinem Alter um die Leiden und Gebrechen seiner Unterthanen zu bekümmern.

Oder man muss annehmen, dass Kaiser Wilhelm die felsenfeste Ueberzeugung hat, in Deutschland sei jeder Mensch mindestens so glücklich, als es ein Mensch auf Erden überhaupt sein könne.

Da aber in beiden Fällen der Kaiser stillschweigend seinem ersten Kanzler freie Hand lässt, für die nichtuniformirten Unterthanen alles Gute und Böse zu erfinden, so begnügt er sich mit der Rolle des Herrschers über das uniformirte Volk und wir müssen den Fürsten Bismarck willig oder unwillig als den eigentlichen Landesvater betrachten.

Wir hoffen, mit dieser Deduktion uns in voller Harmonie zu befinden mit den Reptilien und erkennen an, dass eine beabsichtigte Kränkung des Reichskanzlers identisch ist mit dem Versuche des Landesverrathes.

In seiner Qualität als landesväterliches Oberhaupt einer grossen Nation aber ist es natürlich, dass der Reichskanzler alle Bestrebungen, welche ohne seinen Befehl sich geltend machen oder doch ihm missfallen, als gegen die Wohlfahrt der Nation gerichtet betrachten muss und dass daher alle Diejenigen, welche an seiner unfehlbaren Praxis zu rütteln versuchen, mit Recht den Namen der «Reichsfeinde» verdienen und ausgerottet werden müssen.

Was in letzterer Beziehung vom Reichskanzler und der ihm in tiefstem Patriotismus ergebenden Justiz und Presse geleistet worden ist, steht in der Geschichte bisher unerreicht da und es ist nahezu betäubend für den grossen Mann, dass er es noch nicht erreicht hat, die landesväterliche Würde für seine Familie als eine erbliche zu konstituiren, so dass ihm vielleicht der Schmerz nicht erspart wird, von einem Nachfolger des Kaisers Wilhelm der Früchte seiner vorsehenden Thätigkeit beraubt zu werden.

Dass sich unter solchen Umständen begreiflicher Weise eine gewisse Abneigung gegen diesen muthmasslichen Nachfolger und dessen Familie beim Fürsten Bismarck festgesetzt hat, ist nur natürlich. Ein besonderer Gegenstand dieser Allerhöchsten Abneigung des Reichskanzlers ist die Kaiserin Augusta, einmal vielleicht, weil sie mit die Schuld trifft, für eine legitime Fortpflanzung des Hohenzollerngeschlechts gesorgt zu haben, andererseits aber wohl hauptsächlich darum, weil sie die merkwürdige Eigenschaft besitzt, nicht zu den Verehrerinnen des Fürsten Bismarck zu gehören.

Unerklärlicher Weise legt nämlich die Kaiserin weniger Werth auf den Titel einer «Heldenkaiserin» — ein Prädikat, das ihr jedenfalls vom Reichskanzler

sowohl als den Reptilien mit grösster Bereitwilligkeit verliehen würde — als vielmehr darauf, sich ihrer hohen ernsten Pflicht als Landesmutter bewusst zu bleiben und dieses Bewusstsein bei jeder Gelegenheit in der ihr eigenen huldvollen Weise zu bethätigen.

Das ärgert naturgemäss den Fürsten Bismarck um so mehr, als die Kaiserin nicht einmal eine geborene v. Puttkammer ist.

Der Fürst Bismarck hat seiner Zeit seine Anhänger in denselben Kreisen gesucht, welchen er heute feindlich gegenübersteht. Er hat es vermocht, mit all' denjenigen Anhängern des preussischen Königshauses zu brechen, welche die wesentlichsten Stützen des Hohenzollernhauses zu allen Zeiten ausgemacht haben. Die Kaiserin und Königin hat in allen politischen Kreisen ihre Anhänger und erweist ihre Gunst, ohne Rücksicht auf irgend welchen politischen Standpunkt zu nehmen, all' denjenigen hervorragenden Männern der Nation, welche durch ihre Handlungen und ihren Lebenswandel berechtigt erscheinen, dass ein Monarch mit Stolz auf sie als auf die würdigsten Vertreter seines Volkes zu schauen vermag.

Fürst Bismarck hat mit diesen Männern Nichts mehr gemein. Seine Lebensgewohnheiten und sein Terrorismus haben ihm die Sympathien

jener Kreise verschlossen und seine Neigung, nur Diejenigen als seine Freunde zu betrachten, welche ihn als den Urquell aller Staatskunst verehren und seinen Willen allein als massgebend ansehen, hat ihn auf den Umgang mit Gründern, Juden und Reptilien angewiesen.

Unter diesen aber zählt die Kaiserin naturgemäss keine Verehrer und das erfüllt sie mit berechtigtem Stolze. Da aber dieser Stolz ebenfalls verletzend für den Reichskanzler ist, so ist es wiederum natürlich, dass er den Versuch macht, die Kaiserin von diesem Stolze dadurch zu heilen, dass er ihre Person in den Augen des Volkes auf eine niedrigere Stufe herabzuziehen versucht.

An dieser Arbeit sieht man die Reptilien jetzt seit Jahr und Tag, ohne dass es ihnen bisher gelang, die Kaiserin selbst oder deren Verehrer davon zu überzeugen, dass es ein Irrthum sei, zu glauben, sie, die Kaiserin, nehme einen viel höheren und würdigeren Standpunkt ein, als der gewaltige Bismarck.

Schon seit der Konfliktsperiode in den sechsziger Jahren ist die Kaiserin unablässig von der Reptilien- und Judenpresse der Conspiration nach einander mit den Liberalen, den Ultramontanen, den Conservativen u. s. w. verdächtigt worden. Dem Grafen

v. Arnim sagte der Reichskanzler selbst: «Sie konspiriren mit der Kaiserin gegen mich.»

Ferner ist die Kaiserin beschuldigt worden, die Kriegsbesorgnisse, welche der Reichskanzler im Frühjahr 1875 muthwillig heraufbeschworen hatte, wachgerufen zu haben. Sie auch soll es gewesen sein, welche den badischen Staatsminister Jolly gestürzt hat — sie auch ist es wieder gewesen, welche den Nerven des Reichskanzlers bei Hofe solche Alterationen zugefügt haben soll, dass er mehrmals nahe daran gewesen, dem Vaterlande seine unersetzlichen Dienste auf immer zu entziehen.

Und doch ist von alledem natürlich nie Etwas bewiesen worden, trotzdem es nicht die Kaiserin ist, welche über den Reptilienfonds disponirt. Dagegen ist es Thatsache, dass der Kaiser Wilhelm in seiner Verehrung für den Reichskanzler das würdige Verhalten seiner Gemahlin gemissbilligt hat und dass es dem Fürsten Bismarck gelungen ist, s. Z. die Entfernung der Kaiserin von Berlin nach Coblenz durchzusetzen.

Damit hat er sich das weitere Verdienst erworben, in das häusliche Glück des Herrscherpaares Bresche zu legen, ein Umstand, der vermuthlich der Kaiserin weniger erfreulich ist als dem Fürsten Bismarck.

Die Kaiserin mit ihrem klaren Verstande, ihrem feinen Takte und in dem Vollbewusstsein ihrer erhabenen Stellung, lehnt es ab, dem Namen Bismarck als Folie zu dienen; der Kaiser in seiner Dankbarkeit gegen den Reichskanzler und mit der ihm von der Natur zugemessenen eigenen Urtheilskraft fügt sich zufrieden in die Grösse seines Bismarck.

Die Geschichte kennt eben kein Mitleid!

VI. Capitel.

Bismarck und Arnim. *)

Es kann in dieser Broschüre nicht die Rede sein von einer umständlichen Behandlung der Arnim-Affaire in all' den Stadien, welche diese widerwärtige Angelegenheit bis zum heutigen Tage durchlaufen hat, ebensowenig von einer staatsrechtlichen Kritik derselben, welche zu Gunsten der einen oder andern

*) Den meisten der Leser dieser Broschüre ist zweifellos der Arnim-Prozess in seinen ganzen Details bekannt. Die hierauf bezüglichen Schriften, welche dem vorurtheilslosen Menschen volle Klarheit über die wirklichen Motive zur Beiseiteschaffung des Grafen Harry v. Arnim geben, sowie volles Licht darüber verbreiten, mit welchen Mitteln diese Exekution ausgeführt worden ist, sind sämmtlich durch das Verlags-Magazin in Zürich zu beziehen und bestehen in 1) Pro Nibilo. Vorgeschichte des Arnim-Prozesses; 2) Brief des Grafen Harry v. Arnim an den Fürsten v. Bismarck; 3) Anklageschrift der Oberstaats-Anwaltschaft nebst Aktenstücken. Eine Schrift des Professors v. Holtzendorff, welche vom juristischen Standpunkte aus unbedingt Partei nahm für den Verfolgten, soll, wie glaubwürdig verbürgt wird, von dem Berliner Verleger als Manuscript an das Reichskanzler-Amt verkauft worden sein.

Verfasser.

Partei gedeutet werden könnte. Der Fall Arnim an sich enthält jedoch eine solche Fülle des auffälligsten Materials zur Beurtheilung des Fürsten Bismarck als Charakter, dass nie Jemand nur annähernd sich ein zutreffendes Bild des vielgepriesenen Mannes des Jahrhunderts wird machen können, ohne die dunkle Affaire Arnim bei dem Lichte des gesunden Menschenverstandes zu sondiren.

Suchen wir zunächst nach den Motiven, wie sie unzweideutig durch die Thatsachen aufgeklärt, resp. bestätigt sind, so stossen wir unwillkürlich in erster Reihe auf die Aeusserungen des deutschen Kaisers dem Exbotschafter gegenüber. Diese Aeusserungen haben selbst die Reptilien nicht anzuzweifeln gewagt.

Am 1. September 1872 hatte der Graf Arnim Audienz beim Kaiser, um von demselben zu hören, ob seine Abberufung von Paris, resp. sein Ausscheiden aus dem Dienste von seinem kaiserlichen Herrn gewünscht werde.

Der Kaiser verneinte dies mit der Bemerkung:

«Es handle sich überhaupt um Nichts als um die »Ranküne« des Fürsten Bismarck. — Se. Majestät seien um so weniger im Stande, dieselbe zu begreifen, als es Ihm, dem Kaiser, nicht möglich sei, nachzutragen. Aber »Ranküne« wäre einmal

der vorherrschende Charakterzug des Fürsten Bismarck, und es sei traurig, bei einem Manne dies konstatiren zu müssen, dem man so viel verdanke. Diese Ranküne habe schon viele treue Diener entfernt — Goltz, Thile, Savigny, Uesedom, Werther u. s. w.» *«Jetzt sind Sie an der Reihe!»*

Warum wohl war der Graf Arnim an der Reihe? Die Frage ist nicht schwer zu beantworten. Erstens, weil er als seinen Gebieter seinen Kaiser und König betrachtete und diese Stellung derjenigen eines Dieners des Fürsten Bismarck vorzog. Zweitens, weil er den Fehler besass, gewissenhafter und geistreicher zu sein als der allmächtige Kanzler. Drittens, weil er den «Culturkampf» in der vom Reichskanzler eingeleiteten brutalen Weise missbilligte und die Stirn hatte, zu behaupten, gewaltsame Massregeln würden nie zum Ziele führen. Viertens, weil der Reichskanzler ein Opfer brauchte für seine Grösse, d. h. damit er die Verdienste des Grafen Arnim in den Verhandlungen mit Frankreich sich aneignen konnte und weil er sehr wohl wusste, dass seine eigenen diplomatischen Lorbeeren in dieser Richtung sehr zweideutiger Natur gewesen sind. Fünftens, weil der Kaiser von Deutschland den Grafen Arnim mit besonderer Huld behandelte und

der Reichskanzler, der doch auf dieselbe allein Anspruch hat, dadurch beschädigt wurde. Sechstens, weil auch die Kaiserin und der übrige Hof dem Grafen Arnim ihre Sympathien nicht versagten und dies gewissermassen als ein Attentat auf den allein berechtigten Menschen Bismarck gelten konnte. Siebentes, weil der Graf Arnim mehr das Interesse Deutschlands als des Kanzlers im Auge hatte und seine Berichte nicht so färbte, wie sie den Nerven des Kanzlers jeweilig zuträglich waren. Achtens, weil der Kaiser den Verleumdungen, welche Fürst Bismarck ihm über die Person Arnim's hinterbrachte, keinen Glauben schenkte.

Aus allen diesen Gründen erklärt sich zur Genüge die «Ranküne» Bismarcks und der Umstand, dass so jämmerliche und niederträchtige Mittel wie Fälschung von Telegrammen seitens der Staatsanwaltschaft oder des Auswärtigen Amtes, Spionage, Bestechung, Lüge, Meineid in dem Arnim-Prozesse in Anwendung kommen mussten, ehe der Botschafter zu den Todten geworfen werden konnte, ist lediglich der Zähigkeit des Grafen Arnim zuzuschreiben, mit welcher er auf sein Recht, seine Ehrenhaftigkeit und Pflichttreue pochte.

Graf Arnim selbst sagt über die gegen ihn angewandten Mittel: «Falsche Anklagen beim Kaiser,

schnöde Behandlung, unbegründeter Tadel, frevelhafte Verdächtigungen in der Presse, Demüthigungen in den Augen der französischen Regierung, dies sind die mannigfaltigen Mittel, welche abwechselnd zur Anwendung kamen, bis der Zweck erreicht wurde.» Das war jedoch schon vor dem famosen Tschischwitz-Mathiae'schen Landesverrathsprozess. Der Beweis für die Wahrheit alles Vorhergesagten ist so überzeugend geliefert, dass über die Berechtigung der dem Reichskanzler gemachten Vorwürfe kein Zweifel mehr entstehen kann. Für uns kommt es jedoch lediglich auf einige der hauptsächlichsten Momente an, welche wir der Erörterung unterziehen müssen und wir wollen dies in so beschränkter Weise thun, dass wir uns auch von dem «Reichsfreund» mit beschränktem Verständniss das Prädikat der verständigen Beschränkung verdienen.

Der Reichskanzler hat bekanntlich bei Gelegenheit des unblutigen Attentats des belgischen Kesselflickers Duchesne die Gelegenheit nicht vorübergehen lassen, sich in die Gesetzgebung anderer Länder zu mischen und einen Duchesne-Paragraphen geschaffen, vermöge dessen es ihm möglich geworden, eine bisher strafflose Handlung mit Strafe belegen zu lassen. Gleichermassen hat ihm die eingebildete Unbotmässigkeit des Grafen Arnim Gelegenheit gegeben, den

sogenannten Arnim-Paragraphen für das Strafgesetz zu acquiriren, ein Paragraph, mittels dessen eine obnehin strafbare Handlung mit schwererer Strafe belegt werden kann und welche es dem Reichskanzler ermöglicht, die deutsche Diplomatie derartig von seinem Wohlwollen abhängig zu machen, dass Ungehorsam, Lüge und Bruch des Amtsgeheimnisses nach seinem Ermessen konstatirt und bestraft werden können.

Als das Parlament sich in einem Momente tiefgefühlter Scham weigerte, den Handlanger für die Legalisirung dieses Gewaltaktes abzugeben, da stellte am 3. December 1875 der Reichskanzler die Kabinettsfrage in kategorischer Weise. Er sagte wörtlich:

«Passt der § 353 (der Arnim-Paragraph) nicht in Ihre juristische Façade, dann passt es mir nicht in die *Möglichkeit*, die auswärtigen Geschäfte zu führen, wenn das Gegentheil von dem geschieht, was beantragt ist.»

Der Reichstag überwand sein Schamgefühl, beugte sich dem Quos ego des Reichskanzlers und apportirte devotest den verlangten Paragraphen.

Damit ist nicht allein das deutsche Strafgesetzbuch um einen unsinnigen, sondern um einen geradezu unsittlichen Paragraphen bereichert

worden — ein spezielles Verdienst des Fürsten Bismarck.

«Wer seinen Vorgesetzten durch falsche Angaben täuscht, soll mit Gefängniss bis zu fünf Jahren bestraft werden.» So lautet ein Alinea des Arnimparagraphen.

Herr v. Küpfer, preussischer Legationssekretär, wurde seiner Zeit zum Gesandtschaftssekretär in Konstantinopel ernannt mit der ausdrücklichen amtlichen Weisung, den dortigen preussischen Gesandten zu bewachen und über ihn zu berichten. Um diesen Spionendienst verrichten zu können, täuschte er seinen Vorgesetzten, den Gesandten, durch die falsche Angabe, dass er keine derartige Weisung erhalten habe. Hätte Herr v. Küpfer der Weisung seines obersten Vorgesetzten keine Folge geleistet, so wäre er nach dem Arnimparagraphen wegen Ungehorsams gegen dienstliche Befehle mit fünf Jahren bestraft worden. Indem er dieser Weisung Folge leistete und seinen Vorgesetzten durch falsche Angaben täuschte, zog er sich nach demselben Paragraphen ebenfalls fünf Jahre zu. Durch die Arnim'schen Prozessverhandlungen sind Thatsachen an's Tageslicht gekommen, welche den Verdacht begründen, dass der Pariser Botschafter in Herrn v. Holstein, dem jetzigen

persönlichen Adjutanten des Reichskanzlers, gleichfalls einen Untergebenen hatte, welcher den gleichen Dienst, wie Herr v. Küpfer, versah.

Hiernach müsste also logischer Weise der Paragraph dahin erweitert werden, dass bestimmt wird, welche Vorgesetzten man ungestraft und welche man nicht ungestraft täuschen darf.

«Wer Dienstgeheimnisse verräth, soll mit Gefängniß bis zu zwei Jahren bestraft werden.» So lautet der Arnimparagraph weiter. Da der Kaiser stets in der Hauptstadt weilende Diplomaten zu empfangen pflegt, um sich mit ihnen über politische Angelegenheiten zu unterhalten, so werden die deutschen Botschafter vorsichtiger als der Graf Arnim sein und dem Kaiser jede Auskunft über politische Angelegenheiten verweigern müssen, welche ihnen auf amtlichem Wege bekannt geworden sind.

Der Arnim-Paragraph hat Deutschland dem Spott des Auslandes in ausgiebiger Weise überliefert und mit Recht ertheilt die «Saturday Review», das Organ der gebildeten englischen Staatsmänner und Diplomaten, den deutschen Botschaftern den Rath, auch den Tag über im Bett liegen zu bleiben, da der Verkehr mit Menschen ihnen nur Gefahr bringen könne. (Wörtlich: The best thing,

a German Ambassador will be able to do, is to take straight to his bed and lie there.)

Aber nicht nur den Spott, sondern auch die Verachtung der gesitteten Welt hat die Politik des «ehrlichen offenen» Staatsmannes auf sich geladen durch Vorgänge, wie sie im Arnim-Prozess an die Oeffentlichkeit gedrungen sind.

«Das Spioniren scheint's, ist Deine Lust!» sagt Göthe in seinem Faust und dachte schwerlich damals daran, dass den Deutschen ein «grosser Mann» erstehen würde, der das Spionirsystem so entfalten würde, als der Fürst Bismarck dies gethan. Hat er nicht hinter dem Rücken des kaiserlichen Botschafters durch den Herrn v. Mantouffell, als seinem heimlichen Spezialbotschafter, mit der französischen Regierung unterhandelt und ihr günstigere Propositionen gemacht, als diese zu bieten der offizielle Botschafter es in der Lage war, um den Grafen Arnim bei der französischen Regierung zu verdächtigen? Hat er auf diese Weise nicht Herrn Thiers durch seine Agenten zu veranlassen gewusst, zu erklären, dass Graf Arnim ein doppeltes Spiel treibe? Hat er nicht durch seine Agenten die schmachvoll gescheiterten Bestechungsversuche an der Wiener Presse versucht, um Manuscripte über ihm missliebige Artikel in seine Gewalt zu

bringen? Hat er diese Praxis nicht bis auf die neueste Zeit auch anderen Personen gegenüber im Bunde mit den miserabelsten Subjecten geübt? Hat er nicht die Post, dieses diskrete Gemein-Institut Aller, für den Spionendienst ausgenützt, als der damalige Generalpostdirector der Post-Anstalt in Gampden den Auftrag gab, auf Briefe zu fahnden, welche dem Grafen Arnim angeblich von dem dänischen Agenten Hansen zugehen sollten, aber niemals zugegangen sind? Zieht man hierzu die Fälle der Neuzeit (Ledochowski-Affaire, Liebknecht etc.), was ist anderes aus unseren Postbeamten geworden, als ein Heer von Staatsdienern, welche der Reichskanzler im «Interesse des Staates», d. h. in seinem eigenen, gelegentlich zu Spionen herabwürdigt? Wahrlich ein herrliches, grossartiges System, dessen Existenz abhängig ist von der grösseren oder geringeren menschlichen Schlechtigkeit, ein herrliches, grossartiges System, dessen Existenz stets bedroht ist durch die Ehrlichkeit der Menschen.

Graf Arnim hat bekanntlich der Oberstaatsanwaltschaft, welche gegen ihn die Anklage wegen Landesverrath einleitete, nachgewiesen, dass die ihr als Anklagematerial überwiesenen Depeschen des wichtigsten Inhalts beraubt, d. h. gefälscht waren. Er beruft sich ferner mit Recht darauf, dass ihm

die schon während seiner Dienstzeit als deutscher Botschafter verlangte Untersuchung seiner Handlungsweise versagt blieb, und dass der Reichskanzler erst nach drei Jahren, obschon ihm jedes einzelne Moment der Anklage immer bekannt gewesen, den Staatsanwalt auf ihn hetzt, um ihn zu vernichten.

Als die Broschüre «Pro nihilo» erschienen war und auch in die englische Sprache übersetzt wurde, da hielt es der Fürst Bismarck an der Zeit, dem berechtigten Aufsehen gegenüber einen Brief durch den «Reichsanzeiger» zu veröffentlichen, den derselbe schon am 14. April 1873 an den Kaiser in Betreff Arnim's gerichtet hatte. Der Brief enthielt so schwere Anschuldigungen gegen den gewesenen Botschafter, dass er augenscheinlich nur zu dem Zweck publizirt wurde, den Grafen Arnim auch in den Augen aller Unbefangenen herabzusetzen und namentlich seine Glaubwürdigkeit zu verdächtigen. Die betreffende Stelle des «reichskanzlerischen» Briefes lautet:

— — — «Ew. Majestät wollen sich huldreichst erinnern, dass ich von dem Versuch sprach, «die Gefahren, die Arnim's Charakter in Paris «bedingt, durch seine Versetzung nach London abzuschwächen, dass aber von dort aus bei der ersten «Anföhlung der *heftigste Protest* wegen der

«Neigung Arnim's zur Intrigue und zur Un-
«wahrheit eingelegt wurde; *man würde kein Wort*
«glauben, was er sagen könnte.»

Diese merkwürdige Behauptung des Reichskanzlers, nach deren Publizirung man erwarten konnte, die englische Nation werde, hingewiesen auf ihr eigenes Urtheil über den Verfasser von «Pro nihilo», den Angaben dieser Broschüre jeden Glauben versagen, ist von einer verhängnissvollen Bedeutung für den grossen Mann geworden.

Der Reichskanzler hat es damals und auch bis heute unterlassen, diejenige Person namhaft zu machen, welche befühlt worden ist und welche in Folge dieser Befühlung die ihr zugeschriebene Aeussderung und den auf diese Aeussderung gestützten Protest abgegeben hat.

Es hat nie ein Zweifel darüber obwalten können, noch irgendwo obgewaltet, dass die einzige Person, welche zu einer solchen Anföhlung kompetent ist, keine andere gewesen sein kann, als der damalige Minister der Auswärtigen Angelegenheiten.

Das Auswärtige Amt ist überall diejenige Behörde, welche einzig und allein kompetent ist, Mittheilungen und Anfragen auswärtiger Regierungen in Empfang zu nehmen und auf solche Anfragen

Bescheid zu ertheilen, insbesondere, wenn es sich um die Regelung diplomatischer Beziehungen handelt.

Es ist schlechterdings unmöglich anzunehmen, dass der betreffende diplomatische Vertreter Deutschlands Herrn Gladstone, oder irgend ein anderes Mitglied des Kabinetts, statt des einzig und allein kompetenten Lord Granville, damals Minister der Auswärtigen Angelegenheiten, befragt habe, ob Graf Arnim ein willkommener Botschafter sei. Es ist schlechterdings unmöglich anzunehmen, dass Herr Gladstone oder irgend ein anderer Minister auf eine solche Anfrage anders als mit dem Ersuchen geantwortet haben würde, sich an Lord Granville oder dessen Vertreter zu wenden. Es wäre schlechterdings abgeschmackt, anzunehmen, dass der Reichskanzler auf die ihm berichtete Aeussierung einer inkompetenten Instanz irgend welchen Werth gelegt haben würde.

Hiernach ist es ausser allem Zweifel, dass diejenige Person, welche nach dem Bericht des Reichskanzlers «befühlt» worden ist, nach diesem Bericht den Grafen Arnim der absoluten Unglaublichkeit geziehen, welche gegen dessen Ernennung zum Botschafter den heftigsten Protest eingelegt hat, keine andere sein konnte als der damalige Minister des Auswärtigen, Lord Granville

Und in der That hat darüber auch in England nie ein Zweifel bestanden. Mit voller Entrüstung wies die englische Presse die von dem Reichskanzler der englischen Regierung insinuirte Aeussderung zurück. Das Organ des jetzigen englischen Premiers, der «Standard», namentlich betonte, dass die englische Regierung in einem solchen Proteste eine *Beschimpfung des deutschen Kaisers* erblicken müsse und dass schon dieserhalb die englische Regierung wie die englische Nation eine derartige ihr untergeschobene Infamie energisch zurückweise.

Es war ein merkwürdiges Schauspiel, zu sehen, wie erst die englische Presse der deutschen Nation demonstrieren musste, dass die Beschimpfung des kaiserlichen Botschafters, des Mannes, der die Person Sr. Majestät fremden Nationen gegenüber vertritt, identisch sei mit der Beschimpfung des Monarchen. Glücklicher Weise hat die deutsche Nation von dieser angeblichen Beschimpfung ihres Kaisers nicht allzu viel erfahren, da weder der Reichskanzler noch die Reptilien irgend Etwas gethan haben, um Genugthuung für diese Beschimpfung zu erlangen.

Nachdem der «Standard» ferner dem Lord Granville den Vorwurf gemacht hatte, dass er — seiner Zeit englischer Premier — der Regierung

nicht die nöthige Aufklärung gegeben, um die Interpellation O'Sullivan's genügend beantworten zu können, veröffentlichte die «Pall-Mall-Gazette» ein Schreiben Granville's an den Grafen Arnim, in welchem der Erstere erklärte:

«Er habe sich seines Wissens niemals in tadelnder Weise über den Grafen, welchen er nicht die Ehre habe, zu kennen, geäußert und er habe, als es sich um Besetzung des deutschen Botschafter-Postens in London handelte, den englischen Botschafter in Berlin beauftragt, dem Reichskanzler gegenüber einen einzigen Wunsch auszudrücken, nämlich den, er möge zum Botschafter eine Personlichkeit wählen, welche sein, d.h. des Reichskanzlers, volles Vertrauen genieße.»

Die «Pall Mall Gazette» fügt diesem Briefe eine längere Betrachtung hinzu, an deren Schluss es mit vernichtenden Worten heisst:

«Die Thatsache, dass eine so *monströse* *Erfindung* dem Kaiser von dem Reichskanzler in vollem Ernst berichtet werden konnte, wirft ein eigenenthümliches Licht auf die Methode, mit welcher der

«Angriff auf Graf Arnim anfänglich eingeleitet und
«seitdem fortgesetzt ist.»

Den richtigen Ausdruck zu finden für diese Handlungsweise des «grossen, ehrlichen, offenen Staatsmannes», überlassen wir den Reptilien — sie werden ihn schon finden, wenn der Fürst Bismarck aufgehört hat, ihr Ernährer zu sein.

Eine zweite Stelle in dem angezogenen Briefe des Reichskanzlers an den Kaiser vom 14. April 1874 lautet:

«— — Ich habe Ew. Majestät meine unvor- greifliche Meinung über die Persönlichkeit des Grafen Arnim seit Jahren nicht verhehlt. — — —

— — — Ich habe, und nicht ich allein, den Verdacht, dass er seine geschäftliche Thätigkeit gelegentlich seinen persönlichen Interessen unterordnet. *Beweisen lässt sich dergleichen nicht.*» —

Graf Arnim in seinem offenen Briefe an den Fürsten Bismarck vom November 1876 antwortet auf diese Behauptung in folgender Weise:

«Ich kann mich der Pflicht nicht entziehen, von seinem Inhalt (Schreiben des Reichskanzlers) Notiz zu nehmen und würde dieser Pflicht schon längst nachgekommen sein, wenn ich nicht gehofft hätte, aus der Anklageschrift, durch welche ich auf Ew. Durchlaucht Veranlassung des Landesverraths be-

schuldigt werde, zu erfahren, ob und welchen Grund Sie zu haben glaubten, um in so beleidigender Weise an Se. Majestät über mich zu berichten, wie Sie es vor drei Jahren gethan haben. In dieser Hoffnung sehe ich mich getäuscht. — Die Anklageschrift enthält nicht ein Wort, welches den Inhalt Ihres Berichtes entschuldigen oder auch nur erklären könnte. — — — —

«Sie äussern in dem Bericht vom 14. April 1873: dass ich das Interesse des Dienstes gelegentlich meinem Privat-Interesse unterordnete. Sie sagen, dass auch Andere diesen Verdacht theilten.

«Niemand ist im Zweifel, was Sie damit haben sagen wollen. — Sie haben nicht für gut befunden, diesen Vorwurf durch muthmassliche, geschweige denn erwiesene Thatsachen zu begründen. Es hat Ihnen nicht einmal beliebt, eine solche, unabweislich erforderliche, thatsächliche Begründung in Aussicht zu stellen.

«Indem Ew. Durchlaucht eine beweislose Anschuldigung gegen mich bei Sr. Majestät erheben, verdächtigen Sie mich. — Diese Verdächtigung hört auf, eine unbesonnene Aeussderung zu sein dadurch, dass Sie den anfangs fehlenden Beweis nicht nachträglich erbracht und doch die Anschuldigung nicht zurückgenommen haben. Diese Verdächtigung

ist dadurch endlich zu einer öffentlichen und absichtlichen Ehrenkränkung geworden, dass der «Reichsanzeiger» missbraucht wurde, um Ihre Berichte zu veröffentlichen, ohne zu sagen, dass und welche Beweise Sie in Händen hätten, oder einzuräumen, dass Sie solche Beweise ungeachtet der, wie mir gesagt worden ist, von Ihnen persönlich angestellten Nachforschungen nicht haben auftreiben können.

«Ich bin daher berechtigt, Ew. Durchlaucht zu bitten, dass Sie mir die Thatsachen angeben, auf Grund deren Sie sich berechtigt glaubten: 1) vor drei Jahren jene Anklage gegen mich zu erheben; 2) dieselbe Anklage jetzt öffentlich zu wiederholen.

«Und da Sie in Ihrem Berichte an Se. Majestät auch gesagt haben, dass noch Andere den von Ihnen ausgesprochenen Verdacht theilten, da somit Andere Ihnen gegenüber diesen Verdacht ausgesprochen haben, ohne dass Sie mir davon Kenntniss gaben, so bin ich berechtigt, von Ew. Durchlaucht zu verlangen, dass Sie mir die Personen nennen, die den von Ihnen geäusserten Verdacht in Ihnen angeregt oder bestätigt haben»

Weder der Reichskanzler noch seine Reptilien haben dem Verlangen des Grafen Arnim entsprochen

und die Behauptungen des Reichskanzlers bleiben somit bestehen als das, wofür sie jeder Mensch, der nicht im Servilismus und in sittlicher Rohheit verkommen ist, betrachten muss, als *absichtliche böswillige Verleumdung*. Und diese Verleumdung schleuderte der Reichskanzler hinterrücks auf den Botschafter des Kaisers, als derselbe noch lange und zur Zufriedenheit seines Monarchen den Dienst versah.

Wer aber es wagt, an der Unfehlbarkeit des überlebensgrossen Fürsten Bismarck menschliche Schwächen zu entdecken, der ist ein Verleumder und er wandert den Tausenden nach in's Gefängniss, welche der «Grösse» des Reichskanzlers und seiner «erhabenen Mission» zum Opfer gefallen sind. «Beweisen lassen sich dergleichen Dinge nicht!» sagt Fürst Bismarck und triumphirend schaut er auf den meuchlings erschlagenen Feind — wahrhaftig, ein sittlich-erhebendes Schauspiel!

Als Fürst Gortschakoff im vorigen Jahre dem Reichskanzler seine Aufwartung machte, lenkte er auch das Gespräch auf den Grafen Arnim, mit dem er in Vevey vielfach verkehrt hatte, da unterbrach ihn Bismarck mit den Worten: «Je ne m'occupe plus de l'affaire Arnim!»

Ob den Fürsten Bismarck diese Lüge beruhigt? Dann möge er nur Eins nicht vergessen, nämlich,

dass es über den Reptilien noch ein Gericht gibt,
das der Weltgeschichte, und dass den unschuldig
Erschlagenen Geister der Rache erstehen, welche
unbarmherzig das Amt der Vergeltung üben werden
und dem Frevler das Gewissen vor die Füße werfen.

VII. Capitel.

Fürst Bismarck und die orientalische Frage.

Im Jahre des Unheils und des Schwindels 1872 überkam auch den Fürsten Bismarck — nihil humani alienum esse putans — die Lust zu gründen.

Wie der Poet kam er zuletzt, als schon Alles gegründet war, was den Gründern Nutzen bringen konnte. Daher verfiel er auf die glückliche und einfältige Idee, etwas zu gründen, was ihm nachtheilig werden musste. Er gründete das Bündniss der drei nordischen Mächte — den «Dreikaiserbund», von Diplomaten «das kalte Bündniss» genannt.

Nehmen wir einmal das kalte Bündniss Etwas unter die Lupe und untersuchen wir, was eigentlich die Substanz der genannten Assoziation ist, — Substanz ist dasjenige, was übrig bleibt — quod substat — wenn Alles abgeschabt ist, was den Kern des Dinges verhüllt.

Nach dem Prospektus der Gründung war — denn trotz der Versicherung des Herrn v. Bülow wird Niemand mehr an die Lebensfähigkeit dieses Bündnisses glauben — das «kalte» Bündniss eine Gesellschaft zur Bewahrung des europäischen

Friedens. Zur Zeit der Gründung wurde dieser Prospektus dahin interpretirt, dass die Gründer sich vereinigt hätten, um sich zu schützen gegen Friedensstörer, welche von Aussen her den Einen oder den Anderen von ihnen kriegerisch bedrohen könnten. Die nächstliegende Frage war nun folgerichtig die, welche von den europäischen Mächten wohl in der Lage war, einen oder den anderen Zeichner der Gründung plötzlich zu überfallen oder während längerer Zeit mit kriegerischen Demonstrationen zu provoziren. Man hielt Umschau und fand — Niemand. — Frankreich liess sich alle Taschen umdrehen, nirgends ein geheimnissvoller Revolver. Die allgemeine Unschuld war so gross, dass allmählig alle europäischen Regierungen in einer oder der anderen Form dem «kalten» Bündniss beitraten.

Selbst Frankreich fand das nordische System angemessen, nachdem im Frühjahr 1875 die Friedensliga sich zu seinen Gunsten fühlbar gemacht hatte. — Nur England stand beiseite und verbündete sich mit Niemand, weder gegen Andere noch gegen sich selbst.

Es zeigte sich indessen bei der Bismarck'schen Gründung sehr bald, was bei fast allen Gründungen der Neuzeit zu Tage tritt — der Prospek-

tus war falsch und damit von vorneherein der «Krach» des Bündnisses signalisirt.

Weisen wir diess an einem Beispiel nach. Wenn Mitglieder der preussischen hohen Aristokratie sich mit nationalliberalen Juden als ein Gründerkonsortium konstituiren, um ehrliche Arbeit und lobenswerthe Unternehmungen zu fördern, so ist es unzweifelhaft, dass sie in Folge der grösseren Geschäftschlauheit der semitischen liberalen Gründer nicht allein ihre guten Zwecke verfehlen, sondern auch in Geschäfte verwickelt werden, welche sie selbst als Betrüger erscheinen lassen. Derartige unnatürliche Verbindungen waren bekanntlich diejenigen, welche Herr Lasker benutzte, um den hineingefallenen Aristokraten die ganze Verantwortlichkeit für die betrügerischen Manipulationen seiner eigenen Partei aufzubürden*). Es war diess eine nothwendige Folge davon, dass jene in den Grundsätzen geschäftlicher Ehrlichkeit aufgewachsene Herren sich in der Illusion wiegten, es sei möglich, andauernde Freundschafts- und Geschäftsbündnisse mit Personen zu schliessen, die, in entgegengesetzten, geschäft-

*) Siehe Strousberg-Ratibor-Ujest rumänische Eisenbahnen, Wagener pommer'sche Centralbahn, Putbus-Biron-Nordbahn etc.

lichen Auffassungen erzogen, nothwendig auch entgegengesetzte Zwecke verfolgen mussten.

Wenn wir nun das nordische Bündniss, die Gründung des Fürsten Bismarck, mit der Association leichtfertiger Herzöge und schwindelhafter Gründer vergleichen, so ist uns wohl bewusst, dass weder zwischen dem Dr. Strousberg und dem Fürsten Gortschakoff einerseits, noch zwischen dem Fürsten Bismarck und den hineingefallenen Herzögen andererseits die geringste Aehnlichkeit besteht, aber unser Gleichniss passt insofern, als das nordische Bündniss dem Wunsche des Reichskanzlers, drei Mächte mit diametral entgegengesetzten Zielen unter einen Hut zu bringen, seine Entstehung verdankt.

Als der Fürst Bismarck kurz nach der Dreikaiserzusammenkunft der staunenden Welt seine That verkündete, als er dem deutschen Reichstag mittheilte, «er habe den Frieden Europa's auf geraume Zeit sicher gestellt», äusserten die Nationalliberalen ein grosses Behagen an dieser Mähr, um mit grossem Missbehagen die verlangte Erhöhung des Militärbudgets zu bewilligen.

Was eintreten musste, geschah — die Dreikaiserliga (auch Tugendbund genannt) entpuppte sich als ein Bündniss, vermöge dessen irgend einer der

drei Verbündeten seinen eigenen Kriegsgelüsten desto behaglicher zu fröhnen hoffte. Im Frühjahr 1875 gerieth bekanntlich der grosse Reichskanzler in zu grossen Zorn über das zu grosse Frankreich, ohne indessen sofort den ernstesten Entschluss zu fassen, sich der Gefahr eines Duells auszusetzen. Aber seine «Krieg-in-Sicht»-Artikel fanden in der liberalen und Judenpresse ein williges Echo und aus jedem deutschen Krähwinkel trompeteten die «reichsfreundlichen» Käseblätter: «Nieder mit den Klerikalen in Frankreich und Belgien!»

Darauf allgemeine Angst in Europa, denn Keiner wusste ja, dass es dem Fürsten Bismarck nur auf das Bangemachen der Franzosen und den Beifall der Nationalliberalen ankam — was ihm Beides gelang. Die Börsenspekulanten erkannten ebenfalls die wahren Absichten des Fürsten Bismarck nicht, denn alle Course sanken und Millionen von Differenzen wurden bezahlt. Das verdross besonders die Engländer. Schon Lord Clarendon, im Jahre 1866 Minister des Auswärtigen in England, gab vor Ausbruch des Krieges seine sittliche Entrüstung darüber kund, dass sein College in Berlin damals eine allgemeine Baisse verursachte.

Sogar Gortschakoff glaubte an den «Krieg in Sicht», benutzte aber seinen Irrthum mit grosser

Schlaueit, um in den Augen Europa's die Rolle eines « pacificateur de l'Europe » zu spielen, und that diess mit einem Erfolge, der seine glänzende Bestätigung fand in dem berühmten Telegramme des Kaisers Alexander an die Grossfürstin Olga von Württemberg (L'emporté de Berlin etc.).

Vielleicht, dass der Reichskanzler mit der Stiftung des Dreikaiserbündnisses auch einen praktischen Zweck verband, nämlich den, sich mittels Russlands eine Rückendeckung gegen Frankreich zu verschaffen. So aber erschien, als er Frankreich mit Krieg bedrohte, plötzlich Gortschakoff, um Frankreich den Rücken zu decken, ein für den Fürsten Bismarck gewiss um so beschämenderer Erfolg, als er denselben auch ohne seinen Dreikaiserbund erreicht haben würde.

Auf das kriegerische Frühjahr 1875 folgte ein friedlicher Sommer ohne pikante Vorfälle, es sei denn, dass man als einen solchen den Versuch bezeichnen könnte, den französischen Botschafter in Berlin mittels der Reptilien zu beseitigen. Man machte ihm nämlich plötzlich in allen officiösen Zeitungen den Vorwurf, er conspirire mit den Klerikalen und deren angeblich hohen Beschützerin in Berlin und er habe seit sechs Monaten jede Begegnung mit dem Reichskanzler ungezogener Weise vermieden, wäh-

rend in Wirklichkeit es ihm nicht gelang, vom Fürsten Bismarck persönlich empfangen zu werden.

Nachdem Fürst Bismarck den Sommer 1875 *procul negotiis* in seinem pommer'schen Malepartus verlebt, tauchte plötzlich das «Bischen Herzegowina» auf. Das «Bischen Herzegowina», wie der Reichskanzler es geringschätzig nannte, war allerdings nur eine neue Bewegung in demjenigen *circulus vitiosus* in welchem die orientalische Frage sich zu bewegen von jeher das Privilegium hatte. Das «Bischen» Hohenzoller hatte dem Reichskanzler unsterbliche Lorbeeren gebracht, das «Bischen» Unfehlbarkeit hat seinen Ruhm als Urheber des Culturkampfes erhöht, das «Bischen» Herzegowina aber ist heute schon ein «Bischen» Soviel geworden, dass der Fürst Bismarck bereits selbst gezwungen war, im letzten Herbst zu erklären, es sei jetzt ein «Bischen» lokalisirter Krieg, d. h. nachdem wirklich mit Hülfe Russlands in Bosnien und Serbien die Kanonen unaufhörlich donnerten, trotzdem der grösste Staatsmann der Welt seine Erlaubniss dazu nicht gegeben hatte.

Der Consulnmord in Salonichi, Aufstand in der Bulgarei, Zwangsanleihe in Serbien, Revolution in Constantinopel, Expedition der deutschen Flotte — Alles drängte dazu, den Dreikaiserbund in Function

zu setzen, um Europa zu demonstrieren, dass derselbe wirklich eine Gesellschaft zur Erhaltung des Friedens sei.

Die Dreikanzlerkonferenz wurde in Berlin in Scene gesetzt. Jeder, der damals mit massgebenden russischen Persönlichkeiten Umgang pflegte, musste zu der Ueberzeugung gelangen: Erstens, dass die Russen die orientalische Frage jetzt, und gerade jetzt, zum Austrag bringen wollten; Zweitens, dass sie dabei mit vollständigster Zuversicht auf Deutschlands Dankbarkeit und Hülfe rechneten; Drittens, dass die friedlichen Absichten des Kaisers Alexander keine Garantien gegen den Kriegseifer der Nation gewährten; Viertens, dass es dem russischen Kanzler ebensogut gelingen könnte, seinen friedlichen Souverän zum Kriege zu drängen, als es dem deutschen Kanzler im Jahre 1866 gelungen ist, seinen Monarchen zum Kriege mit Oesterreich zu drängen.

Die Kanzlerkonferenz fand also in Berlin statt. Berlin war das Centrum des Weltall's, wie Verona es einst gewesen, als die Congresskönige sich in seinen Mauern versammelten.

Gortschakoff verlangte energisches Einschreiten in den türkischen Provinzen, um den Einfluss und das Ansehen Russlands bei den Christen im Orient zu erhalten. Seine Absichten waren schon

damals auf eine Lostrennung der aufständischen Provinzen vom türkischen Reich und eine Vertheilung derselben an Serbien und Montenegro gerichtet. Oesterreich, namentlich Ungarn, hat das entgegengesetzte Interesse, nämlich die Slaven in den türkischen Provinzen auf dem nicht mehr ungewöhnlichen Wege des Halsabschneidens verschwinden zu sehen.

Fürst Bismarck neigte sich trotz seiner christlichen Gesinnung mehr auf die Andrassy'sche Seite und die Forderungen Gortschakoff's wurden auf der Conferenz sehr bedeutend beschnitten. Es sollte ein Waffenstillstand abgeschlossen und womöglich eine Entwaffnung der Insurgenten vorgenommen werden. Die Idee eines Waffenstillstands zwischen Türken und Insurgenten war allerdings diejenige des Fürsten Bismarck, aber schon darum widersinnig, weil man auf der Dreikanzlerkonferenz bei der «dilatatorischen» Behandlung der Frage vergass, dass die Vorbedingung zu einem solchen Waffenstillstande nothwendig eine Demarkationslinie war. Andererseits aber konnte sich der Fürst Bismarck, wenn er von der orientalischen Frage Etwas verstand, sagen, dass ein solcher Waffenstillstand einmal die Insurgenten als kriegführende Macht anerkennen liess und dass derselbe, wenn wirklich

gehalten, in Wirklichkeit nur dazu dienen konnte, die Quadratur des Zirkels zu finden, d. h. Garantien dafür herzustellen, dass die Christen im Orient in der Zukunft eine aufrichtige Freude am muselmännischen Joch empfinden würden. So lange jedoch Christen und Muhamedaner in ungefähr gleicher numerischer Stärke jene Provinzen bewohnen, werden die Einen die Unterdrücker, die Anderen die Unterdrückten sein. Wer von Beiden dem Anderen den Hals abschneidet, das hängt lediglich davon ab, ob jene Provinzen unter türkischer oder christlicher Oberherrschaft stehen. In jedem der beiden Fälle bleibt das Halsabschneiden auf der Tagesordnung — um Gottes Willen.

Bismarck nahm indessen bei der Conferenz die Gelegenheit wahr, um sich an seinem Freunde Gortschakoff dafür zu rächen, dass er ihn im Frühjahr 1875 in so auffallender Weise zu besänftigen unternommen hatte. Andrassy war daher in der besten, Gortschakoff — nach dessen Recept: «um das Eine zu erlangen, muss man das Zehnfache verlangen», die Conferenz eröffnet war, — in der übelsten Laune der Welt. Nur das Eine hatte Gortschakoff erreicht, dass nämlich das Berliner Memorandum eine vereinte Aktion der drei Mächte in Aussicht stellte. Ja, es enthielt sogar die Dro-

hung, oder war wenigstens von derselben begleitet, dass diese vereinte Aktion auch dann stattfinden sollte, wenn die anderen Mächte, namentlich England, nicht mitgehen wollten. Das war allerdings auch für Gortschakoff die Hauptsache und als Andrassy bei seinem Scheiden vom deutschen Reichskanzler sein Befremden über die weitgehenden Pläne Gortschakoff's ausdrückte, wusste dieser ihn durch nichts Anderes zu beruhigen, als durch den Hinweis auf die «senile» Schwäche des russischen Staatsmannes.

Freilich, Alter schützt vor Thorheit nicht, auch nicht vor Kriegsgelüsten. Der alte Thiers träumte nur von Kriegslorbeeren, als er 70 Jahre alt war.

So leiden nach Fürst Bismarck bekanntlich auch die englischen Staatsmänner an «seniler» Schwäche und desshalb hasste er Palmerston, wie er Gladstone, Disraeli*) und Derby gehasst hat und noch heute hasst, weil sie sämtlich so unvorsichtig waren, englische statt preussische Politik zu treiben.

*) Disraeli hat bekanntlich auch in einer Anspielung auf die Arnim-Affaire die den Reichskanzler verletzende Aeusserung gethan: «In England sei der Arbeitervorwiderrechtlicher Verhaftung sicherer, als in Deutschland der Aristokrat!»

Als das Berliner Memorandum fertig war — (die «Times» sagte über seinen Inhalt: «Its substance is contradictory!» — stellte desshalb auch der Fürst Bismarck an England einfach das Ultimatum, binnen zwei Tagen seine Unterschrift zu seinen, des grossen Reichskanzlers Füssen zu legen. Aus einem Briefe Lord Odo Russell's (englisches Blaubuch) geht nämlich hervor, dass Fürst Bismarck nach Schluss der Kanzlerkonferenzen — es war diess Freitags den 10. Mai 1876 — die Botschafter Frankreich's, England's und Italien's zu sich befahl, um ihnen mitzutheilen: «Gortschakoff und Andrassy hätten sich entschlossen, bis Montag in Berlin zu bleiben, und die drei Verfasser des Memorandum's erwarteten, dass die Mächte sich bis dahin über die Annahme des Memorandum's äussern würden.»

Lord Odo Russell sowohl als Lord Derby haben die diplomatischen Formen, in denen sie aufgewachsen sind, noch beibehalten, wesshalb es erklärlich scheint, dass sie eine solche Zumuthung nicht mit einem schallenden Gelächter beantworteten. Man denke sich: Die englischen Staatsmänner sollten sich binnen zwei Mal vierundzwanzig Stunden über eine so wichtige, in Form eines Ultima-

tum's an sie gestellte Frage schlüssig machen! Lord Derby antwortete desshalb kalt und höflich: «England lege freilich in so wichtigen Angelegenheiten keinen Werth auf die Beobachtung der Form, indessen etc.» (Engl. Blaubuch.)

Auch Andrassy hat die ihm vom Reichskanzler zugeschriebene Mitschuld an solch' ungewöhnlicher Zumuthung nachträglich in Abrede gestellt. Der österreichische Botschafter in London, Graf Beust, hatte nämlich an Andrassy telegraphirt: «England sei über die Zumuthung, sich in so kurzer Zeit zu erklären, verletzt.» In Folge dessen liess Andrassy dem englischen Kabinet die Weisung zugehen, «es sei ihm nicht eingefallen, irgend eine Frist zu bestimmen.» Das Possierlichste aber bei dem ganzen reichskanzlerischen Manöver war, dass weder Gortschakoff noch Andrassy ihre Abreise bis auf Montag aufschoben, sondern Berlin schon am Sonnabend verliessen.

Der englischen Ablehnung folgte bald der Tod Abdul Aziz's, ehe noch das unglückliche Memorandum an seine Adresse gelangt war — zum Glück für Deutschland. Eine allgemeine Confusion entstand und die Unterzeichner des Memorandums legten dasselbe als Makulatur verschämt zu den Akten.

Von diesem Augenblicke an beginnt das «kalte» Bündniss zur Erhaltung des Friedens sich zu verwandeln in ein Bündniss zur Herbeiführung des Krieges. Die Reptilien erklärten, es sei Alles in Ordnung, die Contremine machte Deckungskäufe, der Reichskanzler ging nach Kissingen.

In Wirklichkeit aber war Nichts in Ordnung. Russland ging weit über das Berliner Memorandum hinaus, insurgirte weiter und drängte damit unaufhaltsam zum Kriege. Andrassy blieb in Furcht vor dem Kommenden, ohne sich zu einer That aufzuraffen — der Fürst Bismarck liess Russland gewähren — der Rubel ging auf Reisen und Deutschland erfüllte sich mit «Juchtengeruch», ohne den, wie die «Wiener Freie Presse» behauptet, auch sein grosser Kanzler nicht leben kann.

Und die Schuld, dass es zum Kriege kommen musste und gekommen ist, trägt einzig und allein der Fürst Bismarck; ihn auch trifft die Schuld, wenn die orientalische Frage die europäische Katastrophe erzeugt.

Nach dem Kriege mit Frankreich konnte das deutsche Reich keinen anderen Zweck haben, als die Erhaltung des *status quo*, wie er durch den Frankfurter Frieden geschaffen war. Oesterreich hatte im Hinblick auf die orientalische Frage dasselbe Interesse

an der Aufrechterhaltung des *status quo*. England war genau in derselben Lage. Hätte nun Fürst Bismarck, anstatt seine tief eingewurzelte, wahlverwandtschaftliche Neigung für russisches Regierungssystem und vielleicht Reminiscenzen an die Petersburger Plaudereien, Zechereien und Jagd-Ausflüge zur Grundlage seiner Politik zu machen, seine Abneigung gegen England und besonders Disraeli überwunden, um mit England und Oesterreich, welche an der Erhaltung des *status quo* Beide das gleiche Interesse haben, eine Verbindung anzubahnen, so würden sich dieser Verbindung ebenfalls alle übrigen Mächte angeschlossen haben, denen an der Erhaltung des *status quo* gelegen ist, und dazu gehören fast alle europäischen Mächte mit Ausnahme Russlands und Frankreichs, von denen Letzteres indessen nach dem eigenen Ausspruch Fürst Bismarck's nicht einmal in Betracht kommt, da es, wie die Welt aus der Correspondenz zwischen dem Reichskanzler und dem Grafen Arnim gelernt hat, vermöge seiner republikanischen Verfassung «nicht bündnissfähig» ist. Italien, Holland und Belgien hatten die Friedensliga mit Freuden begrüsst. Oesterreich und Italien, beide ringend nach Erlösung aus ihren Finanzkalamitäten, würden eine Verringerung ihrer Heere vorgenommen haben, wenn das durch seine

Einigung militärisch um das Dreifache stärker gewordenen Deutschland mit dem guten Beispiele vorgegangen wäre und, unterstützt von England, auf eine Nachahmung hingewirkt hätte. Das Bündniss zwischen Deutschland, England und Oesterreich wäre der erste Schritt zur Erkenntniss gewesen, dass die allgemeine Wehrpflicht in ihrer jetzigen übertriebenen Ausbildung nur dann erträglich bleibt, wenn sie allmählig gleichbedeutend wird mit allgemeiner Entwaffnung.

Wir haben das Dreikaiserbündniss um desswillen schon bei seiner Geburt als eine Leiche betrachten müssen, weil Mächte mit diametral entgegengesetzten Interessen, wie Russland und Oesterreich, unmöglich selbst auf längere Zeit den Glauben an eine Bundesgenossenschaft aufrecht erhalten können. Das englische Blaubuch gibt über die vergeblichen Versuche, Todte zu erwecken, den besten Nachweis. Ferner geht aus dem Blaubuche bis zur Evidenz hervor, dass Russland Alles gethan, um den Krieg herbeizuführen, dass Oesterreich Alles gethan, um den Krieg zu vermeiden, und dass der deutsche Reichskanzler in seiner unfehlbaren Anschauung von dem «Bischen Herzegowina» Nichts von all' dem gethan hat, was er hätte thun sollen! Der Reichskanzler hielt sich selbst für stark genug, die Diffe-

renzen zwischen Russland und Oesterreich auszugleichen. Er hat die Gegensätze verschärft und treibt Oesterreich zum Selbstmord oder zum Kriege mit Russland. Das einzige Mittel, um die vorhandenen Differenzen zwischen den beiden Mitverbündeten auszugleichen, ist die schiedsrichterliche Entscheidung, aber weder Oesterreich noch Russland werden diese Entscheidung in die Hände Deutschlands legen. Somit bliebe für den Fürsten Bismarck nur ein Weg vorgezeichnet, um den Krieg zu vermeiden, wenn er ihn vermeiden wollte. Hat aber Fürst Bismarck den Krieg nicht vermeiden wollen, so mag er auch die Auskunft darüber geben, wann er den Schauplatz des Blutvergiessens von der Türkei nach Deutschland zu verlegen wünscht. Fürst Bismarck musste sich aber, um dem Kriege und damit der soeben angedeuteten möglichen Consequenz im Interesse des deutschen Reiches vorzubeugen, der Hülfe einer dritten Macht bedienen, welche, wie Deutschland, in der Mitte steht zwischen Russland und Oesterreich und welche im Grossen und Ganzen dieselben Interessen hat, wie Deutschland. Zu diesen Interessen Deutschlands gehört es auch, die Handelswege zum Orient in möglichst verschiedenen Händen zu sehen. Für Deutschland war der natürliche Verbündete ad

hoc England. England verlangt eine Sicherstellung der Christen gegen die ungebührliche Behandlung seitens der Pforte. In dieser Beziehung begegneten sich England und Russland. Desshalb konnte Deutschland sich mit England über diesen Punkt verständigen, ohne Russland zu verletzen. Für Russland wäre es unter solchen Verhältnissen absolut unmöglich gewesen, eine Annexionspolitik ernstlich in's Auge zu fassen. So auch konnte Deutschland durch ein Zusammengehen mit England keine russischen Pläne durchkreuzen.

Durch ein Zusammengehen mit England war Deutschland in der Lage, sich die Freundschaft Russlands zu erhalten.

Hätte sich Fürst Bismarck so mit England über ein Programm verständigt, dem auch Russland beigetreten wäre, so bliebe auch Oesterreich Nichts übrig, als sich zu beugen.

Aber was that der deutsche Kanzler? Mit seltener Unverfrorenheit stellte er England ein Ultimatum in dem Berliner Memorandum und folgte seiner Russomanie in demselben Moment, als Russland das deutsche Reich mit der Grenzsperre für alle deutschen Producte beglückte und die Grundbesitzer durch die Ueberschwemmung russischer Bodenerzeugnisse ruinirte.

Man muss hiernach wohl oder übel zu der Ueberzeugung gelangen, dass die mit dem Visum des Fürsten Bismarck versehene Entwicklung des «Bischen Herzegowina» zu einem drohenden europäischen Kriege nicht möglich gewesen wäre, wenn Fürst Bismarck an der Spitze von Mittel-Europa — d. h. aller *status quo* Mächte — sich bestimmt dahin ausgesprochen hätte, dass entweder an dem territorialen *status quo* nicht gerüttelt werden dürfe, oder dass die vielleicht nothwendigen Veränderungen nur unter Mitwirkung der am Frieden um ihrer selbst willen interessirten Mächte vorgenommen werden dürfen. Das war möglich, als die Conferenzkomödie «Zu spät» noch keine Entschuldigung abgab für den bösen Willen Bismarck's und Gortschakoff's.

Es ist eine bei allen christlichen Nationen ausgemachte Sache, dass Europa von dem Alp der orientalischen Frage nur durch *eine vollständige oder theilweise staatsrechtliche Loslösung* der slavischen Herzogthümer von der Türkei befreit werden kann. Disraeli war niemals grundsätzlich gegen eine solche Lösung. Die öffentliche Meinung Englands verlangt eine solche Lösung. Andrassy hätte anfänglich auch darein gewilligt — heute ist es für Oesterreich zu spät und es wird

das Schwert ziehen müssen, um sich der Falle, welche ihm die Liebe seiner Bundesgenossen gestellt hat, zu entziehen. Zur Erhaltung der Bundesgenossenschaft Oesterreichs und seines Freundes Andrassy hätte sich der Fürst Bismarck mit dem ihm verhassten Disraeli verbinden müssen. Statt dessen gründete der Reichskanzler das nordische Bündniss und verbündete sich mit derjenigen Macht, welche notorisch kein Interesse am *status quo* hat, welche notorisch die Auflösung des türkischen Reiches zu ihrem eigenen Vortheil anstrebt.

Wie alle faulen Gründungen, ist auch das Dreikaiserbündniss, gestiftet zur Erhaltung des europäischen Friedens, jämmerlich «verkracht» und sein Gründer hat, wie alle faulen Gründer es zu thun pflegen, seine eigene Gründung im Stich gelassen. Wie bei vielen Gründungen, ist auch der Bismarck'schen Dreikaiserliga die Abschlachtung der Aktionäre, zu deren Heil der glänzende Prospect erfunden wurde, auf dem Fusse gefolgt, und zwar findet diese Abschlachtung mit einer Grausamkeit statt, vor welcher sich die ganze civilisirte Welt entsetzt. Das ist das jämmerliche Fiasco der Politik des deutschen Reichskanzlers. Deutschland befindet sich heute zwischen Scylla und Charybdis, sein Reichskanzler sitzt wieder in Kissingen,

die Reptilien sagen: Es ist Alles in Ordnung, d. h. Niemand weiss mehr, was werden wird, und von Allen am wenigsten der grosse Staatsmann Bismarck, dem die Welt zu verdanken hat, dies «Bischen Herzegowina», das alles Bestehende zu zertrümmern droht, mit frevelhaftem Gleichmuth zu der heutigen Furchtbarkeit grossgezogen zu haben.

Oder ist es wirklich nur Unfähigkeit, die den Fürsten Bismarck wie in anderen, so auch in der Beurtheilung der orientalischen Frage auszeichnet?

Sollte er nicht wissen, dass Russland und Oesterreich nie ohne die Pression einer dritten Macht sich über der Pforte vorzuschlagende Friedensbedingungen einigen werden? Kann der deutsche Reichskanzler diese Pression noch ausüben, ohne sich entweder mit Russland, indem er die mässigen Forderungen Oesterreichs unterstützt, oder mit Oesterreich, indem er den weitgehendsten Forderungen Russlands das Wort redet, zu entzweien? Gewiss nicht! Im ersten Falle wird Deutschland von dem für dasselbe verhängnissvollsten Ereigniss, einem russisch-französischen Bündniss, betroffen; im zweiten Falle macht er Oesterreich zum Bundesgenossen der Türkei und provoziert den Krieg, welchen Deutschland heute zu vermeiden alle Ursache hat. Eine einzige Macht

ist, nachdem der deutsche Reichskanzler das Interesse Deutschlands seinem Hasse gegen England opferte, noch in der Lage, den grossen Brand zu beschwichtigen und diese Macht ist gerade England, welches sich jetzt dafür dankbar erweisen kann, dass der Fürst Bismarck es bei Abfassung des Berliner Memorandum's als politische non-valeur behandelte. Hartnäckiges Schweigen des deutschen Reichskanzlers gilt bekanntlich den Reptilien als Beweis, dass die Weltgeschichte für die nächsten zehn Jahre bereits von dem grossen Manne festgestellt ist und von seiner zaudernden Lippe — hesitating lip — erwarten die getreuen Heerschaaren das unfehlbar erlösende Wort. Fürst Bismarck hat es ihnen gegeben und Deutschland kann daher ruhig sein. «So lange man nicht beweist, dass in Folge der orientalischen Wirren die Güter in Pommern im Werthe sinken, hat Deutschland kein Interesse an der orientalischen Frage.» So sprach Bismarck, und so predigen seine Reptilien heute noch dem deutschen Michel, trotzdem die Ereignisse im Orient bereits mächtige Schatten über Deutschland werfen. Wenn der Fürst Bismarck jetzt noch einsehen sollte, dass die orientalische Frage keine russische, keine türkische, keine österreichische, sondern eine europäische Frage ist, so dürfte diese

Erkenntniss zu spät kommen. Die alte preussische Theorie, dass das Berliner Kabinet an dem Schicksal der Türkei «direct» nicht interessirt sei, datirt aus der Zeit, da Berlin noch die Hauptstadt Preussens war.

Damals konnte man die Türkei als ein Ausgleichs-Objekt behandeln und verhandeln an die Macht, welche Preussen half, deutsches Reich zu werden. Seitdem aber das deutsche Reich besteht, liegt Konstantinopel vor seiner Thür und leicht kann es in die Lage kommen, österreichische Interessen im Orient vertheidigen zu müssen. Die alte preussische Theorie aber in der Orientpolitik, welche der Reichskanzler jetzt noch als die richtige betrachtet, ist weder eine deutsche noch eine nationale Politik — es ist eine einfache Provinzial-Politik, durch welche Deutschland glücklich zum Schleppträger des heiligen Russlands herabgesunken ist.

«Allons donc, comment se soucier de cette bagatelle d'Herzégowine!»

Wenn Deutschland jetzt Russland die Rolle des massgebenden Faktors zur endgültigen Lösung der orientalischen Frage überlässt, so ist es möglich, dass vielleicht der Fürst Bismarck mit einem siegreichen russischen Kaiser gemeinschaftliche Inte-

ressenpolitik machen kann, wahrscheinlich ist dies aber nicht!

Die Ereignisse, welche sich jetzt im Orient abspielen, sind darum so bedeutungsvoll, weil die Präponderanz Russlands an der Donau und am Schwarzen Meere, in den Dardanellen und den griechischen Gewässern, die Vorkämpfer des Slaventhums in eine sichere Position bringt, von welcher uns die russische Civilisation — welche nicht die unsrige ist — anmasslich und brutal, unsere Cultur, unsere Länder, unsern Handel bemeistern und vernichten kann.

Daran möge man in Deutschland recht oft und gründlich denken.

Dem Fürsten Bismarck aber empfehlen wir, sich einen beherzigenswerthen Ausspruch Ranke's vor Augen zu halten, der da sagt:

«Mancherlei Kriege gibt es und mancherlei Held-
«anrufe. Das vornehmste Lob gebührt denen, welche
«der Cultur der Menschheit durch siegreiche Waffen
«neue Schauplätze eröffnet und die Barbarei an be-
«deutenden Stellen überwältigt haben.»

VIII. Capitel.

Fürst Bismarck als Mensch.

Es dürfte schwer sein für den vorurtheilslosen Leser, aus der Lektüre der vorhergehenden Kapitel sich den Fürsten Bismarck ohne einen bereits schwer beschädigten Charakter in dieser Schlussbetrachtung gegenwärtig zu halten, und desshalb ist der Verfasser wohl oder übel genöthigt, sich an all' diejenigen Vorzüge des grossen Mannes zu klammern deren Besprechung geeignet erscheint, ihn als Menschen so viel als möglich wieder zu repariren.

Zunächst verschmäh't es der Verfasser, für seine Person Schlüsse zu ziehen aus demjenigen Material, welches dem Leser zu eigener Schlussfolgerung in dieser Schrift bisher schon geboten ist und hält er sich desshalb lediglich an die unverdächtige Biographie George Hesekei's — *das Buch vom Fürsten Bismarck* — um auf diesem Wege noch etwas Näheres über den «Menschen» Bismarck zu erfahren. *)

*) Dieser Mensch Bismarck steht bekanntlich nach öffentlichem Aussprüche des Staatsanwalts Simon v. Zastrow in Berlin so hoch, dass derselbe durch jede

Zwar bleibt Herr Hesekei für seine byzantinischen Lobhudeleien, analog den Gewohnheiten des Fürsten Bismarck, den Beweis schuldig, und müssen wir somit annehmen, dass sich «dergleichen» Dinge nicht beweisen lassen, wesshalb wir um so lieber daran glauben, als wir hoffen, dadurch in Etwas dem deutschen Reichskanzler gefällig zu sein.

Wir wollen dem Leser den Fürsten Bismarck zunächst in Gesellschaft zweier berühmter Staatsmänner einführen und zwar der Herren Thiers und Guizot. Mit diesen beiden Ehrenmännern hat er sich in dem Album eines bekannten hohen Diplomaten zusammengefunden und es ist interessant, zu erfahren, welche erhabene Wirkung diese Berührung auf den deutschen Reichskanzler ausgeübt hat.

Hypothese beleidigt wird, welche dem «Durchschnittsmenschen» gegenüber als Beleidigung nicht zu erkennen sei. — Der Staatsanwalt Pleuss in Hannover stellte ihn so hoch, dass er in einem Prozesse gegen den Dr. Edgar Bauer den Beweis für die Schuld des Angeklagten also führte: «Dass eine Beleidigung schon dadurch festgestellt zu erachten, weil der Fürst Bismarck sich durch den inkriminirten Artikel beleidigt gefühlt und den Strafantrag gestellt habe!» — Herr Staatsanwalt Tessendorff nennt Bismarck mit Ignorirung des Kaisers den «Mann, der an der Spitze des Staates stehe».

« Ma longue vie m'a appris deux sagesse, que j'ai eu souvent à pratiquer : l'une de beaucoup pardonner, l'autre de ne jamais oublier ».

23 mars 1870.

(Gez.) Guizot. »

« Un peu d'oubli ne nuit pas à la sincérité du pardon ».

6 avril 1870.

(Gez.) A. Thiers. »

« Ma vie m'a appris que j'ai beaucoup à oublier et beaucoup à me faire pardonner ».

17 novembre 1871.

(Gez.) v. Bismarck. »

Ein edler, ein schöner Denkspruch, der des deutschen Reichskanzlers. Leider verriethen uns die Handlungen des Fürsten Bismarck bisher Nichts von dem Vorhandensein der Tugenden der Versöhnlichkeit und Bescheidenheit, und es bleibt uns daher nur noch der Ausweg, den illustren Mann auf Hesekiel zu versuchen, um vollständig unparteiisch zu verfahren.

Der Leser wird uns die Säuglings- und Schlingeljahre des Herrn Otto v. Bismarck-Schönhausen gewiss schenken und damit sind wir zugleich der

Schilderung der Anstrengungen des prophetischen Altweiber-Quartetts Mutter Bellin — Louise Neumann — George Hesekei — Trina Neumann», aus dem ungezogenen Jungen den späteren grossen Staatsmann zu konstruiren, überhoben.

Setzen wir da ein, wo der Mensch in der Regel selbst beginnt, sich für existenzberechtigt auf der Welt zu halten, mit dem Eintritt in das akademische Bürgerthum, so finden wir zunächst, dass die sorgliche Mutter auf Freundesrath im Jahre 1832 den jungen Bismarck nach Göttingen auf die Universität schickte. Er selbst hatte nach Heidelberg gewollt, aber, sagt Hesekei, seine Mutter wollte davon Nichts wissen, da sie fürchtete, er werde sich dort das schändliche Biertrinken angewöhnen. Seine Studienzeit in Göttingen (Hesekei S. 69 u. ff.) theilte der junge Bismarck ehrlich in Saufen, Raufen und verwandte Fächer, und Hesekei weiss ihm nur nachzurühmen, dass er bis zum Herbst 1833, wo er Göttingen verliess, niemals ein Colleg besucht hatte. Wörtlich sagt dieser wackere Biograph: «Bei dem stürmischen Leben, welches Bismarck in Göttingen geführt, hatte er begreiflicher Weise (sic!) keine Musse gefunden, Collegia zu besuchen; dennoch erhielt er sehr schöne Atteste über seinen Fleiss!» (sic!)

Herr Hesekiel hat es für nöthig erachtet, zur Illustration des Göttingen'schen Studentenlebens, welches sein Held geführt, eine bemerkenswerthe Episode der Nachwelt zu überliefern. Eines Tages nämlich warf Bismarck im höchsten «Soff» eine Flasche durch das Fenster auf die Strasse. Glücklicher Weise wurde kein Vorübergehender getödtet, der kühne Werfer aber vor den Universitätsrichter citirt, dem er in Schlafrock, Cylinderhut und Kanonenstiefeln, begleitet von seinem grossen Hunde, seine Aufwartung machte. Dieser denkwürdige Moment, wie der alte Professor unter dem Hohnlachen Bismarck's vor dessen angehetztem Köter ängstlich hinter Tisch und Stuhl flüchtet, ist in dem Buche von künstlerischer Hand durch ein Bild verewigt.

Vermuthlich ist es auch diese That, welche den alten Perrückenhaltern von Stadt und Universität Göttingen vor Kurzem Veranlassung gab, dem Fürsten Bismarck das Ehrenbürgerrecht zu überbringen.

Nach Berlin zurückgekehrt, setzte er das wilde Leben, an das er sich einmal gewöhnt hatte, fort. Hier endlich beginnt sein Studium. Hesekiel sagt «Erst als das Examen wie ein dräuendes Gespenst näher kam, entschloss er sich und ging, das erste Mal in seinem Leben, in ein Collegium; er ging auch ein zweites und letztes Mal dahin, und

klar war ihm, dass er in der kurzen Zeit, welche ihm noch blieb, nicht so viel vom Jus profitiren könne, als er zum Examen brauche. Er ist darum (?!), nach diesen zwei Stunden, nie wieder in einem Collegium erschienen.» Sein Examen legte Bismarck jedoch selbstverständlich ab. Wie? sagt Hesekiel nicht. Sonst laufen darüber sonderbare Gerüchte, welche erkennen lassen, dass auch zu jener Zeit schon die Familienhäupter wussten, «wie's gemacht wird».

Jetzt wird Bismarck Auskultator, als welcher er nach Verübung einiger Unarten 1836 als Referendar an die Regierung zu Aachen versetzt wurde. Hier muss Bismarck ein besonders geniales Leben geführt haben, denn sein treuer Hesekiel schweigt sich folgendermassen darüber aus: — — «bald aber gerieth er in den Strudel des grossen Weltverkehrs, der in der Saison namentlich an den altberühmten Bädern der Kaiserstadt herrschte etc. — — — — Er gerieth dabei in Verhältnisse, die viel Wirrnisse in sein Leben brachten, sich schliesslich aber doch noch mit Hilfe eines Freundes ziemlich leidlich lösen liessen, wenn Bismarck auch noch Jahre lang danach die Nachwehen nicht ganz überwunden hatte.» Da sich hiernach selbst der Gänsekiel des frommen Hesekiel sträubt, seinem Clienten irgend

etwas Bewundernswerthes anzudichten, so können auch wir uns damit begnügen, dem Herrn v. Bismarck nach Potsdam zu folgen, wo wir ihn zugleich als Referendar und Gardejäger in Function finden. Auch, was er hier getrieben, verräth sein Biograph nicht und theilt nur mit, dass er sich von Potsdam nach Greifswald zum zweiten Jägerbataillon versetzen liess, «weil er hoffte, dort nebenher Vorlesungen an der landwirthschaftlichen Akademie zu Eldena hören zu können.» — «Dazu aber war er,» setzt der vorsichtige Biograph hinzu, «durch den traurigen Umstand gezwungen, dass die Verwaltung der väterlichen Güter in Pommern, aus Gründen, die wir bereits oben angedeutet (!) haben, zum völligen Ruin zu führen drohte.»

Ueber seine landwirthschaftlichen Studien in Greifswald erfahren wir sodann noch auf derselben Seite (75), wie Otto v. Bismarck «sich bald überzeugte, dass es unmöglich sei, den Waffendienst und die landwirthschaftlichen Vorlesungen mit einander zu verbinden. Er verfiel daher bald wieder, weil es dort nichts Anderes gab (!) einem wilden Studentenleben.»

Im Sommer 1839 tritt Bismarck in die Verwaltung der ruinirten pommer'schen Güter ein und erhielt Kniephof und Jarchelin. Hier lebt er als

Landjunker eine Zeit lang und soll mit Hülfe tüchtiger Leute pekuniär wieder etwas hinaufgekommen sein, bis er aus Schwermuth und Lebensüberdruß wieder auf's Zechen verfiel und sich dadurch ein besonderes «Renommée» erwarb. Hesekei sagt über Bismarck auf Kniephof:

« — — — es (Kniephof) sah seltsame Scenen genug im buntesten Wechsel, als der jugendliche Gutsherr noch, von dunkelm Thatendrang getrieben, rastlos, ruhelos, ziellos die Zeit durchstürmend, bald einsam durch die Felder schweifte, bald lustige Gesellen und Zechkumpane um sich versammelte, also dass aus dem Kniephof ein Kneiphof wurde, auch so geheissen von den Leuten weithin im Lande. Seltsame Mähren liefen da um über die nächtlichen Zechgelage, bei denen es Niemand dem «tollen Bismarck» gleichthun könne im Trinken aus dem grossen, mit Porter und Champagner, halb und halb, gefüllten Pokal — — — — bis Kniephof endlich so verrufen war, als wenn Gespenster darin umgingen. Aber die Gespenster dort mussten starke Nerven haben, die Gäste wenigstens, die dort gar fest unter der Mütze von Champagner und Porter schliefen, wurden nicht selten durch Pistolenschüsse geweckt, so dass die Kugeln über ihnen in die Decke

schlugen und der Kalk bröckelnd ihnen in's ver-
störte Antlitz fiel.»

Endlich scheint sich Herrn v. Bismarck die Nothwendigkeit aufgedrängt zu haben, seinen zer-
rütteten Verhältnissen durch eine Heirath wieder
aufzuhelfen. Seine bruchstückweise veröffentlichten,
im Tone ganz seinen Lebensgewohnheiten ent-
sprechenden Briefe deuten dies wiederholt an. So
schreibt er von Kniephof im Jahre 1845 an seine
Schwester, die verheirathete Frau v. Arnim-Kröch-
lendorf, nachdem er sich über «Mangel an Stroh,
Futter, Geld, Kartoffeln und Dünger» beklagt, dass
sein Stallknecht Johann vor den Fenstern seinen
Liebeskummer durch Pfeifen zu beschwichtigen sucht,
und fährt wörtlich fort:

«Das Ideal seiner Träume hat vor Kurzem auf
Zureden seiner Eltern ihm abgesagt und einen Stell-
macher geheirathet. Ganz mein Fall, bis auf den
Stellmacher, der noch im Schoosse der Zukunft
raspelt. *) Ich muss mich übrigens, hol' mich der

*) Hier müssen wir dem braven Hesekiel etwas
nachhelfen. Bismarck hatte sich nämlich um die Hand
der reichen Freiin Ottilie v. Puttkammer, mit seiner
Gemahlin Johanna v. Puttkammer nicht verwandt,
beworben. Diese Dame war eine leidenschaftliche Reiterin
und Bismarck hatte eines Tages in einem bekannten
Zustande geäußert, es wäre ihr besser, sie schaffe sich

T ! verheirathen, das wird mir wieder recht klar — — — — Ich muss zuletzt doch noch ** (Johanna v. Puttkammer, seine heutige Gattin) heirathen, die Leute wollen es alle so, und Nichts scheint natürlicher, da wir Beide zusammen übrig geblieben sind. Sie lässt mich zwar kalt, aber das thun sie alle; es ist hübsch, wenn man seine Neigungen nicht mit den Hemden wechseln kann etc.»

An anderer Stelle macht seine sittliche Rohheit, oder «geniale Verwilderung», wenn das reichsfreundlicher klingt, sich Luft in einer Beschreibung eingetretener Ueberschwemmungen, wo er schreibt: «— — ich bin stolz darauf, sagen zu können, dass in meinem Nebenfluss der Zempel ein Theerfahrer mit seinem Pferde ertrank.» (S. 82.)

1846 schreibt Bismarck von Potsdam u. A. an seine Schwester: «Inventarien anfertigen ist langweilig, namentlich, wenn man von den Schurken,

statt der kostbaren Pferde eine Gouvernante an, um grammatikalisch richtig sprechen und schreiben zu können. Als er nun dennoch diese «ungrammatikalische» Dame zur Gattin begehrte, schrieb sie ihm in dürren Worten, «dass sie gerade so viel deutsch gelernt habe, um ein richtiges «Nein!» schreiben zu können». Später verheirathete sich Ottilie v. Puttkammer (auf Schloss Pansin bei Stargard in Pommern) mit dem General v. Hirschfeld. Sie sind Beide schon verstorben.

den Taxatoren, 3 Mal aus nichtigen Gründen im Stich gelassen wird und Tage lang warten muss etc.» Ob wohl von diesen «königlich preussischen Schurken» der Potsdamer Behörde noch welche am Leben sein mögen?

In diesem Tone bewegen sich alle Briefbruchstücke des grossen Mannes, welche zu seiner Ehre und zu seinem Ruhm mit seiner eigenen Beihülfe veröffentlicht worden sind. Uebermässiges Trinken, zweideutige Kalauer, rohe Spässe über Liebelei, Kuppelei und Familienereignisse (S. Seite 83 u. ff., ebenso S. 143, 146 u. s. w.) — das ungefähr ist der Inhalt aller Bismarck'schen Briefe als Referendar, Deichhauptmann, Bundestagsgesandter etc. — nirgends ein Funke jener edlen Gutmüthigkeit, jener Bescheidenheit, jenes Edelmuthes, wie er doch so oft bei kraftvollen, übermüthigen Naturen zu Tage tritt — immer er selbst, immer Bismarck, der Junker, der nur sein eigenes Ich im Auge hat, als müsse sich die Welt um ihn, um seine Laune drehen. Schon als Gesandter in Petersburg war er durch sein rohes, zügelloses Leben dem vollständigen Verfall nahe und es hat wahrlich nicht «seiner Sorge um das deutsche Vaterland» bedurft, um seine Nerven so vollständig zu zerrütten, als sie es wohl sein mögen. Jeder weniger robuste Mensch wäre längst

an demjenigen zu Grunde gegangen, was der gemeine Mann Delirium nennt, das feinerzogene Reptil jedoch mit «Nervosität» übersetzt.

So schreibt er selbst 1859 aus Petersburg an seine Schwester: «— Ich bin schon seit dem Januar in Berlin nie wieder recht gesund gewesen, und Aerger, Klima und Erkältung trieben mein unscheinbares Gliederreißen vor ungefähr 10 Tagen auf die Höhe, dass mir der übliche Athem nicht mehr ausreichend zufloss und nur unter sehr schmerzhaften Anstrengungen einzuziehen war. Das Uebel, rheumatisch-gastrisch-nervös, hatte sich in der Lebergehend eingenistet und wurde mit massenhaften Schröpfköpfen, spanischen Fliegen und Senf über den ganzen Leib bekämpft. — — — Meine gute Natur hat sich aber rasch wieder geholfen, seitdem man mir Sect in mässigen Quantitäten verordnet hat. *)

Wir meinen, hiermit genug des Vorzüglichsten dem Biographen des grossen Bismarck entwendet zu haben und glauben den Leser verschonen zu können mit all' den Zeichen und Wundern, welche

*) Namentlich der «Montebello» spielt in den Bismarck'schen Briefen eine hervorragende Rolle. Seine «Krankheit» ist noch häufig in anderen Briefen das Thema
Verf.

angeblich geschehen sein sollen in Träumen, Gespenster sehen u. s. w., womit Hesekei das ganze Buch vom Fürsten Bismarck für die profane Welt schmackhaft zu machen versucht. Der Wunder wird Deutschland noch genug erleben, ehe es sein Bismarck-Conto mit der reichsfreundlichen Thräne abschliessen kann.

Erwähnt muss noch werden, dass Bismarck als Soldat keine Carrière machen konnte, was wohl Niemanden überraschen wird, und dass er nach Hesekei einstmals einen Reitknecht lebendig aus dem Wasser gezogen hat. Andere Spuren von Heldenthum treffen wir nur Seite 274 und 286. An erster Stelle heisst es:

«Nach der Versicherung eines englischen Correspondenten (sic!) hat aber Bismarck bei Gravelotte doch die ihm sonst eigene Ruhe (!) verloren. Der Engländer sah ihn auf dem Pferde weit nach vorn gebeugt und die sonst so festen Züge voll leidenschaftlichster Aufregung. Er würde ohne die Rücksicht auf den König (!) unzweifelhaft (!!) vorwärts in's Feuer gejagt sein. So versichert uns der Engländer und unglaublich ist's nicht.»

Seite 286 reproduziert Hesekei Favre's Bericht über seine Unterredung mit Bismarck auf dem Schlosse Haute-Maison. Es heisst dort u. A.: Wir

traten in einen niedrigen Saal. Graf Bismarck war im Begriffe, sich niederzulassen, als er mir Folgendes sagte: «Wir sind hier sehr schlecht daran; Ihre Franctireurs können durch die Fenster auf mich zielen.» Als ich hierauf mein Erstaunen und meine Zweifel ausdrückte, fügte er hinzu: «Ich bitte Sie, sagen Sie den Leuten hier im Hause, dass Sie ein Mitglied der Regierung sind und ihnen befehlen, Acht zu geben, und dass sie mit ihrem Kopfe gegen jeden verbrecherischen Versuch haften.» Favre ging hinaus und fand das Haus rings von preussischen Schildwachen umstellt, ein Umstand, der ihn natürlich beruhigen musste. Heldenthum und Vorsicht sind stets in hervorragender Weise bei dem Fürsten Bismarck vereinigt gewesen.»

Damit ist's der Hesekeliade genug, um den Leser in den Stand zu setzen, seine Eindrücke über Bismarck als Mensch, welche er in den wenigen Kapiteln empfangen hat, zu kompletiren. Er hat seinen Hesekiel reichlich verdient. Die Lächerlichkeit ist stets der Fluch des Byzantinismus, wie Letzterer das Produkt ist der Gewalthätigkeit, Rohheit, Heuchelei, erniedrigender Menschenanbetung, des Egoismus und der Unwissenheit.

Ein Volk, das sich selbst erniedrigt! verdient die Niedrigkeit seines Götzen,

Der Papst hat vor Kurzem in einer Allokution auf einen deutschen «Attila» angespielt und die Reptilien mit ihrem gewöhnlichen Scharfsinn und in der Gewohnheit, Alles, was in der Welt gesagt wird, auf den Fürsten Bismarck zu beziehen, haben dies Prädikat sofort für ihren Herrn und Meister annektirt. Wir fühlen nicht den Beruf, Vergleiche anzustellen, welche zum Nachtheile des deutschen Reichskanzlers ausfallen könnten und schweigen daher über diesen Punkt.

Ein anderer, den Fürsten Bismarck kränkender Vergleich ist jedoch vom Grafen Arnim angestellt worden und diesen müssen wir entschieden im Interesse des Reichskanzlers von der Hand weisen. Nach der Anklageschrift des Staatsanwalts hat nämlich Graf Arnim den Fürsten Bismarck mit einem Elephanten und mit Tiberius in Capri verglichen. Die betreffende Stelle in «Pro nihilo» lautet zwar so, dass von einer Vergleichung des Reichskanzlers mit Elephanten und Tyrannen nicht die Rede sein kann. Was namentlich den verstorbenen Tiberius anlangt, so sagt der Nihilist nur, dass Fürst Bismarck in Varzin so einsam sei, wie Tiberius in Capri.

Wenn Jemand sagen wollte, dass der Graf Arnim zu Ragaz sich so wohl befinde, wie s. Z.

Lorenzo von Medici in seinem Exil zu Venedig, so würde daraus kaum deducirt werden können, dass der Vergleich zwischen Graf Arnim und Lorenzo von Medici um deswillen eine Beleidigung des Ersteren involvire, weil Lorenzo von Medici unsittliche Lieder verfasste, während bekannt ist, dass der geistreiche Exbotschafter nie unsittliche Lieder von sich gegeben hat.

Beschränken wir uns daher auf den Nachweis, dass zwischen Tiberius und Bismarck keine Aehnlichkeit besteht. Bismarck kennen wir, über Tiberius wollen wir den alten Vater Suetonius nachschlagen.

Als Tiberius — im besten Mannesalter stehend, sich entschloss, vom politischen Schauplatze abzutreten, schützte er bei seiner Bitte um Entlassung Ueberdruss an Staatsgeschäften vor, ja, er enthielt sich sogar, als ihm diese nicht gewährt wurde, vier Tage lang der Nahrung. Dann ging er wirklich und fuhr nach Rhodus, wo er längere Zeit blieb. Wie oft aber ging Bismarck, um immer wieder zu bleiben?

Dem Tiberius war, als er noch ein Kind war, von dem Astrologen Scirebonius verheissen worden, dass er einst ein König ohne Diadem sein würde. Nach Hesekiel haben nur drei alte Weiber die

künftige Grösse Bismarck's geahnt und zwar, weil er als kleiner Otto in Schönhausen bisweilen — ungleich anderen Kindern — mit «die Beene baumelte».

Als Tiberius später beauftragt wurde, die Ruhe in Germanien wieder herzustellen, mussten die fremden Gesandten sich auch zu ihm in die Provinz begeben. Die Aufhängung einer Bürgerkrone im Vorhof seines Hauses schlug er aus. Fürst Bismarck's Vorzimmer ist mit zahllosen Bürgerbriefen geschmückt.

Gegen Schmähungen und böse Gerüchte verhielt er sich so gelassen, dass er äusserte: «In meinem freien Staate müssen Zunge und Meinung frei sein.» Eine so unvorsichtige Aeussderung ist dem Fürsten Bismarck nicht nachzuweisen.

Als einmal der Senat gegen solche Verbrecher heftig auf gerichtliche Untersuchung antrug, versetzte er: «Wir haben nicht Zeit dazu. Wenn Ihr einmal dies Fenster aufmacht, so werdet Ihr bald nichts Anderes zu thun haben, denn alle Privatfeindschaften werden unter diesem Vorwande den Weg zu uns finden.» Ist nach dieser Aeussderung nicht Tiberius ein lächerlicher Marquis Posa gegen den deutschen Reichskanzler?

Tiberius führte einen gewissen äusseren Schein Freiheit ein; dem Senat und den Magistraten, der

d. h. den Gerichtshöfen, blieb ihr altes Ansehen bewahrt und nie zeigte er sich ungehalten über Beschlüsse, welche seiner eigenen Ansicht widersprachen.

Dem Leichenbegängniss vornehmer Männer wohnte er bis zum Scheiterhaufen bei. Wer hat den Fürsten Bismarck bei dem Leichenbegängnisse des Grafen Robert Goltz gesehen?

Der Einführung fremder Religionsgebräuche that er Einhalt, indem er Diejenigen, welche sich zu solchem Aberglauben bekannten, zwang, die dazu gehörigen gottesdienstlichen Kleider sammt allen übrigen Geräthschaften zu verbrennen. Es war dies freilich auch ein «Culturkampf» — aber hat Fürst Bismarck schon die Messgewänder der katholischen Priester verbrannt?

Die Anhänger eines fremden Glaubens und die Sterndeuter trieb er aus. Gestattet Fürst Bismarck nicht immer noch 15 Millionen Katholiken den Aufenthalt im heiligen deutschen Reiche? Und sind Jesuiten vielleicht Sterndeuter?

Schliesslich ging Tiberius nach Capri und ergab sich dort seinen Leidenschaften, u. A. dem Trunke. Schon früher hatte man ihn wegen seiner Liebe zum Wein Biberius statt Tiberius genannt. Welche Strafe würde in Deutschland ein

ähnliches Wortspiel auf den Namen des Reichskanzlers treffen trotz Hesekiel?

Mit dem Gelde, d. h. mit seinem eigenen, war er sehr sparsam, selbst geizig. Nur zwei Mal in seinem Leben übte er einen Akt der Freigebigkeit aus. Wer will dem Fürsten Bismarck dies nur ein Mal nachweisen?

Den Hass gegen seine Verwandten offenbarte er gegen seinen Bruder Drusus, indem er einen Brief desselben dem Augustus verrieth. Dem Prätor gab er auf die Anfragen, ob er die Zusammensetzung der Magistratsgerichte (Ausnahmegericht, Staatsgerichtshof) befehle, die Antwort, dass die Gesetze gehandhabt werden müssten. Ist nicht Arnim als Landesverräther verurtheilt und hat Bismarck ihn etwa verrathen? Im Gegentheil; er hat ihn nur beim Kaiser des Verrathes denunzirt und gesagt, dass sich «dergleichen Dinge nicht beweisen» lassen, bis ihn preussische Richter darüber belehrten, dass sich Alles beweisen lasse, wenn man nur den «guten Willen» hat.

Unter Tiberius ging die Art der böswilligen Anklägerei so weit, dass Jeder ein todeswürdiger Verbrecher wurde:

1) der in der Nähe des kaiserlichen Bildnisse seinen Sklaven gepeitscht oder seine Kleider gewechselt;

2) der einen Ring oder ein Geldstück mit dem Bildnisse des Kaisers auf den Abtritt mitgenommen;

3) der ein Wort oder eine Handlung des Kaisers auch nur einem leisen Tadel unterwarf.

Sind wohl Bismarck-Beleidigungen — Majestäts-Beleidigungen?

Ein Edikt verbot den Angehörigen, ihre verurtheilten Verwandten zu bemitleiden. Den Anklägern wurden Beförderungen und Belohnungen ausgesetzt, zumal auch den Zeugen. Keinem Spion wurde die Glaubwürdigkeit abgesprochen. Viele zur Verantwortung Vorgeladene, ihrer Verurtheilung sicher, gaben sich, um den Quälereien der Gerichtshöfe zu entgehen, selbst den Tod. Vater Sueton findet dies Alles wunderlich. Vor Bismarck's Herrschaft war es aber auch eine wunderliche Zeit.

«Ma vie m'a appris que j'ai beaucoup à oublier et beaucoup à me faire pardonner.»

Wo hat Tiberius in ähnlich schöner Weise anerkannt, dass es einerseits Vieles gebe, was er zu vergessen, d. h. zu verzeihen habe, und dass es andererseits Vieles gebe, was Andere ihm zu verzeihen haben?

Leider müssen wir am Schlusse dieses Capitels konstatiren, dass auch Hesekiel uns die thatsächlichen Belege vorenthalten hat, woraus die Welt

die so werthvolle Ueberzeugung hätte schöpfen können, dass die *Praxis* des Fürsten Bismarck nur einigermaßen seiner im obigen Denkspruch niedergelegten *Theorie* entspricht.

Für uns giebt es nur eine Interpretation und diese lautet:

Wenn der Fürst *Bismarck* in dem zweiten Satze seines Denkspruches sagt, dass es Vieles gebe, was Andere ihm zu verzeihen haben, so gehört zu diesen Vie-
len unzweifelhaft und vor Allem Eins,
nämlich, dass er die Worte des ersten
Satzes, worin er sich zu der Verpflichtung bekennt, Vieles verzeihen zu
müssen — *nur Worte sein lässt!*

Fürst Bismarck ist am Ende seiner Laufbahn.

Tiberius, als es mit ihm zu Ende ging, lebte in fortwährender Angst. Zuletzt zerfiel er mit sich selbst. Gebildete Zeitgenossen behaupten, dass er vorausgesehen habe, welcher Hass und welche Schande ihn treffen würden. Auch Sueton bemerkte an ihm etwas Unfreiwilliges, Dämonisches. Sein Geist war oft abwesend, sein Gesicht von plötzlichen Schwellungen entstellt — der Schlaf floh ihn und

richtete seine ungemein starke Natur zu Grunde. Die Geschichte hat sich an ihm gerächt.

Auch für den deutschen Reichskanzler ist die Zeit gekommen, zurückzuschauen auf die Thaten seines Lebens und dessen eingedenk zu werden, dass die Bekämpfung der Wahrheit und Gerechtigkeit gleichbedeutend ist mit unrühmlichem Kampfe um das schimpfliche Ende.

Schluss.

Die auffällige, fast fieberhafte Art und Weise in welcher die Reptilien fortwährend die Gesundheit und das blühende Aussehen des Reichskanzlers bis in's kleinste Detail preisen, hat etwas sehr Verdächtiges und scheint nur darauf berechnet, die schwierige politische und wirthschaftliche Stellung, in welche Deutschland durch die Kunst des Fürsten Bismarck gerathen ist, mit dem Hinweis auf zu erwartende neue Kraftproduktionen des grossen Mannes momentan vergessen zu machen. Wahr allein ist, dass Fürst Bismarck vollkommen rathlos den gegenwärtigen Verhältnissen gegenüber sich befindet und dass seine Krankheit die einzige Entschuldigung abzugeben vermag für seine «senile» Schwäche und seine «senile» Empfindlichkeit. Der von den Reptilien gewundene Lorbeerkrantz in den Händen eines kranken Mannes ist nicht das wunderwirkende Heilmittel für ein krankes Reich, und eines Wunders bedarf es, soll das «einige Deutschland» aus der ihm bevorstehenden Prüfungszeit im Grossen und Ganzen unzertrümmert hervorgehen. Wird das Schicksal noch einmal ein Glückswunder

am deutschen Reichskanzler vollziehen, indem es ihn zum unbewussten und widerwilligen Werkzeuge von Thaten macht, denen eine rettende Bedeutung innewohnen kann, so mag das als ein Glück für Deutschland und seinen Kanzler gepriesen werden. Wahrscheinlich aber ist dies nicht und da dürfte für Deutschland denn gerade zu dieser Stunde es als ein Glück betrachtet werden müssen, wenn zur Wahrung seiner politischen Interessen der Zufall aufhören würde, seine Vorsehung zu sein.

Das Weltgericht wird einen harten Urtheilsspruch über den Fürsten Bismarck zu fällen haben. Die Begründung desselben wird mit dem Moment eintreten, wo der Erinnyen Gesang die Lobpsalmen der Reptilien abgelöst hat — und schwerlich ist dieser Zeitpunkt noch fern.

Der deutsche Reichskanzler hat, wie wir solches bei der ersten Auflage als möglich hinstellten, wirklich seine herkulische Kraft dazu verwendet, diese Schrift zu unterdrücken — «senilen» Menschen gönnt man ja gern die Genugthuung kindlicher That — unmöglich wird es ihm bleiben, die Wahrheit des Gesagten zu widerlegen.

Und nun, Herr Reichskanzler — haben Ihre Reptilien das Wort zur zweiten Auflage!

Ende.

1. Representative of nomadism.

Representatives of nomadism, as far as the same applies to the history of the ancient world in general as a shaped Only Semitic powers are considered as and Turanian peoples.

The Semites now live in the Ara Peninsula. bien and in the northern parts of the Vorder-Asia, east and northeast via Euphrates and Tigris out to the Persian and Kurdish mountain ranges, and west to the Mediterranean; in Africa they live in the lower and middle Nile valley, as well as scattered in and south of the Sahara, in the northern and eastern coastal countries. The Ethiopians and Arabs are South Semites; North Semites were the ancient Babylonians, Assyrians, Arameans or Syrians, and the Canaanites niter with the Israelites. The Semitized in Canaan Phoenicians were originally, like the ancient Egyptians, Chamites, who belong to an older ethnic group, but which has its forefathers in common with the Semites.

As far as we look back in illuminated history Arabia appears as the true home of the entire Semitism in its particular form which sharply opposed him from the Aryans and Turanians. and from here the remaining semi-ethnic peoples emigrated at different times Only a few Arabs live in cities

Wahrmund, nomadism.

and villages; the vast majority of them live living in the desert and is therefore called Bedouins, the Desert people. These Bedouins still face the close to the original human condition, are influenced by culture remained almost untouched, and also by Muhammed, the great Arab national prophet who led their ancestors

once from robbers and beggars of the desert to princes the earth, many of them know so well like nothing. They proudly consider themselves the free Arabs of pure blood, despise the residents and have always been considered the true nucleus of the semitism has been recognized.

Like the Arabian deserts and oases, also the great steppes and sand deserts of the Turan-African countries between the Caspian Sea and the Central Asian mountain ranges of nomadic living tribes who lived with the Mongols related Turanian nomads, who, from the Greeks included under the name Scythians, in the Middle old and later mostly called Tatars and Turks have loved it from the earliest times" southwest across Persia towards Syria and Lesser Asia, so that they could reach Mesopotamia and Syria also with the Semites from Arabia clashed, as is still the case today. But the Arab Bedouin is more agile than the Turanian, who often also practices agriculture, and remains so the actual representative of the most educated Nomadentums.

The so-called Aryan or Indo-European ian peoples, namely the Hindu, Persian, Armenian, Greeks, Italics, Celts, Germanic tribes and Slavs, are settled farmers for thousands of years, and if they once due to overpopulation or other hardship to

Digitized by Vj00QIC

If forced to migrate, they only set out to to seek permanent residence again, while the Nomad only wanders from pasture to pasture and also the lands of agricultural tribes only grazing and robbing or temporarily as robbers What the farmer with patient diligence Created over long periods of time, the nomad can only in robbery, plundering, devastating or by predatory economy will quickly exhaust itself or destroy it forever. disturb.

The sedentary, established over the centuries state is based on agriculture; the nomad can probably temporarily in the conquered agricultural state rule, but it cannot create permanent states

The Turk can hold conquered states longer rule than the Arab, because he, with greater bravery loyalty and loyalty to his closest master and superior as well as to the whole community, through nature and character less dependent on constant movement than this one. The actual founder of the state, however, is the Aryans. The ancient civilized states of the Near East, Babylon Ionia and Assyria, were based on mixtures of peoples tribes of Aryan, Turanian and Semitic blood and are, like the Chamitic Egypt, through purely Semitic conquerors only the rapid decline of their culture.

2. The Law of the Desert.

Uie except for historically incomprehensible beginnings of human affairs back to differences between the living conditions of the Aryans and Semites, as is natural, also express themselves in of the language. Decisive for the purely Semitic The only thing that matters is the Arabic language, since the formation of all other Semitic dialects in the area and under the influence of non-Semitic cultural powers has fallen, and in fact Arabism has also all these hybrid creations back into themselves looped, so that today it is all over the pure Semitic and Semito-chamiti see areas – from Ethiopia apart – rules alone again.

For example, by changing the German language from a state or situation of things or of a condition of the same (Latin status, French etat etc.), it also shows itself to be loyal to the Interpreter of the basic ideas of the German as one Aryan people and as a depiction of its original and still ongoing conditions in which a fixed standing (stable) and unchanging the fun-ment of the living conditions of the individual as well as the smaller and larger communities up to the State (status), as is the case with a resident People, which consists mainly of peasants and

is still organized according to estates, will not be different
Arabic offers the exact opposite of this.

image. The word which is used by this language for our
Condition is used {häl for häval pl. ahvät) is

from the root hvl (to turn, to change, to alternate)
seln) and has the concept of the existence

nothing in common, but means precisely the opposite
part, namely the rotation, the change, the

Change, and that is only very natural, because

as for the farmer the solid and permanent in living
place, lifestyle and exercises the foundation

condition of its existence, the No-

made the eternal change, the change of pasture

places the first condition of his peculiar life,

and he therefore does not speak of his situations or
states, but of changes and alternations

The Arabic word for dwelling {sakan) means

actually just rest, like the word for tent and

furthermore also for house [bejt) actually only a super-

The term "longer stay" means "to spend the night".

The Arabs call staying in one place

by leaving (iqämet) the tents standing.

For tribe or people he can use the word qaum

to turn, that is, to stand up, to rise

– originally used only by one department,

which are just changing pastures or

fight, – hence the French say in Algiers:

les goums [qaum) se sont leves , – and the movements

The feasibility of residence is one of the most important

venial conditions of his happiness, that

the concepts of being stuck and being poor and miserable

coincide for him, which is why he uses the same

root (skn) and the poor and miserable

maskin, which originally meant only his inability»

to move from the spot is meant. Poverty
(faqr) forces one to stay (askand)\ whoever
decides to stay (istäkana), which is

It gets itself through this (chddaa \wa dsdlla), and whoever is
Soil clings (ddqta) is degraded.

The same contrast to our views and
Conditions are expressed in the Arabic word for our
Terms: state power, state, government power
and dynasty, which together with the concepts of
Power, influence and wealth, even
happiness, as inseparable from those external things,
by the word davlet di rotation (from the root
dvl rotate), namely the effective
ity quite appropriately, because in Semitic and
Semitized states not only the dynasties more frequently
change than in Aryan, but also the change
of the dynasties and individual rulers for all who
are in close contact with the state authorities,
a thorough reversal of their circumstances and a
complete redistribution of influence and wealth
mean.

But in human affairs, except
certain uniformly recurring basic
figures of the . event on the moral
Territories, nothing lasts forever, and even the most stable political
and social conditions are subject to certain changes
subjected to it; but this change shows in the states
the Aryan the character of the A lim äl igen (the Evo-
lution): large differences in the conditions are
here usually only by comparison far from one-
other distant periods of time, and a sudden
Revolution is the exception, while
among the Semites and in Semitized states the sudden
fundamental changes are the norm.

Such a turnaround in Egypt as
For example, during the Mamluk rule he was there every few
years ago, and as he has occasionally done since Mehemed Ali
lich the individual throne changes on a smaller scale
happened, in our days Arabi have again
and his accomplices. A
Such a revolution is called in Arabic inqiläb el-
utnür, reversal of things, or sarf ed-ddhr
turning point.

The typical archetype or exemplary type
for these turning points in the nomadic life within

the desert areas themselves is the sudden attack of a camped tribe by another, which is usually is carried out at night and, if it is lings, after slaughtering the men, with booty of the cattle and equipment and the abduction of the women and children into slavery. The sudden Attack by cavalry troops, who, through nothing, terminated, like the desert storm roaring along, is also the main form of war. This archetype resembles in the states dominated by nomads also the political and social changes of fate to sudden racy and bloody severity more or less, and they have thus in all Semitic state formations up to to this day in large numbers and small Repeated at intervals. How these sudden fates salwenden in political matters the concept of revolution lution, so in economic terms that of the Noise, and we would like to point out that the Semites living among us the revolution in abstracto called the "Star of Judah" that they made the noise like on the stock market the sudden slaughter of the opponent on the day of liquidation etc., in our economic conditions and that they are trying to

Among other peoples, nomads are accustomed to everything that
foreign to them as hostile. This all-
mean and everlasting hatred against their fellow human beings
must necessarily create in their hearts an unjust, cruel
same and disastrous way of thinking."

The scene that nature provides for the robber nomad
or the nomadic robber, and on
which she herself has trained him to be what
he has become, the desert. "Here alone is he at the right
Place." The Semite – says E. Gellion-Danglar (Les
Semites et le Semitisme, Paris 1882, p. 6) – "is not
for civilization and sedentary life g:ii eighth
In the desert, under his tent, he shows his own
mundane beauty and greatness; here he pursues his
way and remains in harmony with the rest of humanity.
Everywhere else he is not in his place: all
his better qualities disappear, and his
Vices break out. The Semite, robber in the
sand deserts of Arabia, and in a certain sense

heroic, becomes a cunning schemer in society. Some become ministers and favorites of kings; but the mass crawls on the lowest steps, and all trade the patch of earth on which they have settled as conquered land and ravage it with unsatiable greed".

How the nomad relates to work is in these words with utterance: it remains to the slaves and women. This, as well as the position development of the woman and marriage will be discussed in detail later talked.

The permanent resident initially lives from the proceeds of the agriculture, the nomad from cattle breeding; the arable

Digitized by Vj00QIC

i6

The ground is immobile, the cattle walk. The cattle forms the basis of the nomad's possessions, hence the Arabic word for 'property, good'* – namely, originally means cattle. So for the Nomads mobility is one of the essential features painting of possession, yes, is one of the most essential, which is why he calls for mobilization wherever he goes all property, including non-capitalizable sovereign property of the states, such as fields and forests, which the farmer regards as common property, from which only the proceeds can be implemented and capitalized If the nomad is threatened with the destruction of the concept of superior ownership, he has thereby already transformed the residents into his slaves, as his law requires

The law of life in the desert dictates to the nomad the highest mobility of the person and property Horse and camel must accompany him and his entire I had to carry them quickly from pasture to pasture, his small supplies will soon be exhausted, and must him quickly escape the attack of the stronger enemy For the robber and raider, who is the gripper, the mobility must double. But this mobility also requires ordinary circumstances by the leaders of the tribes divisions and entire tribes a certain organizational talent for organization, which requires a wise approach

go through raids and especially through larger,

governed. The opposite term is asfet law-lack of order, malice." Main representatives of this dissolving and maliciously destructive powers is Typhon. How Jewish Christianity later regained the old Jewish god in place of the god of the "good news" was trying to set and still does so today is striving, even in our days again with higher passion, we have already the Semites who invaded Egypt with the Hyksos made an attempt to use their Seth (Shaddai), as the One to replace Amun, or with other words, their exclusive henotheism with the to cloak the appearance of a comprehensive monotheism

(Lauth, From Egypt's Prehistory, p. 235 ff.).

The Sanskrit rita initially referred to the orderly movement of the sun in the sequence of day and night, which with every dawn turns into heart-joyfully announces itself once again as immortal, and so "Rita was the right path on which the Gods brought light out of darkness".

The Egyptians started from the worship of the sun; the concept The unchanging order, however, wins with them all-predominantly ethical-political content, as well as the ancient nature gods of the Hellenes already in Homer and Hesiod into the Olympic polity.

The Egyptian states existed at least at least three to four thousand years before the arrival of catches of the Hebrews. Those leaving Egypt or exiled fathers of the Jews are still nomads; Moses – if it is even permissible to speak of Mosaic institutions – makes an attempt to those who left a political order after Egypt tic model, as best as possible, by forcing his people into a covenant with the ancestral

Desert God under certain fixed regulations about Rights and obligations of both contracting parties In the Egyptian view, the Gods already through the law that is immanent to them, inseparable from their essence and with the truth is identical. Among the Hebrews, between the people and his covenant God a statute; but the Jewish High Priest wears when he in the name of Yahweh right the Egyptian tunic (ephod) and the Symbol of truth composed of precious stones, the Urim and Thummim, on the chest, like the Egyptian High Priest, and it goes without saying, that a Bedouin people only consider such things to be cultural peoples near whom it lives. of the further history of this relationship must we are talking about here.

In the history of the people, which one to designate the Jews as the name of the Jews, There are three main periods. The first is the actual Hebrew one, in which the ancestors

of the later Jews lead a nomadic life that in no way different from that of Arab Bedouins. The transition to the second period is marked by the conquest Canaan and the time of the judges, after which the reasons establishment of the kingdom in Israel by Saul and David and this kingdom, which is associated with the temple in Jerusalem and the one that has long been at this sanctuary. resident local priesthood (Zadok family) the unified central service for the new political federal god Yahweh creates, gives the second period its name than the Israelite. In this period, according to Semitic way, the unity of the nation soon through the Division into a northern and a southern kingdom was lost again. In the northern kingdom, Yahweh is represented in the form of golden

time are to be regarded as the results of scholarship.
Even Charlemagne is an example of this.
Means of culture and learning for the Semitic
Nomads must have been brought from abroad, is also
of course. The first time, during the new formation,
it was Egyptian, the second time, during the reorganization,
Babylonian. After all, the new formation had a more
natural, the transformation more the artificial
taught character.

The idol of a nomadic god or the ark,
which symbolizes his presence, can, like the people,
who worships him wandering around, only under tents
When David gave the holy ark of Yahweh a
wants to build a solid and dignified shelter, he says to

Nathan: "I live in a cedar house and the Invite Yahweh under a tent." Nathan is initially agreed to the construction of the temple, but later Yahweh will proclaim through his mouth: "I have in I have not lived in any house since I brought the children of Israel out of Egypt: in tent and shelter I am not wandered around." The idea of a magnificent ual and artistic tabernacle, which since Moses people and later in the Solomonic Temple, so that it could Holiness only as the outer shell of that tabernacle was invented so that the new temple and the unity of worship founded by him, on which later Judaism is based on, as in the tabernacle could appear "pre-existent". What but as for the post-exilic temple, "approached: now the whole essence of the (new) sanctuary, the Following the letter of the Torah, more like the Tabernacle than Solomon's Temple, where many things concerning the dimensions, shapes, etc. according to a freer interpretation was handled" (Rosenzweig p. 128). In the (subsequent In the exilic Wisdom of Solomon 9:8 the temple is called a "copy of the holy tent", and Josephus (Alterthümer III 6, 1) says of the tabernacle: it has, "in nothing of a carried everywhere and with-wandering temple". Wellhausen (Prolegomena on the history of Israel (p. 38) says: "The basic location of the concentration of worship, the temple, which was actually built by Solomon, is considered here also for the restless time of the migration, which the settlement, as so indispensable that he made portable and transported to prehistoric times as a tabernacle is, because this is in truth not the archetype, but but the copy of the Jerusalem Temple". This.

•but only applies to the tabernacle, as it was built to demanded to achieve similarity with the temple, in Old Testament, because a holy

Ark really existed. In those words Na-
thans the old desert god protests against the fortification
his residence, ie against his conversion into
«a permanent god or in the god of a permanent
resident agricultural people. The temple is
but built, and that Jerusalem priestly family,
which hereby assumes its rule over the people, gives
him in the eyes of this people by the declaration
his consecration, the old God had his tent under the
Roof of the new house and will
from now on the hordes of his holy warriors from here
against the nations.

But the transformed political covenant god
Israel's first and foremost war god was and had to be,
is obvious and is stated clearly enough.
David says to Goliath (i Sam. 17, 45): "I come
in the name of Yahweh of hosts (Zebaoth),
the God of the battle lines of Israel," 2 Sam. 5, 24:
"The LORD has gone out before you to strike the camp
the Philistines"; Psalm 24:8: "Yahweh, a mighty man of war";
Isaiah 13:4; , Yahweh of hosts musteres a war
army." Even the one who is especially sanctified to Yahweh
Tribe of Levites has a warlike destiny.
They were (says A. Rosenzweig, p. 131) "originally
the crew assigned to guard and protect the
served as a sanctuary (Num. 18:2 f.; 1 Sam. 4:4 f.).
Thus (Gen. 49:5) also appears in Jacob's blessing Levi

Idolator (in his area) he was the (political)
God of Israel: in war, no one thought of
To expect victory and salvation from others than Yahweh. That was
the fruit of Israel becoming an empire."
But the temple of this god has been destroyed, and
His people are scattered throughout the earth, but
"camping" today, in the holy war against all
world, around the "Ark of the Covenant", which is the
presence of the ancient nomad god.

Now it is certainly of the utmost importance that

the entirely artificial religious building, which the post-exilic priesthood and scholarship has, together with the renewed sacred center of the cultus in the restored temple, again with Be-awareness of the desert and its customs was returned, and this is all the more strange, than in this artificial creation the the desert life of the ancient Hebrews and the exile following series of centuries of the so-called Israelite Lithographical history with its attempts to settle ity and to move to agriculture, and with their Efforts to make legislation based on residency are completely hushed up. The priestster Codex, which was written by those who returned from Babylon ten priests made the last revision of the older folk traditions, – this priestly codex, says Wellhausen (Prol. p. 10), “guards himself against any hint on the settled life in the land of Canaan, which both in the Jehovah’s Covenant Book (Exodus 21–23), as in Deuteronomy (5 Mos.) the pronounced Basis of legislation; it adheres strictly to formal within the situation of desert wandering and wants in all seriousness be a desert legislation. Foundation of a more solid state with comprehensive
 To gain substructure are mishmash. But also
 The Semitic Jews continue to this day to have a
 in its basic features quite equal position to the
 rest of humanity on earth like the Arab
 Muslims, – they too, as the law of the
 Desert requires it, even today in the holy war against
 the unbelievers, that is, against all non-Jews or, as they
 say, against the "peoples of the earth" (Goyim, Akum etc.)"
 whose property is assigned to them. The Talmud teaches,
 that God declared the property of the Gentiles to be ownerless
 and the first Jewish possessor the right
 on it; yes, it is expressly
 In other words, the property of the Goyim should be viewed

become like a desert or like the sand of the sea;
the first possessor should be the owner.
Therefore, according to the Talmudic-Rabbinical view,
the journey of the Jews across the earth a military campaign
their conquest, – nothing else. They consider
themselves as soldiers on the march, encamped in secret
or covered by false flag, – in the middle
of the enemy. Always ready for the signal to attack and
attack. Hence the rabbinical signature: "I,
Rabbi NN, who I camped in Hamburg etc."
As Islam in its inception only allows its believers
as fighters and soldiers and put them in great
army camp, Judaism considers
on this day his main positions in our midst
as such military camps from which it was possible to
war. Paris, Vienna, Berlin, Frankfurt a. M., Hamburg
burg, Breslau, Pest are today such military camps and

56

People; you are called people, and not People who Gojhn;' 1 – these are literally translated Passages from Talmudic-Rabbinical writings. Yes, the Non-Jew is created in human form only because because it is not fitting that the Jew, as the Re-presenter of the divine majesty (Shechinah), of beings served in the form of animals, for it is said: "God created the Akum in human form for the honor of the Jews, For the Akum were not created except to day and night to serve the Jews and not to desist from their service, and it is not fitting for a King's son (the Jews) that an animal should serve him in animal form, but probably an animal in human form." Likewise, in the Koran, the unbelievers are also "worst of the animals" (Sura 8,21.57), and this view arises, as we have already seen, have shown, quite automatically from the idea of God the Semitic nomad.

The repeatedly expressed in the Old Testament Commandment of the extermination of the Canaanite peoples is through Rabbinism to all idolaters The "great philosopher" Maimonides, who "second Moses," the medieval rabbi who, in consequence, Aristotelian influences as the founder of a less rigid Judaism, but still by today's Orthodox as too liberal, says emphatically: "The axis of our entire law turns about two points, namely the banishment of those (idolatrous servant-like views from the hearts of the people

and the eradication of their memory" (ie those people ians themselves), and he explicitly states: "Know that the Nazarenes, who follow Jesus, although their dogmas different, all of them are to be regarded as idolaters.

she is missing; she also makes leaps and thinks only questioningly
mentally.

The main subject of Semitic and especially Jewish visions and hallucinations is the unconditional rule over others, for the Jews brought about by the last bloody fate salswende, the decisive battle in the valley of Josaphat (Joel chapters 3 and 4): "And it shall come to pass hereafter, I will pour out my Spirit upon all flesh, and your sons and your daughters will prophesy; your Old men will dream dreams, and your young men will see faces. . . . Proclaim among the nations, prepare for war, awaken the heroes; come forward, come up— All men of war shall go to battle in

Valley of the decision, after which then, after rabbinic interpretation, the Messianic Kingdom established. Then, after the Yalkut Shimoni, all the remaining surviving Goyim come and sweep the dust under the lick the feet of the Messiah, fall on their faces and say, "We will serve you and the Israelites. And every Israelite shall have two thousand and have eight hundred servants." The prophet Joel prophesied around 950 BC, the Yalkut Shimoni is written two thousand years later, around 1050 AD; in the appeal that our contemporary Cr&nieux made to founding of the Alliance israelite into the world, It says: "The sublime prophecies of our holy books will come true. The day where Jerusalem is the house of prayer for the [under Israel's rule will be united] peoples (Goyim), where the flag of Jewish monotheism is on the farthest shores. Let us make use of all circumstances! Our power is great — let us learn to use it! What have we to fear? The day is not far off

6. The Nomad and Work"

It has long been known that agriculture and
sedentary life is the prerequisite without
which the separation of trades is not thought of
The nomad is still forced to learn
the crudest handling of the most necessary trades
to combine in oneself, such as those of carpentry, forging,
Weaving, dyeing, sewing. The skilled craftsman,
who is nothing more than this, he can only be a slave
or half-slaves with them. The word gain means
In Arabic, it means the blacksmith, kettle and pot maker
tinker, saddle maker, innkeeper and craftsman
main and at the same time also the prisoners of war and
Slaves. However, a nomadic tribe can also
workers as free people in his clientele, but
This has no consequences, since their offspring are
neither immerse themselves in the nomadic life, or, if they
persist in the craft of their fathers, in fact
bodily slavery, from which, incidentally, the
own decisions, although voluntary, but always
only forced upon the clientele by coercive circumstances
is not very different. Even today's South Arabia
provides examples of this, namely

have been forced to seek help from the Arabs.
workers into this half or full dependency.
The fact that craftsmen as free people are themselves nomads
among farmers or other nomads – especially
or as blacksmiths, as in some Negro peoples or
like the Gypsies and Slovaks ("Kessler") among us –
wandering around is an isolated phenomenon and only
possible at lower levels of the craft. The
The result remains: for the nomad, the craftsman is
only slave, and craftsmanship is slave labor.

The Arab historian Ibn Khaldūn emphasizes
that the Bedouin loves to see the worker and
Craftsmen are not paid. It is the nomadic nature,
which is satisfied with this, as the work, as
unworthy of the free man and proud lord, together with
their claims for remuneration for him in return
state of ridicule. The Arabic word *sūchra*
the term for the forced laborer and the forced laborer
arbe it, originally means a person who

the Christian workers, as well as the Christians in general as their servants (slaves).

The nomadic Bedouin, who at all times was the most typical representative of Semitism always felt and still feels still a deep contempt for the local Arabs, and the Jewish invading Palestine Nomadic tribes, who also do nothing other than duinen were undoubtedly thinking the same. Now in the case of the conquest of a country with settled Population, among which the trades already have a have reached a certain level of prosperity, the Bedouin conquerors in a small percentage of the defeated country residents learn the arts and crafts and continue operate, although not in the truest sense care and further training, does not suffer Doubts. But that Islam, for its part, has Asia and North Africa, where ancient The arts and crafts handed down from civilised peoples killed, suffers no doubt, because it is an obvious fact. So here again the nomadic constitution came into effect. Usually the so-called flower of Spain under Arab rule as an example and proof for the opposite. But this apparent blossom, which was so wonderfully written by Arab and Jewish pens is highlighted, was based only on the operating team; ity of the Berbers who came from Africa, who had accepted Islam, but neither Semites nor Nomads are and still are in Morocco and Algiers are the real bustling element, and continued on the slavery of Negroes and Christians, than the worker, which then also means the? turnaround at the end of the fifteenth century

Digitized by Vj00QIC

has become terrible and has the character of a bloody "change of fate" as defined by the law of nomadism from time to time requires The famous traveler Gerhard Rohlfs says: "May one but finally begin to lead a people according to their physical and intellectual excellence

to judge the Arabs! The Arabs are always parasites have been and will remain so. Spain can be glad that it drove out these Semites. It is true that it is not in the best condition; but if it had retained this horrible bond, then it would be on a par with Morocco and Tunisia. Compare the cultural state of Spain with that of Morocco, Tunisia, Tripolitania, and one will be amazed at the huge difference. If the Arabs were really the capable people they were is only too inclined to hold them, then they would have but in Morocco, Algeria and Tunisia (where they are more the remains of Roman culture destroyed after their expulsion from Spain, the same thing happened does what they allegedly did in Spain In Spain, the conquerors found a more favorable field. Black slaves were employed to cultivate the land. They sat beautifully, many Christians to cultivate spiritual They also received territories. Work themselves? The Arabs never worked anywhere, they left They did not make inventions, they let invent."

Let us now return to the Jews.

They found in conquered Palestine, especially in the coastal areas, an ancient culture with flourishing trade and highly developed trades. A part of the old-settled population that has been around for centuries by being in possession of the trades, the Jews took

Greeks, people who came from the desert come, cannot possibly build. The Arab Ge* Shift scribe Ibn Khaldūn himself points this out He says: "One can see that nomadic Peoples whose civilization is just beginning to develop other countries to find people who are skilled in architecture. This is what is currently of the Caliph Walid, son of Abd-el-Melik, when he built a mosque in Medina, another in Jerusalem and wanted to build a third in Damascus, which the latter still bears his name. He was forced to to turn to Constantinople and the Greek Emperor to ask for skilled architects, and this Prince actually sent him people who fulfilled his wishes. Solid buildings such as bridges, palaces etc., are referred to by the ancient Arabic poets as "Greek Similar to what the Greeks achieved later as architects and engineers the Nestorian Christians of the Orient. That individuals can do something with time Nobody doubts that they were able to learn and achieve; but

were not oppressed but oppressors, and so it is now in Algiers, where the Jews, although they only arrived in 187a by their co-religionist, the then justice Minister Crfmieux, received civil rights, it was already through wealth and influence, especially through stabbing of the Christian judges so far, that Christians and Muslims in disputes with Jews are compelled to comply with the Jewish Consistory Law to speak, which is why in Tlemsen (Oran) At the beginning of 1883 the election of a new Jewish Consistory rium provoke an uprising of Christians and Arabs and in Algiers similar riots are taking place have happened repeatedly. But Poland is for us the European image of Palestine.

Are the Arabs, as Rohlf's also judges, still Parasites and have been at all times, – because they are Nomads have to be – and on the other hand will be the Jews are certainly seen by today's non-Jews as paradigms sites, there is no reason to assume that r that in Palestine they are treated differently than as parasites Now ask yourself whether the following Old Testament passages on this claim agree or not. Numbers 14:9: "You have the people of the land, for our bread is them." Deuteronomy 6:10 f.: "To give you great and beautiful Cities that you have not built, and houses full of all good things, which you have not filled, and hewn wells which you have not and vineyards and olive trees, which you did not planted; and you will eat and be satisfied." – Isaiah 59:10-12: "And the sons of strangers build your walls, and their kings serve you . . ., and Your gates are continually open to bring to you the peoples' wealth and their kings," – and v. 16: "And you will suckle the milk of the nations, and

suckle from the breast of kings." – 61, 5 ff.: "And There are foreigners who feed your flocks, and the Your plowmen and your vinedressers are sons of strangers. But you will be called priests; the kingdom of the nations thum you shall eat, and into her glory you shall enter

set." – But since, as we have already heard, the whole earth will be conquered and all its peoples defeated should, just as in Islam, so we have here, with the Jews as with the Arabs, the true ideal of upper– Nomads: the peoples of the earth as slaves, rules and is forced to work by Jews or Arabs Bern. The Mongols, who were also nomadic, conquered countries presented the corresponding picture in the most terrible form; those ruled by Turks offer it still has faded colors. We have here the indestructible life force of natural principles, which are and remain constitutive for all forms of life, clearly in sight.

But the fact that the operation of the trades in the old palace stina, if it is in the hands of actual Jews, as well as agriculture, were in the main matter was based on simple slavery, illuminates down to the last detail from the Old Testament, and it would This, even if nothing were known about it, from the same situation among the Phoenicians. This is further confirmed by the facts that the Jews throughout the Middle Ages in Europe, especially in France and Germany, which actually ual slave traders, where they bought or stolen "children of the country" in stables for labor ability to feed and then mostly after the Orient and Spain; furthermore, that they exported up to today even among us not to work ourselves, also do not allow Jews to work in their factories,

violent robber who turns them into slavery"
 The nomad is such a violent robber. The
 inner loving devotion of the individual receives its
 highest consecration and sanctification from the relationship of

trade to the whole, of which there is a necessary member, and this sanctification has its ultimate reason in the religious feeling of the individual; the external protection receives his consecration and sanctification through the sanction of the state, which in turn only flows from* religion. The state in the true sense is, as its name suggests (status) says, a sedentary being; because a mobile robber society, like that of the pirates of the Middle Ages sea in the last century of the Roman Republic or the later corsair and buccaneer societies, is not called a state. Every political and at the same time However, a mobile (non-sedentary) company must have a predatory society, since it is in the movement that the life needs cannot be created alone, and on the other hand Every predatory society must be flexible, because everyone limited area is soon robbed. The desert and But the sea forces to move, and both, so almost unlimited, are therefore the most authentic places and scenes of robbery and nomadism. Sea and desert are the fertile soil opposite, on which the higher forms of human society. The arable land alone produces allows and at the same time enforces sedentary life, from which chem also the trades emerge in their separation. Agriculture and trades exclude robbery, which is henceforth outlawed, while it is the pride of the This is why the ancients had Agriculture and trades shared peaceful gods, and only insofar as they are also capable of defending must remain, the common god of war. In Pallas

Athena, who plants the olive tree, before the loom and cultivates the science of war, are the three activities. These gods symbolize the Sanction, the consecration and sanctification, which the various whose activities in the settled state consist of the highest purposes of this State and those of the individual personality who subordinates himself to the state, and that is why the Christian Church also has the loving full integration and subordination of trades and businesses under the purposes of the whole by the guild saints which replaced the old gods and Heroes appeared. In the past, Saint Crispinus, whose Sign itself a local shoemaker and every

if a very gentle and kind protector, as a patron the honorable shoemaker's guild; today it is the Jewish traveling magazineur who is an extremely hard pusher and shoemakers and tailors are transformed into slaves. Saint Rosalia, on the other hand, has not been heard of either, that she had ever practiced malice against those under her protection ordered tailors' guild, – the old fable of the Frog kings Klotz and Stork. In the entire age-thum, not only in the Semitic, the craft was in mainly slave labor; Christianity has the Craftsmanship ennobled and protected by the guild. The Guild associations have been dissolved; what is more natural than that where the Semite gives the law, the hand-factory sinks back into slavery?

It is obvious that the Christian distribution of Work requires a multiple division of society This structure can only be achieved by the sedentary Society suffer and represent. The moving nomadic and predatory society knows no further Structure than the natural one, which is caused by older age, superior intelligence and greater ability

Digitized by Vj00QIC

102

and in addition the military for war purposes, which is still very loose. Otherwise all the links are equal to each other, because they all have the same trade, – the robbery – and the work is done by slaves, partly provided by the women. Accordingly, it is also the above-mentioned reason for structuring the Divine and its powers, as they are expressed through the Division of labor. Among the nomadic Predatory societies have everyone, like the same business, so also the same God, and because this God is robbery and If the world has to wage war against all outsiders, he evidently does not see himself as a human being who sender, must rather – and this too only in its later and higher forms – as a exclusive covenant God, who is the tribe or people with whom he is in contractual relationship nisse, as a reward for their loyalty to the contract, the rulers over other tribes and peoples, finally over the whole earth. This henotheism is

already discussed above.

From the pre-Christian point of view, and especially from the Semitic, service and work remain a degradation of the free; the law of nomadism forces us to maintain this view under all circumstances. the downright anti-Christian standpoint of the Jews, who are still nomads today, but causes this in the Christian's service relationship to him the proof of the superiority of his own principle and the fulfillment of those Old Testament prophecies Even the old Protestant-pious Buxtorf has pointed out in his time how the Jew, when he devotes himself to the Sabbath rest, finds pleasure in it finds himself served by poor Christians, from from whom they so gladly take their servants and maids.

103

Christianity does not demand that the Jew should serve the Christian because it is his own Principles allow everyone full freedom, and because It ennobled work in general and especially loving work in the service of others a divine ordination. If now the previous and anti-Christian principle regains power itself and the higher Christian principle to give it to prove his inferiority, into the position of servitude If someone wants to force someone, the Church must exercise its office. Pope Innocence III (Decretal Gregory IX, Chapter 13) has therefore forbidden: "That the Jews should have Christian nursing or servants, so that the children the Free (i.e. the free church, Uteri liberae) of the servant (i.e. the Jews), but that these, as servants rejected by the Lord, to whose death they maliciously conspired to at least by the effect of this act as servants of those may find those whom the death of Christ frees, but they servants," – that is, if it is already Rule or serve, as is the case with Jews, for the sake of their principle, always demand If all Christians today, whether as a result of a church ban, or in the living feeling of superiority and higher dignity of their own prince zimpes, would refuse to serve the Jews or to work for them, the Jewish question would once again

This time too, it will certainly be resolved in the Christian senses; today the Catholic Church has
There is still time to work on this solution, which is primarily to participate in what she alone would have been entitled to, which she would also already obliged from a purely human point of view would be, since it is still possible for them today, a solution without causing catastrophes. If it does not do so,

so it must later be subjected to those more vital powers the place which they have left for the fulfillment of a
The fact that the Germans deal with the Jews, we can we have no doubt. – The result is: Judaism and Islam have up to this day the principle of slavery or the lack of freedom of labor wounded and cannot overcome it, because the same to the nomadism from which they originate. Therefore The Muslim world also considers today's Actions by the Christian powers to abolish the Slavery as the actual fatal blow to her last bastion. An Arab in Zanzibar said: "What do we still have that is our own? Only one more, slavery. Do they want to take that away from us too? Soon we will also have the European religion here have."*) The appearance of the Mahdi and his successors consequence in our days is only a natural reaction of Islam to protect its slavery-based most vital interests, whose nature is influenced by that of the desert Whether the fight against Semitism of Islam, as Renan believes, concludes with will find that "the last son of Ishmael will perish from misery languished or through terror into the depths the desert will be hunted 1 ', we do not know. if nomadism remains in its cradle, the desert, reserved. In the meantime, however, there is among us the semi-tism of Judaism the law of life by establishing the Work of non-Jews in slave service for the Jews transformed for the royal children, as they like to who are above work. In prayer the Orthodox Jew says: "Blessed be you, Lord,

*) Hauri, Islam. Leiden 1882. p. 155.

iOS

our God and King of the world, who did not call me a servant," – and every Jew who calls his fellow Jew "slave" is excommunicated. threatens (Eisenmenger II, p. 576). It is important that agriculture is considered servile (Isaiah 6:15): "And there are foreigners who feed your flocks, and the sons of foreigners are your tillers of the ground and your winegrowers." Maimonides (More Nebuchim III, p. 210 Scheyer), after he had complained about the star-worshipping farmers (Zabier), who for the sake of agriculture used sun and stars, adds: "When these opinions through widespread public found faith, God in his infinite Love for us, both our spirit from the chains of error, as our body from the servile Efforts to free oneself." Accordingly, the Rabbinism is only for non-Jews insofar as it is an existential authorization when he wants to serve the Jew.

7. Nomadism and the State.

lls is already explained in the introduction to this paper been set, such as the mobility of the Semitic Nomads are the direct opposite of the solidity and continuity which the Aryans expect from their states required, which is why Semitic states in the strict sense The concept of "public thing*", the "common good" in the sense of the sedentary Aryan The nomad cannot win against the ethnic groups, because Nomadic life does not create a tightly-knit community The analogue or prototype of the same limits As already mentioned, there is a connection between blood and Tribal community, which is involved in the ruthless pursuit of tribal interests and in the exercise of blood feuds, which are bought off by money and monetary value can be completely satisfactory. Attempts to achieve greater To form communities in which several tribes

be connected to an inseparable organic whole

nisse in the Muslim area of quite enormous importance. The pious foundations play an extremely important role in Islam, namely They arise partly from the urge to do charity or the strong sense of community of individuals, but partly – and this predominantly – the insecurity of private property and the associated with conspicuous wealth which endanger one's own life, as is the case in the spotically ruled and frequent dynastic and governmental change subjugated Orient is natural. Whoever has acquired property there, built a house, etc., secures The easiest way to do this is to transfer this property to the Administration of a mosque as a pious foundation against the enjoyment of a pension for himself and his descendants The name for these foundations is waqf^ wr locally a stopping, stopping make the a withdraw from trade and commerce or the relationship into the possession of the dead hand. Since this Waqf-Property of the church (i.e. the mosques as private property thümer) not only in general by the owners of the secular power was respected, but also the individual rulers, but especially the new Em-pork-combs, the favor of the clergy through ever to create new Waqf foundations in their own names sought to win and maintain, this concern swelled seat of many places in the monstrosity. So you can see that the more frequent in a certain period the revolutions and twists of fate occurred, the more the nomadic dian law of life mobilizing itself in this way effective, on the other hand a counterbalance of duration in the immobilized Waqf property all the more powerful

and heaviness. The immobility of this church goods was much larger than that of the state lands (Regions which, as the fifth of the territory allocated to the state,

Digitized by Vj00QIC

128

share of the booty, awarded to him or with mood of the troops declared state property were; lands whose owners had died out, etc.; v. Kremer, Kulturgesch. IS 442), because the order over these latter belonged to the Sultan or Prince, thus subject to more frequent and radical change was thrown.

It is now of the utmost interest to see here how in this way in the Muslim countries developed similar ownership structures as they had years ago. thousands before had ruled in ancient Egypt, where the priests owned a third of the land, which they sold them to peasant tenants at a high interest rate, just like the rich mosques with their Waqf Only in modern times was it possible to this property to a large or major extent Muhammed Ali first withdrew the Waqf properties in Egypt and transformed the sheikhs of the Mo-scheen, which formerly as administrator (Mutezu hastens) of this goods even with a massive rent, an abundant income, into poorly paid state officials. Turkey partly imitated his example but still here, for example in Bosnia, Waqf property is important.

One can see how this immovable property the fixation of the mosques. Quite different in Judaism. The Fixation of Jewish Synagogues or temple is only an apparent one. The actual The holy relic of the Jew is and remains the movable bernacle of the Ark of the Covenant, and the synagogue is only the Housing of the same. It should be noted that up to In the very last decades the Jewish communities were much more mobile than they are today in some places, especially in the main strongholds of Judaism,

Digitized by Vj00QIC

where they already have the power in their hands, seem, and a two thousand year history seems also for the immobility of even these few communities no guarantee to offer. It should also be noted that that the Jews themselves destroyed the synagogue building of their deslade as a foreign, immigrant, in- where they can do the same in oriental (Moorish) style. The Rabbinate "camps" only at the various stations of the "Völkerwüste". The movable drawer cannot become the focal point for real estate, and therefore the synagogues do not have any waqf or Foundation assets that could be worth mentioning. recognizes here that the Jews, as far as property is concerned, to this day the law of nomadism, which prescribes the highest mobilization of property, obey to a much greater extent than the Muslim Arabs, and further recognizes that the Jews are also only then a similar property, like the Muslim Waqf- goods are for the benefit of the community and the nation immobilize if their sanctuaries everywhere fixed, ie if they already had full control in their hands, in other words, when they had the States and the culture of the Christians under which they live, as well as in Jewish states and in a Jewish culture transformed, as was the case with the Muslim Arabs with the Persian and Byzantine (Roman) states and cultures, so that then no longer the Jewish God and his tabernacle had to wander, – because his promise of world dominion for Judah, would be fulfilled, but only the individual Jew for for his own benefit, which, by the way, is also the Muslim his prayer rug, according to Jewish tradition prayer straps (tephillin) with her at all times. Whether she then

 created ground of human community and
 of benevolence towards the rest of humanity is not

religion, it represents a merely based on nationality, thus also antiquated (pre-Christian) religious system, which, with all other Nations and religions, but especially with the Christianity, as its most distinct opposite, is engaged in holy war, which is why the Deception of non-Jews through lies and perjury, as their damage through fraud is permitted and partly even is even required, which the reader can easily see from Jacob Ecker's *Judenspiegel* can convince. That the humanly more valuable content of Judaism from Egyptian and Babylonian springs, of which there was We have already spoken about this before. But today's Jews are also to be regarded as heirs of the Phoenicians, and of This Phoenician or Punic heritage we want speak here first.

The Arab's great greed for money and his special their skill in trading are well known. As far as Looking back today, it almost seems as if whether in the ancient world first between the Arab Peninsula and East India a significant wholesale trade developed, aided by the regular Wind currents, which sailors are fairly certain to and from the airport. In addition, there was the caravan trade with Syria, especially the essential Because of grain. The Red Sea was also home to the Forefathers of the Chamitic Phoenicians or Carthaginians, who so-called Puna of the ancient Egyptians, which first came from there to the Persian Gulf and the lower Meso-Potamia, where they were in the area of the Old Baby Ionian culture, and then later moved to the Mediterranean, where they settled among the Canaanites completely Semitized and adopted the same language, which also the later advancing Hebrews from the

Digitized by Vj00QIC

134

the ancient cultures there had to accept, – just the language that, for the sake of the Jews, is called Hebrew and which later, under new Babylonian Influences, gradually with the so-called Chaldean exchanged.

The Jews left Palestine as Bedouin nomads enter and leave as traders, after which it is

It is obvious that they are the education or training to traders or merchants only from their closest relatives, the Phoenicians, who, from even earlier trading activity apart, two millennia before the appearance of the Jews in Palestine in the coastal and inland areas devoted to trade, may have received, their tools, practices and customs they have adopted. Were the Jews, as yes, as is clear from the Old Testament, for centuries the apprentices of the Phoenicians, they entered the fall of Tyre in its place and spread in the ancient Phoenician and Carthaginian tracks across the entire known earth, whereby of course also many people of Punic descent, whose factories they took possession of, "Long before the birth of Christ," says W. Kiesselbach (The Course of World Trade, Stuttgart 1860) – gave it is already in various cities of the evening – and the commercial guilds of the Israelites in the East. As the European world has a lot of influence from Asia, fetched threads into their culture, which is still produce peculiar structures in the present, So our part of the world has in the Jews also an economically social element with unchanged content and unchanged form from the ancient Asian existence," and Alexander Pezz says: "According to a law of nature, the Phoenician sense

Wealth and much sharper expression than our own ancestors in prehistoric times power, according to which the Jew instinctively has a clearer idea of the course of the emotions emotions and their consequences than it does the youthful peoples of Europe, who are dealing with a kind of naive trust to their emotions, while the Jew calmly oversees the course of events and his own advantage. The average Jew is in this respect inferior to the average European not much different than a shrewd Yankee compared to the Indian and the Negro.

The downside of the great age of the Jewish intellectual essence consists in the complete desolation and emptiness of the mind, when it is distracted by the pleasures of Punic calculation and empty rhetoric and the cruel pleasures of Jewish pride tired and exhausted. The pleasures that the Aryans enjoy from the movement of ideas, are a closed world for the Jew, and this Emptiness and desolation, for the sake of which the Jews are no less unbearable to each other than they are to each other fear each other for other reasons, there is for them again a new spur to tighten their cruelty. According to the pathological side, Here you can find the frequent occurrence of half and total mental stupidity among the Jews, as well as that "new roses", as they are called today, which are particularly popular in our days, suicide among them is again frequent made because the Nomad Law was new— However, the freedom granted by this naturally also includes the sudden disasters caused by the law increased, which can be seen in the book by Drumont [La France juive] tells numerous examples.

liberal legislation, to exploit the
new means of transport and communication
used in completely new conditions.

Above all, it is of utmost importance to
notice the high degree to which the new traffic s-
and means of communication of nomadic mobility
of the Jew. Railway, telegraph
and telephone seem to have been invented for him,
although he himself did not invent it, as he reported
invents nothing at all, – they too are only invented,
to "bring to you the wealth of the nations" (Isaiah 59:11).
"The railways have enabled the Jews to
to quickly change the area of his activity. For
No other nation is so fond of the invention of railways.
values as for this most mobile of all peoples.
It is designed to accommodate the Jew's inactivity.
come as the air comes to the bird:

At night he sleeps in the wagon and during the day he makes his business*)' 4 . How the telegraph facilitated of mutual agreement and to accelerate the agreements among themselves, and on the other hand to rumbling and deception of the "outside" audience again most of all to the benefit of the Jews

*) Ernst Frhr. van der Briiggen, *Russia and the Jews*, Leipzig 1852, p. 54.

It is obvious that the large Jewish houses are often informed by the telegrams of their agents about important informed about current events faster than the governments themselves, in which they also, since with them everything is connected with the stock exchange have a means of bribery. And not only these agents and correspondents, but even the largest telegraphic correspondence bureaux are in Jewish hands, and "it is hardly possible today nor a large government or embassy, who did not have such Jewish agents at hand" (Frantz, *Weitpolitik*, III, p. 128). And like the Telegraph, The press also serves in alliance with him, although not invented by Jews either, but given to them today. delivers, to "numb and deceive" the Goyim than the objects of robbery, and even diplomats often draw enough of their information, not to mention their action, from the Jewish newspapers.

But the period of railway foundations has Jewish destiny both opportunity and means commanded to put himself in the real possession of a great part of the new means of transport. This is This is particularly the case in France, where the largest railway lines are almost without exception in the hands of the Jewish Haute finance, especially Rothschild^. Naturally Of course, Jewish capital was only apparently gagirt. As an example, the Austrian Imperial Ferdinands-Nordbahn, which, like the Southern Railway, could almost be described as Rothschild's private property can. Germanicus (*The Second Paris Crash*, Leipzig 1883 p. 16) says: "For him, it is essentially a gift of the state, with whose money they largely

as the shares of the same at an unheard-of premium
and to focus less on the construction of the railway than
to take care of the sale of the shares. The premium
was immediately driven up to 15 percent. But with the
Construction was very slow; he even came into danger of
to remain lying, and in 1841, in order to do this,
To prevent this, the government must step in, first with a
Construction advance of five million guilders and then through
Taking over the entire building. "Only cheap" now went
the shares naturally in the vaults of the Lord
von Rothschild; he bought them for half the price.,
for which he had sold them". Jewish capital
can, like the Jew himself, only raid and destroy,
not build. The nationalization of the railways is
therefore a European question of life. Freycinet in France
Reich has sought this nationalization, but as
soon have to retreat from the haute finance.
The acquisition of the
Northern Railway failed by the state, although even
objection was raised by the military (cf.
Streffleurs Oesterr. Militärische Zeitschrift 1885). In
Prussia is proceeding consistently in this direction.
The period of railway foundations was followed by the
of the stock exchange and banking fraud in which the Jews
are involved with about 90 %/o. Here the naked
Robbery, which the stock exchange and bank Jew also
like the Bedouin of the desert. One has the
relevant institutes as simple "absorption devices

about the sudden "change of fate" of nomadism, here called "Krach", and the competing robbery cooperatives against the murderous attack, the "slaughter on liquidation day", as it were, per—"In Vienna alone, the number of failed May 1873, no less than 55 banking institutions with a Capital of 233 million guilders, of which more than 150 Millions were completely lost. This means but only the loss of cash deposits; the The much higher loss of premium is not taken into account. And This whole amount can be described as the The audience is directly stolen, because there is no economic creation" (Germanicus p. 30). How would the nomad to create economically? He can only raid and rob. In addition, the enormous state debts with ever-increasing interest rates, which also for the most part in the vaults of haute finance In France, the property tax, which is the Thermometer for the stability of the property, in 1881 was lower than in 1804 (174 million Francs against 210 million); however, in this period the burden of debt interest increased sevenfold increased, because the well-founded debt burden of the French. sian real estate has reached the amount of 20 billion exceeded (Germanicus). However, the Mo-ownership of biliary property in a few hands has grown enormously.

The whole process can only be described as the Jewish Raiding of Christian trust and the justified credit system.

The highest mobilization of property is life law of nomadism. For the real nomad there is only one movable property that can be returned to him splits into two types, namely one that itself moves, like cattle and slaves (the walking

Digitized by Vj00QIC

belongings of the Bedouin), and in one that moves which has to be transported on the camel, such as equipment, supplies, etc. The immovable natural property, such as pastures, date palms, wells

etc., is to a far too high degree between the tribes, rather than being considered as actual property. Where people of a tribe to protect date plantations, water pipes, etc. must be left behind, we have already seen the Beginning of settlement. The law of nomadism, which requires the highest mobility of the people, also prescribes the highest mobility of property, because in it lies the highest security of it. If now the nomad, as is the case with the Jews is, lives among permanent residents, the nomadic Law of life and the robbery brought about by it instinct compels him to work so that all possessions of the residents becomes "mobile", also the so-called "superior property" of the states founded on agriculture, the immobile, non-capitalizable state and my property, without which a state cannot exist can, and without his clever and far-sighted Supervision by the state – as in particular in the case of Woad – the most general living conditions for rows of generations can be endangered and destroyed. The Jew is intent on using this property as well as any to mobilize others so that they can carry him with them how the Bedouin could use his cooking pots and clothes chests or the spoils of his raids on the camel Our agricultural states were originally based based on pure natural economy, but this is gradually gave way to the monetary economy, and in the Geide, as the equivalent for everything that is for sale, the Jew the means of mobilizing property, whereby

Mortgage debt in 1868 over two thousand
million, in 1884 over three thousand million guilders.
In the meeting held in Lemgo on 9 June 1886,
meeting of the Lippe Farmers' Association was the re-
solution: "An increasing, purposefully promoted
modified debt system, combined with interest
economy, continually increase the power of the inter-
national monetary rule at the expense of fundamental
sedentary and working population". The capitalist
mus seeks everywhere a systematically promoted
to spread debt fraud; this is the basis
its corrupting power. A real debt
being did not exist among our ancestors.
According to the Sachsenspiegel, the farm heir needed debts
only to pay as far as the moving goods are sufficient
mortgages were only introduced by the Rö-
ic law. As those provisions

provisions of Roman law, which mobilize
all property, by our Jewish lawyers
It is well known that they have been trained.

This includes, above all, the introduction of
general ability to change, which for so many continues
Nothing means other than the mobilization of their property through
the seizure. In France, too, the Jews practice
instead of the old law, which allowed shares under 500
Francs, a new one, which banned shares of
50 francs allowed, so that no savings, not even
the smallest, safe from the clutches of the stock market. So
they want to compete with the savings banks. The stock exchange
is just a suction device that absorbs all economic
surpluses of the industrious Christian population

effortlessly pumped into the coffers of some bankers,
and even the few savings of the poorest should
cannot escape this fate. In France,
threatened by the state that they would take action against the attempts
the stock exchange to compete with the savings banks,
If the court wants to intervene, the haute finance
for their part, the deductibility and eligibility of judges,
so that these, the last pillars of old legal systems,
thus be elected in favor of the new Jewish order»
as is already the case with the people's representatives (!),
of which more than two thirds in France
supervisory or administrative boards of stock corporations
(Germanicus, p. 55). This also belongs to the
Section 'Mobilization of the Solid 4 ', because judges must
be irremovable. In the chapter on mobilization,
usually also the so-called "conversion" of any
bond, e.g. a five percent bond into a three percent bond,
whereby new millions become liquid for the banker.

On the other hand, there is also the
Preference for the Jew over the resident Christian,
which is reflected in the relative non-taxability of mobile
and nomadic capital and trade, since
their taxation on consumers and debtors
is passed on, which alone increases the heavily taxed»
because farmers and workers are easily accessible at any time
of indebtedness or impoverishment and thereby of
slavery, as is the case with the nomad of any non-

nomadic activity. In this way
Ultimately, it would have to come to the point where all
settled Christians would become agricultural and factory slaves,
while the Jewish nomad served as a bailiff, debt collector,
collector and executor, buyer and pre-buyer with the
Railway, which belongs almost exclusively to him anyway, the country
through, skimming off the "fat" of it and removing

intellectual property.

Knowledge consists in what is known.
knew are ideas of the knowledgeable. These ideas
positions refer partly to purely formal relationships
nities, such as the mathematical ones, partly on processes in
of nature, such as the physical, chemical and phy-
siological, partly on the psychological or spiritual
pathways in humans, which are divided into the so-called logical
Operations and the ethical processes in the individual
people disintegrate, partly due to the historical precedents
passages within the smaller and larger human
Communities and between them. Let us assume
that the purely formal relationships of all
people are perceived in exactly the same way
and that all provisions relating to them
attitudes at a certain time in all those who know
can be called, have really become equal
which is not yet the case, and set
We also assume that this will also be the case with the ideas
of the logical operations will one day be the case
– because both seem likely to us,
– it is highly unlikely,
that even the ideas of the physical
alkaline, chemical and physiological processes
could ever be the same in all knowing people.

History contradicts these ideas through-
which from the earliest times to our days
not only a constant change of comprehensive
Systems and attempts at explanation in detail
but also a persistent inequality in
the merely obvious description of the individual
Processes, as far as these systems, attempts to explain
and descriptions of independent minds
have gone, ie unless one follows the other

All this knowledge is only relative; until now
Every day still has the ideas of yesterday
changed (overturned, modified, corrected), and even the
most general assumptions, such as those of gravity
tation, the atoms, molecules, prove to be fluctuating
as long as the doctrine of them does not degenerate into tautologies
But the never-to-be-achieved equality remains
The validity of this kind of ideas is left open, so it is
but quite sure that the ideas of the ethical
ical and historical events in detail
people and in human communities and between
the same never and never in all knowing the same
Here we are faced with the inscrutable
Life itself, which is in constant osciiaations
given natural elements, so
close, and the idea is of the given natural
nature of the individual presenter so un-
separable, that one first has to consider the given natural
differences in the knowers or imaginers,
ie the personalities themselves, in order to
to achieve equality of the ideas concerned
which is absurd. These ideas are
for individual human beings and political
Individualities at the same time the ethical life itself, and

As we see, for example, within the Chinese and Indian (Brahmanical and Buddhist) cultural circle is still very different from ours different sciences simultaneously and partially even find themselves alive and effective alongside ours, so we also see within our own cultural circle a different science from ours, and an older, pre-Greek, still sign of life namely in Jewish Talmudism. What here, in the Talmud itself and even by today's Rabbinism is called science, that was its foundation in fact, once science and was allowed as such, namely about three thousand years ago in the Babylonian cultural area.

That the Israelites and later the actual Jews Even in this cultural and literary circle, there is no could occupy a prominent position, it goes without saying Babylon was the center of the Near East tic intellectual life. Tiele says*): "As the centre The oldest civilization is Babylon for many centuries hundreds for the then most highly developed peoples what Rome was for Europe in the Middle Ages." Therefore, including the religious opposition, Babylon for the Church is "the old dragon", that is, the Representative of that pre-Christian worldview that has been overcome by Christianity, like Python

of Apollo or the Lindwurm of Siegfried or Saint George. Some of the literary inspiration which the inherently sterile spirit of Judaism received, as already mentioned, point to Egyptian Influence, but most and most important on

Of the two Talmuds, the Babylonian is called the one because he on Babylonian soil and of course also under the special spiritual influences that were dominant for two or three millennia,
In this sense, we speak of a
Babylonian or pre-Greek science, which in Talmud in a certain sense still lives on today.
As for the still very childish ways of thinking and interpreting methods of this science, I refer to the
in my essay "The Christian School and the Jewish thum" (Vienna, Kubasta 1885) p. 66 ff. What
As far as the material is concerned, the dependency could be individual Talmudic sentences from Babylonian doctrines can only be clarified by special investigations, which are still too difficult today, as the scope of the now from the remains of Babylonian literature deciphered is still too small. Above all else could already today refer to the legal system
"The lower river region of the Euphrates and Tigris – says v. Holtzendorff (Handbook of International Law. X. Berlin 1885, Vol. I., p. 178) – owned in Babylon a vastly expanded capital, in which the sea Indian Ocean trade its most important trading place, the caravan trade of the Phoenicians and Middle Asians found its oldest crossing point. According to the results of cuneiform research obtained so far
It seems certain that the Babylonians had a far advanced

progress, on carefully maintained documentation of the legal system based on contracts."*)

But the rabbis also have a lot of Greek and Roman. The third century The Talmud, which began in AD 100, found its end exclusion only in the sixth century, and the gave the same recorded commentaries and Supercommentaries go back to our fourteenth century hundred. Now it is more than likely that the confusion inherent in rabbinism, Babylonian culture as well as He did this with recorded Greek intellectual property. The above-mentioned time information should be kept in mind because there are rabbinical Tactic is – which, in the face of total ignorance, ity of our learned and unlearned audience in these things are still used successfully, regarding the originality of Greek philosophical themes, Protestant teachings and later scientific statements to claim that everything "is already written in the Talmud", which only in the third century AD, in sixth according to Aristotle. These are small Semitic robberies.

The same chapter also includes the appropriation of monotheism by the Jews. Lagarde (D. Sehr. II p. 104) says: "That the Jewish tribe once given to the world the worship of the One God, is not true, since the Decalogue describes Yahweh as a god besides other gods, and the coarse-wired physical ity of the molding of the first man [from clay],

consists in breaking completely with it have, referring to those prophets and in combating the so-called Pharisaism, in which that exclusivity is its most perfect embodiment The name Pharisee (Perusckim) means indicates the "separated ones", ie those who are in strictest observance of the so-called Mosaic law set by their own less strict fellow countrymen just as if they were the same as the non-Jewish "peoples of the earth" ({Amme ha-ärez), from whom every Jew keeps himself strictly separate must, which is why this name {{Amme ha-ärez) rabbinical term for those ignorant of the law Jews. This Pharisaical separation is in fact the prototype for the separation of Jews from all non-Jews, and therefore it is the Principle and the story of Judaism, if both Orthodox as Reform Jews, such as the two personal opponents Geiger and Grätz, agree that "to regard Pharisaism as the highest flower, of which their nation is capable" (Lagarde, D. Sehr. II p. 106), or when a Jewish school book (E. Hecht, Handbook of Israelite History; 5th edition by M. Kayserling 1884, p. 11) teaches: "The Pharisees were according to their principle the noblest representatives and preservers of Judaism."

From a Jewish point of view, this is only consistent thought, and accordingly the Jewish approach view of human history as a whole dictated by the spirit of Pharisaism. From the orthodoxiest rabbis and slaughterers, whose minds are only Jewish knowledge, up to the highest standing Jewish scholar who does not disdain

as it is given in our way, even if only attentively sam. He will always listen to the oral presentation interrupt with the request that he be •something from this or that person, this or that Battle etc. The chronological order is It is precisely this need that the Chronicle, for which a larger ideal context is not available, and in which he for his entertainment leafing around everywhere.

Now one could argue that the Jewish Historiography of the Old Testament in the theocratic thoughts possess an idea which the whole history of the Jewish people, and by virtue which it is actually depicted. But that is only apparently true. The impregnation of the ancient Hebrew and the later, so-called Israelite history sources with theocratic idea is an extremely artificial product of the post-exilic, actually Jewishian time and is by no means a re-interpretation those older sources into a unified work of art, but, to use Wellhausen's correct expression here to use again, in a mutilation of this sources and in their "over-coating with the Judaistic digestive mucus," – in its impregnation with the Ideas of the later priestly and scribe state. We, the non-Semitic Christian readers, are the ones whose imagination created the ideal building of a theocracy, as it is the Aryan spirit as the conclusion of the entire history of mankind What the Semitic Jew sees as Theocracy is simply the enslavement of all non-Jews with the help of the Jewish God. The idea of this is the The only one accessible to the Semites that is associated with the concept of Ideal in our sense a certain, although only formal

has a similar relationship, namely the idea of a not yet existing, but to be striven for in every way most perfect state imaginable. From this Idea then also the means of rule, As already mentioned, their value determination for the Jews, – especially money, as the means by which which also the one who had been oppressed until then, as with a jumps can just as surely take over the rule, as through murder and revolution, which the Semitic history from the very beginning. Now that the grasp of constant evolution in slow, realization-oriented processes leading to the realization of ideal goals, the Semites and nomads are completely missing, so are all middle stages between today's hope and former success filling, and this also agrees that the Jew again and again, today freed from shackles, tomorrow is already reaching for power. Everything that lies between These two states can be for him, because it is not the value of an organic middle and connecting link has, only claim that of an anecdote or note, and therefore he has no history. From the Muslim point of view it is also an event. Writing in the Greek-Occidental sense is not possible lich. Just as for the Jew the stories of the Old Testament of Abraham, Isaac and Jacob, so for the Muslim the tradition relating to Muhammad the starting point of historiography. Tradition (hadis) means the collection of the not included in the Sayings of Muhammad recorded in the Koran, which Description of his person and habits, the counting of his deeds etc. The great majority number of Arab historians were also traditional teachers and began their literary and academic career as such. What can be expected from spirits,

humanity. He also sees in the real tragedies – except the Shylock plays

– no Jews suffer, only non-Jews, because the Jew, like the Semite in general, does not write tragedies, and this for the very reason that both the the necessary degree of empathy as well as the representation of the deity's salvific purposes is missing. Spinoza also wanted to eliminate compassion and through the understanding, i.e. here through purely intelligible replace rational thinking that is not influenced by compassion, which is an absurdity; because thinking remains under all circumstances by the logical matter, here therefore determined by the pitiful process, or

– expressed materialistically – the human being's existent matter suffers through the affection of compassion Changes that are the result of the thought process change themselves. Either the thinker is more or less compassionate, or he is not, which of course lich only means that it only has rudiments of it, which does not make him of full humanity as make it seem worthy, because such things are also Animals are present. The Aryan is more compassionate than the Semite. The strongest expression of empathy, the Indian »tat tvam asi" ("that is you") is Aryan; Within Islam, compassion has its most powerful Expression through the mouth of Persian, i.e. Aryan Poets found. The church father Augustine calls compassion is "the worst seducer", but it has

– although half Carthaginian – therefore not eliminated Precisely because pity and fear seduce, that is, can lead to disaster, therefore demands and strives the Aryan, who is a youthful being, the ringing catharsis of these feelings of suffering, or – as Egger says – their "correction", namely in the

i8 7

Direction towards the divine purposes that a young humankind as the highest ideal goals represent itself, – ad minuendum malutn. The senile Semitism cannot understand this. and therefore requires the elimination of those the rudiments of empathy that "oppress" him. The Bernaysian interpretation is genuinely Semitic, and if Jewish philologists had preceded him in the same and followed, then that is quite natural, – but that also non-Jews and mostly even teachers of the youth their Christian-Aryan conceptual inventory through the se-Mithical raiders of such a piece of capital It is really hard to understand why they let themselves be robbed, and J. Egger therefore says (p. 36): "The ethical The whole of antiquity believed in this effect, – it falls I do not even think of proving this, and it It is not to our moderns' credit that one, even if to have doubted it for only a short time."

That the Jew as a legal scholar, legislator and Judges can only destroy our legal view, is as obvious and natural as the fact that he in his practice does not observe our laws, but bypasses or pushes through its gaps, – Of course, because our legislation is the result of a which is completely alien to the Jewish essence. Not on The state and its legal system are based on the laws, but on the national spirit, as its imperfect Expression the laws are to be considered, and from what As long as he is alive, he will always have a new legal order, even if a foreign spirit would have destroyed the old one. History shows that The state existed everywhere before the laws, especially especially the Germanic state. It is known and it has often been criticized that our Jewish lawyers

can prove, even today, three millennia later–
the ancestors of the Jews living among us, the
Leaving the desert behind, into the ancient cultural lands
this side of the Jordan, – that even today
in every expression of life of their later descendants and
changeable the law of the desert comes to light.

Above all, it is important to consider how the Jew, if he enters a previously Jew-free area If you want to make the loan subject to interest, your place of residence is not within of the same, but on a neighboring border area from where he makes his raids, and where he can only be prosecuted with difficulty can; furthermore, if several Jews are already at the live in the same place or already form a community, they divide the districts of the area to be exploited among themselves like a Bedouin tribe, divide the pastures of the Desert.

Zurich Cantonal Councillor Scheuchzer says in his Call for stricter enforcement of the law regarding pawnbrokers, peddlers, money dealers, lender etc. (Oesterr. Volksfreund, 2 August 1885): "As regards the moneylenders and businessmen, Raelite confession, they have the canton or the areas they occupied into individual districts distributed, which is usually exclusively by the Owners are exploited alone. This is how they come from Gailingen, Randegg and Wangen, from Langnau and Endingen (crossing the Rhine, like their ancestors once the Jordan), in more recent times from Zurich, regularly on the same days in their business circles to Some even take part in It seems that the branch or at least as resident, without, however, participating in the alleged permanent residence. Like Adler they hunt through the territory and carry their prey at least every Friday into the actual residential area municipality in Baden, respectively in Aargau." There we again the nomadic raiders of the "well-behaved and returns home laden with booty. I am reminded of the paintings by Jewish painters in which the

Brandy. From the misery of the Polish and
Hungarian villages, which the Jewish chancretary considered to be
We don't even want to talk about the fact that the king rules.
But also in Moravia, Bohemia, Lower Austria, Styria,

mark and Carinthia, the demon has already got its claws laid, and even – on Vienna itself. The Austrian People's friend, 2nd August 1885, writes: "At the ever increasing extent of the so pernicious spirits plague are The Jews are primarily to blame. Are not the fire-wine merchants and consumers everywhere almost exclusively Jews? Aren't they the ones who are making people angry by they initially give on loan, in all possible ways to drink brandy? This is how we are written yesterday from Mährisch-Neustadt:

"The demoralization caused by the spirits plague is increasing in our area is increasing at an alarming rate. It is becoming beautiful farming villages, thanks to the Jewish brandy soon it will be like in Poland: everyone drinks, Farmers and day laborers, masses, – father, mother and even the children! The Jews with their wives and Children go around dressed up and fatten themselves; the Christian farmer, however, becomes impoverished by % more every day. because the government does not know that the people's marrow and strength, prosperity and military power of the state daily downwards, and that against the brandy plague something finally has to be done?"

A correspondent of the "Czech", from the area of the Bohemian Forest, gives the following description of the rampant brandy plague and its effects: "The Brandy taverns are multiplying incessantly, and the Jews supply more brandy than the innkeepers Beer. The people spend nights in the liquor taverns drinks the brandy in quarter-liters, smokes, plays cards and only goes home towards morning.

bourgeoisie, which is in the deadly embrace of the
Asian demon? About the
position of the "German" professors at the university
Czernowitz, which was founded a few years ago,
to pave the way for "German" science to the East
to pave the way, says a correspondent of the "Oesterr. Volks-
freund" of 17 December 1885: "they should not
become a tool of the Jews in the elections
and have no fellowship with the Jews at all.
But because the Jew always seems to be much more
whiter than he is, the professors go to him
fall for it, befriend him and then serve
the Jewish interests, without knowing it themselves and perhaps
easily even without wanting to. Yes, the gentlemen are ashamed
of the simple, modest German citizen and
craftsman who does not seem as noble to them as the
Jew. But the Parch (Jew), how proudly he walks next to
the professor on the street and conversed with
him about politics, equality and liberalism
mus". What opinion the Jew has of the mind of the
non-Jews, and under the prevailing circumstances
must also have necessary, has already been mentioned several times
been indicated.*) – Similar conditions precede
the newest annexes of Western Christian culture,
Serbia and Bosnia. In this area
the Jews of Vienna are close to those of Constantinople
your hands. "Have you given us nothing of your culture
to share – ask the Bosnians – as soldiers
and Jews?"

But let us return to smaller demonstrations of Jewish
sense of razziantent in daily life.

Heman (Historical World Position of the Jews, p. 27)
has rightly highlighted the disastrous consequences
for the whole world it would have had if the Jews
not before the discovery of America from Spain
would have been expelled: "The gold of America would have
everything flowed into Jewish hands; even then
A golden international was formed, from whose
Europe could no longer free itself from its shackles,
– Shackles that would have been strong enough to
the highest spiritual culture, the Christian idea,
We therefore have every reason to admire the wonderful
to honor the providence of Providence, which the
events in such a way that the world was protected from the Jews –
rule, which is the rule of money, was preserved/*
Certainly true. But today things are much
dangerous. Steam and electricity are now in use
attempted to create a whole new world, and the Jew
has with the money also the mediation in all those
activities and work performance of non-Jews themselves
through which this world transformation is
and Jewish liberalism gives the law for
this activity, through which alone the activity
or working people – that is, Christians, because the
Jew does not invent and does not work – to Jew slaves

will have to, as the law of the nomad
thums demands. In our opinion, however, it must
the Christian idea which is the transformation of the
world and the new forms with their spirit
The Christian idea, however, only catches
for air: the church does not move, the heads of state
are still trying to come to their senses,
and the individuals are as if by the magic gaze of a devil
mons is banished and paralyzed. The science of the Na-
but national economics, from which one initially learns
should expect, has consciously or unconsciously relied on
based on the principle that all civilized people
are similar and equivalent quantities, which is
right ^ypour le juif^ or "pour le roi des juifs" ar-
means to work and is all the less wonderful as
It is precisely the Jews who are mainly involved in this "science"
Historical research and history
Historiography is only a dabbler in these matters.

The material changes that steam
Electricity and the new means of power transmission
on earth are about to bring about, the Ge-
do not put something nearly the same on the side
and accordingly the new members call for
means of communication a contact of the spirits about the
whole earth and thus also an increased degree
of empathy and moral solidarity, such as

This his people settled in the palaces and castles of the former Christian rulers and dynasts and distributed by from these the Christian slaves were monitored and forced to work like the believers of his relative, the Arab bit of Allah, done for a long time, or that it, like a lucky raid of Bedouin nomads, "prosperous hold and load with booty" after the starting points Palestine returns, – or finally, that it unites both species and sends its beggars to Palästina to supply them from Europe with its fat to nourish. –

Let us now look, finally, at which expressions of Jewish nature and activity the Law of Nomadism to the clear expression reached.

The Jewish migration as a whole is the nomadic invasion (raid) of foreign (infidel) territory under robbery and plunder, with always remaining alive increasing awareness of national-religious specificity and hostility towards the country's children and with always held thoughts – not wishes – of Return to the old residences.

The material predatory economy also corresponds to the spiritual activity of Judaism, which in a nomadizing grazing of the non-Jewish processed intellectual areas and in the excavation and disintegration disturbance of the Christianity and non-Jewish ideal sources of life arising from nationality of those mental activities.

The equality of Jews with the population of the area covered by them replaces the slow and steady development of these peoples their own law of life – that is, instead of evolution lution – the sudden changes of fate of the nomadic

Digitized by Vj00QIC

thums, namely in the political field in the form of revolution, on an economic level in that of crash.

This equality also results in the conversion of all immovable property, including the upper property of the states, on which their stability based on, in mobile possession, which finally takes the form of bearer securities au porteur is as mobile as the movable property of the nomad and of Jews controlled stock exchanges.

This equality also transforms the free labor work in slave labor, the free worker and manual workers into agricultural and factory slaves, because the nomad who only knows work as slavery. Morally This means that work, as a performance of the intellectually low standing (simple, stupid), dishonorable, theft on the other hand, as an achievement of the higher ranks (from, henotheistic God favored), as both in the nomadic life is the case.

As a very general, all expressions of life permeate urgent form, which the Semitic nomadic thum by nature is ultimately its tumultuous tuarian being, which physically physically and spiritually in constant unrest and in fragmentary and tumultuous thinking, as demonstrated by the well-known portunity for non-Jews and not just disturbance of order and discipline, as well as of fruitful progress gangs in schools, army and advisory bodies, but also, since Judaism now dominates the press, which leads to a general degeneration of thought.

According to this, the entire Hebrew-Israelite-Jewish History is nothing other than the history of the raids a nomadic people on the cultural areas of settled Nations whose history is marked by three things: special character: – firstly, by the fact that

These nomads, as heirs of the Phoenicians, who were
 traditional skills in trade and money
 things for their special purposes,
 – secondly, by the fact that the Punished nomadic people,
 by using the older and contemporary cultures
 peoples developed idea of the unity of God (the true
 monotheism) for itself, and with very
 special hardness and energy his exclusively national-
 religious education based on this henotheism,
 from all other peoples of the earth, as from Un-
 pure and created only for the service of the Jewish people,
 internally closed, similar to the equally nomadic
 Arabs through the religion of Allah, Islam ; –
 thirdly, because it is precisely this inhumane
 increased exclusivity, especially in
 his center through Christ the straight and full circum-
 reversal of this view took place; – in addition to this
 nor for the Christian world in particular that the
 Christianity because it is free from the influence of Judaism,
 on whose soil it was created, not until today
 could completely break free, to this day his relationship with

E. Dühring continues: "They want to and don't know what to do with them. You forget But it does take hold if you look at the one with your state since nineteen centuries of bankrupt Jews to a new establishment. That would mean that the world history back several millennia and let the game start again from the beginning." As is well known, some theological enthusiasts believe that among Christians as Jews, in such a "return of the Things"; we only have to note against the above that the spectacle of a renewed – admittedly unavoidable – bankruptcy of the Jewish state for Jews and Christians would be very instructive, and that the attempt to establish it regulation for Europe would create local relief, which seem absolutely necessary here and there. But Dühring continues, quite rightly: "What As far as the Jewish state is concerned, the judgment of history is has already been completed, and now only about a second bankruptcy of Judaism, namely, the one in the dispersion. Among modern peoples, the Jews are not persevere, no matter how much they are in their arrogance flatter themselves to bury all the nations (Goyim). The Jews will be less able to endure it, the more real freedom of the people. Are the people's forces only properly emancipated in their national consciousness. so it is impossible that these and the Jews on the stay together on the same ground. The where is the own cause of the Jews." Lagarde (Program, p. 60} says from his point of view: "In the To the extent that we become We, the Jews will stop being Jews." Although according to Dühring, the From a racial point of view, the Jew will never stop can be a Jew, both judgments are valid for

because of monitoring, and the examinations, including those
of the teaching and rabbinate candidates always has a

(non-Jewish) government commissioner.

The same applies to the Jews who use their own resources to schools built on the model of our state institutions.

The slaughter of animals must be prohibited (police prevent or punish), as it is well known that is one of the most painful ways of killing. The relevant things are of no small importance
ity, since in this way the Jews themselves also have the Conviction of the antiquity of their religious and can be most easily taught in the religious system.

Because if on the part of individuals, society and the state is serious about exterminating Jews en masse to Christianity, this question is of the utmost importance. The new Christians would penetrate the state and church in ever greater numbers, and The Judaization of both could, for example, in Austria, lead to a reach a similar high level as his time in Spain, which ultimately led to defensive measures against human kind. As is well known, the en- most raging inquisitors and informers of Jewish descent been, – they also made a business out of the Inquisition This is another reason why we recommend the ternization of larger masses, possibly as international Maassregel. The fate of Spain and Poland, France-Reich and Hungary serves as a terrible warning sign all those who take the matter lightly believe.

But here again lies an appeal to the better and best among the Jews themselves. What do you ask of them, if they establish their own fatherland What else does that mean than that they give themselves this (or

About this book

This is a digital copy of a book that was kept on library shelves for generations before it was carefully scanned as part of a project to make the world's books available online.

The book has outlived the copyright and can now be made available to the public. A book is in the public domain if it was never subject to copyright or whose copyright term has expired. Whether a book is in the public domain varies from country to country. Publicly accessible books are our gateway to the past and reveal scientific potential that is often difficult to discover.

Traces of use, notes and other marginal notes contained in the original volume can also be seen in this digital copy. A reminder of the long journey the book has taken from the publisher to a library and then to you.

usage guidelines

Google is proud to partner with libraries to digitize publicly available materials and make them accessible to the public. Public domain books belong to the public and we are only their custodians. Nevertheless, digitization work is costly. In order to continue to provide this resource, we have taken steps to prevent commercial parties from exploiting it. This includes technical restrictions on automated queries.

We ask you to adhere to the following guidelines:

+ Use of the files for non-commercial purposes We have designed Google Book Search for end users. Use files only for personal, non-commercial purposes.

+ No automated queries Do not send automated queries of any kind to the Google system. If you are interested in machine translation, optical character recognition or other areas where access to the data is useful, please contact us. We encourage the use of publicly available material for these purposes and may help.

+ Retaining Google brand elements The Google "watermark" that you will find in every file this project and helps users find more material through Google Book Search. Please do not

+ Stay within the legality Regardless of your intended use, you must be aware of your responsibility to ensure that your use is legal. Do not assume that a book that we believe is legal for use in the United States is publicly accessible, is also publicly accessible to users in other countries. Whether a book is available varies from country to country. We cannot advise whether a particular use of a particular book is legal. Do not assume that a book's appearance in Google Book Search means that it is available in every country in the world. Copyright infringement can have serious consequences.

Horat. Sat. I. 92 Vin tu
“Curtis Judacis oppedere? –
With all due respect, Mr. Horace!

intended for discussion among Germans, because it concerns the
sociale, or the Jewish question, and nothing would be more wrong
fuffifcife than to try to negotiate this question with the elements that
in the unpleasant day of things and the nervous state,
in which all peoples among whom Jews live are guilty
These elements can only be immortalized or
aggravation of these conditions for their special purposes.
On the other hand, the Aryan peoples are struggling for power and are looking for
To create conditions under which they can exist. The
Book is addressed to the entire German people and it
is dedicated to its rulers and appointed representatives.

If you see a person stepping onto a pier that is rotten
and is undermined, and must collapse when entered, so
you shout a warning to him if you want to save him and protect him from the
This is human duty, the duty against
the next. In this sense, the present work was created,
and to attribute other motives to her, I will not admit to anyone that

. X 4 1 book is written only for Germans and exclusively
E

Rightly so. And if it is now the ruler of the country himself,

who is seen in such a situation and whose well-being the

=. ze

The fate of the people depends on who and what wants to prevent me from
To sound a warning cry? But not the fear that
some bad officials who could not wish for anything more than
that the state may perish, threaten with revenge d That would be

but downright cowardly! But it is not the ruler alone who is
The motto is: "Beware of the treacherous Judaism!" –

5 However, a berrfcher has the warning most often
necessary. When Geus was in a grotto on Mount Ida on the island
Crete and born of the Siege Amaltheia and the bees=
was fed, the Curetes had to use their weapons to create a huge
Make noise so that the father Hronos, who has his own children
ate, could not hear the cry of the child. How fine
Since the warriors around the cradle of the Greek god made this noise
had to raise, so today Jews, secret and open,
Jewish offspring and posts pushed forward by Judaism make noise about
the thrones of rulers and surround them with mist and fog, so that
the ruler may not see clearly, – so that it may be clear to each of
it would be difficult for those unqualified to see him clearly or even
to approach him. Double, triple, quadruple and even more
Rings form around the rulers' thrones, as in Part III
See below under "Jews and rulers". Yes, they
fearch for the innate instinct of the Aryan rulers
Coffee to numb and suppress and even deliver to the
ruler to be favorable to their people, any proof,

that they are descended from Jews, or have Jewish blood in their
veins should have. –

Since I was unable to convey my warnings on the usual
ways, I have – at all risks – escaped.
decided to choose the path of publication. At the same time,
My aim is to protect my private rights.

The book is an indictment against the "Alliance israélite
universal" and other secret Jewish societies, whose members
members live among us and actually rule us, although
This is hidden from the eye of the less experienced. It is a
Accusation against the "Secret Judaism" that is spreading
the pseudo-baptism into our diplomacy, civil service, military,
Spirituality and the terrestrial body knew how to gain entry
against this secret Judaism, which in connection with the
open Judaism to all important offices and positions for the
seeks to secure prosperity for the ultimate purpose of world domination.

Activity and connection of the Jewish world throughout |

illuminate the globe.

Few people have been fortunate enough to have such extensive
To make observations and gain experience as this

was the case with me. The number of those who once

found themselves in the clutches of the Jewish Moloch and with the
I found that I survived without a trace, but
The number of people who subsequently
feel the strength and courage to fight with the Jewish
Demon, that is, to take up with the tribe of people, which before all
tribes of the earth demonstrate the toughest solidarity.

I would like to thank the rulers to whom this book is dedicated
to show that we are in a side point,
where we have a struggle with the Jewry of the whole world for the
supremacy, and where it is only a question of whether the
Jews the rulers, or the rulers nationalize the Jews
In fact, the Jews are in the process of overthrowing the Aryan rulers
of all countries, to use the expression of Professor Wellhausen

use “to coat with their digestive mucus”.
This expression characterizes the gentle, supple nature of the snake
of the Jews in full measure, which consists in the fact that they
Instill materialism, hedonism, greed for gold and send it to the stock exchanges
to lure and to other dangerous apparently harmless and

seek to entice them into profitable or glorious enterprises.

How much the Jews surrendered their secret power to the princes
about conscious and how they insist among each other that
shows us best the speech of the English minister Mr. Göffchen.
(See Part III p. 80.) And may it continue to be the princes’
Warning said finely that Judaism actually has its hands –
to the “hoard of world prosperity” to the Bank of England
What the Semites had to offer their intended victims before
they ruin them, throw them away, are nothing but fragments of the
booty that they intend to take themselves. –

The large number of those who see the approaching danger
. or feel, but out of collegiality or camaraderie

pin; be forced, or the civil service harassed them
so disgusted that they give it up voluntarily.

who may cast their eyes upon the tremendous increase of the
Judaism, whether through reproduction or the recruitment of foreign
Elements. In fact, the reproduction of the Jews is the only
Industry branch, which they pursue with diligence and their own strength and
where they deliver genuine goods, more than this for the good of the
fatherland is desired.

It is in the system of the Jew that once he
may claim any consideration of loyalty or comradeship,
he claims it in full for himself and a
festation of the same towards him as a serious refusal and
fleftlessness, while he himself, albeit secretly,
the duties he expects from others through the secret Su-
cooperation with his own people. This is entirely
even in the character of the Jews. –

As for the large number of those who do not have state positions and in which the above-mentioned considerations continue» fall, I mean here preferably the owners, large landowners owners, large industrialists, large merchants, and these also find largely seized by the demon of Judaism, ie made dependent on the stock exchange or Jewish financial institutions – at least to such an extent that they hardly dare to raise their voices, although everyone in greater or lesser to a lesser extent feels the constraint of Judaism.

A large part, perhaps the largest, of all non-possessors is the “social democracy” brought about by Judaism which is run and subsidized by Jews.

– XI –

It is a perfidious game that Judaism has played. It has pushed itself upwards and through Judaization the Lord furling Ulasfes aroused justified discontent among the people= It has taken over the leadership of these dissatisfied elements seized in order to use them against the ruling ulaffes of the Germans on= If everything went according to Israel's wishes, it would be a clash of the incited elements the prey, ie the can seize power.

The two most powerful factors in the state are the government, the supreme administration with all its influence, and the masses of the people, that is, brute force. Just as under Jewish law the bloody sacrifice of the King of the Gentiles (see Part III p. 90) is especially holy, so also the deception and deception exercise of the king and his supreme Käthe the greatest interest of the Jews. The latter also applies to the great mass of the people, and one must allow the Jews to do this, to their task to the best of their ability, as well as the one to carry out all state to demoralize institutions as much as possible.

Whether they will succeed in continuing this and to achieve the desired solution, that is the big question the side

“A powerful spiritual e which is still is not understood, has been making its presence felt for some time in the throughout the civilized world; this is the most reviled anti-Semitism”.

What is anti-Semitism? It is not, however, the Christian thum, but among the non-Jews he is the economic, ethical and aesthetic resistance against the total demoralization. The The healthy basis of anti-Semitism lies unconsciously in all the non-

Jews who have not yet completely surrendered to the Jewish demon=

have fallen victim to this and have not lost all moral consciousness.

The Jews claim and repeat it to us at every opportunity= fact that Christianity emerged from Judaism and that we owe the Christian religion to them. Unfortunately find, and they know this best, many thoughtless and frivolous believers who accept this without further examination. In the chat Christianity arose as a result of Pharisees and the

following the shameful teachings of the Talmud, which at that time

did not yet exist as a book, but only several centuries later was written down. Christ made a stand against this nothing worthy honors and their observance, and if one wants it N.

—

— XII —

Christ was the greatest anti-Semite. The attitudes against which The young Christians turned against them, were exactly like those against which today's anti-Semitism is directed against.

Just as it was Judaism in the past, which represented the opposite of Christianity, so today it is again Judaism, that creates anti-Semitism; with the same right as it of Christianity, the Jews could also claim that We owe the anti-Semitic sentiment to them. The difference between these two great spiritual movements, only that we through a year of practice I came to the conclusion that the so-called Jewish religion is a "rapacious evil" against that we have to face up to, that theology is at the same time anthro. pology and that all hopes for an improvement of the Jewish

breed through training or crossing is almost fruitless and will remain so for all eternity.

Anti-Semitism is a noble movement that most important of all intellectual movements in recent years> hundreds. It will not be of much use to the Jews that they Movement, as they are doing now, with dirt, so that they themselves send in unclean elements to discredit them. It is

an elemental movement that bursts forth like a clear spring from

a huge swamp, which quickly makes its way and becomes
will lead to the drying up of this swamp; – at least we have
so much confidence in the found core, which is still in all Aryan
populations. This should be said to those who, from religious
Reasons to have reservations about this movement.

But the key to understanding almost all of today's calamities
The Talmud provides us with this, and therefore it is required that everyone
be made acquainted with the teachings of this worthless book.

The world today forms a closed circle and through the
Today's means of transport allow us to connect even the most distant points
of the world in a fast and direct connection. The world=
Semites striving for power are actually beginning to make themselves comfortable
and through its influence and its international
nal organization as our rulers. Take
only once the German foreign diplomats= and consular=
service, and see how many Jews and Jewish offspring in the same
And remember that the same service in other
Countries where it is not already equally or even more Judaized, the
The Jews are increasingly falling prey to Judaism. It is then quite natural,
that such Jews from various European countries abroad

– XIII –

country make a common cause, and that they no longer
State that pays and feeds them, but that they
respective interests of international Jewry against the
will serve the state.

The case that prompted me to write this book,
is one such, and I am busy working on a plan,
similar to the one I have printed in Part III, p. 51,
where I saw the diplomatic posts occupied by Jews and Jewish offspring
and consul positions. The small card from the
Blockade of the Russian-Polish border by the committees of the Alliance
indicates the locations where members of the Alliance are located,
who are tasked with tracking down Jewish criminals who escaped from Russia.
to receive, protect and further
This institution has proved to be very useful for the Jews
proved, and when our German consuls all
or continue to be occupied by Jews, it will be difficult to keep Jewish
To catch criminals who have harmed Germany, because
can always count on help from their fellow tribesmen.

Chatfächlidy already offers such examples, and
We are now in the absurd situation that Germany is
nourishes and maintains in office and dignity, whose first duty it is to
rael and to serve him and if necessary
to work against us.

Finally, do not be under any illusion that
in the colonies recently established by the Jews, all the
criminals who are to be taken from the arms of justice of other states
will, if necessary, find accommodation, just as it
used to be in old Jerusalem. Believe me, I know the
Judaism well enough to know that nothing that this people
undertakes, even if it has the appearance of usefulness and well-being=
: activity, without ulterior motives against other peoples. –

Until now I had always believed that of the civilised countries, the
I knew that France was the most deceived. But today I am
I am no longer sure about it, and I do not know whether Germany
has not been further deceived. It seems as if the
Alliance and the secret Jewish societies in Germany=
wisely and very cautiously with Jewish descendants and baptized
Jews have been “operated on”. In any case, it is a fact that
secret Judaism was strongly represented throughout Germany and
not only under the mask of the old Prussian solid official

He " Eu

– XV –

| Ihums, but also in the uniform of the military, in the Calar, Robe
etc. is hidden.

I would therefore like to appeal to the gentlemen of all these different
branches of the church to make lists of all
Their Jewish, half-Jewish and Jewish-related comrades and
colleagues. The most suitable means to distribute the femitic
To make Kafe more visual, it would be necessary to make maps.
All those who are concerned that our Germanness does not become
Judaism, which does not allow its sons and relatives
to Jubenftlaven, this is urgent
taken to heart.

Believe me, it does not happen for nothing and without purpose
and not only in Germany, that the Jews always worry
fwould like to evade the statistics while they

at the same time. You yourself have gifts from your people, They know how to find every trace of Jewish blood, and the Jews know exactly which minister, envoy, supreme president, general, judge, professor, member of parliament, etc. who want such a drop in him or whether he is related to Jews, and from many Others know the price of conscience, their wealth is niffe and first and foremost their guilt and debts.

Such lists compiled by secret espionage bilben, as I have shown elsewhere, the perfidious means, with which Israel dominates us. If we now have similar statistics from all professional branches, they will prove to be very instructive rich, and I have not the slightest doubt that these a "completely hostile to the state" operational plan of the Jew thumbs. For a German policy it is therefore urgent necessary to have such statistics and to make them available to the general public You have to know where the enemy or the uncertain elements are in place. As long as you don't know this, every Social policy proves to be unfruitful. –

When a German, English or Frenchman notices that he is in If he is not welcome in a society, he will leave. Now ask yourself the question: "Why do the Jews leave never the countries where they are hated and allegedly persecuted?" Anyone belonging to other nations would certainly have done so, and The world has enough space. The fact that the Jews have never thought about something seriously, proves sufficiently that they prefer to live on other people's cofts, but do not want to live alone

SE

they want to feed themselves, but they also want to control us and they believe they are already close to their death. –

Israel is playing an incredibly risky game in achieving the ultimate goal, absolute world domination. The political Fraud, which it has been perpetrating continuously for decades, is almost tangible that anyone who makes a little effort can see it and I would like to know which people first received the bandage of I am convinced that the people who first dares to shake off the Semitic yoke, the first Uculture people of the world will be fine. The other peoples will thank him and follow, and the prince who first takes the initiative and who takes over the leadership, his name will stand alone in the world history.

I must now get on with my own business. I I had no desire to get involved in politics. However, since the Politician, whose office it was to take my matter into his hands

take, has refused, my appearance will be with this Book to a political act. It will then be necessary for me, also to make a confession of faith. Since I never participate in politics, so I do not belong to any party; I turn I therefore appeal to honest people from all parties. I have the wish that Germans remain Germans and that a monarchical Regiment may be maintained under our present Kaiser. My political views are state-preserving and, if one wants, conservative, although perhaps not in the programmatic moderate sense of this word. Since a government is a civil service required, so I as an official only wish to see such people who one can give respect, and from the civil service all foreign like elements are excluded, which at least doubtless will find, i.e. which have a connection with the international Judaism, since this experience has shown that its followers too often of the locals seek to promote.

By the way, I am a socialist, and if you ask what I do you mean that I say: "Social fine, Socialist fine, that means the overall interest of the people over the self-determination and sufficiency of individual desires, i.e. society against protect their own weaknesses – that is, think and act, to preserve humanity."

This latter confession also simultaneously includes the Lord of practical writing in itself; and as the highest product

– XVI –

Aryan civilisation I consider the "gentleman", that is, the man, who without fear of punishment and hope of reward according to the above principles.

That the Semitic race can produce such a product must After my experiences, I am in doubt. Individuals may succeed in breaking the airs of civilized To accept people and to act temporarily, but finer He can rarely express his peculiarities. My "patient" is the best proof of this.

I would like to ask whether, in such cases, fetters can be devoted to a cheerful enjoyment of life It is truly not necessary therefore a Hopfinger, Pietist or Moralistic preacher, and one can therefore quietly participate in the so-called "Banquet of Life"

What does the much-discussed banquet of life actually mean and who is taking part in this banquet? To a good banquet is, in my opinion, necessary above all, even before the good food, that good society is also present. But who finds today

days the main participants? This is mostly Jews, and Jews
I rarely find good company. Moreover, we pay the
Bill for these freaks who with great impudence call themselves masters
by drinking our wines and the fruits of our
diligence. –

I am convinced that we are “all sinners”,
and everyone in his life in one way or another
fined. Nor are they such occasional sinners against whom
to whom this book is addressed, but rather those people
who consider it their only job in life to help their fellow human beings
to deceive and plunder, whose whole thoughts and desires
from early morning to late evening on nothing but
aimed at this point. Just think of those
who could reconcile it with their “honor” to use well-considered
fwipe manipulations for the disabled~~=~~ and other such funds
to rob.

Consider the effort of well-considered malice
and meanness, which is almost unique in history
the crime was necessary to bring it into being
feßen (see Glagau and others). So that such ecutes, which
This was able to seize the highest power through fraud, is
– wrote this book.

As a warning example, I have included in Part IV, p. 146, a port~~=~~

– XVII –

trait of Mr. Constans, and I ask everyone whether he

air to be dominated by such people or to give them high

power in the state. I think that there are few
will be those who harbor such desires – with the exception of our hot
Breifian fellow citizens. And yet we are on the best way to
to reach such situations as in France, as I will explain in more detail

in the political discussions with von Brandt.

Eonftans, whose crime probably involved another
Murder not specified in the article in question, namely the
fhis predecessor in Cochinchina, the product is

the Alliance israelite universelle, the completely Judaized French –

Freemasonry and other secret societies of this kind. In
We also have the Alliance in Germany, and we are
more recent times, the dangerous B'nai B'rith Order, which in the IV. Cheil
p. 208. We also have countless other
secret Jewish societies, all under some
Sail the flag of humanity.

Our German Freemasonry also threatens, as I hear, the Jews

thum and already serves Jewish interests in many ways, without
that she knows it herself.

Against this secret Judaism, whose work bears fruits such as
Confessions, the German activity should be primarily

to avoid, as in France, the "mafocracy" (the

I take upon myself the guilt of having formed this word), to
The German, like all Aryan peoples, has
Strive to entrust leadership to the best among his people.

This is the basic feature of the German character, which is expressed through

mixture of Judaism is threatened with being erased. And against
The latter is the target of anti-Semitism.

The Jew, on the other hand, recognizes the one among his own as
leader who, in the sense of the Talmud, is the best practitioner, ie
in our view the most depraved if. The anti-semitic
tism is therefore the struggle of the true aristocracy against

the rule of villainy, the genius of light

against the demon of darkness.

ä The writer of this book is a completely independent
Man who only matured into a man abroad and the German
He has observed the situation with interest from a distance. He is not
Pietist and moralist, but someone who likes to live cheerful life
pleasure, even an admirer of Brillat-Savarin, also the
understands and appreciates finer dining pleasure and, at the same time,

a good glass of wine; no provincial who
Sight of ordinary big city crimes and casters alike
who drives the skin, but one who sees the dark side of the European
and non-European cities and oriental life,
who nevertheless believes that a good society is the first
Condition of a happy Ebbensgenuffes and which some shudder
feels when he, as in Berlin this winter, officially
heard: "Yesterday evening the honorable summons of the Pädē=
rested in this or that Kofale of Weberstraße a mask=
ball", and then think: "So far we find in our father=
land —", who then asks himself: "How is it that this
hideous oriental caster, which allows after the valley mud,
but is nominally punishable under German law, such general
has taken root in the population of Berlin)" —
Sat. VI. 3. Suerft

Introduced foreign customs into the city

The fmntzige gold the entrance;

Jeitalter's strength broke scornfully

The product of wealth, the addiction to extravagance.

(Juvenal.)

Juvenal answers this question and asks that it is our dear
Hebrew fellow citizens to whom we owe this progress of culture
And what Juvenal tells us further about the Hebrews in
ancient Rome, agrees point by point with today's
in Berlin and other business cities where Judaism
has taken root.

Before I go any further I would like to quote a law from the Shulchan

Aruch, which Juftus formulated as follows:

Law of St.

"The Jew is not obliged to marry an Akum (non-Jew) with whom he lives in peace, to kill directly, but it is strict forbidden to save even such an Akum (non-Jew) from death rescue, e.g. if he had fallen into the water and if he also promised him his entire fortune for the rescue. Furthermore It is forbidden for a Jew to heal an Akum (non-Jew), even if he receives payment for it, except when fear that the non-Jews will consequently develop a hatred against the Jews would get. In this case it is even permitted, to treat him free of charge if he (the Jew) refuses to be treated A Jew is also permitted to an Akum ichtjewen) to check whether a medicine is health=

– XIX –

Furthermore, a Jew is obliged to Jew who has been baptized and belongs to the Akum (non-Jews) has transgressed, to kill, and in the strictest terms it is forbidden to save such a person from death."

Dr. J. Gildemeister, Professor of Oriental Languages at the University of Bonn was appointed by the Royal Public Prosecutor=ftschaft there was asked to provide an expert opinion, among other things, on this law as an expert. After Prof. Guildmaster had declared that the Shulchan Aruch was the binding Code of law for all Jews who are not internally fallen away, he expressed himself as follows:

"This law may seem so incredible that it must be noted that it is still valid and, where possible, is implemented. A A seemingly credible case that had been reported in the newspapers for a few years, whom a rabbi in Galicia had killed his own son, cannot be presented here because details and information are not available at the moment. to be duly proven. A very ancient story tells the story of The autobiography of Eliefer Baffin, authenticated by a renowned English scholar, an Indian from the area of Mohilew, is characterized very early by rabbinifdye He shows a great deal of learning, becomes a skilled sweeper at a young age, and finds his the indentism is not satisfied, the Kabbalah disappears, goes to Conftantinople, becomes a Christian here, but is persecuted by his relatives through false accusations complained that he was subject to military service, while he was not subject to military s denounced by the Russian Consul, although now a Turkish subject, Arrested by Russian officials on the street, taken to a Russian Ship seen, taken to Odessa and from there, by stabbing into the The Jews were captured by them in a lonely tavern on the banks of the

Dnieper sentenced to the Code on the basis of this paragraph. In the frozen river, a hole is cut through the ice and he is forced through sought; since it is too narrow and his arms do not go in, they try, as rescuers approach, in a hurry to break it, but does not get there before and only after a fierce struggle does it succeed to mistreat him and to pull out and to snatch the folgern. Happened at the end December 1869 or early 1869. The man is, after having gone through a lot suffered bribed Russian authorities, now English clergyman.

I have considered it necessary to present these stories here so that the reader can understand the facts I have reported not seem too incredible, which is fifthly due to the low level of Judaism and its work may well be the case. The Germans are generally very reluctant to read these days, and although this book does not concern the Jews, I am shows that it is read more by Jews than by Germans. I Therefore, please ask the Germans to live alone first, e.g. at No. some of the Jews have the least faith in

– XX –

the Talmudic chorus of the crime described later they will get understanding after reading Part I p. 58.59 mentioned mysterious deaths and no less mysterious interrogation of Mr. von Brandt in the Chinese Temple Uang=Shang CTfze II. Part S. Jag will have read. The meaning of the latter fact and the connection with the crime, I must leave the reader's imagination to: let it be said that not all Talmudic atrocities can be fathomed. –

0 *
0

My defendant, namely the Imperial Ambassador in Peking, China, Mr. von Brandt has explained to me that he had me taken to the insane asylum or had me administratively disposed of if I dared to make my case public feasibility, and I must note here that the Commissioners of Mr. von Brandt's fine family, i.e. the Reichsgericht president of Samson and especially his son, Justice council of Samfon in Verlin; in other words, the whole Judaism. |

That such atrocities can actually take place has we experienced only recently in Berlin, and the despicable Jewish Doctors who provided asylum certificates without having a personality observed or even seen, still run unpunished and on To avoid such occurrences in me and hopefully

also to make it impossible for all time to come and thus the Jews= people do not add another judicial order to their other crimes= I place myself under the protection of those to whom this book is dedicated to.

The Reichstag member Dr. Alexander Meyer has at Bes the usury laws, the statement was made: "that whoever Usury expires, placed under the guardianship of the creditor "As I am by no means inclined to place myself under guardianship= fociety of the Jews, so may they accept this book as repayment for the evil that they have shown me and threatened me, and so that they see that I am generous and with repayment is not stingy, so you get the ruffian Talmud= Jews, which I translated from French, as well as another booklet, "The Bomb", which also gave them a lot It should bring joy as a GBratis encore.

Our Hebrew fellow citizens do not understand the motive worthy, from which I publish this writing and so may you

– XXI –

because publication in the sense that is only understandable to them and if they do not take care that I am good German justice is done, but on the contrary try to harm me in any way, so hereby give them some further surprises from my side promised. –

But I have done this work for us Germans so that the knowledge of Judaism is spread. All German reigning princes, the members of the Federal Council and all German members of the German Reichstag receive from the One copy of each of the works presented. Since I do not have all the members of the German state representations to the same extent can, a number of copies will be sent to every German candes representation plare and also cirulare, in which it is said that sufficient application by each member of said Candes representations a copy of the book can be obtained at a reasonable price. not to expose myself to legal hassles and lawsuits, this is book written in the public interest printed as a manuscript and for the time being only to the respective rulers and candidates accessible. – May it inspire others to write! –

Since in such a comprehensive work here and there an error may have occurred, justified complaints and reports should be made ments will be given due consideration in a subsequent edition.

In addition, this work contains pretty much everything that is needed for Knowledge of Judaism and its harmful activities on the whole globe necessary if. It contains the quintessence of the

Jewish legislation and an almost complete list of ritual murders from the year 418 to modern times, and in which

now developing struggle of the Aryan peoples against the Jews

thum will henceforth no German candes representative the apology that he does not know Jewish law. Everyone man has the weapon in his hand and can always rely on the best relevant paragraphs. Throughout the book I have ftrictly insisted on reporting everywhere the duels from which I created, so that the Jews cannot claim that the whole book the outflow of a prejudiced fanatical brain fe. Incidentally, I have only cited those passages which my cover the experiences gained in practical work.

The first part of the book contains almost exclusively personal Experiences. Part II contains detailed documents for my experiences feverable and also various reports and memoranda, which also claim general interest. The III. Cheil the

– XXII –

Jewish legislation, and a description of the work of the Jews thums in various professions. The IV. Cheil ritual murders, Jewish crimes in general, including trials, a number of por kråts and description of Judaism in different gentlemen change, fand finally a kifte of some of the Derfaffer used, the Jews books concerning the subject.

For anyone who wants to study Judaism, there is extensive opportunity offered.

Since I am not a writer, and moreover the whole work in fix months written and printed in a few weeks, fo

I do not apply too strict scientific standards to the book

Of all the essays, only

he, who is admittedly very heavy in content, expresses the sharpest Uritics:

Rare, it is the one contained in Part III, p. 247: "The Jew

"a common member of the Aryan state". The same is

omen scientifically and statesmanlike, and I

I cannot take away a single iota of it.

Do not accuse me of being in blind rage against

because it was about Brandt and his family. It was my duty,

NN Judaism von Brandt's to get to the bottom of and the

Making finer actions to explore. The whole family

Hu Brandt has for me today only a "purely scientific

ntereffe", I have investigated how to test a product for quality

and found and also the entire then Derhaltnissen on the Austrian embassy in Peking.

Do not accuse me of incitement, but my book is Defense against the secret under the guise of religion operated sepsis of Judaism against other nations.

Nor should I be accused of having any rank.

I treat me with respect when I occasionally come across particularly Judaized gang such as cursing the professorial class. I am a cr army of art and science but a sworn enemy of the wlatanerie, no matter where I meet them in the wrong place. – I every class, from simple day laborers and night watchmen to the Minister if the person concerned has failed to fulfil his duty on the common good, but with the Jew it is such a n Thing You occasionally find a Jewish miner,

Mr

one

ing

*

– XXIII –

but then it occasionally turns out that he is beating his comrades ftears that he returns to his natural profession. Only recently We experienced that a fireman in Greifenhagen (German= Sociale Blätter No. 155, 15 March 1890) fvery diligently devoted to the profession of the chain, but kept the rescued items for himself. we have not yet experienced anything similar with Jewish ministers and officials lived, we will experience it in abundance, and the same applies to all wiping levels. I do not take any exception to declare that every German, even if he is only a day laborer, closer than a Jew, even if he holds office and dignity. I would also like to share a very sympathetic statement by Mr. Urupp: "I prefer to live in a decent pigsty than in an indecent palace."

Nor should anyone hold it against me that here and there I crude humor has let the reins run wild. The one among our The tone of "nobleness" cultivated by Hebrew citizens, which Talmudic meanness as a cover, I am indeed fluent enough, but I prefer to use a German word here and there to talk. For people who can no longer tolerate such things,

this word is not written at all.

Our German feelings are already revolting at the sight and behavior of a dirty, miserable Jew, how much this need not be the case if we accept the discovery make the so-called noble Jews, the "distinguished" Jews not only not better, but possibly even worse than their poor tribesmen. While the latter physically bring filth and vermin and deceive us in our linen, The others bring us demoralization, spiritual filth and deceive us in the great, while they have their mouths full of virtue and morality. It is a neglected people! and un-beferlich and the usury and greed of the noble Jews deserve There is no finer term than that of a beggar. –

And before some of their actions one can say:

"Disfficile est satiram non scribere!"

It is almost impossible to remain serious, for example in the chapter "Wolonial policy". Before Germany thought about colonies I had already lived in colonies and thoroughly explored Africa = connoisseurs, missionaries as well as landowners and merchants learned and heard and learned some things from them. The connoisseur colonial relations and Judaism, it causes strange Feelings when he has to experience that our German Nolonial=

– XXIV –

politics is led by a Jew who has been baptized (Volume IV, p. 159). In a letter to Prince von Vismarck I mention a court clerk Boos, the simple sailor and with a half-glance saw through what the Jewish Privy Councillors of the Foreign Office allegedly could not see.

Believe me, it would be better for our Molonial policy if we had a man like the court clerk Boos in the Foreign Office Office as such a Jewish soul seller like Dr. Kayfer. Even if Mr Boos may not be of much use, In any case, it would not do any harm. Our circumstances limit this almost absurd.

Moreover, those who value nobility fee feel reassured, because I only lead them into the "noble" Jewish society, if this term is even permissible; under a Jewish "privy councillor" I rarely do it and only show how this society, no matter how high it may be, always has a close connection with low criminality, and I try to demonstrate the exemplum ad oculos that the highest Jewish Beanite and the last scrounger who crossed the border, exactly from

turned from the same wood, that their way of thinking is always the same

vermin and above full of crime!

If you take all this and the countless others in this
Buche cited facts about Jewish civil servants in Be=
costume, so it will hardly be surprising if
also the President of the Reich Court in his old age as the outstanding
fshould represent what he will be, namely a Talmud Jew of the purest
water, where baptism and education have not helped an atom,
which is closely linked to Judaism, which is striving for world domination.
connection and is an active head of the Alliance.

This Jew in particular provides us with a beautiful example of how little a Jew of our German education and German background vision can be penetrated; Samson is or was a member of member or even chairman of the Goethe Researchers Association. parliamentary morning pint at Prince Vismarck's he rühnite the realized this and made the statement: "I do not lie down for the evening Peace without having read at least 10 pages of Goethe beforehand." The South German MP replied to this silly remark Volk in true German style: "And I do not lie down for the evening Rest until I have drunk at least my ten liters of beer With that, the President of the Reich Court was led away and Mr. Völk had the laughs on his side.

But I now ask whether a man who describes Goethe in this way attracts, can have understood the poet at all? I say "No." He only pretends to have sympathy with us Germans for his own glorification. Our education and also the Christianity sits on these stones like a loose garment that only dressed to fight us underneath. With vor= For Jews it has its own peculiarities, and I claim that a Jew in our sense is only noble and fine can, if he acts "of his own free will and without coercion" against

– XXVI –

the teachings of the Talmud openly front and with Judaism breaks. But with Samfon, the opposite is the case, as I sufficient evidence.

We see what excesses the Jewish rule in France produced, and how could it happen that we in Germany should have better Jews than the French and if at all a If a distinction can be made between racial Jews, then we can believe the French assurances that the Russian-Polish-German variety with which we are primarily fo bless you, which is by far the most dangerous kind.

Is it not downright ridiculous that we can only treat the Jews with a simple confession of faith gives access to all our state offices–ftatten (fe III. Part, p. 78) and that these people then ministers, can become vicars, generals, professors, etc. –

. In the chapter "The Jews and the Christian Church" (Part III, = 110) I believe I have proved that for 50 years Jewish influence in our Ministry of Culture is decisive Perhaps this has even been the case for some time, and one will also find that they were baptized Jews fd, which, as in Germany, also in other countries with religion and have held leading positions, and If you take this into consideration and keep it in mind, you can

ben neglected state in which the Christian church finds itself today
The old Testament, which the Jews
selfwerthtlich ft very hang, offers them a comfortable handle to
to split and destroy the Christian confessions. The story
of the Jews, the so-called "holy biblical history", is the
only one that is seriously taught to the Christian nations, because
also unfortunate and wrong way the foundation of the Christian
Keligion forms. If you tell a farmer memorable facts
from the history of his fatherland, this is for him
"Hebrew". But if you tell him the opposite, of all
Hebrews: Abraham, Isaac, Jacob, Joseph, Moses, Joshua,
David, Solomon, Herod etc. w., so he knows everyone together,
he feels at home and can fluently recite the entire litany
from ancient stories.

Yes, if these were just old stories, then it would still be
but what fables do not find it; full of all
possible taunts, murder, theft and fraud. And we know that
the Jews knew very well that the Old Testament was more of a village school
for the Talmud than for Christianity, which ultimately

– xXxXVII –

the opposite of Judaism. The Jews raid
our religion just as well as they raid everything else. They let
the devastated pasture of atheism.

And now politics! "The house of Rolhfchild belongs to no one
political party; the Rothfchilde found the friends of the King-
thunts, legality and peace (in the meantime they were in
France the friends of the Republic, of the Uaiserdom and again
of the Republic). " But it is clear that such whole and half re=
publics, as was the old Poland, France and Hungary today
fare, with their parties fighting each other to the death,
provide the best fields of operation for the Jews, because the more
parties, the less pastures. Where there is division, there
the Jew. One must not imagine that it is always
and everywhere the Alliance israrlite, which the Jewry in
the different political parties, as on different pastures=
places for their fencing and fencing. It was
The nomadic instinct itself is sufficient for this. As far as Austria is concerned,
fo in Cisleithania, especially in Vienna, the Jews are concerned about
leadership of the German party; in Hungary they are the most enraged
Magpyars and incite against the Slapen and Germans, in particular
against the Saxons of Transylvania; in Bohemia they found themselves Ultra=
Czechism; in Trieste they found irredentists. The one
Some of these leaders switch between the different pastures
places depending on their personal advantage and find today also
excessively Hungarian, as Czech yesterday, and Ueiner of
they lose even for a moment their overall interest

Juda's out of sight. – What applies to the parties also applies for clubs, such as school clubs, student associations. Gymnastics= clubs, Wagner clubs, etc., also, as they say, for the free Masonic lodges. Here too, the Jew proves himself to be a raging raider, by attacking the ideas that those associations serve

folll, which undermines life." |

Dr. A. Wahrmond "Law of Nomadism", pp. 193/198.

What is said here also literally applies to our German relationships, even on the confessions and one must not wonder if the Jews also try to use "anti-Semitism" When they were expelled from Spain, they actually done, and in the section of an article entitled "The Lower course of Spain", which I wrote in the chapter "General observations"

– XXVIII –

abörukke, one finds how the baptized Jews in the priest's robe this Land: subsequently even a curse. We are witnessing click wonderful things. In Russia two larger heaths "Nowoje Vremja" and "Grafhdanin" with the Jewish question, and the Jews recently offered to take over these newspapers– with the condition that these newspapers are still retain the anti-Semitic tendency in their hands and should only later be transferred into their sound. The is eight Jewish. But even in Germany we are already experiencing something Achaliches with the newly invented General=Anzeiger of Moses and Conforten, which also publishes all other influential newspapers to try to eliminate. These papers also retain the loral tone and thereby fall in love, and then later to completely convert into the Jewish culture. public extraordinary facilities for advertisements and work before under price, i.e. with damage. They thereby force Legal papers, which of course are not subsidized by the Alliance advertise to work below price, and something like that is a real political murder. This is a powerful operation of the Alliance, which one should go to the collar with force, although the Jews swear that these maneuvers will not work and will not lead to anything about it. –

The "Jewish Press" writes with reference to the measures that one in Russia against the Jews, that now in Russia hd a lot of Jews were baptized for show, but the faith would remain faithful to their father. This is also clearly stated and lets us see what no one should think of baptized Jews. The pressure against Jews, which is today all over the world and especially in Germany is so great that one can almost

can't see the forest for the trees. The good, in tolerance:
poorly educated Germans, can not imagine
to understand that a person who looks similar to him is a completely
other constructed brain, and the old Prussian believes
still that a ministerial tailcoat or uniform requires that
there is a person inside who is completely honest and reliable and
not true. The Jews have taken advantage of this cave belief
made, and while outwardly they imitate our customs and traditions=
take, they rob us with the help of their tribesmen
They tend to the nations in their own way
flattery, in France they circulated the slogan of the
grande nation", the Germans treated them as "people of

– XXIX –

thinkers" and make the English believe that they are great music=
Whether the Jews invented these slogans themselves
It is difficult to say what this nation has, apart from bankruptcy,
Exchange, stock market games and theft actually nothing was invented, even
They have borrowed their language and religion from other peoples,
just as they once gave the Egyptians the silver and gold
stole barrels.

What we need is the knowledge of the Jew. The
What the Jew deceives is his own person, as we see in Part III.
p. 76, he goes so far, if necessary, that he denies the existence of his
entire personality; then that he renounces his Jewish origins
denies like the Lindaus and sails under false names.
But all of him is and must be concerned with his
so-called religion, or, as it should be better called, the
criminal coder of fine legislation. Thanks
the Jewish influences, this deception is on a grand scale=
ftabe succeeded. The Social Democrats count around 1½ million
Voices in the German Reich. How many of this number of
Germans have an idea that through the teachings
of the Talmud and how many may like the content
of these honors? I don't think so, not one percent. And how little
is even the number of educated people who are interested in this study
It is on the part of the Jews who have completely
know and have the full consciousness of guilt, a tremendous spiritual
fraud has been committed, which it is our first duty to make good
fine. So make the German people, especially the social
Democrats became familiar with Jewish legislation and within six
months, although the spirit in the masses only slowly develops
I am convinced that the people themselves would
Drive the leader away. (Perhaps the people would then also like to see how
it is deceived and it is perhaps infinitely more decent and advantageous=
find it more difficult to take the Anabaptists' ill-earned money
than to live by their grace.) This seems to me the simplest manner
to fight social democracy in its current form.

But this suppression of the knowledge of the Jewish secret teachings is probably not only below but also above been practiced. Just read the proceedings of the united state parliaments of 1848 and one will find how little the theory of Judaism, i.e. the Talmud. One finds that there only, some very good, "practical" concerns about the

| – XXX –

Emancipation of the Jews. (See Part III,

p. 58.)

It is precisely the Jews who accuse the Jesuits make sure that they are committed to the education of influential personalities powerful and thereby seek to gain influence. The Jews be= The Jesuits seek as their competitors (inde illae irae!), because in the teachings of the latter a drop of Talmudic spirit penetrated. We see the Jewish=German Delbrück family since the year 1800 in an educational manner at the Prussian royal court court and actually it would also be the case with today's entry= fows of the Jews would be wonderful if they did not do everything to the verses of the Talmud were kept secret from the rulers of Aryan countries to keep; because according to his teachings, not only the bloody devotion sacrifice of the king was especially sacred (see Part III, p. 90), but also its deception and stun.

It would be extremely interesting to have statistics of all the baptized and unbaptized Jewish people who have been of the century fine things were done at the Prussian royal court has and still does. Because with a side space of 100 years we have to reckon with today in order to understand the courageous circumstances to learn.

For a ruler today it is almost more important to enforce the law to know the teachings of the Talmud rather than the teachings of Christianity. That our present Emperor was educated in the teachings of Christianity There is no doubt about that, and he is also considered as ruler over the Differences between Catholicism and Protestantism taught fine. But we have a third "so-called" religion in us ferem Germany, a religion that is a religion of the rabble, which natural heritage of a people who have only been living for a little longer than 0 years of equal rights and that, like the rest of us: will demonstrate that his equality is only a consequence the concealment of fine laws. Has our today= Did the Emperor ever study Talmud? At the gymnasium Certainly not, because you learn a lot of other things there, but just not Talmud. Has our Kaiser ever attended a rabbinical seminar, or taken lessons from a rabbi? We know that pretty well= ly sure that this is not the case, but it would also be of little

have benefited, since it is the sacred duty of the Jews to spread their teachings to keep secret. Who found the later educators of the shark?
who and who would have been entitled to the
To make the Emperor aware of the teachings of Judaism P

– XXXI –

If such persons were baptized Jews or of Jewish origin,
They are indeed made into anti-Semitism but still always
have claimed, as most baptized Jews do, that the
The Talmud's verses are outdated and no longer followed,
although exactly the opposite is the case and I would not

in the slightest astonished when in the Jewish interest, in the interest

the Alliance committed exactly the same fraud on the person of the Uaifer
practiced as it was on the great mass of the German people,
because, as I said, these two major factors are the ones
which Judaism has the greatest interest in deceiving.

When, after the founding period, it was a question of changing the names of the
main founders in the Reichstag, the Lord Court=
preacher Stöcker had the list of founders in his hand. He took
but decency to read it out because there is a name under it=
found, namely that of Mr. von Wilniowski, because he or his
Relative was head of the secret civil cabinet of Haifer and
because he believed that out of respect for the Haifer this name
to remain silent. This was a mistake on the part of the courageous court=

preacher; on the contrary, he should have mentioned this name first,

to warn the emperor.

For example, if it were true what is rumored today that
precisely the people with whom the shark most often
comes, namely Privy Councillor Dr. Hintzpeter, Privy Councillor
von Cucanus and Dr. Paul Güßfeldt were Jewish descendants,
related to Judaism, that the Alliance succeeded
would be to bring personalities she likes into the immediate vicinity of the
ruler? The ways of supple Judaism
find so diverse and hidden that this possibility is by no means
is excluded.

I have tried in my own way to get to the bottom of this matter
to find out whether the cat has learned the teachings of the most poisonous
Kafe of the globe, from which we have a large number of persons

as fellow citizens in Germany and who therefore also subjects, knows.

For this purpose I have taken the trouble to

Statements by the Emperor, whether written or oral, as far as

I managed to see them, to examine them and I am

In this way he came to the conclusion that he could avoid these dangerous teachings cannot be known and that they have been withheld from him must, or that if he knows something about it, he will be informed

must have taught them to wear "old trousers from

Nanaan", as the Jewish-German professor Franz Delitzsch from who, with the same audacity as any rabbi, of the Talmud and the blood ritual of the Jews, while it It is proven that ritual murders are taking place all over the world increase exactly as the power of the Judenthunis increases= takes (fiche IV. Part p. 1). The image used by Delitzsch characterizes in an excellent way the Jew who in this saints. –

If, for example, our Emperor had known the relevant teachings, would certainly be in the last school committee appointed by him fion not so many Semites have been sitting; yes, perhaps no only one.

I am firmly convinced that the German Uaifer= throne around a great Semitic fraud is going on, even more, that even our Uaifer, without knowing it himself, with the Semitism, like the majority of other mortals, struggles with Aryan Origin.

From all the Emperor's statements it is clear that he how a German thinks, promote German culture and fine German

subjects happy. He always makes the right points and points to the wounds that he would like to heal. ft 3. V. the social question, the school question, the increase in desmoralisation in the army and beekeeping. With the right instinct he had found that the party formation, i.e. division into the par= lamentations are harmful, and it felt that the Jew was firmly entrenched in them= He tackled all these important questions and with an openness that does credit to his character. It is an extraordinary occurrence that a ruler of the interpretation of our Emperor by personal intervention in such important questions of general uritis. Some people consider this to be dangerous, perhaps not entirely without reason. But on the other hand we see it and have the infinite possibility to know that our Uaifer thinks German and by no means tends to get caught up in some kind of trap. But on the other hand, one must also ask oneself how a ruler who is surrounded by secret Judaism is that the effects of his orders mediate his position of power can frustrate. My case gives evidence of this mysterious effect a sufficient example, and it can be assumed that such things are happening on a much larger scale. The people, who protected Mr. von Brandt and kept him in office,

– XXXIII –

must, to a certain extent, be participants and accomplices of this deception. And then I should keep silent

We live in an interesting period of history. The Jews know that their deceptions are spreading all over the world. begin to be discovered and that their rule will soon come to an end will take; that is why they are still making all kinds of desperate efforts= to prolong their rule through lies and deceit.

Exodus 12 states:

35. And the children of Israel did as Moses had said and demanded from the Egyptians silver and gold their equipment and clothing.

56. Moreover the Lord had given the people grace before the Egyptians, that they lent them; and they took it away from the Egyptians.

What were the golden vessels about 3200 years ago, the fie borrowing and stealing from the Egyptians, that is what the state authorities find today loans, LCatifundia and industrial establishments, which gradually and as before in Egypt, you have God has shown them grace today by separating us from them

Laws and economic doctrines imposed on them, mediated through which they can quickly enrich themselves and enslave the natives. They have to understand the most elementary and simple views knew how to turn.

It is an extraordinary and simple fact that, if it were possible to raise the working population of Germany and to bring them into better living conditions, to must become more capable of consumption by improving their housing conditions niffe and Cebife improved. But our Lord, the Jew, gives not allow that something like this is pursued seriously and sensibly; otherwise the Bourse Jews, Cotterie Jews, peddlers and schnapps Jews Therefore, the people have to deal with the cheap deception= pictures of the future state, schnapps and finally fogar with for so-called science. Just as one can be misled for the People consider the worst liquor to be good enough, they treat it even with the worst kind of science. The science, which the people really need has been withheld from them, and that is "the knowledge of the character of his exploiters".

The same applies to the working populations in Germany,

also applies to the native population of our colonies. What

it is useful that we poison the people with liquor p Who has the
® 6

– XIIIIV –

Advantage of this? Some merchants, perhaps Jewish men, find this origin, or Jewish sentiment, who work with and for the Jews, who want to enrich themselves quickly, but consider the natives too future holonization and true culture. Such a speech as the head of our holonian office, Dr. Kayfer, said before Hurzem in the Reichstag was genuinely Jewish, it not only had the smell of the nonsense, but even more of the Talmud.

Our big industrialists run the greatest danger from the Jews= thum to be shaved. What can it do to an establishment like Krupp was blessed with such a representative as the Jew Mandl That such a man can never have any other intention, than to enrich oneself as quickly as possible and at the same time with help to disparage the good name of Krupp among his fellow tribesmen, so that they can bring the whole establishment into their hands, one can feven before this person was publicly branded by the Chinese, I have the shame full catastrophe was foreseen (see Part II p. 87), but even The latter does not even seem to be a sufficient indication for

Mr. Krupp was too fine; one seems to have taken such hints with not wanting to spoil the pig pole. I can change nothing about it, but at least warn. May our Large industrialists once my reports in Part II to the imperial Chinese government and the German embassy. The felben find entirely in accordance with the facts, from which you may seen that once with the world markets and the new fields, which the Jewish traders always used to sell their goods brikate pretend to conquer, can come to an end after they raided, and that it might be good to think about such eventualities to think and to keep a closer eye on the Jew. Hein Jew, whatever he may be called, can ever have an interest in to promote German industry, just as little as there is any a Jew can be concerned about the well-being of Germany in to promote any form of government, the Jew can only in himself and think of his own people and their advantage.

In what follows, I should not be accused of being in= acted discreetly, because there is always a limit to discretion, which I believe to have exceeded only where absolutely necessary, after I have tried everything in vain to get the personal opportunities to be handled discreetly.

Nor should anyone accuse me of being careless with the sea; I know exactly what dangers I am running,

– XXXV –

that if our Hebrew fellow citizens could dare, “according to their religious laws.”

And if they can't do the latter, I know what fifth is imminent. It is what keeps so many people from Judaism. Mr. Pontigny gives this feeling thank you drastic expression and I allow myself the relevant passage to quote from his foreword to Rohling's Talmud =Jews:

“If one tells the Jews of today that they are the heirs of their ancestors, driving and certain safety measures against them are not un= would be appropriate, so it is said, it is contemptuous envy that comes from one speaks and infamous greed that consumes us; one is the “Shame of the Century”, the “scum of humanity” ity”, the “excrement of nature”, and it is about our Head emptied the vessel of filth, which every writer Israel filled in his hand.”

I have to be prepared for this kind of thing, but I am armed.

Nor can I be accused of asking for the reason=

sentence:

“Calumniare audacter, semper aliquid haeret!”

(Just slander boldly! Something always sticks.)

because I wanted to present myself to the courts and provide evidence.

Finally, I am not suspected of having personal Ambition or vanity and at any price my person in to the foreground in order to give it an extraordinary importance and to gain fame. I know it quite well that if a single person suddenly disappears from the face of the earth disappears, the world will exist without him, even if the greatest ruler on earth. But I believe for the good= well-being of a large part of my fellow human beings when I bring to light the facts which lead to life has determined my destiny. My importance in the Eyes of the Jews consisted exclusively in the fact that I a field that seemed to be successful, which she would gladly use for the wanted to conquer the swindle, and that with my person coincidentally a sum of 305 million marks, to which they were entitled believe they have a claim to their religious racial laws, i.e. in other words, that in their opinion I have about this amount, to win over the European public if the venture is successful could have cheated, to escape their greedy fingers threatened. . according to the Jewish religion of the Jodi

– XXXVI –

This is the crux of the whole intrigue that I am here complain. The Jews will, if they do not try, to silence this book, to shout that it is a hate book and I am a The slanderer. But, I ask, what do I want to do differently than before?

be admitted to the German court? I have not

Once demanded an open punishment of the criminals. – After I necessarily bring forward such accusations against Judaism= I would be lost if I were to join a I wanted to set up a court that was somehow suspicious of Jews. It would be completely different the matter would have looked if Bismarck had and admitted as evidence. Then today perhaps our Reich Court President and a whole series of Jewish officials behind bars for actual treason and high treason I always assume that the Prince of Bismarck is not generally fcient thing with them, which I still do today does not want to believe). |

I believe that the matter is important enough to warrant a
To make a state affair out of it, of course not because of me personally,
but for the good of the fatherland. But today you have
Imanden before him, who does not fear the whole of Jewry and from
voluntarily insists on being admitted as evidence.
However, I would have to be allowed and the necessary means
to give me the opportunity to provide this evidence and I
can thwart the intrigues of the Jews.

I urge you, gentlemen, to leave this matter
not go uninvestigated: If such things go unpunished,
fo you create untenable conditions and a bureaucracy of
criminals. You will not easily get a case again,
where you will find Jewish subjugation in such abundance and in such
different forms before your eyes. They have the raw
violence, the whole scale of Jewish suspicions and slander=
ments up to the flattering and humiliating letter of the Hebrews;
They have high-ranking officials who have the confidence of the Emperor and
of the fatherland and Catilinarian existences, which they
use for their own purposes. –

As in 1840 during the trial of Father Thomas in Da-
a lot of Jewish money has flowed to paralyze justice
m, so it will happen here in this case too. Here
There will be no doubt that Judas Kohn will be deserved; but I
I know the secret ways of the Jews too well not to investigate them thoroughly
Let us assume that Father

– XXXVI –

Thomas managed to escape with his life and the hands
fine Jewish “friends”. What would happen if
what fine? Father Thomas would simply be considered mentally disturbed

| have explained and condemned all possible witnesses for this purpose

For this reason, in this case too,
some testimonies of unfortunate people who perhaps against their will
the intrigue is forced into it, only give the due value.

But I have, in addition to the burden mentioned in this book,
material still a lot of the same against the international
Crooks= and Jewry, which threatens to ruin our fatherland, in
the hand, which I will only hand over to such people,
which I personally consider trustworthy. I declare
However, I hereby agree to provide circumstantial evidence against the
to lead a society in which everyone can see

that my accusations are justified, and I am ready, if
If I should not succeed in this, I would gladly accept the justified punishment, such as
who would deserve such worthless empty accusations, without

situation to endure. I would not know what I

could promise more. I hereby repeat my Part I,
P. 65/64 formulated petition and recommend myself in the first instance to the
Protection of His Majesty the Uaifer and all those who
This book is dedicated to. But should our governments
the connection with Judaism has already been weakened,
that they no longer dare to take this matter into their own hands,
then I see, however, that the Jewish question has its solution in a

will and must find a violent way. And should it be the Jews=
succeed in eliminating me in one way or another,

then I place myself under the protection of the public and I judge
to all those who are interested in the practical solution of the Jewish question
Participate, the request to remember that One who thought so
has brought about a peaceful solution to the Jewish question
want, fell victim to the Jews, and that then every man,
8 kills a Jew, and kills another one especially in my memory.

To all those I address, I would like to point out the but=

| belief that the Jews would like to teach us,

that the Jewish question can no longer be solved, that it is too late. In

On the contrary, it is easy to put the Jews back in their place=

but some patriotism is necessary and also
some clarification of the question, for the study of which I have sufficient material

It is a "nose question" that we are dealing with,

rn. nl "

and like Disraeli in fine Endymion" (Volume II, p. 18, Keipsig, Cauchnit=Edition) says about it, there is no question that raises such a fine Discernment is required and the principle that if one it does not understand from the bottom up, so easily appear as a will-o'-the-wisp could know. (But there is no subject which requires more discriminating knowledge, or where your illustrating principle, if you are not deeply sounded there may not be a chance to turn out a will. o. the · wis p.

Yes, Disraeli is right, one must know the race question and thoroughly, a bungler cannot handle it.

The Jewish question would be extremely easy to solve if the Kaffé not endowed by nature with an extraordinary ability for deceptions. Judaism produces all types the human race, from the albino with white hair and red eyes to the dark-colored Negro with black woolly beard. We find Jews whose shape and nature resemble some amphibian 3 B. remind one of the frog, and sturdy figures like a butcher. companion; we see the little Jew, whose whole being is a constant request for forgiveness seems too fine for his existence, and the shameless, cheeky Jewish brat. As parliamentarians, we are in all parties, from the Social Democrats through all shades ftrëfts to ultra-conferfts. We see them in all conf flections, from the rigid Orthodox Jew to the enlightened Reform. Jews who deny the Talmud, and we see them as "anti-Semitics"; we see them crossing the border as young men selling trousers and at all levels up to the minister and bishop, but all together a secret bond connects us, and that is blood, it is the honors of the Talmud that are printed in their brains, They are all kneaded from Talmud, as Drumont says, and that should never be forgotten. – They are wrong players who are playing at the wrong find their pleasure in playing (see Law No. 42, Part III, p. 20). who communicate with each other through secret messages, which some Let participants win first, in order to later plunder. If a ruler gets into the volumes of such secret Cliques, so there are only two alternatives for him: "either he through them in time and chase them away, or he be= unconsciously participate in their false game with patriotism and the wealth of nations". In In the latter case, it is irretrievably lost, which not only history of the last 100 years, but also in particular the history

history of modern times has taught. All the Jewish people, baptized or

= IRLIN

unbaptized, denying fine origin, all the people with two or

more names, all the people with false ancestors, they pursue with their deceptions have certain purposes and are not part of the Ulafe of People who it is desirable to be citizens of a state

There are almost only noses and religious questions that concern the world. because. No matter where you look, you will soon see to reach this realization. Therefore, one wants to address the racial issues study, but not with Jewish professors.

I know very well where the greatest difficulty of the solution The question lies with the upper classes. Judaism has either the noose thrown around the neck or in some Weife implicated in his guilt. Ahlwardt tells us on page 196 fhis book that in voting on the intended statehood= lation of the Reichsbank in the Reichstag 50 members alone from a There was no party that wanted this measure to be implemented. This seemed to have forced Judaism, and one sees, what influence Judaism is able to exert. In a The German element should therefore be treated with leniency in answering the question. It would be necessary to provide complete immunity for all Germans for debts contracted against Judaism or Guilt enforced. Another solution would hardly be conceivable. The German who has sinned with Judaism is only too often innocently fell into the clutches of this evil society. He may be to blame, but not all hope is lost. That but the Jew has lost all hops and malt, has given us fine four thousand years of history and recently again fine forty. year of equality in Germany.

I call out to our German princes: "Beware before the smooth Hebrew, whether baptized or unbaptized. He flatters your evil fentiments and can only

Your misfortune. We live in a battle of Aryanism

against the Hebrews. Your thrones are taken by Jews and their Villages surround you, which will lead you imperceptibly into the cage of the Hebrews= thums want to drag across, and your ruin will be sealed fine if They succeed in doing this. There are two enemy days and only in one one can stand. And it is more natural for a German prince to stand by the Germans as the children of Israel, who

have so badly abused the freedoms granted to them." But German civil servants should be warned that because of their own and * Minder's future inappropriate NKollegia=

- - -

may seem exaggerated or unbelievable, I recommend=
read in Gougenot des Moussenux "Le Juif" Cap. IX under Pie I

et la diplomatie européenne militant en faveur du Juif.”

Prince von Bismarck and the Indians. Part III, p. 139 ff.

It is a pity for the man who had a real ideal of the people and whose fame is now gradually fading 405 and it is embarrassing for one of his former admirers to his “abarmament” of necessity. It unites, it is effectively the nemesis that overtakes him, and the more one delves into his politics deepened, the more it seems that he has a large part of his fame with the help of the Jews at the expense of the German fatherland “Every sin takes revenge on earth” “Qui mange du Jew and die!”

I would like to add the following to my observations:
Add notes:

Why did Bismarck allow officials to enter the Reichstag although he himself described it as wrong?
RR and he resisted allowances for the Tuesday evening meetings

n

– XLVII –

Why did he allow the freedom of movement that the Jews enjoyed so

for 1 usury? MER

Therefore, he advocated the “crystallization” of wealth and spoke out against big capitalism

Why did he allow speeches not to be read in the Reichstag?
may be?

Did he never speak of the existence and work of the Privy Councillor
Did some of you, Chief of the Civil Cabinet of His Majesty the Emperor, know?

He never knew that under the court there were a number of secret Jews?

. he declares his hostile behavior towards the current
aifer? f

How does one explain his friendship and affection for the Jewish suspect advised and the Jewish Ferry?

Did he never know about the blockade of the Russian-Polish Border by the Comité's of the Alliance?

All this seems to indicate an abusive preference and toleration of Judaism, and even if he does not, as Brandt suggested, should be of Jewish descent, he has

much to do with Jews. Else that also for his Ver= hold, at least from 1871 onwards, the "Talmud" gives a lüfel.

In 1889, around October, the Berlin "Volks= geitung" a very strange editorial. It was this one

except how one should govern, supposedly as S. h from the Chancellor von Bismarck on behalf of and for His Majesty the Kaiser. The recipe was roughly as follows: Let the People do what they want, observe the political currents and put N on the side of the strongest; also a very convenient amateurish recipe, but without any patriotic and right Ambush; a government of power HR without duties. Unfortunately I do not have this article but only the reason= thoughts in the 1. The Berlin newspaper "Der Reichs= bote" took up this article, but it was immediately distributed among all Jews= newspapers as fake and non-existent. It seemed This article had accidentally appeared in the Volkszeitung, and I said to myself, "You don't chase such things 1 Fingern," just as little as, for example, the Berliner Tageblatt's February 18, 1891, that 'I have brought it to safety in a London bank. How might it Furthermore, rumors are circulating that the Prince of Bis= Marck is said to have bought land in America? Should this all fraud and based on idle inventions?

Prince Bismarck refused the title of H 90 von Lauen= burg 5 When Pompey defeated the Jews in % äjtina he refused to accept the honorary title of Palestinian or Judaicus, namely from 5 chen 8

ompe

had something to object to. W

the title of Duke of Lauenburg w 9 90 1 rden dem

o easy from the the Prince of Bismarck after –

. the honorary title of sympathetic person, which was given to Pompey, being

A statement by the prince goes something like this: decent People could not work for him. Dielen's saying has probably never believed to be taken seriously; but isn't he strikingly right – with the claims of Mr. von Brandt? Does he not insinuate the Jewish tendency to bring the lowest to the top and to create capable 5 ben side to push;? Isn't the Foreign Office full of uden

Now we see the great man, as he is called a Jew to accept a seat in the Reichstag. Doesn't it look like he's playing like a player? table to gamble away the last remnants of his fame? Years ago he had his wife assure us that a wreck that is more interesting than all politics, and now we are experiencing we that a small political role interests him more than the whole Agriculture. "Sic transit gloria mundi!"

The Indians and the Army. Part III, p. 151 ff.

In this chapter I have taken the liberty of referring to the major 1 to point out the Germans in a war on the part of of the Jews and I would like to add a few things here.

The Parisian Figaro published in its No. 9 of 26 February 1891 Memoirs of Prince Talleyrand and in them one finds the following case:

"After 24 hours I left Austerlitz. Two I had spent hours on the terrible battlefield; the Marshal Lannes had led me there and I believe it Honour and perhaps military honour in general owe it to us to confirm that this same man who the day before

and the bravery that showed the greatest personal courage had proved, as long as he fought honest enemies, quite few was when he saw before his eyes only dead and wounded of all Nations. He was so moved that when he showed me the point from which the main attacks had been made, fayed: "I can't stand it here any longer, or you'll have to mix to strangle all these worthless Jews who rob the dead and wounded." – |

General de Ségur tells us further in his fine "Histoire de Napoleon and the Grande Armée in 1812", livre XII. Cape. III, that uf! the retreat from Russia 20,000 Frenchmen with 300 officers and 7 generals remained in Vilna. "The Lithuanians, whom we

left stitches after we had plunged them into misfortune," says the general, "took some of them and saved them, but the Jews whom we had protected, 1 the others back."

"Yes, they did much more. The sight of so much suffering aroused their greed. If their worthless greed for money would have let them exchange their infamous help for gold

"

--/

– XLX –

baptized, history would disdain to fill its pages with such disgusting facts; but that they our unfortunate lured the wounded into their houses to plunder them, and that later, when the Russians approached, these unfortunate Dying exposed from the windows and doors of their ele out and let them die mercilessly from the cold . and that these filthy barbarians even in the eyes of the Russians sought to gain a merit by spreading the misfortune ly still tormented, these terrible crimes must be present and future ages."

So says this French general, who was an eyewitness of what he says and this sounds a little different than the constant Humanitarian assurances of our Jewish benefactors. Yes, the Jews just want to make the other peoples' eyes cry.

Something similar can be read in Part IV p. 205:
"Jews in America,"

and finally Drumont gives us in "La France juive 1" p. 396/396 a need description of 9 9 7 body snatchers. So beware one must beware of our Hebrew fellow citizens in the war.

Jews in the justice system. Part III, p. 177 ff.

The Leipziger Tages=Anzeiger No. 155 of 8 March 1891 brings following note:

In Jewish newspapers we find the following appeal:

Leip 10 2 March. In Leipzig a number of Israeli
Gentlemen are open to founding an association which will strive to
all in those published by Mr. Theodor Fritfsch Jews=
hostile newspapers, insulted and slandered Israelites to complain

Ceheimrath Profeffer Dr. Rudolph Virchow. IV. Theil p. 153.
The German text of the song on page 155 reads:

My husband, the Oberst=Commandant
Died before the enemy by baccn

And left behind instead of gold and trinkets
I only need a fine shako.

Now I live here as a widow
Strictly separated from the world,
O look down from that land
Are you finally satisfied /

h dir jept out my commandant,
t you now well my commandant,
foon, fooner foon than like here below?
3 you now well my commandant,
Are you sitting well, my commander?

The B'ne Briss-Orben. IV. Part p. 208 ff.

In the Jewish Press No. 10 of March 5, 1891, one reads:
Berlin, March 2. "Yesterday here in la Feier a fourth
Weigverein des B'ne Riss – Ordens was installed, which
amen Leopold Zunz=Loge received."

This order has a . in Hamburg, Wiesbaden
and other German cities, as well as in Cairo and Beirut.

Indencliauen.

I leave a number of Jews and Jewish comrades and their
Context, as it emerges from this book, follows:

von Brandt: President of the Reich Court von Simson and his family:
| the three Lindau brothers; the Jew Mandl; von Ketteler;
the Jew Neuftadt; Prof. Julius Leffing; Bleichröder; Schwa=
bach: Reichenheim: the journalist Bernhard Krauß: Justice=
rath Horwitz: e from Madai; Ferry; Constans;
Göfchen: the entire Berlin Jewry, the Foreign Office:
Feld Dernburg, the German-Asian Bank in Shanghai, Moritz
Calf.

The Jew Mandl: Rudolph Lindau from the Foreign Office:

well imagine that it arose from purely German elements.
ment stocks that were neither Jewish descendants nor related to Jews,
nor connected to Jews, nor indebted to Jews. Then the=
felde have a meaning, and one would have to include the members of the same
respect, even if they are accused of ignorance of the Jews=
thum could not be spared. But what should one now make of these

ten who join forces with the Jews to create a
Because something else is going on

– LI –

The matter is not ultimately resolved. For example, you can find the Ge=
Commerzienrath Baare in Bochum. I really want to know
whether this gentleman, who had been a simple freight forwarder at the
Cologne=Minden Railway up to its current position=

has swung, is of Jewish descent. I have nothing more
Respect than for a man who has risen from a small position
has worked his way up to a high position through his own ability,
and small weaknesses that betray the parvenu, I keep in one.
Such a case is more than excusable. But as it seems,
Mr. Baare, in his eagerness to act, became too concerned with the
international entrepreneurship. Apart from all the
The branch establishments of the Bochumer Guß also provide this information.
steelworks in Swona (Italy), and Seville (Spain).
Here Baare treats fine workers well and they respect him
95 but I do not think that she is far-sighted enough to
see that their boss is pursuing a policy of exploitation on the stock exchange, which
fit indirectly damages itself again.

The new tax evasion case of Mr Baare has a
extremely deep impression on the rest of the working population of West=
falens. People are rightly asking themselves why
they are required to pay the full taxes, while the
Great, who does not fulfill his duties in this Dun, completely
ly unpunished, remains a member of the State Council, and still with
Orders and decorations may be adorned. Mr. Baare is said to be related
been fine with the late "ideal" MP Löwe=Calbe,
a Jew who spent the last years of his life exclusively with
is said to have been engaged in the study of the Jewish question. Related is
Furthermore, Mr. Baare with Baron Adolf André. Earlier, when this
When Mr. was still simply called André, he enjoyed the reputation of a
capable usurer, who without mercy even the smallest victim
throat tightened. Mr. Andre is a fun-loving man of the world and
au a beautiful American woman, born Palmer, as his wife. Mr.

ndre has a distinctly femitic type, and in my case
On various trips in different countries I have often
Heard complaints that he had "tricked" people. After
since Mr. André has acquired the title of Baron somewhere, he lives in
London as a financier and allegedly has relationships with
various ruling German princes. Whether he finally better
will treat as his previous commercial N I can
u don't know. Incidentally, we find the name of the Lord
Baron André in the article "Jews in England" Part IV
p. 220 of the book "A Peep at our Cousins" (see Books
list).

Is Mr. Baare a descendant of Jews or is he
Judaism only through N? Its impunity is
He certainly owes this to the influence of Judaism. Here
There may be room for a small, significant story that can be told in
the Westphalian industrial districts.

Mr. Krupp in Effen was responsible for the communal taxes in the city

*

Effen had been overestimated by about 100,000 Mk., and he wanted This was to be proved by presenting his books. They wanted to to refund the overpaid 100,000 marks. But when he heard that as a result of such a repayment, his 9 will be taxed higher he waived the 100,000 Mk. Mr. Baare hin= egen, who was caught in the act of deceiving the city, If you don't want to make things right again, to wriggle out of the bad affair in a pitiful way. [ht these two gentlemen have different views of n rights and duties. Noblesse oblige! –

What remains incomprehensible to me is what Mr. Krupp thinks like when he sees a Jew like Mandl in his crowd: this Jew, of whom someone said: "When he smells a rose, then must stink!" Does he believe that such people and Mandl's spear= journeyman von Ketteler can do him honor?

Empress Frederick in Paris.

The events that occurred during the recent presence of the Empress Friedrich played in Paris, are almost identical that of 1883 in the presence of King Alphonsus XII. of Spain, which I personally experienced (see Part III of L'Alliance isradlite universelle p. 44. That the whole thing is about Jews and perhaps even instigated from Berlin, there is no I have not the slightest doubt. The Jews love the passport triotism of the peoples and to use it for stock exchange purposes abuse, they would like to provoke a war. What What surprises me in this regard is that the German newspapers We could not have appreciated the incident any better.

It is impossible to expect the 18085 to Love Germans beyond measure. After all, we are primarily who brought the Jewish plague to France, who still flourishes today under German auspices.

Julius Neumann.

In the Jewish Press No. 10 of March 2, 1891, one finds

following note

"From Baden, 2. 8 It is gratifying to see how our believers even in the most remote countries to significant positions and how their efficient performances find recognition at the highest levels. His Majesty King 7 the Geefborsog of Baden Mr. Julius Neumann from Rannheim was granted permission to use it as a representative customs office= director in Kiungtfschau (China) awarded by the Emperor of Anam

Dingiendlreng of the Anamitic Dragon Order and to

en.” |

The Agony of Israel by Georges Vitoux. Paris, Albert Savine 1891.

This book has just been published in its second edition. How
It seems that the Jews are now in trouble everywhere,
knows them more and more from day to day, they become afraid, and all lies
+ Deception will not keep them from their deserved fate for long:

üten.

Incomprehension of Jewish legislation.

How bad this is in our country is shown by a case where
a legislator who even has the reputation of being courageous and German-minded
too fine, in order to obtain some Talmud passages, which he had for the preliminary
to pass a law restricting the Jews,
turned to a publisher. He suggested some books, but
they proved to be too costly for the legislator. Finally
find the requested Talmud passages for the gentleman in question free of charge
The sender did not even receive
receipt. This case also shows how much one still
the seriousness of the are e underestimated and how little one in German
higher circles know the Talmud. One should therefore direct the
rungen urge, the translation of the Shulchan Aruch as quickly as possible
to take up positions. This can be done in a few months.

A complete work will now cost around 250 Mk.
500 subscribers are required, of which only 130 have registered
The Jews are trying everything possible to make this translation
The governments, which spend large sums on all kinds of
and spend, should not be afraid to use these relatively
sum of 125,000 Mk., which covers the production of the entire
work costs.

Windthorst.

In the obituary published by the Berliner Tageblatt this week
ordered, one reads that Excellency Windthorst was the first justice=
minister who allowed Jews access to the justice system. –
This should give cause for thought and reflection! –

Chancellor von Caprivi.

. In the Reichstag session of 13 March 1891, the same
some remarks on the importance of the Chinese market for
German industry

If one knows the sources that were given to Reich Chancellor Ca=
555 are available, one can get an idea of the value
such communications. These partly breathe the spirit
of Mr. von Brandt and his views on business, namely
foot that our navy serves more to bring in business
from which the Jews “earn” rather than regular trade

30 Hin convinced that the Reich Chancellor is also
is misled by Brandt, like me and many others.

– LVII –

China's orders for armored ships in Stettin have been
and day played a refuge role, and all sorts of people want
have earned merit for it, including a whole an=
8 l, which had nothing to do with it. In Part II

48 ff. I have in a confidential memorandum to the
Brandt reported on the genesis of these orders. This report
was not for the . e and out of courtesy against
feln von Brandt are in the same his merits for this

positions in a brighter light than they actually are
earn.

As I communicated to Mr. von Brandt in 1879, in which:
Relationship I stood to the "volcano", there was already a part of the
work done, and he heard perhaps for the first time in his life
of the existence of this society. This report actually contains
real truths and I will not let anyone negotiate with me about them.

Many people can imagine themselves in such an armored ship construction
earn merit, and they have done it, and it seems to me
not to diminish anyone's merits, but Mr.
von Brandt, who started with the idea that the
aliens should deliver bad ships for expensive money, which idea
I vigorously opposed, clung to no success and fine
Fingers stuck into them more than was perhaps good.
Already in earlier years he wanted to reap undeserved fame
and are extremely concerned with these battleship matters:
I knew this very well and Mr. von Brandt
this vanity, because I consider him to be an honest man
Mr. von Brandt told me in 1883 how a
A monsieur le ministre de la marine in Berlin, addressed letter, the
was intended for him, with the then Chief of the Admiralty
had arrived. The person who sent this letter
19 was also known to me: Mr. von Brandt had opposed the same

He spoke so much about the Stettin ironclads that they
in their ignorance took him for the German Navy Minister. Mr.
von Caprivi, who, as Mr. von Brandt told me, wrote the letter himself

opened and then delivered to him, this small advance

everything still well remembered. It is clear from the same that Mr.
von Brandt did not even reveal a secret to me about it.
that he has taken on an undeservedly large role in these affairs of
towards the outside world.

It was the beginning of 1884 when Mr. von Brandt,
as he often did, asked if I had any
If he wished to have introductions, he would send them to influential officials or
Bankers in Berlin. I had always turned down such offers;
but this time I asked him to write me a few lines for Mr. von Caprivi
to give, because I wished to have an insight into certain affairs of the Ma-
rine Ministry to which . and exclusively for the reason,
about a point in the Panzerschiff affair that remained obscure to me
to enlighten me. It told far from the ship affairs
and therefore had only an academic interest in it. This is

– LIMIT –

the only introduction I have ever had, except from Chinese authorities,
from Mr. von Brandt. The answer of Mr. von

Brandt was: "Of course, with pleasure!" but the one
 The letter of authorization did not arrive, and so I left the matter at that.
 Brandt knew very well that I never ask for something twice. Today
 10 I am now convinced that he has not forgotten the matter,
 but intentionally did not send me the introductory letter,
 so that the Chief of the Admiralty does not take the
 things as it is written in the mentioned report, because
 This would have diminished his alleged merit.
 I have never heard of Mr. von Brandt, not even once=
 interpretation, demanded medals or titles for my services and
 I still do not demand it today. On the contrary, I have
 the excessive fuss that was going on around these ships
 and about the awards of medals to people who were struggling
 attached to these things, made fun of him, but I
 use this opportunity to discuss this matter on the
 115 a people are ridden around for years, once Mars
 "The beginning of the Ahne 1884 was also the German war
 fhip "Freia=" in Shanghai. I had just about this time the
 "Sultan" about plans for a Corvette based on the model of the "Freia"
 with the necessary innovations. Mr. von Brandt asked
 lan whether I wished that he would come to Tientfin with the "Freia"
 lune to present it to the Chinese. The Vice=
 Diet invited, a parade held, etc.
 The matter might not have been entirely unwelcome to me, but
 I did not expect any practical success from it, which would even be somewhat
 for in relation to the costs incurred by the Reich
 ande; furthermore, I believed that the German fleet and its officers=
 zerbs would not be available to act like a sample card
 tending nations to be brought into the house so that
 place these orders; it is not excluded that the
 in which warships can also serve such a purpose.
 and in the meantime I expressed myself to Mr. von Brandt,
 si fo the matter was abandoned. The 115 Admiral Zirzow and Captain
 Juwreh finally came north without their ships.
 In later years, Mr. von Brandt, as I hear, has actually
 u of the "volcano", and I allow myself to ask,
 hi 15 For it is lawful for a messenger to carry on business of which he

felp himself without authorization and with undoubted doubt=

liable personalities.

The key to von Brandt's behavior lies in the Jews' thumb. We see how he, with the help of his tribesmen,

kandl smuggled into the German industry and how behind him and the whole Jewish community Be Herr von Brandt is such a diplomat as he is in Part III, p. 131 3.

We may supply as many warships and cannons as we like and can show, but we will not be the first to show the foreign nations

We cannot achieve the desired lasting success if we do not trustworthy diplomats and officials and decent representatives

our major industrialists abroad. What Brandt and

this officials the reputation of the German Reich and the German

The extent to which the industry has been damaged is quite unpredictable and it will take Time before the Chinese people's trust in Germany is restored is created.

Mr. von Brandt states that von Bleichröder and his companions dominate foreign policy. How far this is true must remain undecided. But that it is partly true, I was actually able to convince myself.

After Bismarck's departure, I would like to thank Mr. from Caprivi, because a Nd official believed to assure me that Mr. von Caprivi as well as Mr. von Marfhal were honest people, and he did not seem to have a bad desire ha have to introduce myself to the latter, he seemed to believe that the gentlemen would neither be able nor inclined to misdeeds of Mr. von Brandt, if they knew them, with their uten name. But I have 1 of them because in

Foreign Office still has the same people who are also Mr. von Vismarck, and it can be assumed that who have more contact with Mr. von Bleichröder than I can be desirable. Among them are elements that I do not I hope that Mr. Reichs' Chancellor will now take my case into his hands, but Above all, it would be desirable for him to Officials of the Foreign Office and the Consular Service, including the subordinate positions, on Judain salary and their composition te with international Jewry. In such a systematic compilation, as I am currently working on it, and for what he will hopefully provide me with material, he will undoubtedly en au al) results and find out where the

u t.

Such secret secondary governments are not only dangerous for our Germanness, but also honored for our imperial throne. Abroad, we should, above all, find trustworthy and have competent officials, since they can easily evade control. In China we experience that in the first failed existence

which can only be united through mutual glorification in the service of cr»
I could sing many a song about it, but I will

HE

sometimes stop, because it is not even my intention,
to harm these gentlemen, because even among them there are
honorable exceptions, which I am happy to acknowledge. What
I would like to emphasize that this is the harmful effect of the inter=
national Jewry in our foreign policy. I ask the
Mr. Reich Chancellor, the connection between Brandt's and the inter=
national foreign Jewry to examine and investigate,
where Mr. von Brandt suddenly came into money in June 1888
ut and whether Mr. von Ketteler Bu a legitimate ns like cr
angicht, 7 has. I am not an aglander and claim that
a German with English and other Aryan nations under
circumstances can work together in a completely patriotic manner.
But in the way Mr. von Brandt does it, the matter has
a tinge of personal interest and treason.
If we have 5 of such dishonest officials as
3. B. Mr. von Brandt and Mr. von Ketteler and their background
men, you can count it on the five a's that we
on the most beautiful path into a dead end.
It is understandable that Mr. von Caprivi is not convinced of the accusations made against
von Brandt has heard the accusations that he is now in
Reichstag refers to his authority. Mr. von Caprivi will never
have heard of the shameful edict of the Emperor of China,
as was issued against the Jew Mandl. Mr. von Caprivi is
never heard of the infamous powder contract, which
on this occasion. If he has honest officials in foreign affairs

feverything is going to be ruined violently, and I would not be
We would not be surprised at all if we were to experience it next time that, as it
45 von Brandt advocated that the Jews should soon elect a bishop=
tuhl on shares (see Part I, p. 87/88) and thus with the
Christian religion is playing a shameful game.

Again: it is the knowledge of Jewish law that
everyone, from the ruler to the last day laborer, needs it.
Only we can counteract the current social evils, and
hopefully the Chancellor will see fit to respond to this need
to remedy the situation on a comprehensive basis.

P. 8. I just read the following:

Berlin. Dr. Morris de Jonge is abroad
fled because Professor Mendel was commissioned by the district court
is to provide an expert opinion on the mental state of Dr. M. Jonge=
admit. Dr. Jonge writes in the "Kreuzztg.":

"Profeffor Mendel is the same Meofeffor Mendel who
in October 1889, without even having seen me,
on the basis of letters for dangerously mentally ill and my
declared internment necessary;

the same Dr. Mendel, whom I have contacted for this unprecedented procedure
in my publication "Die Wahnbriefe" I had sharply attacked;

the same Professor Mendel, against whom I had complained last autumn about
that which declares me in absentia to be dangerous to the public
had filed a criminal complaint for insult; the same:
Mendel, against whom there is currently criticism in the press, and not only in the

dheiftlich-confervative (I only remember the democratic "Berliner courtroom") was made emphatically that he was Jew does not have the necessary impartiality to speak about me, the determined enemy of modern Judaism and opponent to give an authoritative opinion on the southern religion."

In the above case, I am interested; it happens especially bare things between heaven and earth. – As if it were the en, which I accuse of thinking of going to Dr. Mendel and issue a mental institution certificate based on the nn book because they find the book very uncomfortable? Who knows whether these Gentlemen do not already have such blank certificates in stock? would be an extremely convenient means to put an end to the matter: the "Jewish religion" recommends such means to its followers to apply if they can do so with impunity. I submit this to the en Reich Chancellor for your kind attention. – Is there no Supreme

public prosecutor there who takes action against such abuse? In the writing of Mr. von Dieft=Daber "For the clarification of the anonymous document" we see that the chief public prosecutor of

With the omnipotence of Prince Bismarck and the great
Fear which was felt by all sides of him, I have from the outset
refraining from turning to councillors or other officials and
to try to gain their influence and support for myself.

It was nothing less than that I
Imperial German ambassador of the crime against life, the
Rape, one of the misdemeanor of the official
n and other almost unbelievable things.

in Legation Secretary and some members of the Gegandifchaff were
accused of complicity and complicity. The motives of the
The crimes intended and committed were greed and
Jule Ruhmfucht. I was for the special purpose of

traveled to Europe to face the German Chancellor
and the charges brought against Mr. von Brandt and his comrades
to substantiate and prove accusations. None=
I intended to evade justice.

The only competent official from whom I can request
The only person who could hear me was the Reich Chancellor himself, and the
The only other high official whom I, under the given circumstances,

ask may ask, His Excellency v. Maybach, who, by the way,

as far as I know, was not informed of the state of affairs,
was allowed to leave for "official reasons", i.e. probably as a result
a decree of power by the Reich Chancellor, not 1 en. .

I would not have told my dear friend under such circumstances
to break a lance for me, how much less
a person who is far removed from me!

Thus I was in the unenviable position of having to make noise
to strike and to the representation of the German people
in the hope that my complaints will be heard there
and allow me to have my complaints investigated in court
That was my simple desire and, thus, the
above-mentioned book.

In it I had carefully suppressed everything that was Jewish=
thum, although the crime dealt with therein was a specific
Jewish, because I had no desire to get involved in politics
and even less felt the calling to put a spark in the powder=
fat the focal, or in other words, the Jewish question.

The hope I had for the book was that
I was shown the way to my
violently interrupted by Mr. Vrandt and his comrades
business again and I was unmolested, without having to fear for my life
fear of being able to return to China.

From a replacement that I have received through my travels, work, etc.
I had not mentioned a single word about expenses.

I ate with Jews and Jewish comrades in Europe=
I neither expected nor wanted this to happen, but it seems so.
as if fate had chosen me to wear a scarf against
which in Germany and around the world in . aaße put
to lead Judaism to power. I am an anti-Semitic

2. Kg ae

I became a Jew through life experience. To my knowledge
had done something to harm. For about 13 years that I
activities of the Jews on a large part of the globe
eighth opportunity and became convinced that the
Jewish question is the first to move the world, that the predominance
take of Judaism the existence of all cultural states of the
world is threatened, and we are moving towards conditions with giant steps,
which inevitably leads to a collapse of all existing relationships
and bring about a bloody war of all against all, if
no ignorant measures should be taken.

My experiences are from the living source of life
and not drawn from books and reach to the hour when I
this manuscript is exhaustive.

To try to tackle the Jewish question with * would be to
be a futile effort, and so I go undaunted and
worried about what might come, we got to the heart of the matter.

The book I am presenting today is a book of
That! It is a book of self-defence, self-preservation and
Retaliation. Above all, I consider it a patriotic duty
such crimes as were attempted and committed against me,
to draw the F. I would consider myself a coward.
if I were to remain silent as long as I could wield a pen.

Silence in this case would be tantamount to
Concealment of further crimes, of their intended outcome
conduct one has obtained knowledge of in advance.

If I could give the book such a large scope and such variety=
pliability, this is done to stimulate the thoughts and
Warning for those who are not concerned with the Jewish question at all or
have only dealt with it superficially and indulge in the delusion that the=
ac is easy to take and should be treated differently than a question of race
nne.

I would gladly have spared our German civil service the disgrace of this
Book, but basically my accusation is directed at the
The main thing and only against Jews. What might the prince
What reason did Bismarck have for not wanting to receive me?
He, in whom I had absolute trust and to whom my trust
opportunity to decide, it should have been intra muros
However, he would not have had 5 pleasant things
Mr. von Brandt had stated flatly,
"Mr. von Bleichröder at the Foreign Office and
not the Prince of Bismarck; in the Foreign Office there would be
not a single decent gentleman"; after all, Mr. von Brandt had
sought to insinuate that "the Prince of Bismarck's lineage
feverfe from Jews, and fef a corruptible man" –

Claims whose factuality I have allowed myself to make in
Ban, provided that they are based on untruth

rested. .

Ä Well, Prince Bismarck preferred to avoid unpleasant dis
cusfions – always assuming, of course, that the
ö 1

The matter was properly presented. – As I later semi-officially I hear, the Foreign Office wants I speak of the last period of official activity of Bismarck) would like to keep quiet about the matter and treat them superficially, which will probably no longer be possible.

If this book should become inconvenient to the children of Israel, what I hope, they must be responsible for the creation of the same in their Tribe: and fellow believers Vein M. v. Brandt, Excellency Imperial German ambassador in Peking and his assistants and thank the helpers. | 1

“I must describe the facts that come before me a few words about myself and the circumstances under which I have met Mr. v. Brandt, let me say in advance.

At the end of 1868 I left Europe and went as Merchant to Saigon in the French colony of Eodindine. In 1870, I was exiled along with all other Germans during the War, because the benevolent French government verneur saw himself unable to defend our lives against communist. However, after the war ended, I returned back there. 8

Since 1872 I lived in Shanghai, China, and was born there in 1877. ftändig and travelled in the period from mid-1877 to early 1880 in shops in Germany, England, France and America. In Germany I established connections, especially with A. Borfig, Berlin and the Maschinenbau=Aktien=Gefellschaft “Vulkan” in Stettin, so that I took over their representation for the entire Chinese Empire and could appoint agents at all open ports of the empire. The costs of the enterprise were divided into three equal parts by the two industrial plants and my company. The Er= The result of years of preparatory work in Europe and China was the first Ordering Chinese ironclads at German shipyards, and I may I would argue that without my initiative it would be difficult to establish a Chinese Panzerschiff would have been built in Germany.

At the end of 1879 I had met Mr. von Brandt in Berlin, who promised me that as ambassador in China he would support me in my endeavors to be of assistance. This he has indeed been, as he After I returned to China in 1880, I met the Daft with the u, authorities. – Nothing more! I am for that I have been very grateful to him. I have given him everything that concerns my business and also reported on other events on the Chinese coast, commercial conditions, etc. |. more details see file 11. Part (Confidential Report B to Mr. v. Brandt).

In 1880 I took up residence in Peking and entered to Mr. von Brandt. We became friends. I thought I could calmly accept Mr. von Brandt's friendship His position as German ambassador, his ancestry

by a Prussian general who had an honorable career in the

Army were, in my opinion, sufficient guarantees.

performance for the fact that he had to be a real human being. To be
I have therefore not worried about his previous life, nor about his

3

transactions which, as far as I had to see them and he let me see them,
which bears the stamp of correctness, integrity and even a certain
goodwill. I always ignored rumors to the contrary,
for what man has not been careless at least once in his life?
“and has made a mistake once? Moreover,
me the subsequent spying of a man who had
treated with friendship, contempt appeared fine.

Anyone who knows von Brandt knows how amiable he is.
He can be. In addition, there is a stately appearance, enhanced by
gray hair. Head and beard. A skilful and
perfectly good manners, interest in art and science in his
conversations, left behind by anyone who knows v. Brandt only superficially
knows or in which he is interested and makes an effort to
light, the impression of a skilful, energetic, well-
willing and understanding man. That was the case with me too.

I must emphasize here that v. Brandt emphasized the importance of
Jewish question fully and we often discussed it at his suggestion,
yes, discussed almost daily.

At the beginning of 1883, v. Brandt and I travelled together to
Europe, where we had a lot of contact with each other. That v. Brandt Jewish
I knew that she had relatives, but as such only knew the Reichs-
court president of Simfon and his family, from whom I
got to know one or the other member; that he also
had many relationships with Jews, such as Bleichröder, Schwabach,
Wallich and others, I also knew. (He told me about the Warfschauers
811 deliberately kept secret. The only thing that touched me unpleasantly was his

intimacy with the three Lindau brothers, of whom I learned the
heimen Legationsrat Dr. Rudolph Lindau met, and the
had made an unfavorable impression on me.

(Here it may be said that Mr. Rudolph Lindau of
Mr. von Brandt in Japan and that he was on his
and his assistants entered the civil service, in short – that
the Brandt and Lindau cliques are identical.)

The Jewish society of Berlin hated Brandt and
I decided to avoid the same, to go on holiday in the south
N He cast some light on society in

erlin, and he often made a few digs at his Jewish friends.
Jewishness was disgusting and contemptible to him, and when he
When he wanted to express dislike about a person, he used to say:
"The guy is definitely a Jew!" He even spoke about his family
he often expressed himself dissatisfied. He complained about their harshness and in=
| Baer that she demanded too much money from him etc., but
always only in general terms. The names of the members of his family
he always kept secret from me, except for the few I got to know,
and also the expansion of the family and its many other
load relationships. "Oh, how right you are in your assessment=
ung of the Jewish question!" he sometimes exclaimed when we were in the
"or elsewhere in the hotels swarms of the chosen people met,

Be

ae is unbearable and its prevalence is truly
teckend!
In 1884, Mr. von Brandt returned to his post in
China; I stayed in Europe, but correspondence was established between
us en received. x
At the beginning of 1887 I went back to China with the intention of
with and for the Chinese a railway and mining company
to develop and bring to life. Since I love China and the Chinese
knew enough, understood my work, also had some trust in
I believed that I had the authoritative Chinese, I decided on my own
Faust and to go out on his own account. From an alliance
with bankers and large industrialists I had for various reasons
apart from that see Part II of Confidential Report B to Mr. von Brandt
of April 22, 1888).

On August 9, 1887, I arrived in Peking, my former place of residence
From here I wanted to explore the terrain, that is, look around,
currently in China my competitors in the railway sector etc. w.
would be to find out how the Chinese Re=
ation about railways, and what the most suitable place

t such an undertaking would be fine.

Mr. von Brandt received me extremely kindly and
forced me, much against my will, to be with him on the embassy=
ity, which I assumed for the time being, since no apartment in
zeking was available. The first question that Mr. von Brandt asked me
addressed when we were alone, was tellingly: "How is it
with the ee 2

Me: "It is always the first thing that moves the world!"

He: "And do you believe that without Jews in your intended actions? to be able to cope with the stress?"

I: "No! I stand on the ground of facts and see clear. Even if I intended to do something like that, I would hardly penetrate. I will have to work for Jews as for German, What can perhaps be done is that the German public from being deceived by fraudulent enterprises by means of which the opportunity is taken away cuts off. The Jew also does decent business when he finds it profitable, and he cannot find any others."

Are you studying in Berlin with Prince Bismarck?

: "No!" |

He: 5 not? It would certainly interest the prince

(en, to speak to you; your simple map with Beijing on it would in order to gain you entry."

I: You will surely have informed the princes sufficiently about China. Yet, what else should I tell him? Maybe about the same question? That would be the only thing: but he should also do this without know this, and I do not want to interfere in it. Why should I therefore take up the prince's valuable time?

Now von Brandt explained his plans for Part II

Confidential reports A-C to Mr. von Brandt dated April 22, 1888).

*

He was delighted and said: "Finally, I see again someone who tackles big things with cool blood and a steady hand. You must tell me to stay here and help to work. The entire embassy is at your disposal. Have the staff you need for transcripts, translations, etc. People have nothing to do anyway. How different things look when you call them, than the former "Syndicate." (He meant a syndicate that was Bleichroeder, the Disconto-Gesellschaft, Krupp, Bochum etc. for the purpose of establishment of a banking and railway company in China was sent. It consisted of the bank directors Exner and Erich and the royal architect Carl Bethge. The former two were among those who returned to Europe with the matter accomplished, the latter remained until September 1888 in Tientsin, the port of Peking and summer residence of Viceroy Li Hung Chang.) The two bankers,

He said that when they left China they did not even know what a tael is, and Mr. Bethge is a capable technician, but absolutely useless for business.

So I enjoyed the hospitality of the Lord von Brandt. He not only treated me with great friendliness, but even with distinction, especially the other sent opposite, so that I always had to behave b. The members of the German embassy, who knew nothing of my Plans, initially held me back despite my contrary beliefs security for a legation counselor sent on a secret mission or Secretary, and an English newspaper covered me in a report simply as a member of the German embassy. The latter gave later gave me the immediate reason to visit the German embassy as a place to live; for the success of my plans was it is necessary that I have no other than at most friendly relations with the German authorities. I was allowed I am probably looking forward to some company's success = en or the state as a guarantor for good delivery of ien or good execution of work, 19 55 me such

was granted, but nothing more. Against foreign interference

In 19 and industry, the Chinese have an average. Thus I was not allowed to present myself to them as a member of the German embassy society, which in fact I was not.

Here I have to anticipate a little.

It was agreed between v. Brandt and me that

I was supposed to stay in Beijing for the time being and 1 German staff at my workplace
ö 8 Legation staff should assist me in my work, if necessary, bchülfic fhich.

err von Brandt 5 the strictest secrecy of my Plans on the part of himself and the officials of the embassy, I had to communicate them. |

After they have reached a certain maturity, if not fullness= end, were advanced, I should the same, because they are a trade

e and probably the bankers and investors
industrial of the failed syndicate. From 1 0
was in my plans a plundering of the German Pb ikum
through the stock exchange and the creation of conditions similar
those in Serbia.

The value of my work, i.e. cash expenses etc., should
will of course be reimbursed to me later by the interested parties.

So my na was worked out, on the one hand
for the Chinese government, ie its first official, the order
eber Viceroy Li Hung Chang, on the other hand for German
Industrialists and capitalists, with the highest German official,
Prince von Vismarck, as an honest broker: the whole thing.
in the closed walls of the German embassy in Peking,
with the knowledge and consent of my old friend, Nee
present of His Majesty the Emperor of Germany in China,
His Excellency M. von Brandt, Actual Privy Councillor and f. wu |. w.
In my opinion, these were sufficient guarantees and circumstances,
under which one could go to work in good spirits.

As my competitors in the railway and mining sectors
I primarily identified:

) Sir Robert Hart, Inspector General of Customs, I have already
in ironclads as a concurrent!

2: the European company Jardine Matheson & Co., which is active throughout
China and Japan establishments and in India and London
branch establishment and to the shareholder or agent in

England has a Dutch Indian named Bosman.

"These two factors could possibly be combined as Englishmen
work. '

"The latter company had hired an Austrian
German Jew, Hermann Mandl, was engaged. Mr. von

Brandt, as well as Mr. von Ketteler, had described it to me as a maurais sujet described, which had been accused of fraud by Austria fleeing those who were affiliated with the first people |

1) Mr. Guftav Detring, customs director in Beijing, the 16th

von Brandt as a deserter German, who
for money or money's worth for the English company Jardine

athefon & Comp.; in addition, he could
People because of a fraudulent stock prospectus at any time
get stuck,

=

2) Lieutenant a. D. Konstantin von Hannecken, in service

the Chinese government. Mr. von Brandt had

always called an adventurer. "Now," he said,

"he has become so morally degraded that he cannot

the fire tongs. Every trace of honor and

Patriotism has died out in him, and for money the
man for everything."

A similar verdict was passed by Mr. von Brandt about a
in Sha J. Buchheifter, head of the company Buchheifter & Comp.
in Shanghai.

Since I have been with the three last mentioned gentlemen in earlier times and
remained in good and friendly relations until the end
had, I believe I have the right to protest against such judgments
May, and tried to speak to the gentlemen. Then produced
Mr. von Brandt a just signed by Mandl and Buchheifter
Contract to supply brown powder to the al government
from the company Cramer & Buchholtz in Rübeland and requested
to read the same.

"Do you think the contract is honest?" he asked. "I think
not, because for such a minimal sum such a quantity

ute powder not to be delivered, especially since travel costs for Mr.
Mandl to Europe and back included in this."

"There must be a catch," I replied.

"That's right," said von Brandt, "the whole contract is a

endless chain of swindles and those involved find Spitz= boys. u Detring and von Hannecken are under contract not fer. Moreover, one has a decent German powder= engineer named Jauß from China intrigued to remain undisturbed to be able to do further dirty deeds."

I couldn't object to that.

Well, this contract contained a clause according to which the Prussian Government had to certify that the powder to be delivered was not only useful for war, but in quality the products of the F and Rottweiler powder factories olte.

That was the sore point, and in my opinion von Brandt as ambassador, the duty to inform the Ministry of War in Berlin to warn against the performance of a frivolous certificate.

I had to mention this incident because it later plays a big role.

"In Peking I spoke with the well-known, now deceased Mars quis Tfeng about railways. At the time, he had no influence in these matters and behaved more or less apathetically: he only complained about foreign adventurers who were very concerned about his turned to the Viceroy Li Hung Chang. The The good Marquis Tseng himself was besieged by one.

a new doctor named Dudgeon, a former missionary. efer performed all sorts of menial services for the Marquis and had a Kind of porter's lodge, from where he greets all visitors

=; 10

of the nn could observe. This man also took tips to the people who negotiate business with the Marquis von Brandt said: "If the guy bothers you – he will hear that you and the Marquis are talking about railways speak – then just promise him a quankity Priority shares of the future railway." I thought that was a fhick shear and laughed. "Well, you can always promise=

Officials from the Ministry of Public Works to ee and
sent out for railway technical reconnaissance of China.
The mayor had already been to Serbia on a similar mission.

Mr. von Brandt let the newcomers use the Chinese
e study.

At the beginning of December, partly for reasons mentioned above, partly to attend the social events taking place in Peking in winter avoid my residence at the German Legation 80 and {08 in the Buddhist temple 8 05 Shang Tfze, which is outside the

Peking and about an hour and a half from the German Embassy removed, he is.

For the sake of general understanding, I must add that Beijing is a city surrounded by high walls. It is only still has 400,000 inhabitants, Tartars and Chinese and is about 80 km² lēch miles from Tientfin, the seaport of the capital. Peking is therefore not an open port, and apart from the members of the various embassies and the General Customs Office live there only individual Europeans, mostly missionaries. On the whole, perhaps 150 Europeans including women and children live in Beijing.

Peking is situated in a plain and is, at a distance of several hours, surrounded by a semicircle of high mountains. In The plain between the city and the Vergen is a large el of temples. Most Bohn temples have, in addition to the At tere there are still special apartments for wealthy Chi= ancestral families who live there to perform the ancestral cult In such apartments, the members of the ambassadors to spend the summer in Peking. And such a residence I had rented a room in one of the most beautiful temples.

Mr. von Brandt insisted on helping me with the installation fupon the management of my household. In particular, he sent

a cook, who was provided by the embassy cook. Furthermore He should not miss the opportunity to see a mounted horse at least once a day. Courier with a few friendly lines, and this courier also brought European bread every morning from the city of Trifches and some other things necessary for a household. So fland I then with von Brandt in daily, intellectual and nourishing concern education. He always had his hand in my kitchen.

On the embassy, the Kon remained for me once and for all Guest rooms reserved, where I regularly stay from Saturday to Monday day morning. N

The 1 invitations to the various European I could easily refuse the offer of embassies. The fact that I lived outside the city, and the gates of Peking at sun= were closed, gave me the opportunity to do so.

anzen Winter Spring 86 have the consequence of this only the larger Seville participated in the German embassy, so-called iners diplomatiques, to which only the foreign ambassadors, wives and the legation secretaries were invited.

can hardly get by: I will turn every mark around first before I spend it, and when I go to the theater, 5 ask everyone whether I can allow myself to do it too." (This He repeated this statement several times, and once even, as Hats ge i at table in the presence of the entire embassy= personnel.)

| I must confess that I did not understand such hints, because I considered both gentlemen to be officials in 1857, and only when Mr. v. Ketteler suggested that I should take the position of the W d tout prix and present my works to the Viceroy Li Hung Chang, the whole thing became a bit scary for me.

There were several other circumstances. Immediately after my Returning from Paoutingfu I had set out to make a second to prepare a memorandum for the ee ee Li Hung Chang, which contain the crux of my affairs and the matter should take us a step further. See Part II p. 29.) N

I read this memorandum to Mr. v. Brandt in parts, as fit was created. per v. Brandt showed the greatest participation and was incredibly interested. He suddenly started to claim that the Chinese only through bribes for a u win, while in the memorandum I have just pointed out that

egenteil worked towards: Mr. v. Ketteler was of the same opinion as v. Brandt, and while Mr. v. Brandt thought that he was the only Man who was able to bribe the Chinese, claimed Mr. v. Ketteler, for his part, said that he was the more skilful 5 Both together claimed that the Chinese would be forced to build railways by giving them the opportunity to war with Russia promised the support of Germany.

Such childish suggestions were based on total ignorance the two gentlemen in all railway matters. I argued as best I could against all these suggestions of the Fr v. Brandt, who has so far accepted all my suggestions regarding a

solid treatment of the business. Now he said
but suddenly that the way in which railways are built in Serbia
was the only correct system, and that we in Germany
and would also come to this correct standpoint.

In vain I pointed out the calamities that the Serbian
shared with him, and made him aware of the principles
which can be achieved through the nationalization of the German
railways; in vain I also pointed out that our
Government would hardly ever give its assistance to fraudulent
enterprises that merely aim to deceive the German
public audience. But he could not and did not want to
understand, and said, among other things, that he knew from private sources,
that the Minister von Maybach will soon have his old
and we would then build railways in Germany to Serbian
system would build. –

One day Mr. von Brandt was in a downright tearful mood;
he believed that bribes had to be made under all circumstances

was on the embassy and would have the greatest desire to see me in
to leave the temple. Our correspondence increased and
one day he even sent four mounted couriers to my residence
On March 23, 1888, he asked about the premises,
who were still free in my temple and asked at the same time for a
Loan of 30,000 Marks (fiche II. Part page 150, Mr. v. Brandt
then told me in the 95 days that he had intended
the technicians Aßmann and Scheidtweiler along with their dc nag in
to lodge in my temple, while he, as later
e actually a en in one of the neighboring
empel had rented, into which he had already sent out furniture .
(I had expected that this would be a real mousetrap
of course not allowed to dream anything at all.) In the conversations
with Mr. von Brandt and Mr. von Ketteler, I was particularly
in recent times quite unpleasant that the name of the Jew

Mandl was often mentioned, and this all the more so since I was from Tientfin heard that there was a company called Mandl, v. Ketteler & v. Hannecken educated to work in railways. I spoke about this Rumors with Mr. von Brandt, and even with von Ketteler, but the gentlemen tried to calm my concerns. Meanwhile, the conversations became so dubious that I decided to confirm everything to Mr. von Brandt in writing what we had previously agreed verbally. I made therefore three confidential memoranda A, B and C (see Part II p. 43 ff.) and read the same to Mr. von Brandt and Mr. von Ketteler. N

Herr von Ketteler wanted to go to Tientfin on 26 April, as he said, to the competition taking place there on 10, 11 and 12 May= race, which was somewhat suspicious to me, in order to fo more than both gentlemen with whom I have been friends for eight years= fcient relationships, now suddenly tried to to find all sorts of small defects in me, that they are according to my Friends in Europe, their names, my relationships with them, whose attitudes, etc., inquired that they furthermore asked for the one= to members of my family, their names, positions, etc.

enquiries, and that they finally made sure that I was in Europe Nobody about my projects in China more detailed information= divisions. – Both also repeatedly boasted of their quite extraordinary connections at home, both in bankers= as well as in high official circles and in the judiciary and believed that I wouldn't have such good connections.

After I had read the memorandums to Mr. von Brandt, he asked me whether Mr. von Ketteler had informed Viceroy Li an Chang something about my projects, whereupon I asked that this does not want to happen and Ketteler, if the Viceroy then asked to inform him of my imminent arrival in Tienzin Both men were excited and after I had read the memorandums to Mr. von Ketteler, he said to me as he left the strange words: "And the Jews

– 16 –

will still do the business, thanks to all your good wishes» sift and if an angel were to fly from heaven, there must be pigs have" government business. Everyone wants medals
U 80 mn

When I was alone with Mr. von Brandt in Peking, the conversations about my projects no better turn: he Pros again induced the most adventurous ideas about a Chinese ji fictitious promise of state aid in the event of a nes, and the like. I always kept in mind that In my opinion it is only necessary that the general

Governor at the purely human side and separated him from the convinced of the company's material and strategic advantages. For my own purposes I had written a paper on the Transcaspian railway tracks made, with special attention to my Company (fiche IL Part page 39. This work pleased Mr. von Brandt so much that he asked me to be allowed to use it, in return I had even less objection when he put me under the impression that he was using them to support my efforts. To date, despite frequent requests, I have not found out whether and how Mr. von Brandt used this work. Mr. von Brandt, who had the idea of establishing a German Bank in East Asia, namely China, was thus at The Berliners and other bankers encountered difficulties, which seemed very natural to me, as he understood the peculiarities of financialization of German trade out of ignorance. This topic had often been the subject of our conversations, and since Mr. von Brandt was at the fixed idea that stock exchange banks are absolutely necessary, also for my ventures, so I prepared an essay for him, who showed the way how to possibly create a German bank for East Asia. (See Part II, page 6.3.) I spoke to Mr. von Brandt about this at the end of April and the beginning of May various lectures. Around this time I asked Mr. von Brandt, whether he also agreed that I should give the Viceroy in Tientsin presented my projects in the form in which they had been worked out to which he replied "yes". Meanwhile, Mr. von Brandt's behavior was particularly. When I visited him in his room, he sat there, not like I at the work table, but in a pose with arms crossed, as if he were lost in deep thought. In my friendship with him he affirmed once over the other this

fe
I protested against this and said that one would

as 97 22

such documents as private property, I could possibly by the Minister von Maybach, whom I know, to the Reich Chancellor. But then Mr. von Brandt began to not only to discredit Mr. von Maybach, but he also told me outright that the Reich Chancellor was not only an indiscreet, but also a corruptible person who earning money, and in reality the Lord does not rule from Bismarck, head of the Foreign Office, Mr. von Alvensleben. As far as the officials of the Foreign Office are concerned, I cannot find a single decent man among them; I may do not indulge in any illusions on this point.

I must confess that when Mr. von Brandt told me this,
90 was completely perplexed. What should I expect from Mr. v. Brandt?

old?

For many years I had known him as an honest and
I thought I knew the permanent official, and now he suddenly comes
with conversations and insinuations of the most dangerous kind. Not only
15 he had already tried to indicate that the prince was more maternal= of Jewish origin, political discussions with Mr. von Brandt), but he himself, whom I have known as Sa knew, had to understand me in a conversation about religion given that he himself was a devout Jew.

Both claims, probably concerning Prince Bismarck
as well as about him himself, I had considered to be bad jokes and
Now he even claimed that the Reich Chancellor was an unjust person.

All sorts of thoughts shot through my head and I said
me that if the allegations of Mr. von Brandt are really
justified, the Reich Chancellor is nothing but an ordinary
Jewish food could be fine. I said to myself, in that case the best
Part of the prince's fame would be gone and he would be in the
History can hardly be described as a great man. I
painted a picture of how the ciferne Chancellor of the apollo= Nifian figure of Mr. von Bleichröder and similar Semites at
was led a leash, and that seemed so unspeakably ridiculous to me
and unbelievably, I said indignantly to Mr. von Brandt:
"The risk with Prince Bismarck and the Foreign

le on private means by military police, as I expressed it,
deliver."

This idea did not seem to please the ambassador at all, but
he friendly.

When we had breakfast together the next day, I remembered
Mr. von Brandt's extraordinarily polite, yet disturbed nature
when the first dish, a cold Krammetsvogel=pie, was served to me like
e was presented first. There were three cuts

this pie on the plate and I noticed that the front one,

which I took, had no cut surface, but was a bit smeared

looked; Mr. von Brandt took the second cut and after we

had enjoyed the pies, Mr. von Brandt praised them and asked

2

Your friend v. Brandt.

=. A se

me if it was good, which I said yes: then he took the third piece, which was left on the plate, divided it and gave me the

half of it on my plate.

After breakfast I felt unwell, but I had not the slightest suspicion. Some drinks drunk during the afternoon Glasses of champagne lifted the discomfort to a slight Diarrhea. This was, if I am not mistaken, on May 4th.

The next morning, in my room, for the first time,

Breakfast, instead of the usual two eggs in the shell with. toasted bread, cold meat and toasted bread. Since I still I was a little unwell, so I did not enjoy any of it. The envoy came towards the habit of coming to my room at this hour and I saw how he cast a disappointed glance at my untouched breakfast. This seemed strange to me, but I still did not dare to When I returned to my home, the Buddhists' temple, Kuang-Shang-Tsze wanted to return, looked for me Mr. von Brandt, and indeed with vehemence, to determine to stay at the embassy, which I refused because I to work, and I had to work with Mr.

Baron von der Goltz, who wrote Memorandum No. 2 (see Part II, p. 25) translated and who in turn was to accompany him as an interpreter, to Tientsin wanted to mature. But I had to firmly convince Mr. von Brandt: to come back to the city on Monday 7 May and to stay with him until the 10th of May. On Tuesday, May 8th we wanted to go together to the wedding of the Marquis Feng's daughter marriage, to which I was also invited. The ceremony should begin at 3 o'clock in the afternoon. The following evening, on Wednesday, May 1st, Professor E. Pander was to speak at the German embassy to give a lecture on Lamaism.

Here I must mention an incident which perhaps is not without Meaning is. I was with the interpreter Eleven Mr. Georg Lange, it was on the 4th or 5th of May, around 9 o'clock In the morning in the shop opposite the German Embassy of Mr. Tallieu, when the General Customs Inspector Sir Robert Hart there. Although I had been in this gentleman's house in previous years ago, when that wife was still present in Peking, much had returned, he had never been well disposed towards me. Recently

But I had declined all invitations to fine social gatherings. That day he asked me with extraordinary politeness how how I was doing in the temple Kuang-Shang-Tsze, whether I was still diligently praying Buddhism and whether the priests in the temple were still friendly

ple, and added that I was not wrong
th 1 as far away as possible from the empty pleasures of society

Mr. von Brandt, many niceties and that he then in one
or the other way with fine propositions or demands

But, as it seems, Mr. von Brandt had
other decisions, because even before he received my note
and although I had written to him that morning that I
I felt pretty comfortable, he had at the wedding celebrations at the
Marquis Tfeng spread the rumor that I was seriously ill.

The Mttenkak.

(The events described on the following pages up to page 41 are primarily
Line of personal nature and in their context will probably only be available to those
and subtle and clear, who already understand something about Jewish intrigues.

For those who are still little or not at all versed in this area, I would like to
to familiarize oneself with Jewish nature and Jewish views from the other

parts of my book, especially from the first five chapters of Part III
You will no doubt enjoy the following pages
read with more interest and understanding. I have explained the following =
fuffifcift to describe it in detail, since it is a criminal case and the
Jewish power can really stand out.)

It might have been about 7 o'clock in the evening when Dr. Lenz arrived =
came, not as usual simply in a mule cart, but
accompanied by a mounted courier. He brought with him a large
flat dispatch box, such as those used in China to send important
to store or transport important papers. He opened the
dispatch box in my presence: it contained a large black
Neifes or sleeping blanket. I must note here that Dr. Lenz,
who visited me from time to time in the temple, had his own bed with me
Do had, which served as a guest bed; with bedding and

I was well provided with corners, so that visitors never had to
While Dr. Lenz had the blanket
lying in the box, he took out a package that contained two
round, white, flat a with red ring on the periphery and
red dot in the middle. He said: "This cake sends
The minister, they are wedding cakes that he received from the Marquis
Tfeng brought with him. The Minister has received your letter and
tells you he has no time to answer." Then
he added the remark: "Everyone on the embassy was
As I left, both Mr. Aßmann and the gentlemen von der Goltz
and Lange: I was the only one who was happy."— J Bi him then
after the course of the Jace pages at the Marquis Tfeng. and he draws =
I drew a pencil sketch of the party rooms on a
Sheet of paper.

Since Dr. Lenz is a big beer drinker, I had a
bottle of beer. and when we had half filled the glasses
gr had, Si Dr. Lenz a walk in front of the
Temple. I agreed and put on my rod. Then

we went so I had in my pockets the keys to
the leather suitcase in which I kept my papers, a small
Pen, pencil and a Mexican dollar. In his hand
I had an elegant cane walking stick with a silver handle.
had not said a word to Dr. Lenz about all the suspicions,
u iich had nurtured and which had increased considerably
through the extraordinary nature of his mission, the mysterious mission
the crate, the blanket and the wedding cake. I was inside =
increasingly convinced that some kind of foul assassination attempt had taken place.
b Hen Dr. Lenz was involved in the same and knew about it or
not, it was unclear to me, but at any price, I said to myself, I will stay
Good night not in my temple.
After we had walked a few hundred steps,

I said goodbye to Mr. Pr. Lenz and hurried southwards to the
do zee, the southern gate of the Western Wall of Beijing.
08 Thor was still open, but not for long, as all
outer gates of Peking are closed at sunset.
I thought I had achieved the same just before the end. I
990 into the gate and approached the
kb animal cart station and asked for a cart to the German-
n embassy.

my beer I must note that the way through the Ping=Tze=Men

ii The usual way in the city was that most carts=
a 15 did not know and Peking is a city in which I have lived for years

Dietder could go around unarmed during the day and night.
But one time I suddenly found myself being badly attacked by a gang
surrounded by Chinese people and they refused to give me the cart.

knew Beijing very well and made my way through small

ion Taffen in the u. after the foreign quarter of Peking, the
* called Gefttfhaftoftraße. Then I suddenly found myself
the same bunch of Chinese that surrounded me at the cart station
They pretended to show me the way, but

Messrs Aßmann and Emmaus walked up and down in the garden. I told
He briefly outlined the experiences and deliberately sought to

to make a joke out of the matter. I expected Mr. von Brandt every moment, but Mr. Aßmann told me that it was already went for a walk in accordance with his cure with Carlsbad salt: Messrs. von der Goltz and Lange were still asleep, so they said. When I wanted to see Dr. Lenz, I was urged to ly, to rest a little, since after what I experienced I was very exhausted. This was not the case and I refused I then had breakfast with Mr. Aßmann and Emans together in the latter's room and then proposed in Expectation of the return of Mr. von Brandt / Bottle Cham = pagner to drink and sent a servant to the master's shop I now and then, to make the whole thing ridiculous, Jones I deliberately wrote on a piece of paper the words: "Please send a pint of your poisoned Champagne." |

It was said that Mr. Kierulff's shop was still closed.

The gentlemen repeatedly asked me to go to my room go and rest. Mr. Emans said: "We are also tired,

We were looking for you all evening yesterday. (How you could already know the previous evening that I was

– 26 –

Temple, if the Lords had not been in the previously mentioned cart and had seen me. It might now be danger 7½ o'clock fine. Soon after, Mr. von der Goltz appeared in Riding gaiters and very exhausted. Mr. Aßmann asked him with be= meaningful look: "Do you know that Paasch is back on the Embassy if?" Soon afterwards Mr. Lange also appeared, on whose I sat there for a while. He said to me: "This night our dispatch box was broken into, we still know not which documents are missing, but they will probably in Tientsin." N . .

The minister's long absence was quite inexplicable to me. We heard a noise as if a large crowd in motion. I expressed my suspicion that this an uprising would be caused by the above-described events of the previous evening. Now, As I later learned from my servant, nd nwilchen the following happened: After the evening before the edition to the temple Kuang=Shang=Tfze was fruitless Dr. Lenz was left alone, probably m vain expectation of the following. After he first After he had seized the weapons, he ate dinner and wrote then a letter to Mr. von Brandt about what had happened. The SHE had to repair the city wall for a fee of 5 dollars. and in this unusual way to send the letter to Mr. von Brandt, who was there around midnight=

At two o'clock in the morning, Dr. Lenz left
temples to enter through one of the southern gates at daybreak into the
city. Mr. von Brandt had opposed one or two
Your morning in fine Etants: palanquin to the temple Kuang=Shang=
Te opened; he was accompanied by Baron von der Goltz
jb, Mr. Lange, and the Chinese servant Jim. Around
| Early in the morning Mr. von Brandt and his 1
Bot arrived; they then had all my papers
ucchstöbert. The main documents were in a different
open leather suitcase, and so the minister ordered my servants
1 5 suitcases and all the letters and documents
tt, to send to the embassy.
After the gentlemen had breakfast and Mr. von Brandt
* A very strange act was carried out (fiche JI. Part p. 188,
5 he called Dr. Lenz to inform the Minister that I
u arrived at the embassy, whereupon all immediately
0 city. They had seized my falcon and

German Nee had gone.

The dismay and fear of those present at the embassy
was enormous. Strange things happened on the embassy
Things were happening. I was being searched for from the large entrance gate=
to hold on, where, as it seemed to me, things were getting fourer and ß (it
These were probably some of my suitcases and papers! I
asked Mr. von der Goltz: "What happened?" He answered
replied to me very dismayed: "It is already too late, the minister
has already had it put in the newspapers." The significance of this
Words are not entirely clear to me. But it is very likely,
that Mr. von Brandt, after hearing that I had withdrawn from my
Tempel removed, through Mr. von Ketteler an advertisement to the
Tientfin=newspaper that I had left my apartment
removed in a fit of madness and the like, which I
of course cannot know.

If such a lawyer had ever appeared in the newspaper.

then he would at least have achieved the purpose of making me morally resp.

would have been commercially impossible. (I must here mention the friendship I would like to emphasize the promptness of Mr. von Brandt and the stand that he must have launched such an advertisement before he Letter from Dr. Lenz: this circumstance also indicates a completely prepared machination.)

The fear of the supposed uprising had an almost ridiculously frightening to all the gentlemen. Mr. von der Goltz, who seemed to take the situation very seriously and like the others said it would probably affect us all, wrote a farewell letter to his mother and put it on his Desk: the big tears stood in his eyes. Suddenly Mr. von Brandt appeared, accompanied by Dr. Dudgeon, a depraved man described elsewhere.

Mr. von Brandt was completely pale and exhausted; he looked eerie, looked corpse-like, as if he was about to decay. His demeanor was restless, and he told me that he had got up at 1 o'clock in the night to go to my temple Kuang-Shang-Tsze, from where he had just returned. He installed himself in Mr. Emans' rooms and explained me that I was sick and had to take medication. He protested against this and said that I was in good health and that my discomfort from the previous days were completely lifted. I stood on the veranda in front of the open Door and the window from where I spoke to him. Find Dr. Dudgeon had greeted me with the words: "I am very sorry done not to be in the temple last night 15 (The showed that Dr. Dudgeon was probably with the Temple had been on the way.)

Here I must add that I have almost no contact with Dr. Dudgeon

duct ba saw him, about three to four days before, when he, Mr. von Brandt and I appeared before the German ambassadorhaft and saw a train pass, in which to Chinese ffcher One of the wedding gifts for the Marquis' daughter Tieng were carried in open parade through the streets and at On this occasion, Dr. Dudgeon invited me to the Sentence to Marquis Teng on May 8th.

The Etenes, who now followed, and until about midday I reserve the right to explain later, as a result It would lead too far to describe it. I only nn that 8 the impression of a 5 h en

I had a good night's sleep. When I woke up=
woke up, I noticed that my shirt was completely covered in blood in the front.
soaked, but also that I did not achieve my purpose because
the arteries had not been hit. The torture=
The journey began again and I thought again
the things clearly and came to the same results as on
The evening before. I therefore decided to invite my "friends" to a
In a moment when the just
Constable Hummelcke, who was on duty, had left, I
in bed and tried to jump against the corner of the
chimney to end my life. I had the
Distance not judged correctly, or had missed the direction, because
On the right side of my head I wore only a relatively light

Injury from it, suffered a skin abrasion on the forehead, broke
but due to the violent impact on the lower edge of the protruding
the fireplace my right arm. I stood up freely, climbed back
into bed, N fell out, then Mr. Hummelcke helped
on his feet. Dr. Dudgeon was immediately on hand, he was probably
ly to the minister for advice.

I must look very pale as a result of the fall I have just endured.
I was led around the room without being
knew that I had broken my arm. Dr. Dudgeon said to the

Bystanders: "now he is dying" mun dies he, then one discovered my broken arm, the wound on my head and finally the Wounds on my wrists, of which I calmly asked how The wound on the head was treated with Ben Dr. Dudgeon was shaking so much that he could not even Wound could not be sewn, but one of the younger Gentlemen of the Embassy. The arm was bandaged and I went back to bed. I had just taken off my pleated shirt after its removal was necessary due to the broken arm It was replaced by a nightshirt of the minister, one of whose sleeves was cut out) The ice on the head, that had bothered me the previous day, was now because of the Wound quite pleasant. Fetz. where I helplessly with right arm in bed, the guards were doubled and tripled. brought people as guards who had never been on the embassy appeared, a certain Sen Jeanrenaud, an Irishman named 8 Bing, the latter having a bad reputation 5 and the Dr. Dudgeon had brought in, as well as a Mr. Imbeck. The

-doorkeepers, dirty coolies, everyone had to keep watch. In the foreground The room was always a whole gathering of people, but I I couldn't see. After sleeping a little, I found myself fo even tied up in bed and my left hand was always a Chinese or European. I asked if they would the crowd of people and especially the unknown companion=

1) My bloody d was accepted by Mr. von Brandt and the mel m know which . the same may be given 1 f = Bein Breund v. Brandt. i

3

fchaft like Jeanrenaud, Collingridge Bing, Mr. Imbeck. The same, fuch as the foul-smelling coolies and all the ridiculous forebodings preparations are suitable to prepare even the healthiest people for the to make you sick permanently.

The more I asked, the more strict the measures were. Four large mattresses were placed between the bed and the wall, I was treated like a madman. I was indignant, but a von Brandt, who finally came and gave me a

drink, said that these things were all necessary. The drink, The ct did not force him to drink, was, if I am not mistaken, a decoction of Senna leaves, at least judging by their effects.

As I said, little had been said about Brandt; if He showed great concern, but I occasionally saw through him a request I made to Dr. Dudgeon to heal the wounds on my

Dandgelenten beffer to connect over which you can strips of booklet:
pavement laid 1 fe without examining it more closely, and where he briefly
said: "That is not necessary." This bad treatment and
malnutrition continued. I had Dr. Dudgeon

asked if 5 could drink a glass of beer or wine: he had
"Yes" said. All

was washed and from the horrific state Bette came out. I was undressed and covered with a sponge and Towel cleaned. Mr. von Brandt could 11 5 the pleasure not fail to be there. With great interest he took over the direction of this cleaning. I was also given some better food and allowed the use of my toothbrush. nz

Here I have to insert an n, which I will only add later in Europe and which one has probably tried to convey to me count. While I was lying in bed with a broken arm and absolutely helpless von Brandt had a Chinese tailor make a forced jacket. As I hear, it was a jacket with long sleeves I do not know how a straitjacket works, Mr. von Brandt, the I expressed great sadness to myself and to the outside world, Lich

85 garment at the table, where some gentlemen of the The eyes of the public were present, and he was delighted with this amused by this lovely idea. (I don't know exactly who was there and how the others found the joke. But this fact is quite suitable to characterize the Jewish rabble.)

Dr. Atterbury came and was, as far as I saw, only 52 von Brandt rc. properly informed about my case. I asked Mr. Dr. Atterbury to visit me frequently and to accompany me help to apply a plaster cast. If Dr. Atterbury is present was, then Mr. von Brandt was always kindness itself and treated me with special kindness. I requested a plaster cast for my arm, which was approved. Dr. Dudgeon wanted to use absolutely bad Chinese gypsum, But I insisted that good material be used, which Dr. Atterbury, but only from the distant The patient had to be taken to the hospital. The plaster cast was band. Mr. von Brandt held my arm and Dr. Dudgeon made the bandage first in the presence of Dr. Atterbury, but was it was renewed several times without the latter doctor being present.

On 11 May, Mr. Wee Pander was also to my bed. They had brought the

The moment I was lying in a wound fever, which lasted about ten Hours after the wounds sustained and the lasted for several hours. (See Part II, p. 191/192 testimony of Professor E. Pander.)

The next evening, Professor Pander was again with me while I sat at the table with my bandaged arm. We We talked for a long time about art objects and led

a long conversation about indifferent things. Professor Pander was still amazed in 1889 at the precision with which I could single word exchanged between us, even during the time when I had wound fever. At my request He issued me the printed certificate, but asked me to Hand to renounce further; if necessary he will, upon request= The courts will have to say more. Since he is

ng and was forced to continue to live in the

to live in the society I was accused of, he had indeed He has justified concerns that he will be further voluntarily written statements could make life in Beijing unbearable. dern von Randt now began to become friendlier; he came to me, sat down next to me and asked if I could not I told him quite openly how something like that could happen after all what had happened would be possible. He asked me to trust him again, and said with a wet e that he always treated me like a brother . I would like to give him my trust again. If we were to start the work together, it would be wonderful. bar if we did not reach our goal: we then wanted to= go to Europe together and get things done there. I told him we wanted to see how he would approach my concerns in the future= ten would behave towards.

It was wonderful to see the naivety with which Mr. von Brandt, when we were alone, said that it was just "business" He later often said: "the arrangement with the sick= guards was, however, very clumsily done." He seemed to therefore to be regarded as a meritorious diplomatic work, as whether it is a noble calling to take possession of other people's property to sit without getting caught or arousing suspicion.

A peculiar scene took place on 15 or 16 May towards evening in my room when the interpreter=Eleve G. Lange was just doing guard duty. Mr. von Brandt came to me and asked me where the keys to my correspondent's suitcase were. The= fame had remained in the vein dress that was given to me on 9 May In the morning, my servant had to take off the garment

and I took out the keys. Mr. von Brandt asked for the keys; I asked him what he wanted with them. He said he only wanted to have me. I pinned myself and said, There would be no point in me handing over the keys to him. He begged and pleaded and said: "I will burn her over the fireplace= nail, but in any case I will stay seated until you

give the keys, even if it takes all night." He said
UA: "Do you think that if I look into the suitcase
wanted, I couldn't have done this long ago?"

After an hour of parliamentarianism in this absurd manner
and I saw that resistance was futile, I gave the keys to

ernn von Brandt, who left with it. Only after a considerable
He then came back and nailed the whole bunch of keys
above the fireplace, where it remained untouched until the 17th.
When I received the small correspondence case that had been brought to my room
I wanted to place it near the head of my bed,
In 500 here Mr. von der Goltz, who meanwhile Mr. Lange
had replaced.

As I later heard from Professor Pa nder, Mr.
von Brandt stated that he wanted to open this suitcase because
because it could contain things that I might be able to imagine
Nothing could have been more desirable for Mr. von Brandt

than if I had done this now and what I care about
fo easier would have been possible, since I now have knife and fork again
used while eating. The real reason why Mr. von Brandt
had the suitcase opened, was because he had heard that I
in addition to the weapons taken from me, I also owned a Löwe revolver,
which was packed in a box under my other luggage
and which had not been found. Mr. von Brandt feared for
this precious life and had the fvery understandable fear that I
want to tackle it, as well as the cowardice that
he, as well as the gentlemen Jews of the embassy, had developed,
an extraordinary) characteristic feature throughout the
processes formed. N .

On the 16th, there was talk of me building a house next to the American
Nife sfudity. I refused and said,
If I could not stay at the embassy, I wanted to go back
to my temple, where I would most like to go. But
Nobody wanted to know anything about this. Mr. von Brandt refuted me,
that I should remain at the embassy; but if I

existed, he would cover the whole part of the embassy in which
 my room would be located, insulate and the main entrance from the garden
 (The real reason why they wanted me to
 not living on the embassy was that a young gentleman
 Buchheifter had come, of whom I had been told that
 he was already in Tachiaoffe“], but was actually still in Peking
 Since I was friends with his family, they did not want to
 that I might meet with this Lord: to my temple
 But I was not allowed to go because Mr. von Brandt had already
 was cleared out and I was left in the dark about what was going on there=
 and whether there was anything to do with the uprising on the 9th morning=
 And finally, one probably did not yet have the
 I had given up hope that, after I had been deprived of my weapons,
 I will be welcomed in the new house in any way
 In short, it was explained to me that it would be best
 I would go to the new house, and I would also have to have guards for
 in case I injured my arm in my sleep or otherwise. |
 les Proteftiren 15 did not, and on the 17th I was taken in a sedan chair
 to the new house N. Mr. von Brandt had it
 not take to accompany me. He walked beside the sedan chair. And=
 On the way he said to me: “Now I will take the direction of things
 in hand”, to which I said to him: “As in everything,
 I submit to the violence here too.” In the new house
 I mean carpets, the furniture brought from the temple,

It looked as if Mr. von Brandt was still with me
 attention, as before, surrounded and still my true
 ar

N The main building was set up for me, one house to the left
 avon contained my baggage; opposite me in another building
 dude was housed Mr. Collingridge Bing and right in the
 2 building, which included the courtyard a new person, the English
 Tienftabler Cox, who, as I later heard, telegraphed from
 lentfin was ordered to Peking. I asked Mr. von Brandt,
 ö 15 if this is a new Samaritan. He said, I need some of the
 pi en not to take any notice, and in fact I also have
 a man who left about fourteen days later,
 ie spoken a word.

"As far as Mr. Bing is concerned," said Mr. von Brandt, "he dines alone. It is not necessary for him to be a table companion. Freuchmeme I replied: "You have the 11 185 as eund and table companions, and I confess that he did not displease me despite his bad reputation, therefore I will invite him to the table." And so it happened. SQ have never had to regret that I did this, because it turned out from this that Mr. Bing is indeed a reckless and mo= tan was a run-down, but not a bad person. He ap extraordinary language= and other knowledge and had through Staying in a Chinese family does not only mean getting to know each other quickly ae the language, but also the Chinese customs. once asked Mr. Bing how he came to to serve as my caretaker. He said: Dr. Dudgeon had offered him the job on the street, but he Dog, as such he did not want to do it. Then he he invited Brandt to his place.

At night I was closely guarded. Despite my protest |

Old Mr. von Brandt and the Co-Coolies of the Embassy in the new ohnung, who had to keep watch in the adjoining rooms at night.

The house I lived in belonged to the Lazarists in Peking, was

but actually by the General Customs Inspector Sir Robert Hart for one of his officials, who is now dealing with Another group had to help. Dr. Dudgeon often came ger and changed the bandages on my arm several times. Mr. r. Atterbury also came more often at my request and I used to chat with him for an hour about indifferent things and a I intentionally never asked him what one could do 185 about me when he was called to me on the 12th or 13th von Brandt came two to three times a day, brought me a lage ante letters and was full of friendship. My servant . bal "The father is strange, he always asks me: afch hunted?" b

One day Mr. von Brandt brought me a letter and asked:

The same has probably been lying at the post office in Shanghai for a long time. for a poor economy there, I get the letters regularly"

, . r- mm ____ _

moderately one day later than the other ambassadors. They have sometimes you don't receive letters that you should find there." Then he forced me to open the letter. The letter was really dated 1887; it was a request for postage stamps from a child written. I put the letter aside half-read. Pot. von Brandt now indulged in insults against the German post-service in Shanghai. After Mr. von Brandt and Dr. Lenz, the also came immediately after Mr. von Brandt, revenge was promised, read id) the letter to the end and saw from the writing of the father of the child that the letter had arrived quite regularly and that the child had only made a mistake in the year. I reported this

Factum the next morning Immediately to Mr. von Brandt, but he did not notice my suspicion that he had opened the letter, he handed it over. – – –

Mr. von Brandt also provided literature. Among other things, He brought me a French book, the title of which I unfortunately I forgot. In it was the whole arsenal of so-called diplomatic means, which Mr. von Bismarck allegedly should be served in abundance. There were these except Er= opening of letters, forging of telegrams and documents the most sophisticated frauds of every kind according to Talmudic recipes. We discussed the content of this book and I had little idea that Mr. von Brandt, according to these recipes, later in Tientfin would act against me.

One evening, it was moonlight, the ag of the Neighbourhood was very loud and Mr Bing complained that he could not Dr. Dudgeon readily provided Mr. Bing with a can of strychnine, with which he can kill the chest troublemaker, a dog of the one living in the still barfhaft to a Wirthes Tali, vers infecte by putting the strychnine into a piece of meat and giving it to the dogs. Soon after, Sir Robert Hart suddenly appeared, with whom Mr. Bing had previously been on bad terms, The latter an offer that the same in the e in Shanghai a= he should receive 200 taels per month and free received. 1055 Bing hesitated whether to accept. The condition= gun was that he had to leave Yangbai within 24 hours. then told me that he had a conversation with Sir Robert 925 and would have refufired; he preferred to be in his needy conditions nor does he have any hope of an position in one of the Chinese ministries.

Only a few people were allowed to have contact with me. Mr. v. Brandt carefully regulated my traffic and brought me the cards from ambassadors and members of the embassies who had me wanted to visit, but he had refused them access. i in gentlemen in the service of Sir Robert Hart, namely No. Hancock

and Professor Pander, as well as some gentlemen from the Ber Embassy formed my only iso ech Der aan, this man, the

– 40 –

Forgiveness, by putting all the blame on Mr. von Brandt and said he had only acted on his orders. –

When Herr von Ketteler returned from Tientsin, about the 22nd or May 23rd, he visited me. He told me that Mr. Mandl had recently arrived in Tienzi, he wanted to quickly sign a contract on Field guns with the Viceroy and then return to Europe. Mr. von Hannecken has now also got a bro: visien secured at Krupp if cannon purchases took place, as well as as Mr. Schnell would have received earlier. In government business there must always be irregularities and dirt= come; he had seen a lot of it, and I was the only one who ever managed to do decent business. I heard about this time that 1 of Ketteler was employed and worked, which was at least something striking for everyone. –

Only in the very last time, when I could move more freely, I was allowed to see other people, but I was always guarded. Lately I have been eating my meals on the German embassy, where guests were occasionally present. Mr. von Brandt was then kindness itself and let it fuch as you do not take the food that I do not If I could cut up members of the envoy= wanted to visit the company, then Mr. von Brandt himself went with him, and In the evening, when I went home around 10 o'clock, he accompanied me to my door so that I do not fall or otherwise be harmed would like – as he said.

Mr. von Brandt had meanwhile made some cash expenditures for As soon as I was somewhat mobile, I reported returned all the money to him. This was on June 2nd. He said that this was not necessary, he would gladly become my banker, he still owed me money. I replied that that was a matter of its own, and that I could not demand it and also He replied that I just wanted to remember him He said that it gave him a lot of pleasure and that he could activity also have larger sums of money. a

I asked Dr. Dudgeon about this time when he

took off my gype bandage, saying: "the arm looks looks quite good and so you will not have the opportunity to fufher sue for malpractice" to submit his a to which he replied: "That is not necessary, for I consider you a member of the German legation." I sent Mr. von Brandt 30 dollars with the request that he to Dr. Dudgeon. I told him about the Statement by Dr. Dudgeon, and also Mr. von Brandt thought that I did not need to pay for it, whereby but he was taken aback and embarrassed. I said to him, "I want to Man has nothing to rent, he wants the money for his Chinese fiffical hospital", a statement that I fortunately On 12 June, when Mr von Brandt and I finally settled accounts, in presence of witnesses.

22: A

For Dr. Atterbury, or rather his hospital, I gave Mr. von Brandt 20 dollars and a letter, which was promptly procured The weapons that had been taken from me in the temple, (see. Interrogation of the servant Matthias), I was finally given, if also with hesitation, again. . On the evening of June 11th I had my last meal at the embassy.

At the table were Mr. von Brandt and Mr. von Ketteler

the gentlemen Lieutenants von Brixen=Hahn and von Auer, who were Tientsin to Peking. Mr. von Brandt was so disgustingly friendly towards me, that I stood up in disgust and left the table that had not yet been lifted under the pretext that I for my upcoming maturity 8 pack.

Until now, Mr. von Brandt had promised me that Mr. Baron von der Goltz as an interpreter to Tientsin. When I When he said goodbye on the 12th, he made excuses and said: "You told Mr. von der Goltz that he I asked him what this meant, I knew of such a change. He replied: "I am was there when you said this."

When I said goodbye to Mr. von der Goltz, I asked him what this strange statement by Mr. von Brandt meant. "Well," said Mr. von der Goltz, extremely embarrassed and evasive, "if If you don't know it yourself anymore, then it doesn't do any harm."

On 12 June I left Peking in the company of the gentlemen Carl Rump from Tientsin and Emil Rump from a Bei der Departure from Peking, Mr. von Brandt led a characteristic

While he was trying to convince me with an infamous lie, lips, but with all forms of politeness, he betrayed himself towards the Rump brothers by a malicious, behind-sly remark about me, which these gentlemen had hardly understood and not with the friendship displayed by Brandt were able to reconcile for me.

We left Beijing on the Imperial Canal: the short route I would go to the disembarkation point in the nice weather but Mr. von Brandt not only compelled me to take a sedan chair, but also gave me a forerunner. That looked very good to him, he could then say, as he did: "Behold, I have not loved him only as a brother, and showed him hospitality, but also treated him like a prince, and now he complains about bad treatment."

® ®

On the 14th, after about 48 hours of sailing, we arrived in Tientsin.

My various acquaintances were amazed to see me so cheerful and healthy, and Consul Feindel said: "I thought you would be sick, and I have never seen you so blooming as now, that I have to write to Mr. von Brandt right away!"

soon found out how Mr. von Brandt operated

He had told several of our mutual acquaintances

a UI

Belärichen, I suddenly became very ill; he had guessed that this is due to drinking a lot of champagne gate, or as a result of sunstroke, or as a result of He had left the matter doubtful, but also that I was terminally ill. Then I later found out that he ale had asked whether in my previous life there had been any I would not be able to prove any unusual cases, e.g. where I 555 glasses of wine too much etc. Then he had A ' order to investigate whether in my experience any facts that could be established that would lead to

Kumbung would be suitable. So he had, among other things, non-self-inflicted illnesses or the like occurred

ale But the strangest thing of all was that he spread rumors

hate (NE m great anti-femite and persecutor of Jews Paafsch
let it be put in the belt. 2 |
This latter fact naturally interested the people in
tfin very little, and since everyone knew me very well,

With certainty the thought occurred to me, oh he we are dealing with
An organized society of Jewish doers.

ee A. Ze

I was no longer surprised that the Jews always spoke so well of all things are taught in China. I came to the perfect my certainty that the e felp, whose high office protected him from any suspicion, a chief agent in this clique of Jews. Von Brandt always talked about his family, who made financial demands on him, who depend everything on him and the like.

Now the Simfon family or the Lindau clique were also there= presumably commissioned to gather defamatory material It was that is the well-known Jewish manner; the Jews wanted to take my place and exploit what I have earned, whereby in the first place Another thing to consider is that in my memoirs the Chinese had proposed the whole business of the fraudulent Stock market speculation. Of course, the Jews can do something like that not tolerate and so the banlier clique may perhaps Mr. von Brandt gave the order to the inconvenient people, who was honest with the Chinese, to eliminate. .

After I had seen through this matter, I swore to myself: "This treacherous Jewish clan I want to) forces even if I myself should perish in the process!" It were no longer solely the motives of self-preservation and defense, which determined my further conduct, but something more. And indeed a certain something that the Jews Kar is incomprehensible, namely love of country and neighbour. Since

Year and day I had worked on the German name, the Reputation of the German civil service and the reputation of the German to hold the Chinese in high esteem. I was downright zealous= addicted to the reputation of the German name and once I even had Mr. von Brandt when he annoyed me with his worthless Infimations, explained: "If I 1 the Ehincien should be forced to resort to the means of stabbing mature, I would first of all maintain my connection with the German society have to break off the relationship so that, in case the things came out, "The German civil service would not be compromised at the same time."

In response to this statement, Mr. von Brandt said that The matter was not so far back when one could have accredited diplomats with money for bribery purposes – and we discussed the idea on this occasion the Jew Sir Drummond Wolf, who was captured by the English government had money for bribery purposes in Persia 0 and which was openly written about in the newspapers. Now it was the envoy himself, who wanted to do dirty business. I saw the cliques of Jews in the background, I saw clearly and deut id that he not only betrayed the fatherland, but also in the future every German, whatever his name may be, Business in China impossible due to the system followed by Brandt would be made."

1889.

I was in Tientsin at the invitation of Viceroy Li
Hung Chang. I was contacted by the consulate=
report, but I had all sorts of difficulties in getting admitted.
Despite all assurances to the contrary, I had

Brandt tried to barricade the way to it, and various my cards, which I sent to the King, seem to have been concealed to be, although the Consulate has given me old Cards from the Viceroy were delivered. I then found out from the Viceroy himself: he explained to me clearly and completely out that Mr. von Brandt had told him to

not receive me because I was ill. He also told me that my

Friend Brandt was playing a false game with me and expressed J fvery disparaging about the character of this gentleman. He had the ke e 85 ue speaking

seen through and now he introduced me to one of his German length and the

Officials at my disposal, to whom I gave the whole situation of Intrigue dictated into the pen.

I have been dealing with this whole affair of the emperor for weeks. ly Admiralty for the Viceroy; inde verfeptieg I deliberately gave the Viceroy the names of the Europeans who had Brandt, as I am not yet fully aware of all the points Certainty and was not inclined to rely on the Europeans in Generally speaking, it was not fair to cast such a bad light on the world. This took me

ie

the Viceroy was very angry and he insisted on knowing names, which I refused, pointing out that I had met Mr. von Brandt in Berlin. Meanwhile, I asked him to To pay attention to railway matters and to ensure that that he or his government should not be fleeced.

The Viceroy explained to me that I could go to Europe could, since he had no intention of building a railway take to inaugurate in the manner proposed, and at my At the farewell audience he even pointed out to me that the hostility of Brandt might not be comfortable for me, nor to stay in Tientsin for a long time. They might want to take me to a warship and transport it home. – I replied then to the Viceroy that I am not worried about my person here would be that I would have been worried about my papers and would have would have therefore brought them to safety.

(How had the Viceroy come to these strange views?

I can't explain it, because on September 11th,
So a few days before this audience of mine, Mr. Detring was in
Commissioned by Mr. von Brandt to the Viceroy.)

How justified the Viceroy's concerns were,
I only heard about it later. In Peking, the gentlemen were afraid
come after they realized that I had seen through them completely.
Of course, the German embassy in Peking had
fchisch asked about me and asked all sorts of unpleasant questions
thrown. Mr. von Brandt and Ketteler then responded.
that I am busy with great plans for the happiness of the Chinese

I would have borne it, but that it drove me crazy, etc.
Fer von Ketteler had seriously suggested that I should be

c

In Tienzin, around this time, the Jew Mandl established
the company Mandl & Co, as agent of the company Friedrich Krupp
in Effen. Mr. von Brandt and von Ketteler were with the same

ir UT

in lively correspondence, and when Mandl had established himself, he wrote to him
Mr. von Brandt a congratulatory letter in more than polite terms
The Jew ran around with this letter and showed it. Mr.
Baumeister Bethge, who was in the interest of the company Friedrich
Krupp was in Tientfin, gave rise to the general mood against
Mr. Mandl expressed this by saying: "I do not understand how

err von Brandt a so sleazy Jewish boy N 1 fo –
falivellecerifch fine. (The expression of Mr. Bethge was
significantly more drastically.)

When I suspected and feared that perhaps a bribe.
could make an attack on my papers (since among them
Letters that exposed Mr. von Brandt and which I found in
an iron despatch box), I decided to put them in
Safety and brought them to Chefoo (seaside resort,
1 day's journey south of Tientsin), from where I received it through a friend

to Shanghai. Before I travelled to Chefoo,
I handed over to Consul Feindel an iron box in which I placed a
I had packed a packet of old newspapers. On top I put a piece of
white paper on which I wrote the best regards to Poland from Brandt
I deliberately sealed the box badly and asked Mr.
Feindel to keep it in the Consulate's safe and
to give me a consulate receipt against the 95 75 fees

Mr. Feindel said that the box was too big and would not fit
into the safe, but he gave me a folded
Receipt for which I paid the fees. When I received the receipt
I was delighted to see that it simply
Named Feindel. He had signed this as a private citizen,
Despite the fees charged, the consular stamp was also missing. I
Of course, he didn't make a fuss about the matter and travelled to Chefoo.
When I returned to Tientsin on 17 August after two days
arrived, Dr. Schrameier said to me: "Your cassette has caused the misfortune=
foreign enemies, he always believed that they would
ftefe, and he got up several times during the night to do so.
Mr. von Brandt has received my greetings, I know of course
not, but I almost suspect it and hope so.

Mr. von Brandt also seemed to be making a business approach

to do so occasionally when he realized that his intrigues
had been of little use to the Viceroy; namely Mrs. Eveline Detring
cleverly asked me whether I would like an invitation
from her would accept, which was approximately equal to a
Resumption of contact with the clique Mandl, Ketteler, Det=
ring and others, but I thanked him for it. (See II. Th., p. 198,
Letter to Eveline Detring.)

For the sake of curiosity, I would like to point out that in September
tember a certain Mr. Ifidor Levi had registered in Tientsin, who
on behalf of De yes Arthur Koppel in Berlin the uff en Re
often n Decauvi 1 offer Pete With the following

But it was reassured: "Ifidor Levi will certainly come,
but he has now, for reasons of opportunity, given his name

changed and is now called Hans Lindeck, he has blond hair, blue
eyes and a pleasant appearance."

Unfortunately, I was not able to make the acquaintance to make this interesting ar. 1

On my return trip to Europe I wrote to Mr. von Brandt from Yokohama, he should inform me about the use of a small Collection of natural objects that he gave me when clearing out my Tempels had taken. I also met in Poko= hama a Mr. Paffavant from Basle who wanted to visit Peking and asked me to write to Mr. von Brandt. Since I had no I wanted to tell him about my disagreements with him, so I gave him a very polite, purely formal letter of introduction au the envoy. I note this fact only because said introductory letter to Mr. von Brandt in the highest degree altered and he made it clear that I was totally crazy fhould have been, fuenced to be exploited later. j

After a 14-day stay in Japan, I continued my journey Vancouver through Canada and across the Great American Lakes to New=Dork and Europe, where I arrived on December 8th. In Europe I found out 108 for what purpose Mr. von Brandt so precisely after the addresses of my friends and relatives He had sent people there whom I still can name the most horrific reports about my condition and arranged it so that these messages could also be spread by the Foreign Office and otherwise to industrialists, bankers, etc. had to come. Herr von Brandt hal also the intrigue completely

exactly as I had already described it in my report

No. 16 of August 9th from Tientsin (see Part II p. 112) prophesies time. I had all the threads of the intrigue in my hand. December 18th, 1 requested an audience with Prince Bismarck, but was refused, just as with His Excellency the Minister of Public Works.

I then wrote on 28 February 1889, enclosing other documents and a letter to His Serene Highness the Prince von Bismarck, but received neither an answer nor my documents which I had asked for return. However, I found A few days after the dispatch of the! call an official notice in the See that in future no letters should be sent personally to the Prince

Ismarck would like to address, since such letters would not run into to fall into his hands. -

Now I wrote the book mentioned above: "An Assassination in Peking", which I wanted to submit to the Reichstag as a petition. By mid-April it was finished printing, but I neglected to its dispatch. .

That the Foreign Office took note of my documents I soon noticed that I had taken it. A gentleman friend of mine

took his consulate exam. Dr. Kayfer was the examiner and asked the examinees how he could have committed a crime in abroad, that is, any crime committed within

– 49 –

the German interest sphere, the natural response

was: "I would report the crime to the nearest consulate, there let the facts be recorded and f. wu f. w.", but Dr. Kayfer found this view to be incorrect and I have what tinkering he had to do. This time should also in the W by government a law on abroad walg uc le be presented; whether it has come to that, I don't know.

I was now without rights and therefore turned to the MPs. representatives of various parties to whom I presented my case with the question of whether they could make political progress for their party in this ma could and would make a profit from the financial capital. I would like to point out here

expressly that I have not asked any of these gentlemen for help, but merely asked for their information. The information that I received are extremely representative of our existing Legal relationships and legal views. The first of the gentlemen was a liberal MP of Semitic origin. He took in a grateful way the effort to read my ad and ga me the following information: "Your case is a difficult one; is Mr. Brandt persona grata with Prince Bismarck, you will get nowhere, You will not even be allowed to give evidence. On the other hand, Mr. von Brandt is not persona grata, so you can prove everything to him. Let me remind you here, for example, of the case of the court preacher Stöcker. If you want to know what to expect from our officials have, I recommend you to read the case of Carstenn=Lichterfelde through= e about which a brochure was recently published. He said

ann, I would like to take up the matter again later and wait, what would become of Mr. von Brandt. He also thought that I would pose a danger run, if I published the book, for several months because of Be= insult of being imprisoned.

I am quite certain that, although not a word about Jews in the entire book, this gentleman nevertheless from Brandt's young dian origin and connections and also the anti-stock exchange He appreciated the tendency of my projects. After he had shown me the Hopelessness of my cause, without the cooperation of Prince Bis= marck, even if I turn to the Reichstag, public prosecutor, judiciary= minister or courts, he concluded with a beautiful quotes, such as: "Five great souls suffer injustice."

It was not exactly this quote, but a much more beautiful one, whose wording I have unfortunately forgotten, but there is no more sublime feeling in this world, as the fur is properly pulled over the ears to let go.

Another MP from the same party said that it was

jur party not to make any capital out of the book, but possibly

I could 155 the lawyer Mr. Munckel for my case

N ß f ich our German civil service in a fo be

He said that if the situation were to be worthy of consideration, they would know exactly

and that if I were to bring complaints against it, I

would have to be prepared for perjury. "

No, friend v. Brandt. 4

Yet another Reichstag member, namely the conservative party, said to me: "If you present the book to the Reichstag hand over, yes I advise you to make a money affair out of it because someone wanted to harm you for money and harmed you seems to me to be quite clearly proven. I would recommend the book I would add that I have little to say about the other points raised therein. The danger that you will be interned exists in my opinion not." —

Another shrewd parliamentarian who is in the Centrums party, advised me to read the book quietly, as it was free, to the Reichstag, they would not intern me and

If the matter were once known in the Reichstag, then Suddenly everyone knew something. He finally said that I would to get to the bottom of the matter. . 1

An old, skilled lawyer was of the opinion that I fufould like to resume later, when Mr. von Brandt is in Europe and that he would not mind taking matters into his own hands Mr. von Brandt, he said, . anyway through the daily The manner of the correspondence and the vulnerabilities he exposed to me towards him, he has forfeited his office. |

Another lawyer had a similar view, but summed up the matter much more serious. He said, "Your matter is a cause cé- life of the first order." That Mr. von Brandt is impossible to he was also convinced, "You yourself," he said, "are through your actions Hage and through the whole case to a political personality and I ask you to pay attention to whether you It is not possible to observe whether people you did not know before have, are pushing towards you etc."

Regarding the latter point, I have, however, some made new acquaintances, but I know at most one person which I suspect are in the indicated Weife mir 5a een could have. i

Mr. von Brandt had a permanent vacation in his pocket, and he could leave China and start his vacation when he wanted. And so he had planned his departure to Europe on the November 27, 1888 in Peking. Mr. von Brandt at all embassies farewell dinners. when he suddenly at the last moment, to the astonishment of the Peking community decided to stay in Peking over the winter. (A father's note travel from Tientsin in this year was hardly feasible, since the beginning December the Peiho River freezes over and the ship communication with Shanghai is interrupted until the end of February.) .

von Brandt had undoubtedly received from his people in Europe received the news that I had not yet arrived and therefore he could not decide what course my affairs would take The terrain was jomit a and he therefore preferred to spend the winter in Beijing, far from the action. Later may he have received more favorable news from his family, because on 26, 1889, he left Tientsin for Europe, where

SE .

he arrived in June. In Berlin he first took up residence in the Kaiserhof. but after a short time he travelled south to Salzburg as they said, and he has on this trip his Viennese Jewish friends and the Mandl family. In July we were

then both together in Berlin, and here strange things happened
 Things. We had mutual friends who were on both sides
 a and a communication took place between us.
 von Brandt first cursed 5 quite excessively and said, I
 fe was crazy, suffered from delirium tremens, delusions of grandeur and persecution=
 delusion. My friends laughed at him, and then
 He cited the fact as proof that I was totally crazy.
 that, after we had already fallen out, I had to
 e had given him an introductory letter. As Mr.
 von Brandt spoke at length about Berolgunge mapn, I made him aware
 noticeable that I am the persecutor and he the persecuted
 But I did not have the slightest illusion that
 the whole family, if they dared to leave me without the
 5 would pursue grace and cause me as much harm as
 she could at any cost.
 At the Foreign Office, Brandt seemed to be in very bad ft
 A friend of mine had just told him about
 studying my papers, which were given to him for entertainment
 and with a great heavy sigh he said:
 "If you knew what kind of letters Paaſch wrote to the Foreign Office
 has let loose against me, you would be amazed, and if
 If I wasn't sitting so firmly in the saddle, I would have broken my neck long ago."
 In his correspondence with me, Mr. von Brandt had
 I was exposed as having to file a civil suit for a few hundred
 Mark could file a lawsuit against him. That was the only way
 which the Jews and the Reich Chancellor cannot deny me
 could, and so I had Mr. von Brandt summoned to court
 (see Part II of the trial documents). von Brandt tried to get out of the affair
 by writing a smooth letter (see Part II
 Page 166) to my lawyer and asked him to arbitrate
 wanted to appoint a judge. An Ir procedure violates every
 good custom among lawyers, and of course I did not want to
 because I was not interested in the money, but in
 To expose Mr. von Brandt and keep him in their hands.
 One day a long article appeared in the Nationalzeitung
 about Mr. von Brandt. A certain Bernh. Krauß, who was Jour=
 nalist and reporter for Berlin, had interviewed him,
 and I still have this newspaper article in brush print, from which
 some passages have been corrected for the newspaper print. Na=
 9 8 the article a great glorification of the Lord of
 ran
 The aforementioned Mr. Bernh. Krauß is a typical phenomenon, the
 Schmock from Freitag's Journalisten in a new edition. He wears
 always a snug white tie, is very distinctive
 convinced himself. Mr. Krauss's business is Chinese espionage.

China is his field and he visits all people who have relations with China. I had the honor to be contacted several times by Mr. Krauss to visit. Once, when I could not receive him, I asked the porter who registered me to take the address of this 9 on= to write, and I was not a little surprised at the card Behrenstraße No. 43 a. This is the address of Mr. von N or the Disconto=Gefellschaft, and since I generally 'care, To return visits, I had fun occasionally But they did not want to know Mr. Krauß; possible He had another name, but he told me two other addresses and I believe a third still mentioned. Mr. Krauß travels to the Chinese Embassy= at the Foreign Office, he visits Mr. Dernburg, Re= actor of the National=Zeitung, he also visited Mr. Jenke, General Director of the Krupp works when he is in Berlin. So again Mr. Jenke, who is in verse with the entire Jewish community of Berlin connection to vo fscheint. 3

Mr. von Brandt had meanwhile tried to get along with me. reconcile, ie he had suggestions for rapprochement made; as a condition For him it was that I should admit that I was in Peking at least

at least three or four days of my senses were not in control- There was a lot of haggling going on, but I didn't agreed to it. One day even Mr. Krauß came, against which- about which I had barely mentioned the name v. Brandt, and asked: "Is Is no reconciliation with Mr. von Brandt possible?" I simply asked him whether he was specifically commissioned by Mr. von Brandt which he denied. I then asked him not to get involved in things to interfere in matters that were none of his business.

But if one believes that Mr. von Brandt has the slightest had made an effort to refute any of the charges I had raised against him. fufts to refute, fo ft one deceives EN Rather, he philosophical reflections, freely adapted from Darwin. He spoke "of Struggle for Existence", of the wild animal that in every human being and of the predatory nature of humans, which only through education and training is suppressed. An acquaintance of mine indicated to him that I suspected that he was of Jewish descent fe. Then he suddenly became very quiet and sought the conversation to another topic. He had heard that i had written a book about him, and as a community friend assured him that I had no intention of doing the same public, he said: "He may have the intention today, but who knows whether he will do it in the end." Yes, this book has probably weighed heavily on his conscience and I have

also noticed that people elsewhere knew about this book. And if Unless all signs deceive me, one has a secret horror of me in Ober-Maulheim (ie the Berlin Jewry).

When von Brandt realized that nothing was going to happen to me was, he had a friend of mine send me c. "As long as the An= occasions remain between us, ie between Paafch and me, as well as

3 5

the Foreign Office and some acquaintances, the matter may rest on themselves. But if Paafch says anything further and enters the public, so I'll have him put in the madhouse, or admini = ftratively eliminate". on

Yes, if you have friends like Lindau and relatives like the

Samson's as legal counsel, then one believes such a threat. That there are Jewish doctors and psychiatrists there are enough people who lend a hand to any kind of villainous deed and take care of the necessary things, we have in the meantime nüse. I now prefer, however, to such people and people like Lindau's common cause make and with the same frere et cochon to fine, the way of nn to enter and brand the society that has caused incalculable damage to our fatherland and still will inflict if it is not stopped. Yes, one should believe that after such a Jewish people have tried, To put our own people aside, to ruin them morally and materially to plunder, the atrocities have been exhausted, but one deceives fich: then society threatens with a madhouse, which is still is much more terrible than a threat of death. Yes, our dear Hebrew citizens are brilliant people, they can do anything!

Now the time had come when Mr. von Brandt would have had to answer in court; that seems to him to be inconvenient was too fine, because long before the necessary time he went to Genoa, from where he left on 30 November with a steamer of the North German

Lloyd left for China. He had left and gone: "abiit, excessit, evasit, erupit!" I A on semi-official ale: that Mr. von Brandt's maturity in connection with my An= occasions and that he would probably soon take his leave However, none of the gentlemen I spoke to had had assumed the possibility that a man, after having been under such accusations, ever again to hold the post of Aa would wear. I, for my part, had other views, since I understand the whole context of Judaism with von Brandt 3c. knew.

While in Berlin, Mr. von Brandt had publicly boasted that he had made Mandl an agent for Krupp, 1955 o as he told me earlier in Peking. A gentleman who

Finance Minister Jenke had asked whether Mr. von Brandt had asked Mandl to Krupp agent, Mr. Jenke replied: "I give Ba: the assurance that we will never discuss Mandl with Brandt= fpondirt." This may be literally true, because such Things are being handled by the Jewish community and the Foreign Office ie Lindau etc. worried. The Jew Mandl is not only a friend by the Privy Legation Counsellor Rudolf Lindau, but also the election of the Jew Reichenheim, elder of the merchants in Berlin. Mandl gave gifts to both of these gentlemen, they accepted 1 To determine whether Mr. von Brandt is familiar with the company.

the IE

Krupp, I wrote on September 4, 1889, a official letter to the Krupp company, in which I asked for a business I wrote the letter in such a way that it would be more was forced to answer it in either an affirmative or negative way. I received no answer, but let Mr. Jenke know shortly afterwards question whether he had received a letter from me. Mr. Jenke, who have an extraordinarily good memory and a tüch= tiger businessman, promised not to receive this letter u have.

g In the last half of 1889 the Simfon family in Königs- berg a family day. Baptism, circumcision, engagement or the like. was the alleged reason for this family reunion. It Some fifty members were gathered and strangely Even a single German was invited. If a ischpoche of LO Jews gathered, so everyone who is Jewish= fic life knows that at such meetings the matters ties of the whole family and that plans for joint action. That one single Teuton such a family, which undoubtedly In such a gathering of "Italians" (that is what the Jews when they talk about each other and also become more polite Weife otherwise described, must have seemed strange, had without doubt its guise. The official festivities due to the latest family events that served as a cover for the meeting, ought perhaps to be trumpeted by the Teuton. He should perhaps from the splendor of the Samfon family and their virtue= ity of the outside world. But it is also possible that the and had invited him as a kind of protection against themselves, so that at least at the festival they did not start to gossip and to Jewish people so that they do not call each other by their real names where Eduard becomes Enoch, Ferdinand abe from Gustav Ibig, from Max Marcus dc. Before such scenes

Jews who have lived among Europeans for a long time, a holy Shyness, and then a stranger is brought in, whose counterpart war excludes such family intimacies.

But when I heard about this gathering and the large number of those present, I was shocked and thought: "that is the famous family that Mr. von Brandt always told me about

Counts; that is the ad 1 monetary claims to Bi power

and which he used as an excuse for his attempts at blackmail. To an Ae Society should pay tribute in order to perhaps a Bocher Samfon or of Samfon or God knows what they may all be called, or any female member of the family can indulge in luxury. or with their contributions to the synagogue or to the Alliance have free time. That is asking a little too much. Mr. von Brandt, who is a bachelor, moves into a free apartment and servants a salary of 60,000 marks per year. The Lord Reichs gerichtspräsident von Simfon is also well paid and several members of the family are in good siactasis

En

with adequate salaries and the whole family should be in good One could at least expect that the Jews are content with the well-paid positions and not nor in addition eh 1 which their status prohibits them and which are also not legitimate. But it seems the origin of the Jew thumbs on the clan, it is the old hereditary evil, which comes from the Muthal 1 oeypie plague, as Heine says, that will last forever is liable to them.

to work for the fatherland and for the community N and for the German Kaiser, that is something you can imagine everyone and is happy to do it without payment. But to work for King Itzig, whatever his name may be, whether von Simfon, von Bleichröder e tutti quanti, that strikes me as a German does not enter. . HE

The secret parallel government of this is nowhere else and I openly declare myself as a revolutionary against the fame. I would also like to point out that no German officer and no German official by his oath against this secondary government obliged; these can only be those who have taken the oath against the Gofim is worth nothing and who through fake baptism in our state positions have crept in. And I also have 770 for a legation secretary, like von Ketteler, to work so that this pay off a debt and win the grand seigneur at the racetracks can peck. |

But I also thought about how it was of me,
that I had a small notebook in my hand against von Brandt
and he was and remained the persecuted person in court. Because after
According to Jewish custom, the whole family had to regard me as their enemy.
who has brought one of their own into such a bad situation
had, so that he had to make a run for it, and his case
The whole family could be affected.
N ammenkunft in old also of the poor persecuted
Letters and Uncle Max and plans regarding his
future and thought of mine, about that can
for me not the slightest two exist.

That the 5th of Samfon, who, by the way,
Ingt, with a native of Warsaw, the accomplice
It is also beyond doubt that this was one of Mr. von Brandt's most intimate plans.
That Mr. von Brandt commissioned people 1 in Europe possible
to collect a lot of unfavorable material against this, I also
already indicated. The harvest in this respect will probably be very poor
But when I think about the fact that the representatives
of Mr. von Brandt, which, as we have already seen in the court case,
see, the family of Samfon, it should be time to
to open a public campaign of slander against me, then
can be a well-known form of defense of the Jews
a secret u " Because, by Brandt
I also attack his family, who then
must take defensive measures. |

ur

The Talmud itself offers the following explanation for the Seder:
doroth p. 258 an excellent illustration. It says here that Rabbi
Jofi, when he was on his way home one day after
If someone had made a good deal somewhere,
ande was attacked by 400 robbers. Without help from heaven
the holy man was lost! He fell to his knees and was
upon his prayer from above with a miraculous power=
Kftattet, by means of which he creates from his body a fo ftrong (un=
[namely] aroma that made the 400 robbers faint=
ftumbled and the smell spread over the ocean, so that he
was noticeable on all ships.

Considering how numerous the Samson family alone is,
what position, power, influence it possesses in Germany, furthermore that
with her the Jewish banker clique of Warsaw and others is allied,

and fed to the Lindaus and similar people from abroad
Office in the closest relationships feared; that they further in the Jewish
press has all possible influence, through which all the floodgates
can be opened to slander: then it will be clear,
that one must arm oneself with courage in order to be an outstanding member
member of this clique, where "All for one, and one for
All" stands to attack.

The trial gives us an insight into the views of these people
of the painter Graef and his models (see Part IV, p. 94 ff.)
teaching. Here we find the accused painter Graef, surrounded
by his sympathetic friends, Justice Counselor Simson, Paul
Lindau, Fritz Dernburg, Julius Leffing, Karl Frentzel; also
a whole series of Jews, all of whom were involved in the filth
this trial and the acquittal of the accused as
celebrate an achievement of their legal views and their morals.
From Glagau's brilliant description, which also tells us about the
Protest of the Berlin artists reported, who thank God against such
views, we will see the difference between them
far and Aryan way of thinking and morality so clearly before the eyes
We also see that almost all of the Jews in
Berlin sympathized with Messrs. Simson, Lindau and Leffing, and
one wonders whether one can make any subtle distinctions
8 the Jews who in one way or another have

I don't believe it, I don't know that the
brothers or relatives of these people have a different way of thinking and outlook
But it bothers us that the Jew's nature
cannot change, no matter what level of education he possesses
and what offices he holds.

The sudden departure of Mr. von Brandt to China
to have been solely to blame, I cannot take credit for that
meffing. Mr. von Brandt was also from other people, quite
independently of me, by three active officers
ficers who worked in China as instructors at the end in Tientsin

They had at least one and.
lungs and one of these gentlemen was even, at the risk

u

to ruin his entire career before the expiration of his contract
from China to Europe due to Mr. von Brandt at the
authorities, i.e. General Staff, Ministry of War,
Foreign Office. This officer was in China to
to take away his credibility, from the German ambassador
ficiency also declared mentally ill. Whether this is
I do not know whether he also wrote to Berlin. Furthermore,
Mr. von Brandt under the indictment of two other officers, who
had previously been in China. The subject of these charges is

I don't know exactly, but none of the gentlemen seems to have succeeded too subtle to penetrate with subtle complaints against von Brandt; but how Nor has one given the officers, the gentlemen von Brandt, have done something to harm. One has all of us unscathed despite the ambassador's accusations. The probability is that Mr. von Brandt will not be in the. The aim was to refute the accusations.

When Mr. von Brandt was in Berlin, despite the protests against him, pending accusations before His Majesty the Emperor in audience received and invited to dinner in Potsdam. He is also said to have met His Majesty made a gift that was accepted. (This damned femific gifts!) This event is immediately after China reports and will make a certain impression. I fear that the same will be true for German country could not have been more favorable. I myself am in Berlin and been asked by officers who did not have the slightest had any idea that I had been friends with Mr. von Brandt was what kind of ambassador we actually had in China, against whom serious charges were brought by several officers and who nevertheless returned to his post. I want seem that this case was the case with the officers of the General Staff, the Ministry of War, the War Academy justified surprise and that these facts have not been explained. I think I can solve the riddle, it is very simple. Mr. von Brandt is a secret Jew, a member of the Jewry, agent of Jewry, and, like all spiritual and socially outstanding Jew in the world, member of the Alliance israélite universelle. Whoever the organization and the Anyone who knows the work of the Alliance can easily explain how important member Mr. von Brandt, who is responsible for all crimes and is capable of committing any dishonorable and shameless act. No hair of such a person may be harmed; it must be spared. the same could still perform many heroic deeds in the Fnkereffe Is-rae 8h habs de

I have already highlighted the fact that the gentlemen of Ketteler and von Hanneken, both of whom retired from the army have to take, only then re-entered into the same were after they had met with the international Jewthum had allied themselves.

In connection with this I would like to tell a small incident,

2.6

which shows what an effect the impunity of such people on a third party. At the beginning of 1890, a Berlin Profeffor sent a captain to me who would like to have a position in China, namely as a military instructor. He

wanted to ask me for my opinion and information and he told me that he had resigned from the army because of a small quarrel with a superior. His stuff: He had brought wife with him, he said that they were the very best, he wanted to present it. I advised the gentleman not to go to China and told him that I had accused the ambassador of serious crimes accused, but the latter returned to his post without punishment had returned and nothing had happened to me. If he not believe these monstrous things and he further distances himself from the truth of my claims, I referred him to active officers to whom I wanted to introduce him, and that these men were in a similar situation as me. What his wife is concerned, he does not want to take too much credit for it do if he should ever come to China. With the current conditions in our civil service, he would have better prospects to move forward if he could provide evidence that he somehow passed away; his quality as a decent human being could only harm him. I fear that the Lord has unconditional faith. He made gloomy observations about and said, what else is there to do left to become a Social Democrat, these are the only People who still count for something today.

1 Now go back a little and bring out some notes from the Tienzi newspaper The Chinese Times:

"The Chinese Times No. 130, April 27, 1889.

His Excellency Mr. von Brandt left yesterday with the Tampfer Kowfshing Tientfin en route to Europe.

—

The Chinese Times No. 131, May 4, 1880.

The sad and sudden death of the Italian ambassador Ferdinand de Luca, who met in Shanghai on April 29, called here some dismay (Mr. von Brandt had visited Mr. de Luca on the day of his death The death of de Luca occurred a few hours after v. Brandt's visit to his house).

— and mn...

The Chinese Times No. 132, May 11, 1889.

We hear with great sadness of the death of His Excellency Chioda Saburo. Japanese ambassador in Peking. Date of death missing; the death of Mr. Shioda

was not commented on except for the above brief note in the Tientiin newspaper).

The Chinese Times No. 158, November 9, 1889.

There is great concern in Chefoo about the whereabouts of Colin 5 Deputy Customs Director. Mr. Jamieson arrived from Aiungchow just last week in Hainan to temporarily meet Mr. Edgard. About five days According to his information he was found walking on the beach and since then Nothing has been heard from him since then. A broken walking stick, which

== 350:

have been found near the neighboring hills, and It is assumed that he died there.

The following numbers 159 162 then tell us that on 19 November the body of Mr. Jamieson i and was buried on the 22nd, and further, that there is an unexplained mystery surrounding this whole matter.

— u

To the above news comes the one from the sudden Death of Marquis Tfeng in Peking, who was known to be the head of the future Railways in China, and whose death was reported to have been directing a nervousness.

— —

By the above messages I do not intend to insinuate that perhaps in China there are forces of which the outside world has little idea. Whether through these different deaths will ever be made clear, remains to be seen remain, but they are well suited for some considerations, if you know what is happening in Beijing, if you know which people feases are and were in office there. I refer here very specifically especially on the biography of Monsieur Constans (see Part IV p. 146 ff.,. That Mr. Conftans is a friend of Mr. von Brandt I have already highlighted this elsewhere.

Now I come to the diplomatic successes which the policy of Mr. von Brandt. On 30 September Mr. von Brandt left Genoa for China, towards the end of No= In August he was back in Peking. On December 2nd in the Chinese newspaper Shih=Pao published in Tianjin a Memorandum to the Emperor of China. The English newspaper Chinese

Times reports on the same on December 7th as follows:

"Chi Nui, a frank censor, whose sharp memoranda we Europeans have often had the opportunity to read, has just submitted a new memorandum to the throne in which he declared in destructive expressions the behavior of a foreigner, a Russian Named Myres and a German named Mandl. The Cenfor argues that agents who have cannons and ships fitch the Chinese government has become a habit, I am trying to obtain an illegal side income, and cites as an example the former ambassadors in Berlin, Li Fung Pao and Hfü Cheng Chü. |

Fortunately, he continues, the keen eye of his beloved lie down on you, large and all-pervading, and by doing so, who have been guilty of dishonesty, according to If you punish them with a fine, you may be able to stop the problem for a while. But. while many out of self-respect and in their own interest act wisely, there are still those whose deceptive It is difficult to escape from the ruthless machinations.

Foreigners maintain contracts with the Chinese government as extremely profitable business, and this is how it happens,

that at several ports a number of unscrupulous characters of different nationalities, through whose Intrigues of our officials, if they do not act with the utmost caution delts, can easily be misled. . .

Author of the memorandum has from a foreigner Russian nationality, who in 188 in association with a Dele= the Peking garrison, called Tung Mung Lan, a large number of unusable rifles in Japan and thereby caused a 15 profit. The fraud was discovered at Jeiten discovered and Tung Mung Lau punished and deported, while Myrcs, who is outside our jurisdiction, went unpunished. – Ittt, when he hears that we want to build railways, he starts again to move and seeks through all kinds of tricks a share in to secure the loot. f .

Then there is a German, named Mandl, 1 is in Tentfin, who last year was the head of a company and an order for 30,000 pounds of powder for the needs of the northern fleet squadron, from which he made a profit of several ten thousand taels. But when the powder was an officer appointed by the Womiral Ting was examined, I ft turned out to be unusable, and we escaped the suffered.

You will now find yourself in the process of rebuilding our fleet

otganifiren, we have orders for a lot of things to
heal, but if we seek the help of such foreigners as the
mentioned, which provides us with the greatest (doubtlessness:
deceive, yes we must fear that our national Juteresen
suffer damage as a result. Moreover, this foreign lie is tough and
tireless. If they fail in one thing, they take action
They will not rest until they have fulfilled their greedy plans.

it have. – .

If the high authorities of the Maritime Provinces do not properly
then they can easily fall into the hands of these people, and
This could have the worst consequences. 8 –

The author of the memorandum therefore asks His Majesty that
The Tiung=li= amen (Foreign Office) was given the order,
to request the Russian as well as the German (Hefandten) to
Confulate of these nations at all treaty ports,
by the said strangers, wherever they may be,
and furthermore, that all Chinese Governors-General
= Ouderneuer be forbidden to contact mentioned persons in any
di 10 business relationships. This would be in the Inter.

The number of opportunities for use should be a maximum of 3.
N About the personalities of Mr. Mandl and Myres
1 reported elsewhere, but I would like to refer in particular to
dice del. p. 184. I have written about the said powder contract at the beginning
ffes Article 58 40 and we see that Mr. von Brandt the=

Hanne asked. A to Z and a chain of dirt 9

Fe.

We find further information in Part II, p. 202/203, and from the
From what has been said there, it is clear that the contract
was not correct that the censor was generally right
We now read the following in the Chinese Times:

Tho Chinese Times No. 168, Tientfin, January 18, 1890.

Six months ago we printed from the Shi-Pao the memorandum of a censor
Chi=Yul to the Imperial Throne, in which he describes the actions of two foreign =
linge denounced, whereupon then really on 1 0 of the Kaiser through the Tfung li-
Ladies (Foreign Office) sent requests to all provincial authorities to
warned about the fraudsters. Since one of the accused companies was a German one,
This matter was quickly taken up by the German landowner,

who demanded an investigation into the accusations. The result was a complete complete collapse of the censor's view, the complete closure of the company Mandl & Co of the accusations, and that the Foreign Office issued its decrees to the . – This incident shows us the weakest point of censorship and we see with what little knowledge and in what way insignificant information, the censors are inclined to act and the government to support them. In this case, the censor appears to be the victim of the intrigue a comprador. He was poorly educated and mixed Truth with fiction and when examined more closely, little of substance remained. Since an actual imperial edict has appeared on this matter, it is to assume that the frivolous censor had to suffer inconveniences because of this. –

The i also appears in not very brilliant colors. Deep, sluggish body, which never leads to real activity, but used all their power only to justify the actions of others criticizes, once it gets moving, it comes along like an avalanche.

Humiliating for the gentlemen was the piece of Christmas cake, which has been given to them by the German Embassy, but it will be good if you can digest it, which, by the way, remains doubtful.

Finally, we note with great satisfaction that the foreign ambassadors still have a position of power in petition politics, and that if they have a clear Present the case without quibbling and without falling to one's knees, then you are always sure to win.

– –

Mr. von Brandt has nevertheless taken the Jew Mandl from taken, although he is not a German and although he is quite knew that he was representing a bad cause. Mandl's company dings registered in the German Consulate and also remote partner German. It is called Lieder and is associated with a born Married to Rosenbaum: they should pretend not to be Jews.

I know the sangen powder contract from A to Z, how and where it came about and what is the reason for it von Brandt has thus defeated the Chinese by great applause and the by the fact that the corpus delicti F was still present, in which It should be noted that the Chinese Times the company Jardine Matheson & Co., in which Mr. Mandl is still employed and works with von Brandt. That the * Mr. von Brandt, for lack of evidence, have to give in, it is conceivable that the race of

the importance of Mr. Mandl's cause should have been convinced, 10 + mille I know this very well. Just think of it

' n under the German flag and those with

– 62 –

Around January or February 1890, all newspapers reported a dispatch with the following content: "The Chinese government has all their plans regarding railway construction, for the time being because diplomatic activities." This was also a diplomatic success of Mr. von Brandt.

If you want to know what the much-mentioned Mr. Mandl looks like, I can say that he is the type of a Galician Jew. I saw him in Tienzin in dirty and torn clothes: run, but I hear that in Shanghai and Europe he He is supposed to stand out from the crowd and dress conspicuously. One cannot deny Mr. Mandl a certain originality, but it has a specifically semitic character. For example, he said: to an acquaintance of mine: "When people say that I am a Schuft, you are not telling me anything new, I know that myself exactly, and I don't care, but money, money I want and also wear an Order Star "on the brood". The is the friend of Mr. von Brandt and Rudolf Lindau. Elsewhere I say that Mandl is always on the move, I have to make off with it, i.e. as soon as he has a lazy He tells this to anyone who wants to hear it. If Mr. Mandl is forced, then Mr. v. Brandt can with the help of our other Jewish-German consular officials, in the world, so that he can continue his fine swindles elsewhere Mandl lived in Tienzin for a time with Mr. von Hannecken. One day, when he went out, the gentlemen von Hannecken found and v. Ketteler, that a small travel bag from Mandl was very heavy Curious as they were, they opened the suitcase and found in it some Vackfsteine. It seems that Mr. Mandl has fine cardboard-bucket. This story is guaranteed to me as true; the The gentlemen who met him are said to have told it themselves. . f

It was a few months ago when a gentleman in Berlin asked me: "Tell me for heaven's sake, how can a company like Krupp, make such a Jew as Mandl their representative in China? He said: "The only explanation I can find for this is that he von Brandt and possibly also Mr. Jenke's fine tribe is fen find." – "And the latter sits in the State Council! Does the Foreign Office about these stories?" I replied: "The ei very well informed about it, Mandl and Lindau are closely

under" – .

1 But what does the Caprivi say about it?" I shrugged my and asked: "He will hardly know what is in this

is going on."

In the R aer Düna=Zeitung of June 1890 we read:

"The Chinese government has approached our
closely with the request to send her Russian General Staff officers

prove themselves as teachers for the fecurities that have existed for a few years and
khanner teorganifiete and expanded war school in Tientfin, at the
i mainly German officers worked, whose contracts were now
en."

– 63 –

What wonder if the Chinese, after their previous experiences,
don't want to know anything about Germans anymore. 1 IV, Part p. 229.)

Have you seen Daudet's play "La lutte pour la vie" (The
Struggle for Existence) ee or read? He has several per=

95 are the products of our present civilization. Paul Astier
and Chemincau live in France as well as in Germany. In
In this case they are called von Brandt and von Ketteler.

Mr. von Ketteler, who soon after one had torn thousand tons.
possessed a lot of money, claimed an inheritance of thirty thousand thalers
to have done so, although he had assured me earlier that he unfortunately
would no longer have to inherit from anyone. . a

Mr. von der Golz wrote in 1889 to a community member
dear friend: I no longer regret that I went to China.

I am happy because now I get 7200 Marks salary, which I
would probably never have reached Germany!

From all that has been said above, the simple fact emerges,
that Mr. von Brandt, under the mask of friendship,
German embassy and presented me there the results of my research
work in order to exploit it himself. He tried
to get me out of the way after he had convinced himself that
I was not to be won over to dishonest plans. How far he himself
in the latter respect was sincere towards me, must be left open
remain, also to what extent he is in connection with his family and
Bankers in Europe. My conviction is that a
such a connection existed and that Mr. von Brandt
some of his officials and some other people against their
Will drawn into the shameful intrigue and into his guilt
